

NATURAL INGENUITY

Sacred Patterns, Sustainable Paths

Talawakelle Tea Estates PLC
Integrated Annual Report 2024/25

Natural Ingenuity

Hieroglyphics are the ancient Egyptian writing system made of symbols and pictures. They were used for religious texts, monuments, and royal records. Some symbols stood for sounds, others for words or ideas. Lost for centuries, they were decoded using the Rosetta Stone in the 1800s.

Natural Ingenuity

Sacred Patterns, Sustainable Paths

Nature has long been revered as a source of wisdom and resilience. In ancient Egypt, Gods like Geb, Shu, and Hapi embodied the ingenuity and balance found in the natural world and at Talawakelle Tea Estates, we draw inspiration from the same elemental forces such as adaptability, renewal, and harmony.

Just as Egyptian deities were portrayed with features of animals and nature, and encouraged growth and progress in line with the natural movements of the world, we look to nature's intricate details for guidance. It is this natural ingenuity that shapes how we cultivate, conserve, and care.

We adapt our farming practices to regenerate the land, conserve water, and protect biodiversity. Like the Nile sustained life in Egypt, we believe our sustainable practices must nourish the present and secure the future. Our workforce, empowered with knowledge and tools, is central to this balance as we bridge tradition with progress in all we do.

With nature and history as our guide, we continue to innovate, adapt, and thrive. This is natural ingenuity.

Earth, Air, Water, Sun, Spirit

The Divine Forces of Egypt

In Egyptian mythology, the world was shaped by five elemental gods. Geb, the Earth god, lay beneath all life, his green skin bringing fertility. Shu, god of Air, held the sky above him, creating space for life to thrive. Hapi, god of the Nile, nourished the land with his life-giving floods. Above all, Ra, the sun god, journeyed across the sky, bringing light and order. At the center stood Amun, the invisible force and king of the gods, embodying hidden power and creation. Together, they formed the sacred balance of nature and divinity.

Geb

*The Fertile Earth Beneath
Our Feet*

From soil to sprout, our roots run deep in the richness of the earth nurturing life and prosperity.

Shu

*The Breath Between Earth
and Sky*

Balance and harmony guide our practices, as Shu balanced the heavens, with utmost care.

Hapi
The Life-Giver of Waters

Like Hapi's sacred floods, our water stewardship sustains growth, community, and continuity.

Ra
Illuminating the Path to Growth

With the energy of the sun god, we cultivate with clarity and purpose, harnessing light to power tomorrow.

Amun
The Hidden Force of Regeneration

Invisible yet powerful, our innovations echo Amun's spirit as we renew the land through sustainable change.

Vision

To be the most admired
Plantation Company in Sri Lanka

Positive Change Through Growth and Innovation

Upholding best business practices, we are open to new ideas to stay ahead of the evolving market dynamics. We give precedence and allocate our resources strategically to expand our outreach, offer enhanced products and blend modernity with conventional tea production practices.

- Precision Agriculture
- Water Conservation
- Renewable Energy
- Eco-friendly Processes

Environment stewardship, Conservation & Climate Action

Advocating environmental stewardship, we prioritise responsible resource management, waste reduction and environmental conservation.

- Circular Economy
- Water Conservation
- Reforestation
- Wildlife Conservation
- Energy Management
- Renewable Energy
- Carbon Footprint

Community Engagement and Local Development

Creating impactful and shared value, we stand committed to support our employees, bought-leaf suppliers and communities residing in our estates—empowering them, ensuring their wellbeing and uplifting their quality of life, through our key human resources and social initiatives.

- Fair Trade
- Estate Workforce Engagement
- Best Labour Practices
- Skill-Building Opportunities
- Access to Healthcare Facilities
- Social Infrastructure

Beyond Profit: Conscious and Responsible Future

Going beyond mere short-term financial gains, we stand committed to integrate ethical and sustainable business practices into our strategic delivery for long-term impact.

- Environmental Responsibility
- Social Responsibility
- Good Governance

Mission

Manage the plantations to enhance
Quality of life of all employees. Produce
and market quality teas that delight our
customers. Drive sustainable growth.
Enhance shareholder value.

Our Purpose

Brewing
a Better
Future

Business Philosophy

- Manufacturing Quality Tea that fetch Premium Prices
- Increasing Shareholder Value
- The Spirit of Entrepreneurship
- Making Profit without loss of Honour
- Motivating and Training our people to reach their full potential
- Rewarding Performance
- Being a Learning Organisation and continuously improving
- Building mutually beneficial long term relationships with our Customers and Suppliers
- Positively contributing to the conservation of the environment

About the Report

GRI 2-2, 3

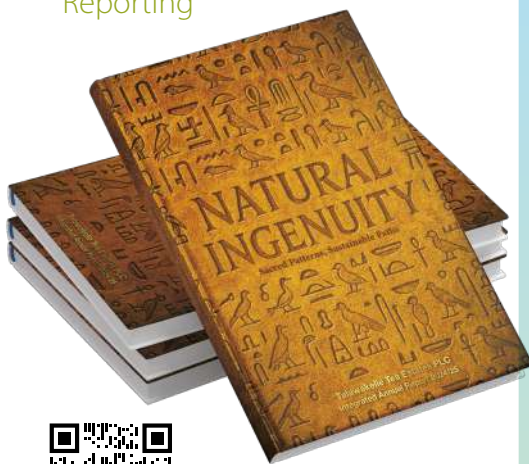

Report Profile

This Integrated Annual Report provides a comprehensive and balanced overview of the financial and non-financial performance of Talawakelle Tea Estates PLC (TTE), underscoring our commitment to long-term value creation. It captures the strategic actions undertaken to deliver sustainable growth, while aligning with the evolving priorities of our stakeholders striking a balance between present performance and future potential.

Having commemorated a decade of reporting excellence with our previous report, we have set out to transform reporting norms in Sri Lanka with our current report. This report, which marks a new chapter of reporting excellence for TTE, seeks to show that transparency, accountability, governance, and sustainability are not merely guiding principles, but serve as key tenets within our operational fabric and strategic decision-making architecture. Through this report, we aim to demonstrate how these values are integrated into every aspect of our business, shaping outcomes that are responsible, resilient, and forward-looking.

11 Years in the Making

Showcasing Our Commitment to Excellence in Integrated Reporting

Refer: www.talawakelleteas.com
for the current and the past integrated annual reports.

Key Improvements captured in the FY 2024/25

Enhanced Transparency

At TTE, we have deepened the connections between our stakeholder engagements, material topic assessments and strategic resource allocations, ensuring every decision is traceable and every risk visible. By integrating quantitative performance data alongside narrative insights, we present a truly holistic view of our operations bringing clarity to our supply-chain decisions, environmental programmes and community investments.

Strengthened Accountability

Our revamped Risk Report now captures not only financial and operational exposures but also climate-related and broader sustainability opportunities, backed by limited external assurance. For the first time, we have expanded our scope beyond chronic and acute climate risks (CRRO) to include Social, Regulatory and Opportunity dimensions (SRRO), reinforcing our commitment to proactive risk management and outcome-driven governance.

Reinforced Governance

A clear declaration from our Chairman underscores TTE's unwavering adherence to best-practice governance, rigorous regulatory compliance and uncompromising ethical conduct. Enhanced internal controls and refreshed board oversight mechanisms ensure that integrity remains the cornerstone of every aspect of our business.

Elevated Sustainability

This year marks our full alignment with SLFRS S1 and S2 sustainability disclosure standards, underpinned by external limited assurance over key metrics and methodologies. We have adopted a materiality led approach prioritizing disclosures where they drive the greatest long-term value for our plantation, our people and the wider ecosystem.

Integrated Reporting Process at TTE

GRI 2-5

Assurance

All sections of this Integrated Report covering both financial and non-financial information, along with the accompanying narrative and supporting qualitative and quantitative data, have been reviewed by the Board Audit Committee. This review was conducted to provide the Board with assurance on the accuracy, consistency, and completeness of the report's content.

Independent assurance on the financial statements for the year ended 31 March 2025 has been provided by TTE's external auditors, page 250.

Independent limited assurance has also been obtained for:

- the Integrated Report for FY 2024/25 (pages 194 to 195) ☒ Independent Assurance
- the SLFRS S1 & S2 sustainability-related financial disclosures (pages 79 to 80) ☒ Independent Assurance
- the ESG consolidated statement (pages 239 to 240) ☒ Independent Assurance

This assurance confirms alignment with the GRI Universal Standards (In Accordance) and the GRI 13: Agriculture, Aquaculture and Fishing Sector Standard (2022).

Additionally, our GHG-emission quantification has been subject to external verification.

GRI 2-4

Forward-Looking Statements

This report includes, where appropriate, forward-looking statements that reflect the views, intentions, and strategic direction of the TTE Board and management at the time of publication. However, in light of the dynamic and often unpredictable nature of the operating environment, actual results or future actions may differ from those expressed or implied herein due to unforeseen circumstances or external developments. Accordingly, TTE assumes no obligation to publicly update or revise any forward-looking statements after the publication of this report. Readers are therefore encouraged to interpret such statements with care and avoid placing undue reliance on them.

The Board also confirms that there are no restatements relating to previously published annual reports of Talawakelle Tea Estates PLC.

Board Responsibility Statement

The TTE Board takes full responsibility for the completeness, accuracy, and integrity of this Integrated Annual Report. The Board confirms that it has collectively reviewed the report's content, with the support of assurance provided by both internal and external parties. Based on this review, the Board is satisfied that the Integrated Report for the FY 2024/25 effectively captures all material matters that influence TTE's ability to create, preserve, and deliver value to its stakeholders over the short, medium, and long term.

ESG Report
2024/25

GHG Report
2024/25

Year at a Glance

For the seventh consecutive year, we are ranked as the number one Regional Plantation Company in Sri Lanka. This accomplishment is further underscored by maintaining the number one position in both High Grown and Low Grown operating regions.

In the history of Global Performance Awards, we are proud to be the 1st plantation company in the World to win the World Class Award in GPEA 2024.

TEATEL launched Envelope Tea Bag range, enhancing convenience and freshness while strengthening premium product portfolio for local and global markets.

The newly inaugurated Kiruwanaganga Tea Factory showcases our commitment to sustainability and innovation, featuring AI-powered colour separators, semi-automated processing and a green-certified building design.

TTE PLC and WNPS launched a 13 km forest corridor project, planting 50,000 native trees across 12 estates, promoting biodiversity, community engagement and sustainable ecosystem restoration in the central highlands.

Securing First Place in the Best Tea Harvester competition for the third consecutive year highlights the outstanding dedication and skill of our field teams, underscoring our commitment to sustainable tea excellence.

Ranked as Sri Lanka's 2nd most awarded entity by LMD, Talawakelle Tea Estates PLC continues to demonstrate industry-leading excellence and performance.

Our plantation has adopted drone technology for chemical spraying, boosting efficiency and safety. This advancement ensures uniform application, reduces waste, and enables operations in challenging conditions, signifying a move towards precision agriculture.

We pledge net-zero GHG emissions by FY2050, validated by SBTi targets. This includes reducing emissions 42% by FY2030 and 90% by FY2050 across all scopes, with a no-deforestation commitment by 2025.

World Vision and Tea Leaf Trust's cookstove initiative promotes ESG impact by reducing carbon emissions, improving community health through cleaner indoor air and fostering sustainable practices using eco-friendly resources, empowering communities and supporting environmental, social and governance goals.

Chairman's Message

GRI 2-22

Our largest investment to date – the Kiruwanaganga factory is set to play a defining role in TTE's next phase of growth by cementing our position as a leader in quality, innovation, and sustainable tea manufacturing.

Scan for audio
version

In a year characterised by the confluence of complex challenges, Talawakelle Tea Estates PLC demonstrated its characteristic resilience and spirit to maintain its benchmark position in the country's plantation industry, delivering exceptional financial, operational and sustainability performance. On behalf of the Board, I am pleased to present the 11th Integrated Annual Report and the Audited Financial Statements of TTE for the financial year ended 31st March 2025.

Macroeconomic Developments

Following the economic crisis in 2022 Sri Lanka continues to regain its footing, resuming its journey towards growth and stability. Critical structural and policy reforms coupled with the support of the IMF and the conclusion of external debt restructuring have paved the way for economic stability. Accordingly, Sri Lanka recorded four consecutive quarters of growth in 2024, while inflation fell sharply, reaching negative territory by the end of 2024. The rebound in external inflows including a resurgence in worker remittances and the recovery in tourism earnings led to improvements in the external sector, which contributed to a healthier balance of

payments and easing pressure on the currency. Resultantly, the Sri Lankan Rupee appreciated nearly 10% during 2024.

Within this economic resurgence, the performance of the tea industry was particularly commendable. National tea production rose on the back of improved agro-climatic conditions in key growing regions, while strong global demand for Ceylon Tea from all key source markets saw Sri Lanka's tea export volumes posting strong growth. However, the industry continued to be hampered by persistent structural challenges, most notably the wage increase implemented in September 2024, which exerted severe pressure on already tight margins. Nonetheless, improved productivity, better estate management practices, and steady demand from key export markets helped offset these pressures, enabling the industry to post higher export earnings, a commendable achievement given the LKR appreciation.

Financial Performance

Against the backdrop of broader macroeconomic recovery, TTE demonstrated improvements in its triple bottom line performance, continuing to deliver on its stakeholder commitments.

The Company recorded Revenue of Rs. 7,805 million during the year, with tea from all elevations commanding record prices at the Colombo Tea Auction. Rubber and Cinnamon also contributed positively to the topline, emphasising the importance of crop diversification. Additionally, favourable rainfall and enhanced operational efficiency enabled our hydropower operations to deliver an impressive 36 % increase in Revenue.

Profit Before Tax stood at Rs. 1,770.5 million for the financial year 2024/25, a result I consider particularly commendable, given the Rs.

270 million increase in wage costs following the government-mandated wage hike in September 2024. Meanwhile at Rs. 1,234.8 million, Profit After Tax was broadly consistent with the 5-year trend average.

Reinforcing Core Competencies

At TTE, we have always operated with the firm conviction that strengthening our core competencies is essential to sustainable growth and long-term success. It is this fundamental belief that set in motion plans for the construction of a state-of-the-art tea

factory at Kiruwanaganga Estate. Nearly two years in the making, this world-class facility spans approximately 38,700 square feet and brings together advanced technologies and sustainable practices to deliver exceptional efficiency, quality, and environmental responsibility. The single largest investment ever undertaken by TTE, the Kiruwanaganga factory was commissioned in March 2025 and will remain a key catalyst in our vision to transform the future of tea manufacturing in Sri Lanka.

Chairman's Message

"The implementation of SLFRS S1 and S2 remained a key focus area for the Board and the Board Audit Committee during the year. Having adopted a climate-first approach to reporting in the previous year, TTE has fully aligned its sustainability-related financial disclosures with SLFRS S1 and S2."

Leading by Example in ESG Advocacy

Emboldened by the belief that true leadership is defined by visible action on all fronts, we have over the years accelerated our investments towards climate action and social impact. Attesting to this long-standing commitment, TTE achieved several key ESG milestones during the year. Our near-term, long-term, and Net-Zero 2050 targets, including FLAG emissions were officially re-verified by the Science Based Targets initiative (SBTi), marking a proud and historic moment that places TTE as the world's first plantation Company, and Sri Lanka's first organisation, to have its SBTi targets re-verified.

Our flagship Home for Every Plantation Worker programme continues to gather momentum, creating meaningful impact on the ground, with 331,832 beneficiaries supported to-date.

It is with immense pride that I note our sustainability performance gaining international visibility. In recognition of our continued leadership in the sustainability sphere, TTE was appointed a Patron Member of the UN Global Compact Sri Lanka Network and selected to serve on its Climate Emergency Taskforce. Moreover, the 12% reduction in our Scope 1 and 2 emissions, 2% reduction in Scope 3 emissions, 5.86% improvement in renewable energy use, and the 15% expansion in community investment, was featured at the UNGC's Forward Faster Now – Asia & Oceania event.

Shareholder Value

As always, we remained firmly committed to upholding our strong track record of delivering shareholder value through the consistent distribution of dividends, even amidst challenging operating conditions. This year, we maintained our consistent dividend payout track record by distributing dividends of Rs. 339 million to our shareholders.

Governance Matters

As part of the Hayleys Group, TTE benefits from the robust governance frameworks, practices and culture of the Group. As in the past, the Board continued its active involvement in governance matters, with considerable focus on evaluating the resilience of TTE's strategy and risk management frameworks vis-a-vis the increasingly complex operating environment.

The potential financial implications of the wage hike was a key focal point in Board discussions this past year.

At the same time the Board and the Board Committees guided the management in disseminating and implementing the necessary provisions outlined under section 9 of the new CSE listing rules on corporate governance. I wish to confirm that all stipulated requirements including Sub-Committee reconstitutions and publication of policies were implemented in line with the mandated timelines.

The implementation of SLFRS S1 and S2 remained a key focus area for the Board and the Board Audit Committee during the year. Having adopted a climate-first approach to reporting in the previous year, TTE has fully aligned its sustainability-related financial disclosures with SLFRS S1 and S2. With a comprehensive framework of internal controls, risk management processes, and integrated reporting systems already in place, TTE also voluntarily sought independent assurance for all SLFRS S1 & S2 disclosures in the current year, underscoring the commitment to early adoption of best practices.

Board Changes

We bid farewell to Mr. Dilhan Fernando and Mr. M.H. Jamaldeen, who stepped down from the Board with effect from 01st August 2024 and 14th November 2024 respectively, as well as Ms. M.D.A. Perera and Mr. A.M.J. Fernando who resigned on 24th December 2024. On behalf of the Board, I wish to place on record our sincere appreciation for their valuable contributions over the years. Each of them brought a unique perspective and depth of expertise to the Board, and their service has been invaluable in steering TTE forward.

We also welcomed three new Directors to the Board; Mr. Darshana Gunasekera and Ms. Harshani Randiligama were appointed with effect from 27th December 2024 and Mr. Milinda Hewagama from 05th May 2025.

Mr. Darshana Gunasekera joins us with a strong track record in finance, governance and strategic transformation, having held several senior leadership roles in both the plantation and food sectors.

Ms. Harshani Randiligama brings to the Board multi-faceted expertise underpinned by her extensive career in local and international companies.

Mr. Milinda Hewagama who serves as Group Chief Financial Officer of the Hayleys Group has extensive experience in financial reporting, ESG, tax, risk, safety and corporate secretarial functions.

Together, these appointments ensure the Board remains equipped with the right balance of experience, knowledge, and diversity to accelerate TTE's strategic aspirations in the years ahead.

Outlook and Prospects

Looking ahead, while the tea industry will continue to navigate complex structural challenges, I believe TTE is well-positioned to adapt, respond, and thrive.

My belief and confidence stems from TTE's solid foundation, unparalleled talent and core strengths that have enabled us to consistently produce some of the finest teas in Sri Lanka. Building on this strong base, our largest investment to date - the Kiruwanaganga factory is set to play a defining role in TTE's next phase of growth by cementing our position as a leader in quality, innovation, and sustainable tea manufacturing.

We will thus move forward with a keen sense of purpose to contribute meaningfully to the resurgence of Sri Lanka's tea industry in the years ahead.

Acknowledgements

As we conclude another eventful year, TTE stands stronger and more resilient than ever before, and that is all thanks to the unwavering dedication of our teams and the support of our stakeholders. On that note, I wish to extend my heartfelt appreciation to our Managing Director, Dr Roshan Rajadurai, Chief Executive Officer, Mr. Senaka Alawattegama, the Corporate and Executive Management Teams, as well as our Estate Teams, whose steadfast commitment and perseverance have been the driving force behind our achievements.

I would also like to express my sincere gratitude to my colleagues on the Board for their guidance and foresight, which have been instrumental in navigating a constantly evolving landscape.

To our shareholders, customers, and business partners, thank you for your continued trust and belief in our purpose. It is this collective strength that gives us confidence and inspires us to keep raising the bar, as we remain firmly focused on seizing new opportunities for long-term value creation for all those connected to TTE.

Mohan Pandithage

Chairman

Talawakelle Tea Estates PLC

05th May 2025

Managing Director's Review

Our performance at the Colombo Tea Auction in 2024 stands as an affirmation of TTE's unwavering commitment to quality. At a time when the industry faced considerable headwinds, TTE recorded premiums of Rs. 185.34 per above the national average in High-Grown Teas and Rs. 179.08 per kg in Low-Grown.

Scan for audio version

The year under review was one which tested the mettle of TTE, as a multitude of external challenges converged to cause significant disruption across the Sri Lankan plantation industry. In an operating landscape that went far beyond the ordinary, TTE remained steadfast, driven by purpose, and guided by the long-term vision rooted in sustainability, innovation, and operational excellence.

Confronting Challenges

The entire plantation industry came under pressure in 2024, with the year under review proving to be among the most challenging in recent history. For instance, the 35% hike in plantation worker wages without a link to productivity, led to considerable uncertainty across the industry, exerting further pressure on the relatively high cost of production in Sri Lanka's tea industry.

As an industry, we are exposed to a range of non-controllable external factors such as weather patterns, global price fluctuations and agronomic challenges. While these are endemic to our business and can be managed through experience, innovation and foresight, inconsistent and often arbitrary policies are more challenging to address. Given the national importance of the country's tea industry and the livelihoods of those who depend on it,

engaging all relevant stakeholders prior to implementing major policy changes such as this is vital in ensuring more informed, inclusive and effective decision-making.

Navigating such drastic shifts in the operating landscape have strengthened the Company's resilience in recent years. Our response to the current crisis was one of strategic recalibration with our corporate and estate management teams focusing on ensuring business continuity under extremely volatile conditions.

Beyond crisis management, we continued to focus on diversification as a long-term hedge against labour dependency and market volatility. Crop diversification, in particular, saw accelerated progress with cinnamon and coconut cultivation gaining momentum, and our strawberry pilot project proving viable enough to warrant expansion. Each of these efforts are executed systematically, guided by ongoing assessment to determine commercial viability, environmental sustainability, and labour efficiency.

At the same time, we diversified into non-traditional areas, specifically diverting resources towards tourism-driven ventures. Investments in our Tea boutique operations, including the newly upgraded Somerset estate, Nanuoya

outlet is the second Tea boutique, aim to capture value from domestic and international Tea tourism. Likewise, the glamping initiative at Great Western Estate further exemplifies our commitment to creating unique experiences in Sri Lanka's scenic hill country. These projects are designed to amplify brand presence, create local employment, and deliver sustained profitability.

Proving our Resilience

The operating environment in 2024 tested the resilience of every player in Sri Lanka's Tea industry. Erratic and prolonged weather

disruptions, especially in the up-country regions significantly impacted national crop levels, while rising input costs and increasingly volatile global demand conditions placed further strain on already stretched margins. These external pressures were compounded by structural cost escalations within the industry, most notably a significant increase in labour costs that reshaped the financial dynamics of estate operations.

Amidst these mounting challenges, TTE approached the year with a proactive, performance-driven mindset, anchored by a

deep commitment to operational excellence. While weather-related setbacks did result in a marginal contraction in crop volumes, our strategic focus enabled us to extract maximum value from every Kilo produced enabling TTE to secure record-breaking auction prices that outperformed national benchmarks across both High-Grown and Low-Grown categories.

Our performance at the Colombo Tea Auction in 2024 stands as an affirmation of TTE's unwavering commitment to quality. At a time when the industry faced considerable headwinds, TTE recorded premiums of

Managing Director's Review

Rs. 185.34 per kg above the national average in High-Grown Teas and Rs. 179.08 per kg in Low-Grown. Most notably, our Teas fetched an all-time Overall Gross Sale Average of Rs. 1,403.74 per kg, outperforming the national average by an impressive Rs. 178.57 per kg.

Our ability to consistently command premium prices in the Colombo Tea Auction, at levels well above the national averages, I believe that speaks volumes of the strength and trust TTE continues to enjoy in the market. Bolstered by strong performances across all elevations, TTE succeeded in retaining its no.1 position nationally. Moreover the fact that six of our Garden Marks ranked among the Country's "Top Ten" further underscores the exceptional value we continue to deliver.

Meanwhile, I am pleased to note that despite significant pressure on cost structures following the 35% wage increase, without any corresponding productivity gains introduced in September 2024, TTE delivered sound operational performance, reflecting our disciplined cost management, agile response to emerging challenges, and the collective effort of a committed and capable workforce.

Infrastructure Development

As a future-focused company, TTE has continued to drive investments towards capacity expansion and infrastructure upgrades. A relentless focus on innovation and operational excellence forms the backbone of our long-term strategy, ensuring that we are not only keeping pace with global trends but definitively shaping the future of Sri Lanka's Tea industry.

It is therefore with great pride that I highlight one of our most significant milestones in recent years: the commissioning of the state-of-the-art Kiruwanaganga Tea Factory which marks a defining chapter in TTE's journey. With a manufacturing capacity of 14,000 kg Green leaf per day and cutting-edge machinery, the facility is purpose-built to elevate both product quality and operational efficiency.

Moreover, the Kiruwanaganga factory stands at the forefront of sustainability. Built in accordance with global environmental standards and the Green Building Concept, it is already certified by the Rainforest Alliance, ISO 22000:2018, ISO 14064-1:2018, and several other international benchmarks, with Green Building certification soon to follow. Constructed at an investment of Rs.714 million financed entirely through internally generated funds, this facility

stands as a benchmark for innovation in the modernisation of the country's plantations sector.

On that note, I proudly note that the Kiruwanaganga factory is now ranked as the no.1 Low-Grown RPC Tea factory in the Country by the Colombo Tea Traders Association.

Progress on the Regen Agenda 2030

As I reflect on TTE journey toward transitioning into a fully sustainable plantation Company, I am proud to share the significant progress made under the Regenerative Agenda 2030. The initiatives undertaken in the past year stand as a testament to our unwavering commitment to preserving the long-term agricultural sustainability across our estates while driving shared value across our universe of stakeholders.

At a time when environmental regulations are becoming increasingly tight and climate-related risks more complex, we at TTE commenced our journey of embedding regenerative thinking into the core of our business strategy. Our efforts are strategically guided by evidence-based approaches, with a strong emphasis on nature-based solutions, in alignment with our newly standardised 'Nature Positive Business Policy' across all core operations. For instance, through our circularity initiatives we repurpose biomass and plant waste into high-quality compost, enhancing both soil fertility and water retention. Simultaneously, our widespread use of cover crops and reforestation efforts serve the dual purpose of protecting against erosion while actively restoring biodiversity.

We continue to strengthen our field development activities, investing Rs. 271 million in 2024/25 to boost the long-term health and productivity of our lands. With a strong focus on nursery management, soil rehabilitation, and precision agriculture, we are advancing regenerative practices that are both environmentally sound and operationally viable, and applied holistically across our agricultural practices. In parallel, we are increasingly adopting an Integrated Pest Management model, aligned with our core strategy to prioritise nature-based solutions for pest control. Guided by the Food and Agriculture Organization (FAO), our integrated pest management model prioritises biodiversity conservation and natural predation to reduce agrochemical use in our Tea fields.

Technology and data remain central to our transformation and we have invested in drone surveillance and IoT devices, offering richer data insights for decision making and improving the efficiency of our operations.

TTE's transition to low-carbon energy is another key component of our Regen Agenda 2030. Over the past three years, we have significantly scaled up investments in renewable energy, expanding our solar footprint, optimising mini-hydro capacity, and harnessing biomass for factory operations. Biomass alone now represents the largest component of our renewable energy mix. These efforts are aligned with our Science-Based Targets initiative, through which we've already achieved a 27% reduction in Scope 1 and 2 emissions from our 2022/23 baseline.

We are committed to driving sustainable action in partnership with industry stakeholders and partners. Reflecting our strong commitment and impactful contributions, TTE has been recognised and appointed as a "Patron Member" of the Climate Emergency Task Force under the United Nations Global Compact Sri Lanka Network.

Operating in areas which are rich in biodiversity, the Company has taken a strategic approach towards ecosystem preservation.

Our environmental audits are science-driven, supported by universities and conservation partners, and inform our broader goal of zero net loss of nature. In 2024, we took a decisive step forward by launching our Nature-Positive Business Policy outlining TTE's commitment to halt nature loss by 2030 and work towards full recovery by 2050.

A landmark reforestation project undertaken in partnership with the Wildlife and Nature Protection Society, was also a key intervention during the year as we committed to establishing a 13-kilometre forest corridor consisting of over 50,000 native trees across 80-100 hectares.

Investing in the Team

At TTE, we believe that to truly reset the plantation industry, it is imperative that we develop our most vital pillar - our people. Our aim is to cultivate empowered individuals, leaders, and changemakers, essentially people who will carry this industry forward to the next century.

We began this transformation with the pioneering launch of our Revenue Share Model (RSM) in 2014, where we looked beyond the conventional wage model towards a complete mindset shift that would nurture a new breed of entrepreneurs. By assigning estate workers their own plots and positioning them as Block Managers, we have empowered them to take control of their productivity, income, and ultimately, their future. The early results are clear: higher yields, stronger motivation, and a more entrepreneurial workforce. I am very proud to say that TTE's Deniyaya Estate operates entirely under the RSM, and its success is paving the way for adoption across our estate portfolio.

We are also digitalising our HR processes through investments in data-driven systems, where AI and predictive analytics are used to track performance of our conventional harvesters, thus creating an environment where workers can thrive. These efforts are completed by such initiatives as the Best Harvester Competition, an effort to reward and recognise our workforce on an ongoing basis.

Similarly, our landmark HerLead program continued to the second year as an effort to break gender barriers in estate field supervision. Traditionally male dominated, these roles are now being successfully filled by female supervisors who have undergone comprehensive training and empowered their true potential.

This year, we launched an initiative called "EmpowerU"- Pathways to Leadership, aiming to train 40 youth, both male and female, from the estate community as Factory, Field and Office Trainees across our estates. The key criteria of this program is to develop the career prospects of the estate children with the aim of professionalizing the next generation of talent within our industry.

In 2024, we also launched a broader Women in Leadership initiative aimed at increasing female representation in leadership roles both administrative and estate levels. All of these efforts have culminated in TTE has been officially certified as a "Great Place to Work" with a 99% employee satisfaction score, which I believe reaffirms that our people-first culture is delivering real and measurable results.

Progress on SLFRS S1 & S2

In 2023/24, Talawakelle Tea Estates PLC took a progressive step forward by fully adopting SLFRS S1 and S2 under a 'climate-first' approach,

aimed at providing investors and other primary users with clear, decision-useful information. Strengthening our corporate reporting suite, this year's report presents comprehensive sustainability-related financial disclosures, supported by limited assurance that positions TTE as a pioneer in advancing corporate transparency within the plantation sector. In alignment with the double materiality principle, the report also concisely presents impact-related information to benefit a broader range of stakeholders and enhance the relevance and completeness of sustainability insights.

Awards and Accolades

TTE is proud to be the second most awarded company by LMD in 2024 in Sri Lanka's Corporate Sector—and the most awarded in the plantation industry having earned top national and international accolades including the Best Corporate Citizen Sustainability Awards, Global Sustainability Awards, and Global Performance Excellence Awards, reinforcing our leadership in sustainable, high-performance business practices.

Looking Ahead

As we look to the future, our ambition is clear: to lead the regeneration of Sri Lanka's plantation industry. In doing so, we will not merely wait for change; but focus instead on being the changemaker.

We will continue to challenge the status quo by scaling up our Revenue Share Model (RSM) across all estates to promote entrepreneurship at the grassroots and transforming operations through AI-driven, data-backed decision-making. These are not pilot projects or incremental improvements; they are deliberate, future-focused interventions that will reset the way plantations operate.

Equally importantly, we will aim to stay ahead of the curve in Environmental, Social, and Governance (ESG) action, from trailblazing gender equity initiatives like HerLead and Women in Leadership, to sustainable cultivation practices and community empowerment programmes.

Simply put, the future we envision is not just one we inherit, it is something that is our own design - a blueprint that will redefine what a plantation Company can achieve with clarity of thought and an even deeper conviction to act.

Appreciations

In what has been a year marked by unprecedented challenges, I would like to take this opportunity to extend my deepest appreciation to all those who stood by TTE.

To our Chairman, my fellow Board members, and the Group Management Committee, thank you for your forward-thinking leadership and unwavering commitment. It is your strategic insight that has been instrumental in ensuring TTE stays at the forefront of the plantation sector, even amidst turbulent times.

I would also like commend our Chief Executive Officer, Mr Senaka Alawattagama, along with our Corporate and Operational Management teams, for their ability to lead with integrity and purpose.

To our teams at the head office and across our estates, your tireless commitment, passion, and discipline have been nothing short of extraordinary. Each of you has played an integral role in delivering on our mission, and for that, I offer my sincere thanks and admiration.

Finally, to our valued shareholders, buyers, brokers, and business partners, thank you for the confidence and trust you continue to place in us. I wish to reiterate that your support remains crucial to our success, and we look forward to your patronage as we pursue our bold ambitions for the future.

Roshan Rajadurai PhD, DSc.
Managing Director
Talawakelle Tea Estates PLC

05th May 2025

About US

Welcome to the Talawakelle Tea Estates PLC

Our Journey

"Began in 1992, amidst the verdant hills and misty landscapes of Sri Lanka, following a privatization initiative by the government. The roots of our 16 tea gardens, however, delve deeper into history, tracing back to the late 19th century when Scottish planters first cultivated these lands. Today, we honor their vision by continuing to produce unparalleled Ceylon tea."

Looking Ahead

"As we reflect on the past year, we are reminded of the lush green landscapes that define our heritage and the unwavering commitment to excellence that drives our future. Talawakelle Tea Estate PLC has continued to cultivate not just tea, but a legacy of sustainability, innovation, and community empowerment."

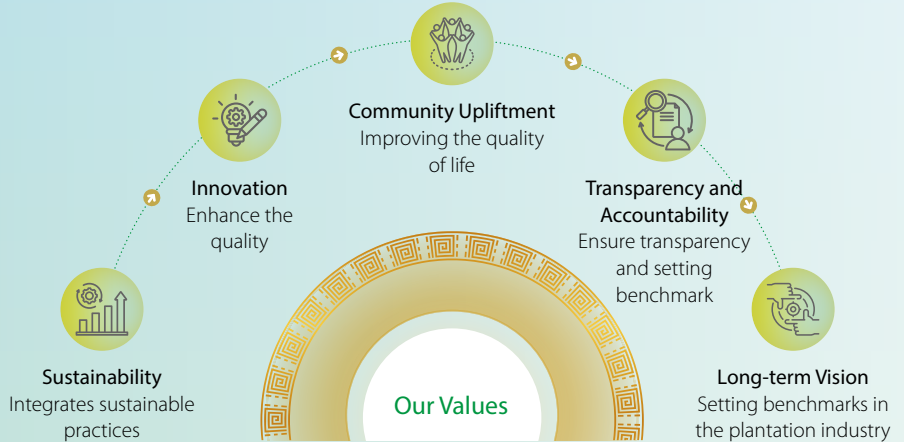

In This Report

"We invite you to journey through our achievements, challenges, and aspirations. From the meticulous care in our tea gardens to the strategic initiatives that propel us forward, every page is a testament to our dedication to quality and our vision for a thriving, sustainable future."

Join us as we celebrate the essence of Talawakelle Tea Estates PLC – where tradition meets progress, and every cup tells a story.

Brewing Success: A Year in Review at Talawakelle Tea Estates

"Differentiation and diversification are key strategies that have been applied in various contexts,"

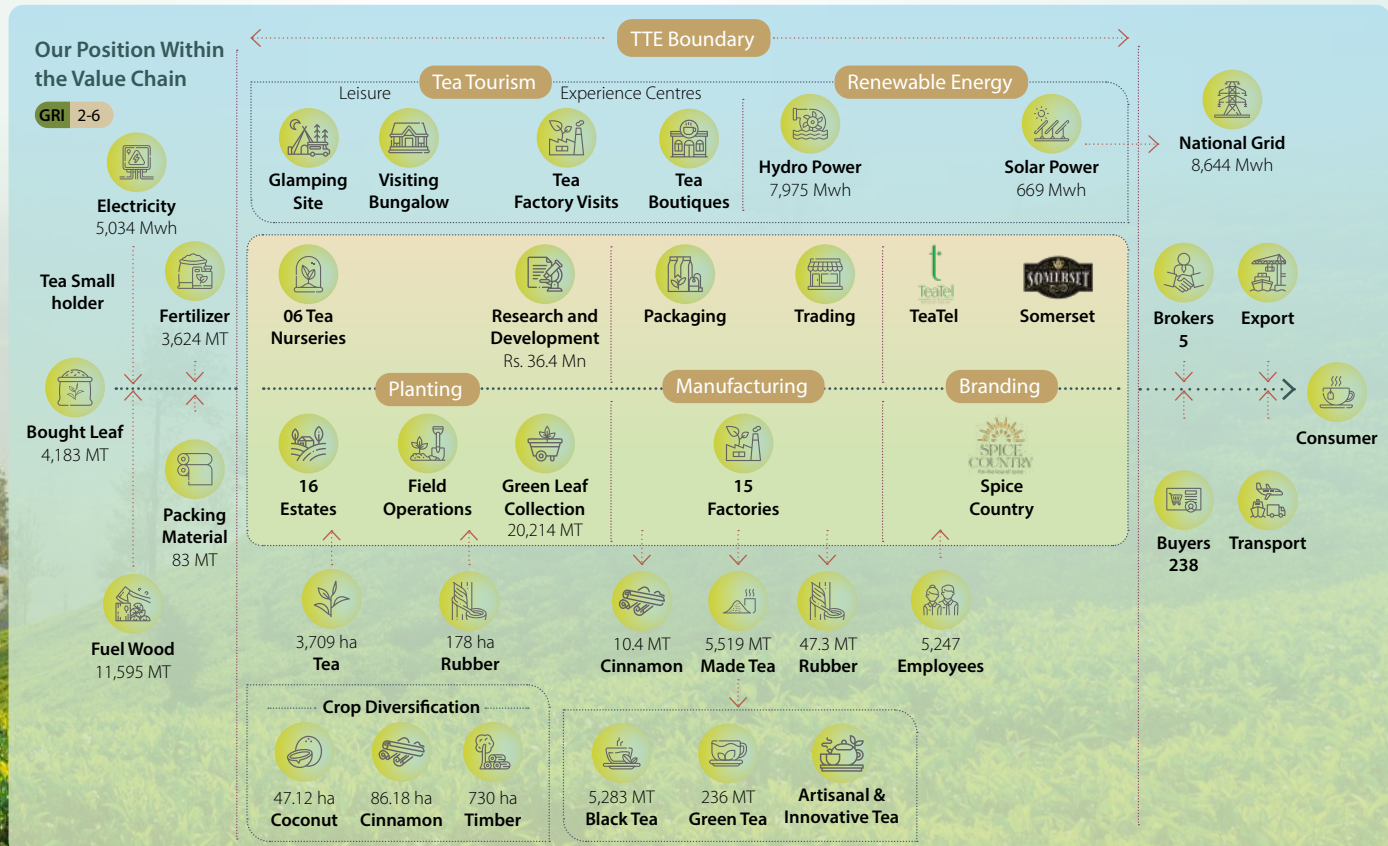

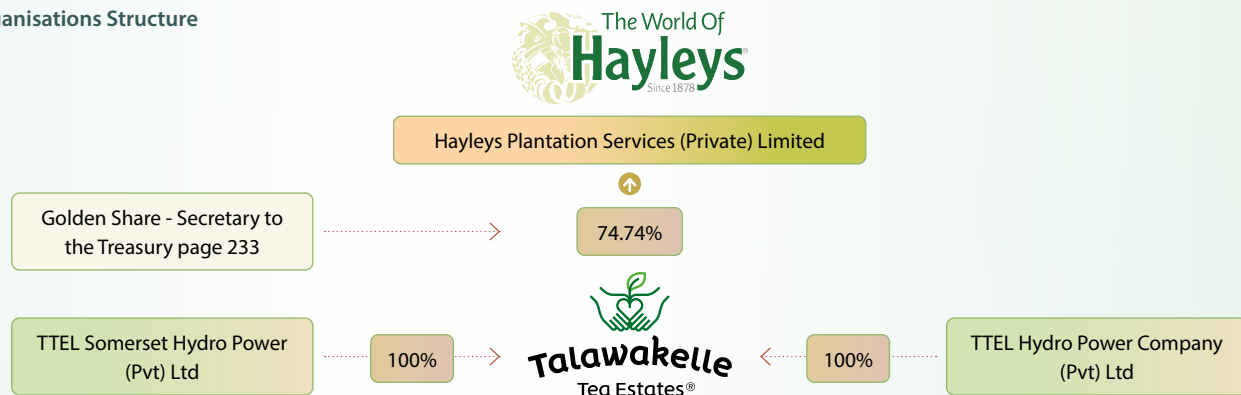

Differentiation

- **Quality and Flavor:** Emphasize the unique flavor profiles and superior quality of its teas. Highlighting the meticulous cultivation and processing methods can attract tea connoisseurs.
- **Sustainable Practices:** Promote eco-friendly and sustainable farming practices. This can appeal to environmentally conscious consumers and enhance brand reputation.
- **Innovative Products:** Introduce new tea blends or specialty teas that cater to niche markets, such as organic or wellness teas.
- **Customer Experience:** Enhance customer service and engagement through personalized experiences, such as tea tasting events or interactive online platforms.

Diversification

- **Product Line Expansion:** Develop new products related to tea, such as tea-infused cosmetics, health supplements, or ready-to-drink beverages.
- **Market Expansion:** Enter new geographical markets, both domestically and internationally, to reach a broader audience.
- **Vertical Integration:** Invest in downstream activities like packaging and distribution to control more of the supply chain and increase profitability.
- **Related Ventures:** Explore related agricultural ventures, such as growing herbs or spices that complement tea production.

Tea

TTE's tea range presents premium Black tea, Green tea and artisanal carefully crafted to preserve traditional flavors, delivering a rich taste experience and showcasing the company's commitment to quality and craftsmanship.

Other Crops

Alongside our premium teas, we offer high-quality Ceylon spices including cinnamon, black pepper, cardamom, cloves, turmeric, and additional products like strawberries, coconuts, and rubber. Sourced from trusted estates, they reflect Sri Lanka's rich flavors and heritage.

Value Added

Our value-added tea collection from Talawakelle a showcase of premium, flavourful blends packed with care and creativity. Each pack reflects the richness of Sri Lanka's tea heritage, crafted to deliver an exceptional tea experience

Tea Tourism

Every visit to Talawakelle Tea Estate reveals the soul of Ceylon tea. With each leaf handpicked by experienced hands, we carry forward a tradition worth tasting.

Renewable Energy

TTE Renewable Energy offers sustainable solutions like solar and hydro power, supporting eco-friendly power generation and reducing carbon footprint for a cleaner, greener future.

Our Journey

Commence

Established in 1992 as a Regional Plantation Company, our organization expanded its horizons significantly in 1998 when Hayleys Plantations Services (Pvt) Ltd acquired controlling interest. This strategic move introduced new opportunities, enhanced capabilities and set the stage for future growth and development within the company.

Stabilizing

Our journey of growth is marked by trailblazing milestones and innovative strides. Notably, in 2000, we listed at CES with 4 million shares, marking our entry into the public eye. In 2001, we set new standards by earning HACCP certification, showcasing our commitment to food safety. We embraced sustainability in 2004 with renewable biomass, reducing our carbon footprint. By 2008, we expanded into Green Tea at Radella Estate and in 2005, we invested in Mini Hydro Plants, all reinforcing our leadership and resilience. Additionally, converting debentures into 3.75 million shares boosted our financial stability.

Thriving

We thrived by enhancing living conditions and prioritizing workforce well-being, demonstrating true environmental and social stewardship. In 2011, Rainforest Alliance certification underscored our commitment to sustainability, while the Presidential Award celebrated our outstanding replanting efforts and land management. Our dedicated actions not only propelled growth but also supported our people, preserved ecosystems and paved the way to industry leadership proving that a thriving company nurtures both people and the planet. In 2010, we became a home for every plantation worker.

Advancing

Our advancing journey is marked by impactful milestones and visionary initiatives. In 2013, we launched our first integrated report, reaffirming transparency and in 2018, we introduced the first rooftop solar project in the plantation sector, championing renewable energy. We also planted one million trees in 2013, demonstrating our commitment to conservation. By adopting advanced technology like electronic scales and web-based monitoring in 2015, along with aligning with UN Global Compact principles, we seamlessly blend sustainability and innovation. These strides propel us towards a resilient, eco-friendly future.

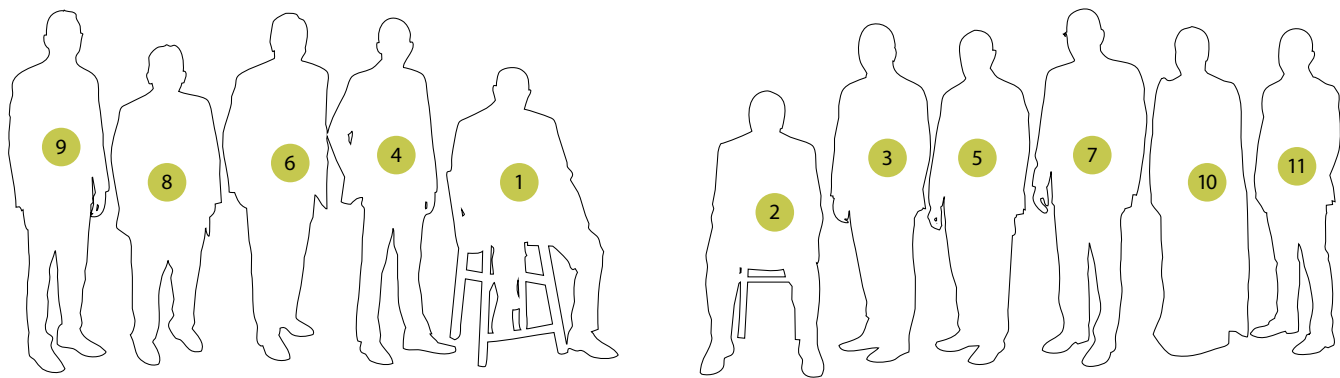

Elevate

We elevate our journey through innovation and excellence, highlighted by winning the 2019 National Business Excellence Award; the first agriculture company to achieve this honor. We rewarded shareholder trust with our highest-ever dividend and introduced the Block Management concept to optimize operations. Our commitment to employee well-being was further reflected in 2021 when we became the first plantation company certified as a Great Place to Work, underscoring our dedication to a thriving, progressive organization.

Unparalleled

Our story exemplifies unparalleled performance, forging holistic, sustainable value through innovative practices. We launched a state-of-the-art tea factory at Kiruwanaganga, unveiled an eco-friendly Glamping Site at Great Western and expanded Somerset Estate's Tea Boutique. As the first plantation company globally to win the prestigious Global Performance & Excellence Award, TTE is among Sri Lanka's most respected. In 2022, we achieved our highest profit with 73% revenue growth. By 2024, we earned 93 awards and was recognized as the 2nd most awarded corporate entity in Sri Lanka by LMD, reaffirming our unwavering commitment to excellence and stakeholder well-being.

An aerial photograph of a vast, terraced tea plantation on a steep hillside. The tea bushes are arranged in neat, horizontal rows that follow the contours of the land. The color of the tea leaves is a vibrant green, with some areas appearing slightly more yellowish-green, possibly due to sunlight or the age of the plants. A dirt path or road winds through the upper part of the image, separating different sections of the plantation. Several tall, thin trees are scattered throughout the landscape, some standing alone and others in small groups. The overall scene is one of a well-maintained and productive agricultural landscape.

Operating Environment

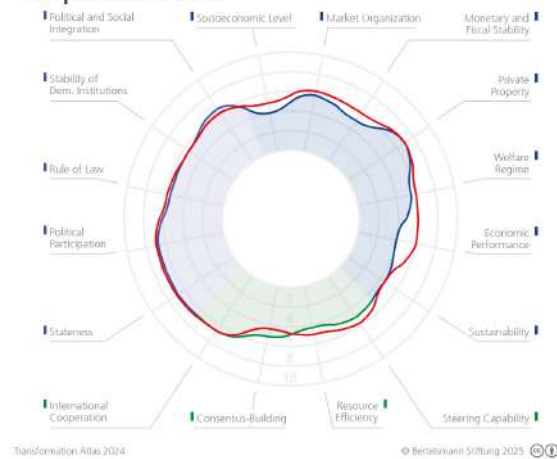

Sri Lanka's economy displayed signs of notable recovery in 2024 after experiencing its most severe crisis since independence. The Central Bank of Sri Lanka reported a 5.2% GDP growth in the third quarter of the year. Simultaneously, inflation saw a significant decrease, reaching -2.1% year-on-year. The nation's foreign reserves are also projected to increase, reaching USD 8.7 billion by 2026, according to the Central Bank's forecasts. This improved macroeconomic stability, partially attributed to successful debt restructuring efforts, led Fitch Ratings to upgrade Sri Lanka's rating to 'CCC+'.

Despite these positive economic indicators, challenges remain. The Bertelsmann Transformation Index (BTI) 2024 report underscores persistent governance issues, including weakened institutional trust and ongoing social unrest rooted in past policy failures. This complex environment necessitates a strategic approach from businesses operating within the country.

In response, TTE PLC adopting strategies focused on resilience, sustainability and innovation. This approach aligns with global trends and addresses stakeholder expectations, acknowledging the need for long-term growth alongside responsible and ethical business practices in a recovering but still vulnerable Sri Lankan economy. This proactive approach demonstrates a commitment to navigating the existing challenges and contributing to a more stable and prosperous future for the nation.

Political

Geopolitical Turmoil Weighs Down Global Trade Flows

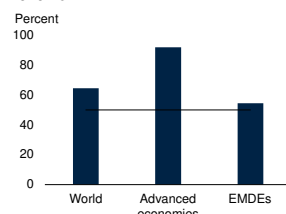

In 2024, escalating geopolitical tensions contributed significantly to the global economic slowdown, with growth decelerating to 2.4%. The prolonged Russia–Ukraine war continued to disrupt energy and agricultural markets, driving price volatility and weakening external demand, particularly in the Euro Area. Simultaneously, tensions in the Middle East marked by intermittent conflict fueled oil price instability and logistical delays. The intensifying US–China strategic rivalry, especially over technology and trade controls, further dampened global investment sentiment and strained supply chains. These overlapping crises also weighed heavily on global trade, which remained subdued due to heightened policy uncertainty, trade fragmentation and shifting supply chains. Together, these factors heightened inflationary pressures, constrained cross-border flows and undermined consumer and business confidence reinforcing a broader deceleration in global economic activity.

Against this backdrop advanced economies registered a further growth deceleration in 2024, with projections indicating a slowdown to 1.2% from 1.5% in the previous year, while emerging market and developing economies (EMDEs) showed an expansion of 3.9%.

A. Contributions to global growth

B. Share of economies with average trade growth in 2025-26 lower than in 2010-19

Impact to TTE

The 2024 global slowdown has challenged Talawakelle Tea Estates PLC through subdued international trade and supply chain disruptions, mainly affecting exports to Europe, North America, and other key markets. However, demand for Ceylon tea remained steady in traditional markets like Iraq, Russia, the UAE, and Turkey, with notable growth in the Middle East, North Africa and parts of Europe and Asia, supported by its strong reputation. Additionally, increased tourist inbound, especially from China and Europe, boosted tea tourism. While broader economic pressures persist, these regional demand improvements and tourism recovery offer some resilience for the company's performance.

TTE Tea Export Value

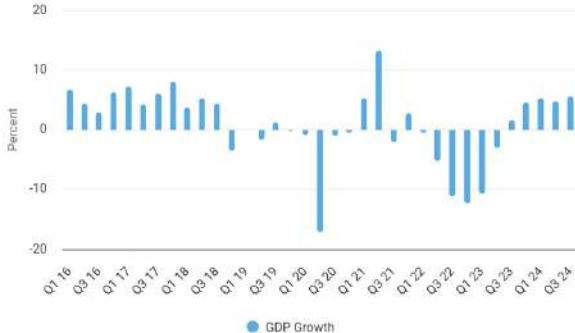

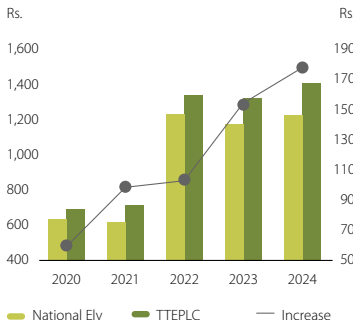

Outlook and Prospects for 2025 and Beyond

The global geopolitical landscape in 2025 will be marked by intensifying rivalries, shifting alliances, and growing protectionism. The strategic competition between the United States and China is expected to deepen, particularly around technology and trade controls, driving supply chain reconfigurations and contributing to global economic uncertainty. Meanwhile, the emergence and consolidation of new geopolitical blocs such as BRICS+ and Weimar+ indicate a rebalancing of global power and influence which will also likely be accompanied by a resurgence in protectionist trade policies, as countries seek to shield domestic industries through tariffs and trade barriers, undermining the multilateral trading system.

These developments will have direct implications for the global tea industry, including the demand for Ceylon tea. Supply chain disruptions, driven by both conflict-related risks and logistical inefficiencies, will affect the timely and cost-effective movement of tea across borders. Rising geopolitical risks and trade fragmentation will also complicate market access, especially for countries that rely heavily on exports. Exporters will need to recalibrate their strategies, diversifying into emerging or politically stable markets to maintain sales volumes.

TTE Resilience

Economic																																					
The Sri Lankan Economy Stages a Strong Comeback		Impact to TTE																																			
<p>In 2024, Sri Lanka's economy experienced a strong recovery, achieving a real GDP growth of 5%, the highest in seven years and well above the Central Bank's estimate of 3%. Key drivers included a rebound in the industrial sector supported by improved energy supply and rising domestic demand and a revitalised tourism industry. The services sector, especially information technology and business process outsourcing, also grew. Also credited for the economic resurgence is the IMF programme initiated in early 2023 and the successful completion of a \$25 billion debt restructuring by the end of 2024.</p> <div><p>GDP Growth</p><p>Source: Annual Economic Review (CSBL)</p></div>		<p>TTE achieved an average price increase of Rs. 112/kg over the previous year at the Colombo Tea Auction. National Western High Grown prices rose from Rs. 1,123.01/kg in 2023 to Rs. 1,189.14/kg in 2024, while TTE's high-grown GSA increased from Rs. 1,303.61/kg to Rs. 1,374.48/kg, maintaining a premium of Rs. 185.34/kg over national levels. TTE's low-grown GSA rose from Rs. 1,399.33/kg to Rs. 1,483.46/kg, surpassing the national low-grown price of Rs. 1,317.05/kg by Rs. 166.41. The company set a record overall gross sale average, increasing from Rs. 1,326.06/kg in 2023 to Rs. 1,403.74/kg in 2024, which was Rs. 178.57 above the national average of Rs. 1,225.17/kg. Despite a crop decline, TTE retained its #1 position nationally and in both high-grown and low-grown categories, with six of its marks ranked among the top ten.</p> <div><p>Impact on Value Creation Activities</p><table><tr><th rowspan="2">Main Segments</th><th colspan="3">Impact</th><th colspan="3">Period</th></tr><tr><th>High</th><th>Medium</th><th>Low</th><th>Short</th><th>Medium</th><th>Long</th></tr><tr><td>Plantation</td><td></td><td></td><td>✓</td><td></td><td>✓</td><td></td></tr><tr><td>Tea Tourism</td><td></td><td>✓</td><td></td><td></td><td>✓</td><td></td></tr><tr><td>Renewable Energy</td><td></td><td></td><td>✓</td><td></td><td>✓</td><td></td></tr></table><div><p>Elevation Gap</p></div></div>	Main Segments	Impact			Period			High	Medium	Low	Short	Medium	Long	Plantation			✓		✓		Tea Tourism		✓			✓		Renewable Energy			✓		✓		BR2

Short Term Investments Against Total Assets

FR3

Inflationary Conditions Continue to Ease

Inflationary pressures, which had significantly strained the economy in recent years, declined sharply in 2024. After peaking at 64% in 2022, inflation gradually eased through 2023, reaching a low of 0.5% by August 2024. By December, the economy recorded mild deflation at -1.7%, reflecting a substantial reduction in consumer price pressures. This sharp downturn in inflation was supported by a stable exchange rate, improved supply chain conditions, tighter monetary policy by the Central Bank, and a decline in global commodity prices.

Source: Annual Economic Review (CSBL)

Impact to TTE

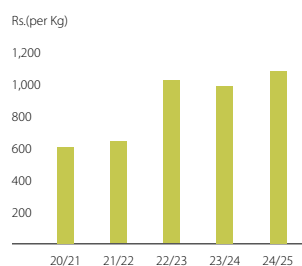

As inflation eases, TTE PLC stands to benefit from lower input costs (e.g., fertilizers and fuel), improving operational margins in the short to medium term. This could lead to cost savings and enhanced profitability, assuming tea prices remain stable. However, reduced inflation may also bring lower output prices, depending on global demand trends. The company's impact will largely depend on effective cost management and market conditions. In the medium term, improved cash flow could support reinvestment in quality and sustainability initiatives, though climate and market fluctuations will continue to influence overall performance.

LKR Strengthens against the USD

In 2024, the LKR exhibited notable stability and modest appreciation against the US Dollar (USD), reflecting improved macroeconomic fundamentals and effective monetary policy. The average exchange rate for the year was approximately LKR 300.89 per USD, strengthening from an average of LKR 333.91 per USD in 2023. The LKR reached its strongest level of the year at LKR 289.87 per USD in December 2024, compared to a peak of LKR 367.82 per USD in January 2023.

Figure 1.21: Daily Exchange Rate Movements

Source: Annual Economic Review (CSBL)

Impact to TTE

The notable stability and modest appreciation of the Sri Lankan Rupee (LKR) against the US Dollar in 2024 had a mixed but largely positive impact on TTE. On one hand, the stronger LKR reduced the cost of imported inputs such as fertilizer, packaging materials, and machinery, contributing to better cost efficiency. On the other hand, currency appreciation negatively affected export revenue when converted to local currency. However, TTE’s ability to command premium prices at the Colombo Tea Auction helped mitigate this effect.

SRI LANKA MONTHLY AUCTION PRICE MOVEMENTS 2019 TO 2024 SLR/USD

COLOMBO AUCTION AVERAGE REACHES USD 4 MARK IN APRIL 2022

Outlook and Prospects for 2025 and Beyond

The Sri Lankan economy is projected to continue its recovery trajectory in 2025, building upon the robust 5% GDP growth achieved in 2024. This positive outlook is underpinned by restored macroeconomic stability and the gradual dissipation of domestic uncertainties. The CBSL anticipates that inflation will stabilise at a rate of around 5% by mid-2025 supported by continued easing of monetary conditions to encourage investment, stimulate consumer spending, and boost aggregate demand.

Accordingly, interest rates are likely to remain at their current level of 8% in the first half of 2025, before being gradually adjusted depending on inflation dynamics and fiscal developments. Additionally, the LKR is expected to remain broadly stable in 2025, supported by stronger external sector performance, increased foreign inflows, and a sustained build-up of foreign reserves. Modest appreciation pressures may persist if global commodity prices remain soft and domestic confidence continues to improve.

TTE Resilience

Operating Environment

Social

Labour Force Dynamics Continue to Fluctuate

The labour force participation rate (LFPR) was estimated at 47.4%, reflecting a slight decline from 48.6% in 2023. This decrease highlights ongoing challenges in engaging a larger portion of the working-age population in economic activities.

Female participation in the labor force remained significantly lower than male participation, continuing to be a key challenge for the country. Despite some improvements, female labor force participation remains well below the overall average, underscoring the need for greater gender inclusivity and targeted policies to encourage more women to enter and remain in the workforce.

The unemployment rate improved modestly, falling to 4.4% in 2024 from 4.7% in the previous year, indicating a gradual increase in employment opportunities. Employment distribution across sectors showed that agriculture accounted for 26.4% of jobs, industry for 25.4%, and services for 48.3%. This data points to a continuing shift towards a more service-oriented economy, with nearly half the workforce employed in the services sector.

Table 1.5: Household Population, Labour Force and Labour Force Participation (a)

Impact to TTE

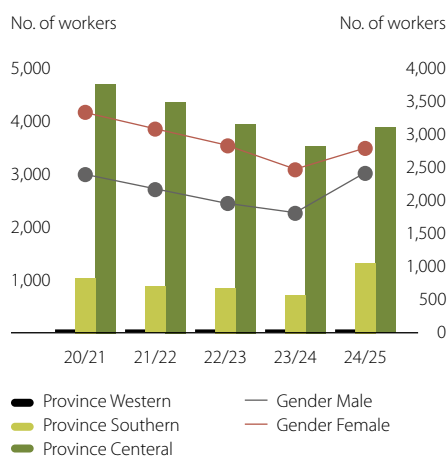

TTE faces significant challenges in accessing labour due to fluctuations in Sri Lanka's labor force dynamics. With the overall labour force participation rate declining, the pool of available and willing workers is shrinking.

Additionally, societal and economic barriers that contribute to lower female workforce participation also limits TTE's ability to attract new workers, while competition from other sectors offering better wages or working conditions may pull potential labor away. These dynamics are further complicated by economic pressures, such as rising wage demands and living costs, which can increase labor turnover or absenteeism.

Growing Consumer Preference for premium and ethically sourced Teas				Impact to TTE																																											
<p>A notable trend in the global tea market has been the increasing consumer preference for premium and ethically sourced teas. More consumers are seeking high-quality products that offer unique flavor profiles and are produced with transparency, fairness, and environmental responsibility. This shift reflects a broader awareness around sustainable agriculture, fair trade practices, and the social impact of their purchases. As a result, teas certified by recognized ethical standards or sourced from plantations with strong commitments to social and environmental stewardship are gaining significant market traction.</p> <p>Simultaneously, there appears to be a growing interest in health and wellness beverages worldwide, driven by consumers' growing focus on holistic health, natural ingredients, and functional benefits. Tea, with its antioxidants, calming properties, and variety of health-promoting compounds, fits perfectly into this trend. Consumers increasingly favour teas that claim benefits such as boosting immunity, aiding digestion, or reducing stress. This has led to a diversification of tea products, including blends infused with herbs, botanicals, and superfoods, catering to the wellness-oriented segment of the market.</p>				<p>TTE's commitment to ethical sourcing and sustainability, can attract conscientious consumers who prioritise transparency and social responsibility, opening up new market opportunities.</p> <p>Additionally, the growing popularity of health and wellness beverages creates scope for TTE to innovate its product portfolio by introducing specialty blends and functional teas that cater to health-conscious consumers.</p>			SRR2 SRO2

Plantation Sector hit with a 70% wage Hike

In May 2024, Sri Lanka's government mandated a 70% wage increase for plantation workers, raising daily pay from Rs. 1,000 to Rs. 1,700. This decision has been met with strong opposition from the tea industry, which argues that the hike will elevate production costs by 45%, making Sri Lankan tea less competitive globally and impacting essential dollar earnings.

The Planters' Association of Ceylon (PAOC) has criticised the wage increase, citing significant rises in the costs of fertiliser, fuel, and power. They argue that the decision was made without proper consultation and could lead to a decline in the quality of Ceylon Tea. Moreover, the industry faces significant additional burdens, with the wage hike imposing an extra Rs. 35 billion in costs.

Impact to TTE

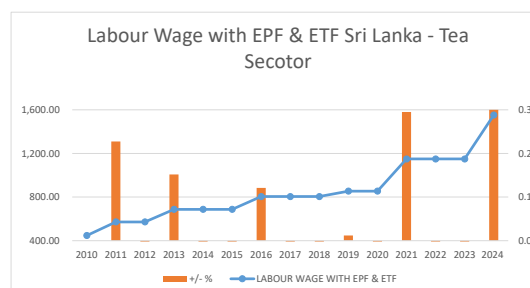

The 70% wage hike imposed on plantation workers in 2024 presented significant challenges for TTE, given its reliance on a largely female workforce in tea cultivation. This sharp increase in labour costs will substantially raise TTE's production expenses, squeezing profit margins and potentially impacting overall competitiveness in the global tea market. As TTE operates in a highly price-sensitive industry, these elevated costs may make it difficult to maintain export volumes or pricing advantages without passing some costs onto buyers, which could reduce demand.

Moreover, the wage hike comes amid existing pressures such as fluctuating labour availability and rising input costs, compounding operational risks. While higher wages might improve worker morale and retention, the sudden cost shock could force TTE to re-evaluate its cost structures, invest further in mechanisation or smart agriculture to offset labor costs.

Outlook and Prospects for 2025 and Beyond

Despite months of negotiations, the government has enforced the new wage rates, threatening to take over plantation companies that refuse to comply. This move raises concerns about the long-term sustainability of the plantation sector and its ability to maintain its position in the global tea market.

Weather Related Disruptions Continue to Hamper Sri Lanka's Agricultural Output

Sri Lanka's agricultural sector came under significant strain due to the escalating impacts of climate change. One of the most disruptive factors was the El Niño event, which contributed to erratic weather patterns, including prolonged droughts and unpredictable rainfall.

In response, the government has intensified its focus on climate adaptation by promoting climate-resilient crop varieties, improving access to efficient irrigation systems, and enhancing early warning mechanisms to help farmers better prepare for weather extremes. While these efforts mark a positive step, their success hinges on sustained investment, cross-sector collaboration, and community-level engagement to strengthen the long-term resilience of Sri Lanka's agricultural.

Outlook and Prospects for 2025 and Beyond

Climate change presents both challenges and opportunities for Sri Lanka's agriculture sector. Variability in rainfall patterns and rising temperatures will likely exacerbate the frequency and intensity of extreme weather events such as droughts, floods, and storms. These disruptions are expected to further strain water resources resulting in reduced crop productivity.

However, the growing recognition of these risks has prompted a stronger policy and institutional response. The government is expected to accelerate the implementation of climate-resilient agricultural strategies, while international development partners are also anticipated to play a more active role in financing and supporting capacity-building efforts to equip farmers with the knowledge and tools to adapt, including digital agriculture and climate-smart technologies such as precision farming, soil health monitoring, and AI-powered weather forecasting. These tools will help optimize input use, reduce crop loss, and enhance farm-level decision-making.

TTE Resilience

Stakeholder Engagement

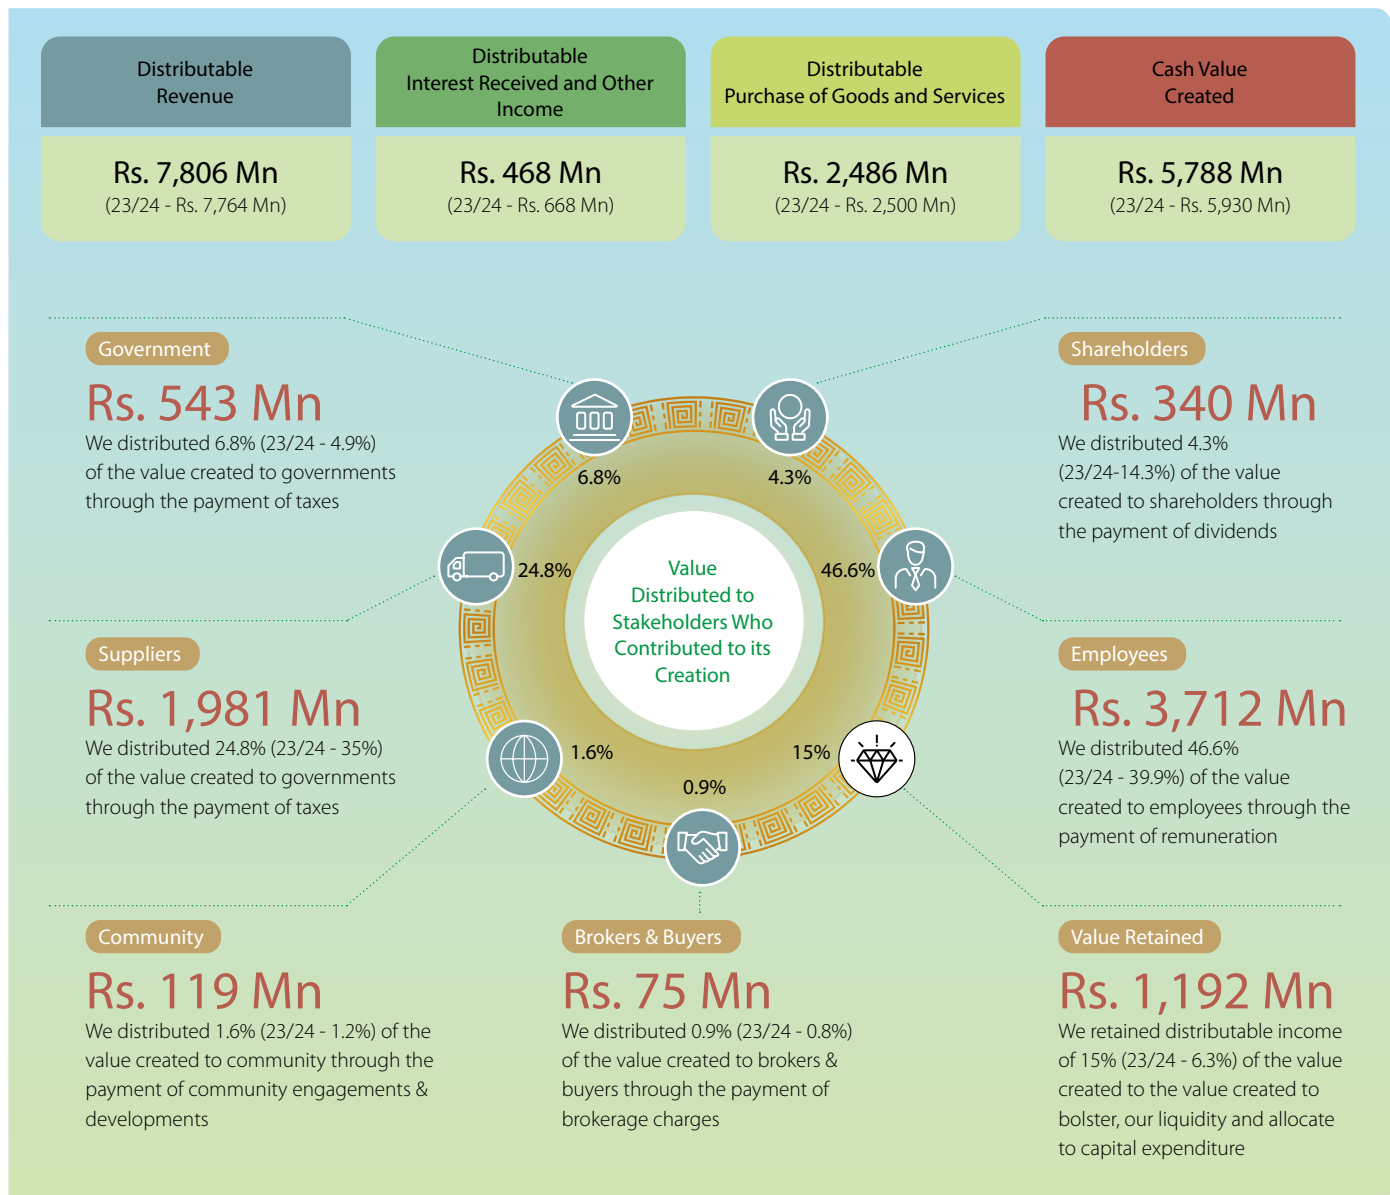

GRI 2-29

At TTE, we believe that sustained, constructive dialogue with our stakeholders is essential for achieving the objectives set out under our Regenerative Business Agenda – 2030 (ReGen). Hence stakeholder engagement is undertaken not just as a formality, but more as a strategic imperative to understand diverse perspectives, inform our decision-making, and continuously refine our strategies, policies, and operational practices, ultimately enhancing both our financial and non-financial performance outcomes across the value chain.

We follow a structured and systematic approach to stakeholder engagement. We begin by identifying our key stakeholder groups based on the level of interest they have in TTE and the influence they exert on our operations. Functional heads across the business are responsible for applying these criteria to identify and categorise stakeholders relevant to their areas. Stakeholders are then broadly classified as shareholders, employees, customers, resident communities, suppliers and regulators.

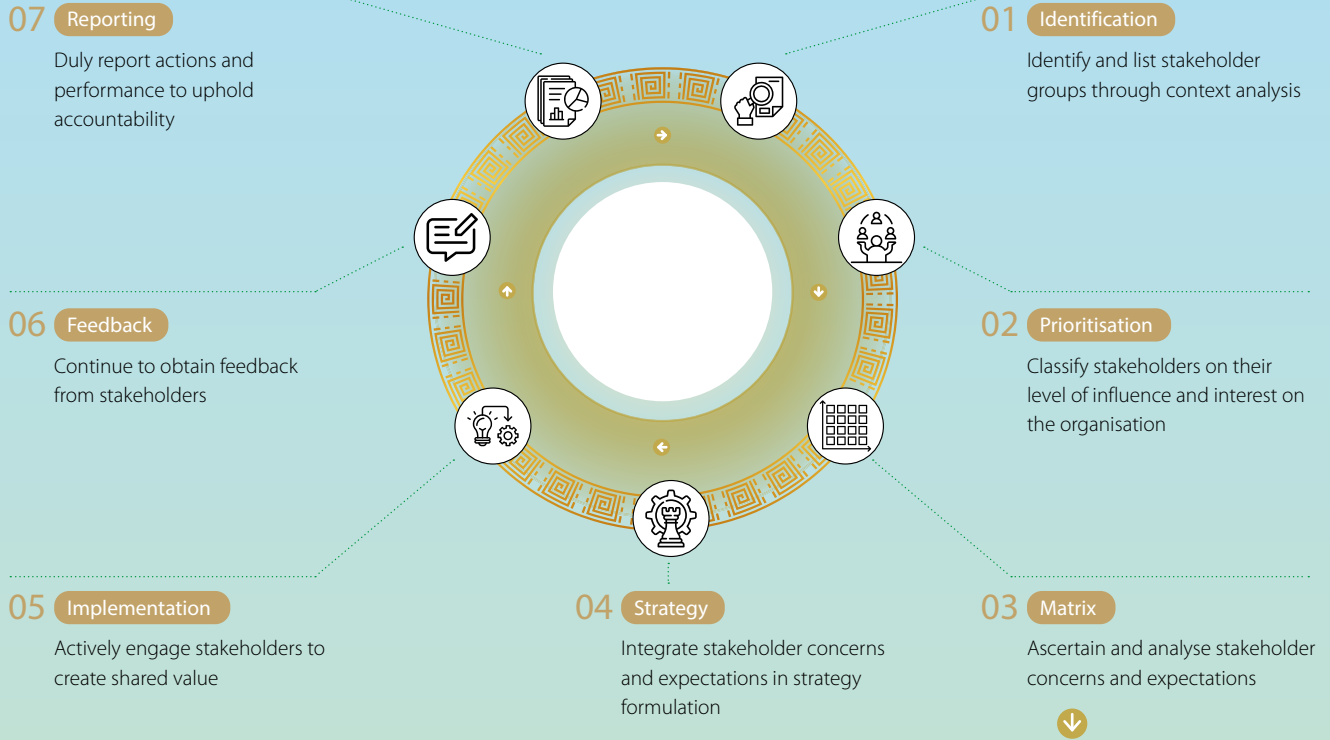

Identified stakeholder groups are positioned on a power-interest grid, which helps us determine the most appropriate methods and frequency of engagement, thus ensuring our interactions are meaningful, responsive, and aligned with the priorities of both TTE and our stakeholders.

Materiality in Focus

GRI 2-14 | 3-1, 2

Changes to Material Topics in FY 2024/25

Marketing and Labelling was removed from the list of Material Topics, as it primarily pertains to communications directed at end consumers. As a manufacturer of tea, TTE operates within a B2B model, selling its products in bulk through tea auctions, with no direct engagement with end consumers. Consequently, this topic was assessed as non-material to TTE's operations.

Anti-Corruption was added as a Material Topic, reflecting TTE's broader commitment to anti-corruption advocacy, extending well beyond its own operations. While TTE's operations are not at risk of corruption owing to the Company's strict zero-tolerance policy on corruption, we are now seeking to play a more active role in promoting ethical conduct and best practices across its entire value chain.

At TTE, we consider materiality not merely as a reporting requirement, but a powerful tool in shaping a future where business thrives in harmony with society and the planet. We believe Material Topics act as strategic levers, driving our actions to align with the expectations of our stakeholders and the evolving needs of the world around us.

Our fundamental approach to determining Material Topics is based on a comprehensive '360-degree' focus that begins with a deep dive into TTE's value chain and followed by extensive analysis to arrive at the material topics that hold the most significance to our organisation as well as to our stakeholders. Best practices set out by internationally recognised frameworks such as GRI and SASB guide our efforts to refine and update our approaches. Accordingly, we have recently embraced the double materiality assessment (DMA) principles to further examine

how our 24 material topics using the DMA's dual perspective approach - financial materiality to assess how externalities can influence TTE's ability to create and sustain and impact materiality review how our business could potentially impact the environment and society.

Going forward, we will aim to align our materiality disclosures with the latest IFRS sustainability disclosure standards S1 and S2.

Strategy and Resource Allocation

Talawakelle Tea Estates PLC (TTE) stands as a beacon of innovation and sustainability in Sri Lanka's tea industry, guided by its purpose of "Brewing a Better Future." Central to this vision is the 2030 Regenerative Agenda, a comprehensive strategy that redefines TTE's approach to value creation by embedding regenerative principles across its operations.

The 2030 Regenerative Agenda outlines five strategic imperatives: winning with the customer, operational excellence, nurturing our people, environmental stewardship and climate action, and business diversification, collectively forming the backbone for informed planning and decision-making at all levels of the organisation. Each year, the Company undertakes a structured planning process where business units identify key initiatives aligned to these strategic pillars, enabling a systematic evaluation of the financial and non-financial resources to be allocated through the various forms of capital to achieve the desired results. This integrated approach is designed to achieve the optimal balance between

delivering short-term performance, advancing medium-term strategic objectives, and creating long-term sustainable value, culminating in creating a future that benefits both the Company and the broader ecosystem it depends on.

Winning with the Customer

Aligned with our regenerative business principles, we stand committed to create long-standing and reciprocal relationships with our customers by delivering exceptional customer experience; ensuring their wellbeing; and exceeding their expectations, consistently

2030 Regenerative Agenda through ESG Framework

GRI 2-23, 24

Our ESG
Framework

The 2030 ReGen Agenda

Represents our strategic compass to regenerate, transform, and lead with purpose anchored in the interconnectedness of nature, people, and performance. Framed by the ESG pillars and informed by the dynamic interplay between our business model, stakeholder expectations, and evolving global standards, this agenda advances a systems-based approach that transcends silos. By weaving together risk, resilience, and opportunity across all capitals, it enables TTE to unlock shared value where every decision balances economic advancement with ecological integrity and social well-being. The framework doesn't operate in parts, but as a living system integrating insight, accountability, and innovation to sustain value creation over time.

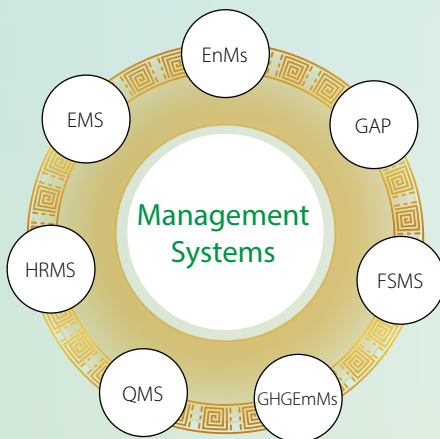

Purpose

"Brewing a Better Future"

Our commitment is to regenerate ecosystems, uplift livelihoods, and create shared value going beyond compliance to sustainability leadership.

Our integrated, standardized management systems ensure operational excellence, ESG compliance, and resilience across the tea value chain:

Foundation

Guided by Core Values & Regenerative Principles

- Fairness, Integrity, Respect
- Entrepreneurial Spirit & Learning Culture
- Long-term value for people, planet, and profit

Stakeholder Engagement

We maintain open, structured engagement across our value chain from estate communities to global buyers to understand concerns and co-create solutions. Page 61

Double Materiality

We assess both:

- Impact on environment, society & communities
- Financial risks & opportunities from Sustainability & ESG factors
- Anchored in SLFRS S1/ S2 and GRI Standards. Page 81

Risks & Opportunities

Pages 198 to 206

Sustainability Priorities

Environmental (E):

- Climate Action & Net-Zero 2050 Commitment
- Biodiversity Conservation & Ecosystem Restoration
- Circularity & Resource Efficiency
- Water Security & Soil Health

Social (S):

- Worker Well-being & Revenue Share Model
- Gender Equity & Women in Leadership
- Community Empowerment & Education
- Health, Nutrition & Housing Infrastructure

Governance (G):

- Ethical Business Conduct & Anti-Bribery
- Board ESG Oversight
- Data Transparency & Audit Trail (including AI-powered ESG system)
- Policy Alignment with International Standards (GRI, IFRS S1/S2, UNGC)

Ambitious Target

Page 76

Governance & Oversight

Page 215

Transparency and Disclosures

Financial Materiality (Primary Users):

- SLFRS S1 & S2 Disclosures
- Sustainability-related financial risks and opportunities
- Scope 1,2&3 GHG emissions
- Transition and physical risk financial effects
- Scenario-based business resilience assessments

Impact Materiality (Broader Stakeholders):

- GRI Universal & Sector Standards (GRI 13: Agriculture)
- UNGC principles and SDG Alignment
- Social outcomes: health, gender, livelihoods
- Environmental impact performance: biodiversity, water, soil
- Human rights due diligence & stakeholder equity

Enablers

Digital & AI-Driven Tech Integration

Nature Based Solution Focused Value Chain Partnerships

Winning with the Customer

Sustain highest auction prices through quality, ethics, and traceable, low-emission tea.

Nurturing Our People

Revenue-share model, best workplace certifications, women in leadership, and upskilling estate youth.

Operational Excellence

Energy efficiency, waste reduction, lean management, and GHG reduction across estates and factories.

Environmental Stewardship & Climate Action

Verified GHG emissions inventory (Scope 1–3), climate resilience actions, water security, and landscape restoration.

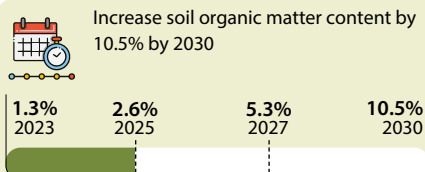

Business Diversification

Diversification Expansion into value-added teas, herbal cultivation, and renewable energy ventures (hydro, biomass).

Independent practitioner's assurance report to the Board of Directors of Talawakelle Tea Estates PLC on the SLFRS Sustainability-related Financial Disclosures presented in the Integrated Annual Report 2024/25

Scope

We have been engaged by Talawakelle Tea Estates PLC to perform a 'limited assurance engagement', as defined by Sri Lanka Standards on Assurance Engagements, here after referred to as the engagement, to report on Talawakelle Tea Estates PLC's SLFRS Sustainability-related Financial Disclosures (the "Subject Matter") contained in Talawakelle Tea Estates PLC's (the "Company's") Integrated Annual Report in pages 81 to 113 for the year ended 31 March 2025 (the "Report").

Other than as described in the preceding paragraph, which sets out the scope of our engagement, we did not perform assurance procedures on the remaining information included in the Report, and accordingly, we do not express a conclusion on this information.

Criteria applied by Talawakelle Tea Estates PLC

In preparing the SLFRS Sustainability-related Financial Information, Talawakelle Tea Estates PLC applied the Sri Lanka Sustainability Disclosure Standards, SLFRS S1 – General Requirements for Disclosure of Sustainability-related Financial Information and SLFRS S2 – Climate-related Disclosures (Criteria). Such Criteria were specifically designed for the disclosure of material information on sustainability-related risks and opportunities that is useful to primary users of general-purpose financial reports in making decisions

relating to providing resources to the entity; As a result, the subject matter information may not be suitable for another purpose.

Talawakelle Tea Estates PLC's responsibilities

Talawakelle Tea Estates PLC's management is responsible for selecting the Criteria, and for presenting the SLFRS Sustainability-related Financial Disclosures in accordance with that Criteria, in all material respects. This responsibility includes establishing and maintaining internal controls, maintaining adequate records and making estimates that are relevant to the preparation of the subject matter, such that it is free from material misstatement, whether due to fraud or error.

Ernst & Young's responsibilities

Our responsibility is to express a conclusion on the presentation of the Subject Matter based on the evidence we have obtained.

We conducted our engagement in accordance with the Sri Lanka Standard for Assurance Engagements Other Than Audits or Reviews of Historical Financial Information (SLSAE 3000 (Revised)), and the terms of reference for this engagement as agreed with Talawakelle Tea Estates PLC on 23 April 2025. Those standards require that we plan and perform our engagement to express a conclusion on whether we are aware of any material modifications that need to be made to the Subject Matter in order for it to be in accordance with the Criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusions.

Our independence and quality management

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Professional Accountants issued by the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) and have the required competencies and experience to conduct this assurance engagement.

EY also applies quality management standards, which require that we design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Description of procedures performed

Procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our procedures were designed to obtain a limited level of assurance on which to base our conclusion and do not provide all the evidence that would be required to provide a reasonable level of assurance.

A member firm of Ernst & Young Global Limited

Independent Limited Assurance Statement on SLFRS Sustainability Related Financial Disclosures

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

A limited assurance engagement consists of making enquiries, primarily of persons responsible for preparing the Subject Matter and related information and applying analytical and other appropriate procedures.

Our procedures included:

- Conducted interviews with selected key management personnel and relevant staff to understand the business, value chain and sustainability reporting process of the Company.
- Undertook analytical procedures of the data and made inquiries of management to obtain explanations for any significant differences we identified.
- Performed procedures to understand the Company's disclosures in relation to the Conceptual Foundation of SLFRS S1, including fair presentation, materiality, reporting entity, and connected information.
- Conducted procedures to understand the governance processes, controls and procedures employed by the Company to monitor, manage and oversee sustainability-related risks and opportunities, supported by relevant evidence.
- Perused the minutes of the Board of Directors and Board Audit Committee meetings from the financial year to ensure alignment with the content of governance-related disclosures.

- Conducted procedures to comprehend the Company's strategy for managing identified sustainability-related risks and opportunities, supported by relevant evidence and calculations.
- Performed analytical procedures to obtain explanations and supporting evidence regarding the Company's processes for identifying, assessing, prioritizing, and monitoring sustainability-related risks and opportunities, including their integration into the overall risk management framework.
- Conducted analytical procedures to gather explanations and supporting evidence to evaluate the Company's performance in relation to its identified sustainability-related risks and opportunities, including progress towards any targets the Company has set.
- Performed procedures to assess the Company's disclosures and compliance with the General Requirements of SLFRS S1.
- Conducted procedures to evaluate the disclosures regarding judgments and uncertainties in the process of preparing the Company's sustainability-related financial disclosures.

We also performed such other procedures as we considered necessary in the circumstances.

Emphasis of matter

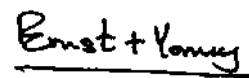

There are inherent limitations in the identification, measurement and disclosure of underlying Subject Matter against the applicable Criteria due to forward looking information, uncertainties and management judgements. For clarity, our engagement does not extend to providing assurance on the accuracy or achievability of these forward-looking information, uncertainties and management judgements.

Conclusion

Based on our procedures and the evidence obtained, we are not aware of any material modifications that should be made to SLFRS Sustainability-related Financial Disclosures for the year ended 31 March 2025, in order for it to be in accordance with the Criteria.

Restricted use

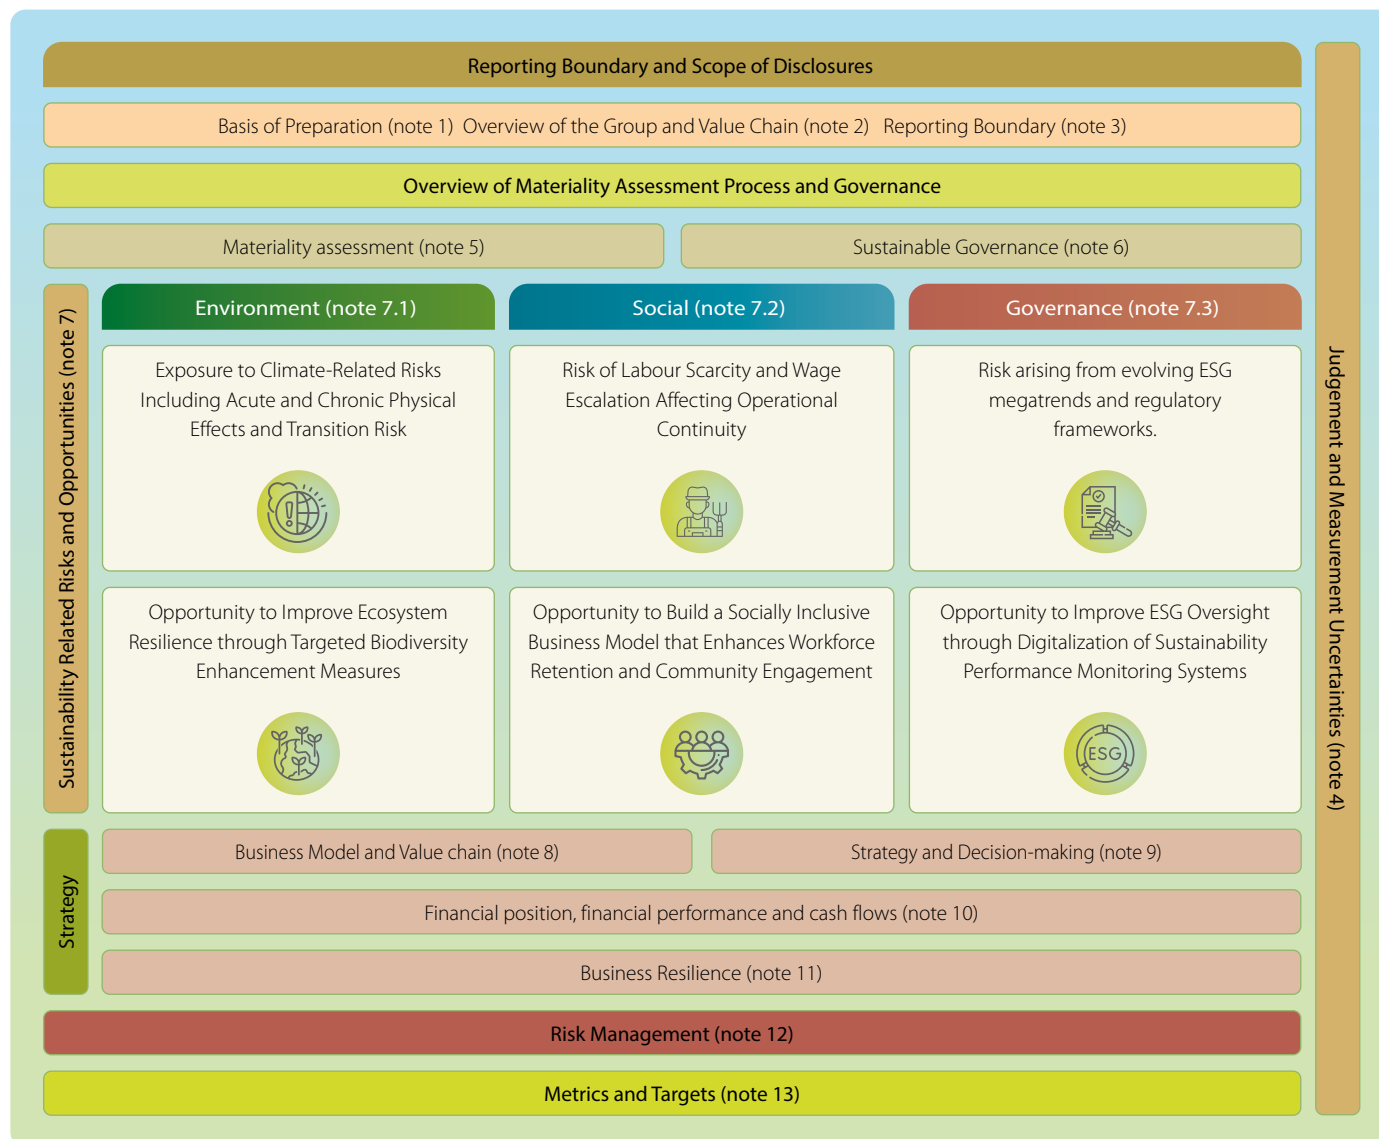

This report is intended solely for the information and use of Talawakelle Tea Estates PLC for the purpose of providing an assurance conclusion on the Subject Matter based on the Criteria and is not intended to be and should not be used by anyone other than those specified parties.

27 May 2025
Colombo

SLFRS Sustainability Related Financial Disclosures

The following summary outlines the structure of Talawakelle Tea Estates PLC's (TTE) sustainability-related financial disclosures in alignment with SLFRS S1 and S2. It connects key environmental, social, and governance (ESG) risks and opportunities with the company's governance, strategy, risk management, and performance metrics and targets. Each component is supported by detailed notes (1–13) that explain how these sustainability factors affect the company's financial prospects, operational resilience, and long-term value creation across the value chain.

Note 1: Basis of Preparation

1.1 Application of SLFRS Sustainability Disclosure Standards

This report has been prepared in accordance with the SLFRS Sustainability Disclosure Standards, specifically:

- SLFRS S1 – General Requirements for Disclosure of Sustainability-related Financial Information, and
- SLFRS S2 – Climate-related Disclosures, issued by Institute of Chartered Accountants of Sri Lanka (adopted based on the IFRS S1 and IFRS S2 issued by the International Sustainability Standards Board).

Talawakelle Tea Estates PLC has voluntarily adopted the full requirements of SLFRS S1 and SLFRS S2 for the financial year ending 31 March 2025, marking its second year of reporting following the initial adoption in 2023/24. The Company has not applied the transitional 'Climate-First' relief during the current reporting period. Accordingly, this report encompasses disclosures on a wider spectrum of sustainability-related risks and opportunities, extending beyond Climate-related risks and opportunities which was identified during 2023/24.

SLFRS Sustainability Related Financial Disclosures

The disclosures presented here are intended to support primary users of general-purpose financial reports in understanding the sustainability-related risks and opportunities that could reasonably be expected to affect the TTE's:

- cash flows,
- access to finance
- cost of capital over the short, medium and long term.

Where applicable, the company has considered guidance from following frameworks and standards, in identifying and disclosing sustainability-related risks and opportunities:

- SLFRS S2 –Climate-related Disclosures
- Sustainability Accounting Standards Board (SASB) Standards
 - Food & Beverage Sector - Agricultural Products (Version 2023-12)
- Climate Disclosure Standards Board (CDSB) Application Guidance.
 - CDSB Framework Application Guidance for Biodiversity-related Disclosures
 - CDSB Framework Application Guidance for Water-related Disclosures.
- Global Reporting Initiative (GRI) Standards,
 - GRI 13 Agriculture Aquaculture and Fishing Sectors 2022
- Taskforce on Nature-related Financial Disclosures (TNFD),
 - Additional sector guidance – Food and agriculture

1.2 Reporting Period and Boundary

This report covers the financial year from 1 April 2024 to 31 March 2025, consistent with the company's financial reporting period.

The disclosures presented herein apply to TTE, including all operations and assets within the financial reporting boundary, in line with the company's general purpose financial reports.

This includes:

- Talawakelle Tea Estates PLC
- All subsidiaries
 - TTEL Hydro Power Company (Pvt) Ltd
 - TTEL Somerset Hydro Power Company (Pvt) Ltd

Disclosures in this report are provided on a consolidated basis, unless otherwise stated. Where upstream or downstream activities (such as suppliers or distribution channels) are material to the assessment of specific sustainability-related risks and opportunities, they are included and clearly identified in the respective sections.

The scope of the report includes both qualitative and quantitative disclosures regarding sustainability-related risks and opportunities that could reasonably be expected to affect the company's prospects, as determined through the process described in Note 5 and the 'Materiality in Focus' section on page 66. The primary users of these disclosures are existing and potential investors, lenders, and other creditors.

Unless explicitly mentioned, no restatements of previously published sustainability data have been made. Any updates to methodologies or assumptions are disclosed in the relevant notes.

1.3 Materiality Basis

TTE discloses only those sustainability-related risks and opportunities that could reasonably be expected to affect its cash flow, access to finance, or cost of capital over the short, medium, or long term.

The company applies a financial materiality lens while still considering broader sustainability conditions that may eventually translate into financial impact (e.g., environmental degradation, evolving stakeholder expectations).

Materiality is determined through a structured process:

- Assessment of magnitude, likelihood, time horizon,
- Engagement with internal and external stakeholders,
- Mapping across environmental, social, and economic contexts,
- Alignment to ESG disclosure pillars under SLFRS Sustainability Disclosure Standards.

Topics deemed non-material and that could not reasonably be expected affect the Company prospects have been excluded from disclosure, and a full internal record of evaluated topics is maintained for future reference.

1.4 Use of Estimates and Judgments

TTEs sustainability-related financial disclosures involve professional judgment and estimation due to the future-oriented and evolving nature of relevant risks. The company applies reasonable and supportable information available at the reporting date, without incurring undue cost or effort. Further, the Company has used the skills, capabilities and resources available at the reporting date wherever quantifying the impact of identified sustainability related risks and opportunities for a full breakdown of areas involving material judgment, estimation uncertainty, and forward-looking assumptions, refer to Note 4: Judgment and Measurement uncertainties.

1.5 Changes from Previous Reporting

The 2023/24 reporting year marks the first-time adoption by Talawakelle Tea Estates PLC of the SLFRS Sustainability Disclosure Standards. Key changes compared to previous reporting cycles; the major enhancements include:

- Expansion Beyond Climate: In addition to climate-related risks (previously aligned with SLFRS S2), the report now covers a full range of stakeholders, society, the economy and the natural environment throughout the company's value chain.
- Integration of Forward-looking Assessments: Increased emphasis on scenario analysis, resilience testing, and financial effects estimation related to sustainability matters.
- In 2023/24, non-significant CRROs were omitted due to their minimal impact, and several CRROs were consolidated to enhance reporting clarity and focus.
- GHG emissions for 2023/24 have been restated this year to incorporate updated emission factors and enhanced Scope 3 activity data and quantification methodologies.

1.6. Statement of Compliance

This report represents a complete set of sustainability-related financial disclosures for Talawakelle Tea Estates PLC and its subsidiaries (collectively, the Group) for the year ended 31 March 2025. The Group's sustainability-related disclosures have been prepared in accordance with SLFRS Sustainability Disclosure Standards as issued by the Institute of Chartered Accountants of Sri Lanka.

Note 2: Overview of the Value Chain

TTE is one of the leading plantation companies in Sri Lanka, engaged in the full value chain of premium tea production from cultivation and manufacturing to market-ready products with a strong emphasis on sustainable agriculture and environmental stewardship and several other crops also. The company operates 16 estates and 15 factories across diverse agro-climatic zones in Sri Lanka's Upcountry and Low-country regions. In addition to its core operations, TTE operates mini-hydropower plants that contribute renewable energy to the national grid and estate operations, supporting its low-carbon strategy. (Refer to TTE's value chain on page 29).

2.4 Stakeholders Across the Value Chain

Talawakelle Tea Estates PLC operates within a diverse stakeholder ecosystem that includes estate community, suppliers, regulators, buyers, certification bodies, investors, and NGOs. These stakeholders significantly influence the company's sustainability performance, from ethical labor practices and input sourcing to regulatory compliance and market access. TTE maintains structured engagement with each group through community forums, buyer audits, and investor briefings to ensure alignment with ESG expectations, manage risks proactively, and strengthen its long-term social license to operate. (Refer stakeholder section – page 61).

2.5 Value Chain-related Risks and Opportunities

TTE's value chain presents both sustainability-related risks and opportunities that influence its financial outcomes.

Upstream risks include:

- Input supply volatility (e.g., fertilizer cost and agrochemical regulation),
- Water and ecosystem stress due to climate variability and competing usage,
- Labor dynamics, including wage expectations and retention challenges.

Downstream risks involve:

- Rising buyer ESG requirements (e.g., Rainforest Alliance, carbon disclosure),
- Scrutiny on logistics emissions, impacting both cost and reputational exposure.

Key opportunities across the value chain include:

- Regenerative agriculture to reduce input dependency and improve soil resilience,
- Mini-hydro energy expansion lowering GHG Scope 2 emissions and energy costs,
- Certified product differentiation enabling premium pricing and market loyalty,
- Access to green financing through strengthened ESG positioning.

By mapping these sustainability-related risks and opportunities across the upstream and downstream segments, TTE takes a strategic, financially focused approach to sustainability management in line with SLFRS Sustainability Disclosure Standards, using all reasonable and supportable information available as at the reporting date without undue cost or effort.

Note 3: Reporting Boundary

3.1 Alignment with Financial Reporting Boundary

TTE's sustainability-related financial disclosures for the year ending 31 March 2025 follow the same reporting boundary as its consolidated financial statements. This includes all operations under the company's control tea estates, factories, mini-hydro plants, and central administrative functions. Material exposures from outside the financial boundary (e.g., suppliers or logistics providers) are addressed separately, where relevant to value chain risks.

3.2 Operational Control Definition

TTE applies an operational control approach to define its sustainability reporting boundary, including all activities where it directs operations, implements sustainability actions, and governs compliance. This covers wholly owned estates, factories, mini-hydro plants, and

estate-managed workforce systems. Entities not under direct control (e.g., third-party suppliers) are excluded from direct reporting but assessed separately under value chain disclosures in line with SLFRS Sustainability Disclosure Standards.

3.3 Value Chain Coverage Beyond the Financial Boundary

TTE consider material information relating to sustainability-related risks and opportunities arising from both upstream and downstream value chain activities, even when not within its financial reporting boundary. Inclusion is based on materiality, operational relevance, and data availability. Specific exposures such as input sourcing, certification-linked buyer expectations, and logistics emissions are addressed within financial impact considerations in Note 10.

3.4 Exclusions and Limitations

The Company sustainability-related financial disclosures include all materially relevant operations and value chain activities. However, certain elements such as out-growers, smallholders, third-party logistics, and non-controlled entities are excluded from the direct reporting boundary due to lack of operational control, limited data availability, or immateriality.

3.5 Basis for Boundary Judgments

We applied a principle-based approach to define its sustainability reporting boundary. Boundary decisions were based on operational control, materiality, and availability of reliable data. Value chain elements outside the financial reporting scope were included where material, with professional judgment applied to manage estimation uncertainty. All judgments are subject to periodic review as conditions evolve.

SLFRS Sustainability Related Financial Disclosures

Note 4: Judgement and Uncertainties

4.1 Overview of Judgement and Estimation in Sustainability Disclosures

Sustainability-related financial disclosures prepared by TTE involve the application of significant professional judgement and estimation, due to the inherent uncertainty, forward-looking nature, and data limitations associated with sustainability-related risks and opportunities. These disclosures are developed.

TTE operates within a climate-sensitive, labor-intensive, and export-oriented industry, where:

- Many sustainability-related risks and opportunities are future-oriented, such as climate change exposure, labor dynamics, export market dynamics and biodiversity degradation.
- Quantifiable data for upstream supply chain emissions, ecosystem benefits, and long-term adaptation costs are limited and non-standardized.
- Stakeholder expectations (e.g., buyers, certifiers, investors) are evolving faster than current ESG data systems can adapt.

Accordingly, judgement is applied in:

- Determining which sustainability-related financial information is material to investors and creditors,
- Choosing between quantitative vs. qualitative disclosure formats when data gaps exist,
- Assessing which estimates involve high levels of measurement uncertainty and must be disclosed with supporting context.

To ensure fair presentation, TTE uses all reasonable and supportable information available at the reporting date, without incurring undue cost or effort. In all cases, TTE prioritizes fair presentation of all sustainability-related risks and opportunities that could reasonably be expected to affect the Company's prospects.

4.2 Key Areas of Professional Judgement

In preparing sustainability-related financial disclosures, TTE has exercised professional judgement in areas where materiality assessment, defining reporting boundary, quantification of financial impact, and time horizon classification are not straightforward and depend on contextual interpretation. These judgments are critical for ensuring disclosures are meaningful and aligned with the decision-making needs of primary users.

Key areas include:

Materiality Assessment

- Determining whether specific sustainability-related risks and opportunities (e.g., drought exposure, labor migration, certification loss) could reasonably be expected to affect cash flows, access to finance, or cost of capital over the short, medium or long term.
- Judgements were applied where the financial effects were uncertain or indirect, but the strategic importance was high (e.g., biodiversity-related and ecosystem services related to risks and opportunities).

Definition of Reporting Boundary

- Deciding whether to include upstream and downstream value chain activities such as third-party logistics emissions and smallholder's agrochemical practices based on operational control and material impact (see Note 3.3).
- Evaluating the relevance of non-controlled activities where TTE remains exposed through certification and buyer obligations.

Time Horizon Classification

- Defining short, medium, and long-term time horizons based on tea cultivation cycles, replanting intervals, labor dynamics, and infrastructure payback periods, and aligning them with the company's strategic planning and business cycles for optimal integration.
- These judgments directly affect how sustainability-related risks and opportunities (e.g., Scope 3 emissions, social equity programs) are disclosed and tracked over time.

Scenario Analysis and Resilience Planning

- Selecting relevant and plausible climate scenarios and interpreting their operational and financial implications (see Note 11.3).
- Judging how to model resilience without precise long-range climate and buyer behavior forecasts.

Quantifying the Financial Impact

- Deciding when quantitative disclosure was not reasonably possible and applying consistent qualitative alternatives that convey the direction and magnitude of potential effects (further addressed in note 4.4).
- Ensuring that omitted or estimated figures are clearly contextualized to prevent misinterpretation or overstatement of certainty.

All such judgments were guided by a conservative, consistent approach, prioritizing transparency, comparability, and faithful representation.

4.3 Significant Sources of Measurement Uncertainty

Many of TTE's sustainability-related financial disclosures involve material estimation uncertainty. These uncertainties arise when inputs or assumptions necessary for quantification involve significant variability, are based on incomplete data, or reflect long-term projections with evolving methodologies.

TTE discloses the following key areas of measurement uncertainty, where actual outcomes could differ material from current estimates:

GHG Emissions (Scope 1, 2, and 3)	Physical Climate Risk Projections
<ul style="list-style-type: none"> Estimations rely on third-party emissions factors, especially for Scope 3 sources such as downstream logistics, upstream inputs (e.g., fertilizer use), and business travels. Direct measurement is not feasible for all supplier categories, and assumptions are updated as more accurate sectoral benchmarks become available. 	<ul style="list-style-type: none"> Climate risk models for Sri Lanka vary significantly by region and scenario. Yield projections, land suitability, water availability, and erosion risk estimates depend on assumptions about rainfall, temperature, and seasonal variability particularly in Upcountry drought-prone and Low-country flood zones estates.
Valuation of Nature-Based Benefits	Regulatory and Policy Forecasts
<ul style="list-style-type: none"> Financial benefits from regenerative agriculture, reforestation, and biodiversity programs (e.g., erosion control, carbon sequestration) are qualitatively supported but not fully monetized due to immature ecosystem service valuation tools. These impacts are disclosed as directionally positive but remain subject to future model development. 	<ul style="list-style-type: none"> Estimating the cost impact of potential future requirements (e.g., possible extension of EU deforestation-free supply chains, Corporate Sustainability Due Diligence Directive (CSDDD), Carbon Border Adjustment Mechanism (CBAM)) involves high uncertainty. TTE applies scenario-based assumptions (see Note 11.3), but actual policy adoption, enforcement timing, and buyer implementation vary.
Certification-Linked Compliance and Reputational Risk	
<ul style="list-style-type: none"> Non-quantifiable risk arises from the likelihood of certification failure (e.g., Rainforest Alliance and ISO 22000:2018), which could lead to market access loss or pricing pressure. Although no material loss occurred from restoring certification and managing reputational recovery during the reporting period. 	

In each case, TTE provides clear assumptions and qualitative context to help users understand the nature, scale, and direction of potential financial effects even where numerical precision is not achievable at this stage.

4.4 When Quantification Is Not Reasonably Possible

In several instances, TTE determined that it was not reasonably possible to quantify the financial effects of certain sustainability-related risks or opportunities. In such cases, the company has provided clear qualitative disclosures to describe the nature, direction, and relevance of those effects using the skills, capabilities and resources available to the Company, rather than omit or speculate inaccurately.

Disclosure Criteria and Approach:	
<p>A financial effect was deemed not reasonably quantifiable when:</p> <ul style="list-style-type: none"> The cause-effect relationship between a sustainability factor and financial metrics (e.g., revenue, capex) was too indirect or diffuse, The data required for reliable modeling was incomplete, inconsistent, not yet available, and The future-oriented nature of the matter (e.g., climate regulation, biodiversity and ecosystem valuation) carried significant scenario or policy dependency. 	<p>In all such cases, qualitative disclosures were made that:</p> <ul style="list-style-type: none"> Explain the type and source of the sustainability-related risk and opportunity, Describe its likely direction of impact (e.g., increasing, stabilizing), Identify the value chain area affected (upstream, midstream, downstream), Specify the time horizon (short, medium, or long term), Provide a rationale for why quantitative information was not presented.
<p>Instances where the qualitative approach is used:</p> <ul style="list-style-type: none"> Biodiversity Restoration (Note 7.2): Financial benefits from habitat corridors, buffer zones, or soil regeneration are described qualitatively due to the lack of credible monetization tools for ecosystem services. Scope 3 Emissions (Note 13.2.1): While GHG emissions are quantified, downstream logistics and supplier-related Scope 3 financial effects are disclosed without precise monetary quantification, due to third-party data limitations. 	

Regulatory Exposure, the potential cost of future ESG reporting mandates or import compliance obligations (e.g., EU CSRD or EU Deforestation Regulations) is discussed narratively, as enforceability and scope remain uncertain.

SLFRS Sustainability Related Financial Disclosures

Outcome:

TTE avoids misleading users with overestimated precision while still providing decision-useful information that reflects material sustainability factors transparently. Where feasible, such areas will be transitioned to quantified disclosures in future periods as data systems mature.

4.5 Disclosure of High-Uncertainty Estimates

TTE discloses information about sustainability-related risks and opportunities, estimates that involve a high level of measurement uncertainty, particularly where such estimates could significantly influence users' understanding of the company's financial position, performance, or cash flows. These disclosures are intended to ensure that users can:

- Understand the sources and nature of uncertainty,
- Assess the potential variability of estimates, and
- Place forward-looking assumptions in an appropriate context.

Characteristics of High-Uncertainty Estimates at TTE:

In all cases below, outcomes are affected by long-term projections, third-party modeling, or external policy assumptions:

Estimate Area	Source of Uncertainty	Nature of Potential Impact
Climate Risk Impact	Long-range rainfall and temperature scenarios vary significantly across elevation zones	Could affect estate yields, energy generation, and asset value
Scope 3 Emissions Financial Effects	Incomplete upstream/downstream data, reliance on emission factors	May material affects risk-adjusted cost models and buyer disclosures
Ecosystem Service Valuation (Note 7.3)	No standardized method for monetizing biodiversity or reforestation gains	Could understate long-term benefits of nature-based investments
Regulatory Cost Forecasting	Policy adoption timelines, implementation scope (e.g., expansion of scope of EU Deforestation Regulations, Corporate Sustainability Due Diligence Directive (CSDDD))	Could create unanticipated capex or compliance burdens
Social Infrastructure Return on Investment (ROI)	Payback of housing, education, and healthcare linked to retention outcomes	Financial benefit realization may lag and vary across estates

Disclosures Provided for Each Area:

For each high-uncertainty estimate, TTE discloses:

- The nature of the underlying risk and opportunity,
- The key assumptions used,
- The reason why quantification carries material variability,
- And where applicable, narrative ranges or directional guidance (e.g., "expected to reduce long-term input costs," or "likely to create future audit burden").

When significant changes to assumptions or estimation methods are made, they are flagged and justified in the relevant note (e.g., Note 11.3 on scenario revision).

Commitments Going Forward:

TTE actively monitors these areas and plans to enhance quantification where:

- Data collection systems improve (e.g., field-level emissions tracking, biodiversity baselining),
- Regulatory clarity increases, and
- Market consensus on valuation methodologies (e.g., natural capital accounting) matures.

This ensures a progressive transition from qualitative to quantitative disclosures.

4.6 Approach to Managing Estimation and Judgement Uncertainty

TTE applies a structured and conservative approach to managing estimation and judgement uncertainty in its sustainability-related disclosures. This approach ensures that disclosures remain faithful to the company's operational reality while meeting the expectations of primary users for transparency and comparability.

Guiding Principles

TTE's process is governed by five core principles:

1. Periodic Review and Revision

All key assumptions and methodologies are subject to annual review, and may be adjusted based on:

- Improvements in data availability,
- Regulatory or buyer expectation changes,
- Internal audit findings or post-event outcome evaluations

2. Conservative Assumption Setting

Where a range of assumptions is possible, the company selects conservative, non-optimistic estimates particularly for future-oriented risks (e.g., climate resilience, labor attrition).

3. Use of Reasonable and Supportable Information

Disclosures are based on the best available internal and external data at the reporting date, without incurring undue cost or effort.

4. Qualitative Substitution Where Needed

When high estimation uncertainty exists, TTE substitutes quantitative projections with qualitative descriptions (see Section 4.4), explaining direction, drivers, and risk concentration areas.

5. Proportionality

Skills, capabilities and resources that are available to the Company for preparing those disclosures.

Instances where the above application is used in the Report

- Emission factor updates are reviewed annually and adjusted as national or sectoral datasets (e.g., IPCC, GHG Protocol, Department for Environment, Food and Rural Affairs (DEFRA) GHG emission factors) are refined.

- Climate-related assumptions (e.g., rainfall models, drought frequency) are aligned with updated projections from Sri Lanka's National Adaptation Plan.
- Certification cost and benefit modeling is revised following major Rainforest Alliance (RA) or ISO standard updates or recertification cycles.

Governance Integration

The process is embedded within:

- The Board Audit Committee's oversight function (Note 6.1),
- The "Environment, Social, Economic and Governance (ESEG)" Steering Committee's operational agenda (Note 6.5), and
- The Enterprise Risk Management (ERM) framework, which captures emerging ESG risks and validates control responses (Note 12.2).

This systematic approach allows TTE to transparently represent uncertainty while ensuring disclosures are as decision-useful and investor-relevant as possible.

4.7 Forward-Looking Statements and Limitations

This report contains forward-looking statements relating to sustainability-related risks, opportunities, strategies, and financial impacts that reflect TTE's current expectations, assumptions, and estimates as of the reporting date. These statements are provided to support investor decision-making, but they are inherently uncertain.

Nature of Forward-Looking Content

Forward-looking disclosures in this report include:

- Climate scenario analysis results and projected resilience measures (Note 11.3),
- Anticipated costs and efficiency benefits from ESG investments (Note 10.4.2),
- Strategic timelines and replanting responses to climate and labor risks (Note 9),
- Expected benefits of biodiversity programs and community inclusion efforts (Notes 10.4.2, 7.2).

These are based on internal models, available external forecasts (e.g., climate models, policy outlooks), and management assumptions regarding future trends.

Limitations and Risk Factors

Actual outcomes may differ in materiality due to:

- Variability and uncertainty in climate science and local agroecological conditions,
- Future regulatory developments that affect ESG reporting, certification, or export market eligibility,
- Changes in buyer preferences or investor expectations regarding traceability, labor rights, or emissions performance,
- Evolution in ESG rating tools & platforms, certification frameworks, or national policies affecting the plantation sector.

Where appropriate, ranges, scenarios, or qualitative framing are used in place of deterministic forecasts.

Disclosure Approach

TTE does not guarantee the realization of any forward-looking statement and does not undertake to update them, except as required by law or major reporting updates. Statements are included to:

- Enable informed investor interpretation of risk exposures,
- Demonstrate alignment with leading sustainability disclosure standards (e.g., SLFRS Sustainability Disclosure Standards, TNFD, Science Based Targets initiative (SBTi) and Science Based Targets Network (SBTN),
- Promote transparency around assumptions and long-range risk mitigation efforts.

Note 5: Materiality Assessment

5.1 Purpose and Scope

TTE applies the SLFRS S1 materiality principle to ensure its sustainability-related financial disclosures focus on matters that could reasonably be expected to affect the company's prospects and thereby influence decisions made by existing and potential primary users. Broader stakeholder topics addressed in the Integrated Report are excluded from these disclosures unless such information meets the objective of SLFRS S1.

5.2 Materiality Definition and Application

Materiality is defined by SLFRS S1 as information that, if omitted, misstated, or obscured, could reasonably be expected to affect the company's cash flows, access to finance, or cost of capital over the short, medium, or long term. TTE applies this principle by:

- Focusing on sustainability-related risks and opportunities with direct or indirect financial impact,
- Avoiding disclosure of non-material items that would dilute decision-useful content,
- Considering both current and reasonably anticipated effects where data is available.

Materiality Identification & Assessment Process

1. Identification

- Internal reviews
- Industry benchmarks & standards
- Stakeholder feedback

2. Assessment

- Likelihood of occurrence
- Magnitude of financial impact
- Qualitative & quantitative inputs

3. Prioritization

- Rank issues in a materiality matrix
- Emphasize strategic and compliance relevance

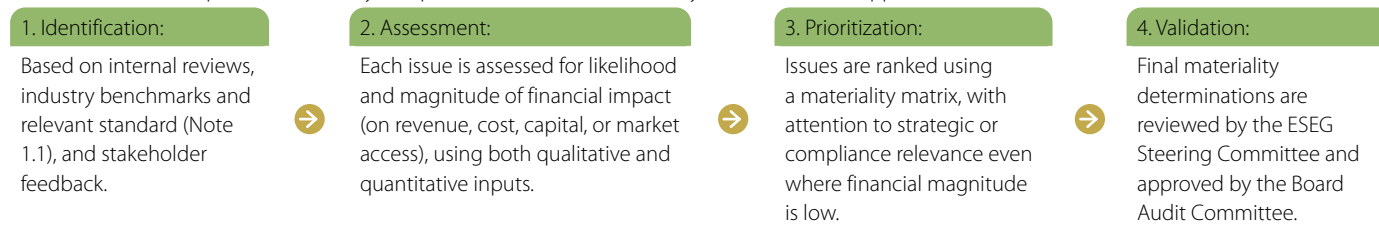

4. Validation

- Review by the ESEG Steering Committee
- Approval by the Board Audit Committee

SLFRS Sustainability Related Financial Disclosures

5.3 Identification and Assessment Methodology

TTE uses a structured process, to identify and prioritize material sustainability-related risks and opportunities:

Material information pertaining to sustainability-related risks and opportunities are provided in Notes 7–9, with related financial implications in Note 12.

5.4 Quantitative and Qualitative Judgement Criteria

TTE applies the following criteria when classifying issues as material:

- Financial thresholds: Impact on cost, revenue, capex, or credit indicators.
- Likelihood thresholds: Moderate to high likelihood, or low probability with high consequences (e.g., climate disasters);
- Strategic and regulatory significance: Items tied to climate resilience, ESG regulation, or buyer compliance obligations.
- Professional judgement: Used where quantification is limited but directional relevance is clear (e.g., biodiversity, Scope 3 exposure).
- Quantitative Financial Threshold: Issues with a potential impact of Rs 50 Mn or more (approximately 1% of annual revenue) on costs, revenue, CAPEX or credit metrics.

When in doubt, the company errs on the side of inclusion if materiality is reasonably foreseeable.

Financial Materiality Thresholds

The following thresholds were applied to determine the financial materiality of sustainability-related risks and opportunities (SRROs) for Talawakelle Tea Estates PLC during the reporting period:

Quantitative Criteria	Qualitative Criteria
<p>A sustainability-related item is deemed financially material if it meets one or more of the following thresholds, either individually or cumulatively:</p> <ul style="list-style-type: none"> Impact on revenue, cost, or capital expenditure exceeding Rs. 25 million in any given reporting year; Adjustment to carrying value of assets or liabilities exceeding 1% of total asset base; Variability in operating cash flows of $\pm 2\%$ or more linked to a sustainability factor (e.g., extreme weather, labor shortages); Financial effect forecasted over time exceeding Rs. 100 million in cumulative terms across the short, medium, or long term, as defined in Note 7.1. 	<p>Items not meeting the quantitative thresholds may still be deemed material based on professional judgment where:</p> <ul style="list-style-type: none"> Reputational risks arising from failure to meet ESG expectations (e.g., loss of Rainforest Alliance certification or buyer non-compliance) could impair market access or brand equity. Social license to operate is at risk due to labor disputes, community dissatisfaction, or land-use grievances, even in the absence of quantifiable financial effect. Non-compliance with evolving regulatory frameworks (e.g., EU deforestation regulation, SBTi alignment) could result in long-term restrictions, penalties, or investment detraction. Strategic significance is high due to linkage with long-term resilience, such as biodiversity restoration or climate adaptation, even where current valuation is not feasible.

Items not meeting any of these thresholds or criteria are classified as non-material for the reporting period. However, they are retained in the internal sustainability risk register and monitored for changes in magnitude, likelihood, or stakeholder relevance.

5.5 Ongoing Review on Materiality Assessment

Materiality is reviewed annually in line with financial reporting cycles and reassessed during interim periods if significant internal or external changes occur. Key triggers include:

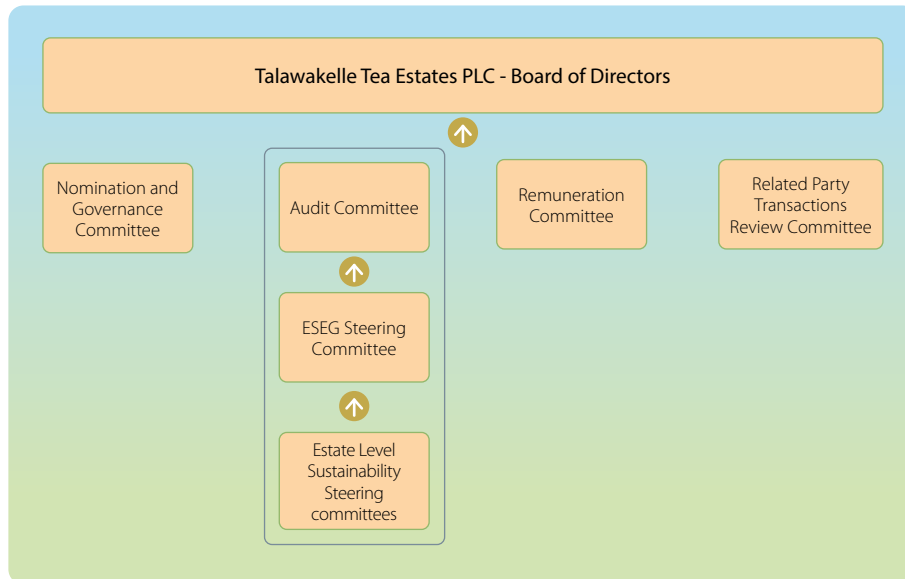

- Climate and environmental shifts (e.g., drought, extreme weather),
- Regulatory developments,
- Buyer and investor ESG expectations,
- Technological and market transitions affecting operations or product demand.
- A significant change in the entity's value chain
- A significant change in the entity's business model, activities or corporate structure
- A significant change in an entity's exposure to sustainability-related risks and opportunities (for example, a supplier in the entity's value chain is affected by the introduction of a new regulation that the entity had not anticipated).

Any emerging material sustainability risks or opportunities identified outside the reporting period will be addressed in subsequent disclosures.

Note 6: Sustainability Governance

GRI 2-9, 12, 13, 14, 17, 18

6.1 Governance Oversight Structure

These responsibilities are formalized according to Hayleys group direction under "Hayleys Life code" (ESG Framework), and TTE's Sustainability Governance Framework under "2030 ReGen Agenda". Directors receive formal induction on relevant standards.

6.2 Sustainability Competence and Skills

TTE ensures its Board and committees possess or have access to sustainability-related expertise.

- The BAC includes members with experience in plantation operations, agroecology, and corporate governance.
- Board composition is periodically reviewed to ensure alignment with emerging ESG themes (e.g., climate, biodiversity, just transition).
- A structured development program provides:
 - Annual ESG training,
 - Regulatory briefings,
 - Updates on investor ESG trends and Sri Lanka-specific policy changes.

This ensures the Board remains well-informed to govern sustainability-related matters effectively.

Governance Body Key Sustainability & Climate Responsibilities

Governance Body	Key Sustainability & Climate Responsibilities
Board of Directors	<ul style="list-style-type: none"> • Approve and review corporate sustainability & climate strategy aligned to Strategic Imperatives • Set sustainability and climate relates -risk appetite, ESG policies and oversight frameworks • Monitor progress against GHG, and other ESG related targets • Champion transparent stakeholder engagement and disclosure
Audit Committee	<ul style="list-style-type: none"> • Oversee internal controls and data integrity for ESG metrics • Ensure accuracy and completeness of SLFRS S1-S2 disclosures other integrated reporting disclosures
ESEG Steering Committee	<ul style="list-style-type: none"> • Translate Board ESG strategy into cross-functional programs (scenario analysis, ESG strategies) • Maintain dynamic ESG, climate & biodiversity risk register and seize emerging ESG opportunities
Estate-Level Sustainability Steering Committees	<ul style="list-style-type: none"> • Implement corporate ESG policies on the ground (GAP, water-harvesting, soil ecosystem conservation, climate adaptation) • Track estate-specific KPIs, escalate incidents or innovative pilots to ESEG, and ensure alignment with TTE's Strategic Imperatives

TTE maintains a clearly defined governance framework to oversee sustainability-related risks, opportunities, and decision-making.

Oversight responsibilities rest with the Board of Directors, with specific delegation to the Board Audit Committee (BAC). The BAC meets quarterly and is responsible for:

- Reviewing and endorsing ESG strategy and climate transition plans,
- Overseeing material ESG risks and their alignment with corporate strategy,
- Monitoring performance against sustainability-related targets and disclosures,
- Approving key policies.

Sustainability Competence Skills

Board & Committee Expertise

- Plantation operations
- Agroecology
- Corporate governance

Periodic Composition Review

- Align membership with emerging ESG themes (climate, biodiversity, just transition)

Structured Development Program

- Annual ESG training
- Regulatory briefings
- Investor-ESG trend updates & Sri Lanka policy changes

Outcome

- Ensures the Board remains well-informed to govern sustainability matters effectively

SLFRS Sustainability Related Financial Disclosures

Skill Matrix of Board of Directors

Skill and Experience	Discription	Relevant to TTE and strategy
Plantation Operations 	Experience managing large-scale plantations, agronomy best-practices, yield optimisation and Good Agriculture practices (GAP) compliance.	Drives Operational Excellence by boosting productivity, quality and traceability across estates.
Financial Expertise 	Proficiency in corporate finance, SLFRS reporting, budgeting and cost control in agricultural operations.	Underpins Operational Excellence and Business Diversification through robust capital allocation and risk-adjusted growth.
Governance and Transparency 	Deep knowledge of Sri Lankan company law and finance and sustainability disclosure rules.	Secures overall governance and Environmental Stewardship & Climate Change credibility and investor trust via top-tier oversight and reporting.
Sustainability & ESG 	Led sustainability strategy, climate action, environment and social management practices.	Advances Social aspects, Nurturing people, Environmental Stewardship & Climate Change by embedding climate, nature and social targets into the business.
Risk Management 	Track record identifying and mitigating financial, operational and climate-related risks across the value chain.	Builds resilience under Operational Excellence and Environmental Stewardship, protecting TTE's assets against volatility and climate shocks.
Digital Transformation 	Experience deploying agritech, IoT/data analytics, ERP systems and cyber-security in plantation sector.	Accelerates Operational Excellence and Winning with the Customer by unlocking real-time insights, traceability and service innovation.
People & Culture 	Expertise in organisational culture, talent development, succession planning and labour-relations frameworks.	Fuels Nurturing Our People through leadership pipelines, engagement and inclusive practices that sustain long-term performance.
Market & Customer Insights 	Understanding of global tea markets and other (Cinamon, rubber etc.), buyer requirements, traceability and brand-driven customer engagement.	Powers Winning with the Customer and Business Diversification by aligning products, channels and partnerships with evolving market demands.
		

6.3 Board Information Flows and Decision-Making

Sustainability performance and risks and opportunities are reported to the BAC on a quarterly basis, supplemented by ad hoc briefings on urgent sustainability related material information. Updates are channeled through the Director/CEO by the ESEG Steering Committee and the Head of Finance and Head of Sustainability, who serves as the Committee Advisor and Secretary respectively, and include the following:

- Progress on ESG targets (e.g., GHG emissions, social indicators, certification),
- Emerging risks and incidents (e.g., Extreme weather event, compliance issues),
- Status of key initiatives (e.g., biodiversity corridors, water security, Revenue share model).

The BAC is involved in:

- Strategic investment review (e.g., hydropower, regenerative land use),
- ESG-linked capital allocation decisions,
- Approval and monitoring of ESG key performance indicators (KPIs) and public disclosures.

Progress summaries are shared quarterly, with additional governance details in Note 6.6.

6.4 Integration of ESG into Strategic Governance

TTE integrates ESG factors into its strategic planning, risk management, and corporate decision-making. ESG is embedded in:

- Strategic planning: climate adaptation, replanting, natural resources management, and market access.
- Capital allocation: investments are screened for ESG implications (e.g., energy efficiency, biodiversity impact).
- Major transactions: ESG factors influence supplier selection, workforce planning, land development, and product design.

Sustainability performance is also considered in accessing sustainability-linked financing and enhancing long-term competitiveness.

6.5 Board Audit Committee Roles and Internal Controls

BAC is responsible for overseeing the setting and progress monitoring of sustainability-related targets across environmental, social, and governance areas.

- **Target Setting:** Key ESG targets including those related to GHG emissions, biodiversity restoration, certification compliance, and workforce inclusion are developed by the Sustainability Team & ESG Steering Committee and approved by the BAC. Targets are aligned with the company's 2030 Regenerative Agenda and business strategy (see Note 15.1).
- **Progress Monitoring:** Performance is reviewed quarterly using an ESG performance dashboard and integrated scorecards (see Note 6.3 and 15.3). Deviations are escalated with corrective actions tracked.
- **Link to Remuneration:** TTE is currently in discussion regarding the integration of selected ESG KPIs into the performance evaluations of executives and senior management. (see Note 15.4).

Skill Matrix of ESEG Steering Committee

Skill and Experience	Description	Relevant to TTE and strategy
Plantation Operations Management 	Day-to-day oversight of field operations, agronomy scheduling, input optimisation and GACP audit readiness.	Ensures Operational Excellence by driving yield, quality and traceability on the ground.
Financial & Performance Management 	Budget ownership, cost-variance analysis, P&L stewardship and monthly/quarterly forecasting.	Underpins Operational Excellence and Business Diversification via disciplined resource allocation and performance tracking.
Compliance & Internal Controls 	Implements SLFRS controls, regulatory reporting, internal audit follow-up and policy enforcement.	Secures Environmental Stewardship & Climate Change and Winning with the Customer by upholding standards and trust.
Sustainability & ESG Implementation 	Translates ESG targets into departmental KPIs, manages SBTi/TNFD projects, drives supplier engagement on climate and nature actions.	Accelerates Environmental Stewardship & Climate Change by embedding sustainability into everyday operations.
Enterprise Risk & Crisis Management 	Monitors risk registers, leads cross-functional risk reviews, updates mitigation plans and manages incident response protocols.	Builds Operational Excellence and Environmental Stewardship resilience against market, compliance and climate disruptions.
Digital & Process Innovation 	Drives ERP/IoT roll-outs, data-driven process improvements, automation pilots and cybersecurity hygiene programs.	Fuels Operational Excellence and Winning with the Customer through faster decision-making and enhanced service delivery.
People Leadership & Culture Development 	Coaches teams, leads talent reviews, implements learning programmes and champions inclusion, health & safety best practices.	Delivers Nurturing Our People by building capability, engagement and a safe, high-performance culture.
Market, Sales & Customer Management 	Translates market insights into sales plans, manages key accounts, oversees traceability/quality audits and drives channel partnerships.	Powers Winning with the Customer and Business Diversification by aligning offer, brand and distribution with evolving buyer needs.
		

Day-to-day execution of sustainability strategy is led by the Company Sustainability Team and ESEG Steering Cross functional team of, who reports to the Director/CEO, Managing Director and BAC. This role oversees:

- ESG strategy implementation across TTE 16 estates and 15 factories, Mini-hydro plant operation under subsidiary companies.
- Certification (e.g., RA, ISO 14001/14001-1/50001),
- Sustainability disclosures, Scope 1,2&3 tracking, and ESG reporting.

Supporting structures include:

- The Estate level Sustainability steering Committee (monthly reviews),
- ESG performance dashboards and scorecards (estate and corporate level),
- Internal ESG audits and compliance reviews (quarterly),
- Integration of ESG into the Enterprise Risk Management (ERM) framework.

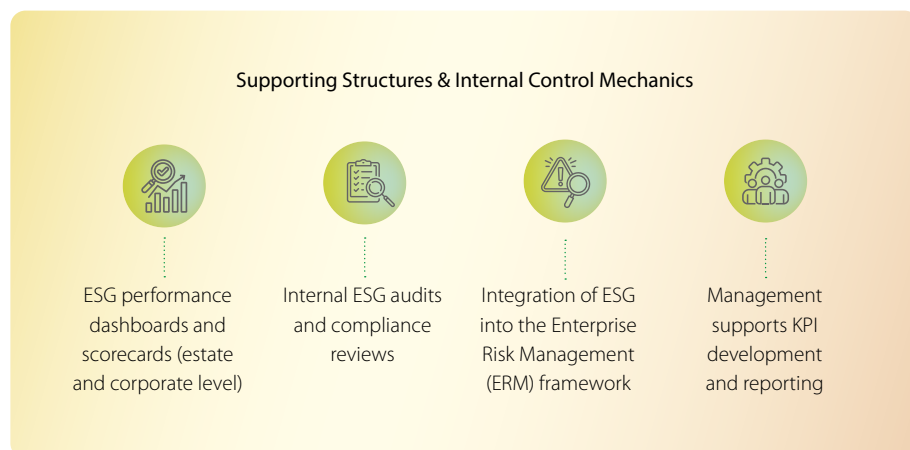

Management supports KPI development and reporting, with Board-level oversight of performance linkages addressed in Note 6.6 and 15.4.

Note 7: Sustainability-related Risks and Opportunities

Overview of Sustainability-related Risks and Opportunities

TTE operates within a complex socio-environmental context where sustainability-related risks and opportunities influence the company's long-term financial prospects. This note presents an overview of risks and opportunities assessed as material or non-material across the Environmental, Social, and Governance (ESG) dimensions. Only items that could reasonably be expected to affect TTE's cash flows, cost of capital, or access to finance are classified as material. Strategic responses, financial impacts, business resilience considerations, risk management systems, and metrics are disclosed separately in Notes 9 to 13.

6.6 Management Roles and Internal Controls

SLFRS Sustainability Related Financial Disclosures

Classification of Sustainability Related Risks and Opportunities

ESG Category	Sustainability-related Risks	Sustainability-related Opportunities
Environmental	<ul style="list-style-type: none"> Climate-related Transition Risk (low-emission compliance and decarbonization costs) Climate-related Acute Physical Risk (extreme weather events) Climate-related Chronic Physical Risk (rising temperatures, erratic rainfall affecting crop productivity) 	<ul style="list-style-type: none"> Nature-based Opportunity (Biodiversity Restoration and Ecosystem Resilience)
Social	<ul style="list-style-type: none"> Labor Scarcity and Wage Escalation (workforce migration and cost pressure) 	-

Time Horizons Used for Assessment

TTE uses the following standardized timeframes, aligned with internal planning cycles, to assess when the financial effects of each risk or opportunity are expected to emerge:

Short-term (1–3 years)	Medium-term (3–5 years)	Long-term (beyond 5 years)
Operational disruptions, certification changes, labor force dynamics.	Shifts in weather patterns, regulatory evolution, wage restructuring.	Change of climate patterns, Biodiversity degradation, chronic temperature rise, ESG-driven market shifts.

Each item disclosed in Notes 7.2–7.4 has been evaluated within one or more of these timeframes.

Affected Operational Areas

Sustainability-related risks and opportunities are expected to affect the following areas:

Estate Operations	Labor-Dependent Functions	Agro-Ecological Cultivation Zones	Export Channels	Internal ESG Oversight Systems
Particularly in lower divisions prone to heavy rainfall and landslides (e.g., Deniyaya).	Including harvesting and field maintenance units with high absenteeism.	Subject to rainfall and temperature variability.	Especially those reliant on ESG certifications and buyer sustainability compliance.	Under evaluation for digital transformation.

This overview provides a structured context for the disclosures in Notes 7.2 to 7.4, which detail sustainability-related risks and opportunities under each ESG category. Connected disclosures regarding strategy, risk management, financial effects, and performance indicators are presented separately in Notes 9 to 13.

Note 7.1 Environmental Risks and Opportunities

This section presents the environmental-related risks and opportunities that could reasonably be expected to affect the TTE prospects. Classification is based on materiality thresholds defined in Note 5.4.

Only material information pertaining to sustainability-related risks and opportunities that could reasonably expected affect the TTE's prospects are included below. Strategic responses, financial impacts, and performance targets are discussed separately in Notes 9 through 13.

#	Type	Name	Description	Time Horizon	Materiality Basis
CRR1	Climate-related transition risk	Compliance with Low-Carbon Regulations and Decarbonization Costs	Increasing compliance pressure from buyers and regulatory frameworks (e.g., SBTi, EU CBAM) requiring emissions reduction and low-carbon operations.	Medium to Long Term	Investment needs for decarbonization exceed Rs. 50 Mn in low carbon fertilizer and renewable energy, GHG monitoring, and fuel transition.
CRR2	Climate-related physical risk (Acute)	Extreme Rainfall and Flood Disruptions	Intensified rainfall events causing flash floods, harvest delays, infrastructure damage, and production shutdowns.	Short to Medium Term	Estimated annual disruptions and recovery costs exceed Rs. 60 Mn, particularly during monsoon season.

#	Type	Name	Description	Time Horizon	Materiality Basis
CRR3	Climate related physical risk (Chronic)	Rising Temperatures Affecting Yield and Crop Viability	Gradual temperature increases reducing yield quality, altering bud formation, and shortening or lengthening plucking intervals. Elevated pest/disease risks also expected.	Medium to Long Term	Long-term yield impacts projected to cause annual revenue loss > Rs. 50 Mn across vulnerable estates.
SRO1	Nature-based Opportunity	Biodiversity Restoration and Ecosystem Resilience	Enhancing ecological resilience through reforestation, agroforestry, and conservation of natural capital to improve long-term climate adaptation.	Medium to Long Term	Over 100 hectares under restoration. Estimated co-benefits and potential nature finance opportunities > Rs. 75 Mn.

7.2 Social-related Risks and Opportunities

This section presents the social-related risks and opportunities identified by TTE that could reasonably be expected to affect its prospects. Only items assessed as material, based on the thresholds set out in Note 5.4, are included in the table below.

#	Type	Name	Description	Time Horizon	Materiality Basis
SRR1	Risk	Labor Scarcity and Wage Escalation	Declining availability of estate-based labor due to generational migration and alternate employment opportunities. Rising wage expectations are creating operational and cost pressures.	Short to Medium Term	Estate-level productivity disruptions and wage-related cost increases projected to exceed Rs. 100 Mn annually.

Note 7.3 Governance Risks and Opportunities

No governance-related risks or opportunities have been identified, which could reasonably be expected to affect the Company's prospects and met the criteria for material disclosure in this reporting cycle.

Oversight mechanisms, board-level responsibilities, and sustainability governance processes are disclosed in Note 6 and Note 12 (Risk Management).

Note 8: Business Model and Value chain

8.1 Business Model Overview

Talawakelle Tea Estates PLC is a vertically integrated plantation company primarily engaged in the cultivation, manufacture, and sale of high-quality tea. The company operates 16 estates and 15 factories in Sri Lanka's Upcountry and Low-country regions, supported by central administration and two subsidiary companies of renewable energy generation from Mini-hydro plants.

The business model encompasses:

- End-to-end operations from field to factory,

- Integration of environmental and social sustainability practices (see Notes 7 and page 29),
- A community-embedded workforce structure and estate-centered infrastructure.
- This vertically integrated model enables TTE to control quality, sustainability performance, and traceability across the value chain (Refer to page 29 – Our Position in the Value Chain).

8.2 Key Inputs and Resources

Core inputs include:

- Agricultural supplies (fertilizers, agrochemicals, planting materials),
- Labor from estate-based communities (see Note 8.2),
- Water resources and renewable energy (e.g., mini-hydro),
- Infrastructure such as roads, housing, and factory equipment.

Natural and human capital form the foundation of the company's value creation model (refer to Notes 7.1 and 8.3).

8.3 Value Chain Activities

TTE's value chain spans:

Upstream	Midstream	Downstream
Input sourcing, out grower engagement, and labor services associated risks include input price volatility, labor shortages, and certification dependencies.	Estate operations and tea manufacturing affected by climate risk, biodiversity performance, and labor productivity.	Tea auction sales, export to ESG-conscious markets, and buyer certification compliance sensitive to reputation, audit performance, and Scope 3 traceability.

SLFRS Sustainability Related Financial Disclosures

8.4 External Dependencies and Stakeholder Linkages

The business model is heavily interlinked with:

- Estate communities and worker welfare systems,
- Certifying bodies (Rainforest Alliance, ISO) and buyer expectations,
- Local ecosystems and climate-sensitive landscapes,
- Regulatory environments shaping labor, environmental, and market access conditions.

The ability to preserve and grow value depends on continuous alignment of value chain practices with sustainability principles and stakeholder needs.

8.5. Business model and value chain impacts of identified SRROs

CRRO/SRRO	Current effects of SRROs to business model and value chain	Anticipated effects of SRROs to business model and value chain
Transition Risk - Compliance with Low-Carbon Regulations and Decarbonization Costs	Exposure across field operations (chemical/fertilizer inputs), factory thermal energy usage, and logistics, including Scope 3 emissions from inbound and outbound transport.	Transition to low-emission fertilizers and chemical leasing models; factory decarbonization via biomass and renewable energy; enhanced logistics efficiency; increased ESG traceability to comply with buyer and regulatory carbon reporting standards.
Acute Physical Risk - Extreme Rainfall and Flood Disruptions	Disruption to estate accessibility and supply chain continuity in high-risk zones such as Deniyaya, Talawakelle, and Nanu Oya during monsoon periods.	Strengthened climate-resilient infrastructure (e.g., slope protection, road reinforcement); integration of seasonal production buffers and emergency response protocols into estate planning.
Chronic Physical Risk - Rising Temperatures Affecting Yield and Crop Viability	Declining productivity in high-altitude, rain-fed blocks (>1,200m) due to heat stress and altered agronomic cycles.	Shift to climate-resilient cultivars and adaptive replanting cycles; revised agronomic practices including shade management, soil moisture retention, and pest resilience strategies.
Biodiversity Restoration and Ecosystem Resilience	Biodiversity degradation in buffer zones, riparian strips, and degraded natural capital near estate field boundaries.	Expansion of agroforestry systems, ecological corridors, and habitat buffers; integration of ecosystem services into estate planning; opportunity to access biodiversity-linked financing (e.g., PES).
Labor Scarcity and Wage Escalation	Rising absenteeism and operational strain in labor-intensive field functions across all divisions. Increase in operating expenses and retirement benefit obligations due to wage increase	Workforce stabilization through estate-level housing, welfare, and retention schemes; optimized labor deployment; incentive realignment and preservation of estate-based employment models.

Note 9: Strategy and Decision-Making

9.1 Strategic Integration of Sustainability-Related Risks and Opportunities

TTE has embedded responses to material sustainability-related risks and opportunities into its core strategic and operational planning processes. These responses are designed to safeguard long-term value, maintain market competitiveness, and ensure resilience across agro-ecological and labor systems.

The table below summarizes how each material item disclosed in Note 7 is reflected in strategic decision-making:

Material Risk / Opportunity	Strategic Integration	Progress against the Strategic Plans
Transition Risk (Compliance with low-carbon regulations and decarbonization costs)	Incorporated into the company's decarbonization roadmap through investments in Chemical leasing project for agrochemical and fertilizer use reduction, mini-hydro and solar power generation, fuel (Biomass)-efficient boilers, GHG tracking systems, and energy optimization initiatives. These form part of the company's Net Zero commitment (aligned and verification with SBTi).	<ul style="list-style-type: none"> • Convert all boilers to biomass boilers and 3 mini-hydro plants operational as of 2024/25. • 4.1% YoY reduction in Scope 1 emissions and 5% reduction in thermal energy use per kg made tea. • SBTi re-validation achieved for 2024 targets. • Invest in energy and fertilizer transition initiatives.
Acute Physical Risk (Extreme weather events, including floods, landslides, and droughts.)	Estate infrastructure investments prioritize climate resilience: Factory construction, land management practices. These responses are targeted to high-risk estates in Deniyaya region.	<ul style="list-style-type: none"> • Emergency OPEX for landslide/flood recovery in 2024/25 was Rs. 81.7 Mn. • Soil Retaining mechanism and slope stabilization completed across all landslide-prone divisions. • Business continuity protocols establishment.

Material Risk / Opportunity	Strategic Integration	Progress against the Strategic Plans
Chronic Risk (Rising temperatures affecting yield and crop viability)	Strategic shift towards climate-smart cultivars and agroforestry. Estate-level replanting cycles and shade tree integration are restructured to accommodate long-term climate stress exposure.	<ul style="list-style-type: none"> 62 hectares replanted using climate-resilient cultivars. Shade tree density increased in vulnerability in each elevation zones.
Labor Scarcity and Wage Escalation	Social investments are embedded in the estate-level master plans to address workforce retention. Strategic actions include upgraded housing, education programs, and inclusive employment policies.	<ul style="list-style-type: none"> Provision for revised wage structures. New worker housing units constructed; 16 estate schools supported. Absenteeism rate reduction.
Biodiversity Opportunity (Ecosystem restoration and resilience)	The company's landscape planning strategy incorporates restoration of riparian buffers, forest patches protection, and biodiversity corridors in alignment with Rainforest Alliance standards and long-term resilience planning.	<ul style="list-style-type: none"> Invest in ecosystem restoration projects. 13 km of biodiversity corridors mapped and restored. Nature-positive and regenerative uplift certified for all estates under Rainforest Alliance.

Sustainability-related risks and opportunities have shaped TTE's operational, financial, and governance strategies.

Operational Realignment:

- Land-use planning prioritizes climate resilience and biodiversity.
- Labor strategy focuses on estate-based service delivery and inclusive employment.
- ESG monitoring is now embedded in governance structures (Note 6.3).

Investment Strategy Influence:

- Capex prioritized Solar, Regenerative agriculture with soil restoration.
- Projects are evaluated based on financial return and ESG alignment.

Market Strategy:

- ESG credentials drive brand differentiation and premium pricing.
- Verified sustainability disclosures strengthen investor appeal.

Strategic Alignment Overview

Operational Realignment

- Prioritize climate-resilient, biodiversity-friendly land use
- Shift labour strategy to estate-based services and inclusivity
- Embed ESG monitoring into governance

Investment Focus

- Target CAPEX on solar and regenerative agriculture
- Assess projects by both financial return and ESG fit

Market Positioning

- Leverage ESG credentials for brand differentiation and pricing
- Use verified disclosures to bolster investor confidence

9.3 Impact on Strategic Planning, Capital Allocation, and Financial Planning

The material sustainability-related risks and opportunities disclosed in Note 7 have directly influenced TTE's enterprise-wide planning priorities, capital investment strategy, and financial decision-making processes. These impacts include:

Capital Expenditure (CapEx) Allocation	Operating Cost Planning	Revenue and Market Access	Rolling Strategic Review Process
<ul style="list-style-type: none"> Climate Resilience Investments: CapEx has been allocated for Factory construction and upkeep, solar and mini-hydro expansions, sustainable land management, stabilization infrastructure, rainwater harvesting, and drought-tolerant cultivars. Biodiversity and Soil Health: Investment in native forest buffer zones and regenerative agriculture pilots are aligned with long-term ecosystem resilience targets. Workforce Infrastructure: Worker housing upgrades, health facilities, and retention-linked programs are prioritized to address the scarcity risk of labor. 	<ul style="list-style-type: none"> Certification Compliance: Budget allocations account for ongoing Rainforest Alliance and ISO compliance, internal audit cycles, and data system upgrades. Climate Disruption Reserves: Operating contingency is set aside to cover estate-level recovery costs from rainfall-related disruption. 	<ul style="list-style-type: none"> Sustainability Premiums: TTE's ESG positioning underpins pricing premiums in export markets and buyer continuity in high-value segments. Futureproofing through Disclosure Readiness: Verified sustainability disclosures under SLFRS S1/S2 support buyer trust and investor ESG screening. 	<p>Material sustainability factors are formally reviewed through the companies:</p> <ul style="list-style-type: none"> Annual strategic planning cycle, Capex approval process, Board Audit Committee oversight (Note 6.1).

Forecasted financial impacts from these factors are disclosed in Note 10.2 and resilience planning is detailed in Note 11.4.

SLFRS Sustainability Related Financial Disclosures

9.4 Strategic Trade-Offs and Long-Term Positioning

In addressing material sustainability-related risks and opportunities, TTE has adopted a long-term perspective that emphasizes resilience, ESG compliance, and market differentiation. The company routinely evaluates trade-offs when allocating resources or selecting risk mitigation pathways. Examples include:

Strategic Trade-Off	Decision Taken	Outcome / Justification
Replanting vs. Ecosystem Protection	Dedicating land in favor of reforestation sensitive areas and establishing biodiversity buffers.	Preserved certification status (e.g., RA), enhanced natural capital, and mitigated flood and erosion risks.
Agrochemical Yield vs. Certification Compliance	Reduced chemical dependency in favor of Integrated Nutrient Management (INM) and regenerative inputs.	Short-term yield trade-offs offset by certification continuity and improved soil health.
Labor Mechanization vs. Community Stability	Limited mechanization in labor-intensive estates to preserve estate-based livelihoods.	Reinforced worker trust, supported social license to operate, and avoided reputational risk.
Immediate Cost Efficiency vs. Long-Term Energy Resilience	Invested in solar and mini-hydro expansion despite higher upfront CapEx.	Reduced long-term energy costs, lowered Scope 2 GHG emissions, and strengthened ESG performance.

These trade-offs are assessed within TTE's multi-capital framework, considering both financial and non-financial value preservation over time.

Note 10: Financial Position, Financial Performance and Cash Flows

GRI 3-3 | 201-2 | 13.2.1, 13.2.2

10.1 Current Period Financial Effects

The table below outlines the known or observable impacts on financial position, performance, and cash flows during the reporting period ended 31 March 2025. These impacts have arisen from TTE's material sustainability-related risks and opportunities:

- Cash flow impacts include increased expenditure on climate resilience infrastructure and workforce costs.
- Financial Performance impacts reflect short-term yield volatility, increased operating expenditure (OPEX), and adjustments to labor cost structures.
- Balance sheet impacts are evident in targeted CapEx on agro-input, energy, housing, and reforestation projects, with no material asset write-downs reported.

TTE has not identified any significant risk of material adjustment to the carrying amounts of assets or liabilities in the next annual reporting period. However, resilience and asset valuation sensitivity to physical climate risks, labour shortages, and related cost pressures are continuously monitored.

10.2 Anticipated Financial Effects Across Time Horizons

The table in note 10.4.4 summarizes how material sustainability-related risks and opportunities are expected to affect TTE's financial position, cash flows, performance, and cost of capital over the

short (1–3 years), medium (3–5 years), and long term (>5 years):

- Effects are derived from scenario analysis (Note 11.3), strategic alignment (Note 9), and materiality determination (Note 5.4).
- CapEx planning is especially sensitive to biodiversity and fertilizer and energy transition strategies.
- Cash flows and operating performance are forecast to remain moderately exposed to rainfall disruption and labor cost escalation.
- Opportunities such as renewable energy expansion and ecosystem service restoration are expected to reduce long-term cost structures and enhance pricing resilience.

10.2.1 Risk of Material Adjustment to Carrying Amounts

Based on the company's current evaluation of sustainability-related risks and opportunities, no significant risk of material adjustment to the carrying amounts of assets or liabilities is expected within the next annual reporting period.

However, the following material factors are monitored closely due to their potential proximity to materiality thresholds:

Extreme rainfall and slope instability	Labor scarcity and wage escalation pressures	Biodiversity restoration investments
may elevate restoration and maintenance costs for vulnerable estate infrastructure, potentially affecting repair provisions and asset maintenance reserves (see Note 7.2).	could influence employee benefit liabilities and future wage-linked expense planning, particularly in worker-dense divisions (see Note 7.3).	linked to ecosystem regeneration (e.g., reforestation, agroforestry corridors) may trigger new capitalized asset categories or influence asset valuation methodologies if nature-based assets are recognized over time. Although not expected to materially adjust current carrying amounts, this is a monitored accounting area as methodology evolves (see Note 7.2).

10.2.2 Estimation Uncertainty and Quantification Limitations

Where financial effects of sustainability-related risks and opportunities are not separately identifiable or involve high levels of estimation uncertainty, TTE provides qualitative disclosures. The following areas currently have limitations that affect full quantification:

Chronic Climate Risk (Note 7.2): Long-term yield decline due to temperature increases has been observed in high-altitude zones; however, isolating this impact from other agronomic variables remains complex. No specific revenue impairment is recorded but revenue sensitivity is tracked estate-wise through yield.

Biodiversity Opportunity (Note 7.2): TTE's investments in reforestation and agroforestry buffers are long-cycle interventions. Although potential cost-avoidance and ecosystem service value are expected to contribute to financial performance in the medium to long term, a standardized methodology for asset capitalization or monetization is not yet available.

Labor Scarcity Impacts (Note 7.3): While OPEX adjustments for wages and retention investments are budgeted annually, the indirect productivity impacts (e.g., absenteeism) are not separately measurable due to overlapping influences such as estate weather and terrain.

TTE identifies the following areas with high levels of estimation uncertainty:

Chronic Climate Risk
Due to temperature rise

Biodiversity Opportunity
Reforestation efforts

Labor Scarcity Impacts
Indirect productivity effects

Quantification not possible with
reasonable certainty

Where quantification is not feasible, TTE discloses the expected financial effects using qualitative narrative. The assumptions, confidence levels, and limitations related to these estimates are detailed in Note 4: Judgement and Estimation Uncertainty. TTE continues to enhance its ESG-financial data integration capabilities to enable future quantification in areas such as ecosystem valuation, labor productivity impacts, and downstream Scope 3 GHG exposure.

10.3 Link to Financial Planning and Capital Allocation

Sustainability-related financial effects are embedded into the company's financial planning processes. These effects are integrated through:

- The annual CapEx approval cycle,
- ESG-linked project screening criteria,
- Internal budgeting and cost variance tracking at estate level.

TTE uses a risk-adjusted approach to financial decision-making to balance short-term performance with long-term resilience.

10.4 Integration to Finance Planning & Anticipated Effect

10.4.1 Integration into Financial Planning and Funding Strategy

TTE integrates the financial implications of sustainability-related risks and opportunities into its financial planning, capital allocation decisions, and investment prioritization frameworks. These considerations are embedded within the company's Five-year rolling financial plan, approved annually by the Board.

SLFRS Sustainability Related Financial Disclosures

Key financial planning linkages include:

Capital Investment Prioritization	Operational Budget Planning	Resilience Reserve Mechanism:	Funding Sources
Sustainability-linked CapEx such as climate-resilient replanting, solar mini-hydro expansion, soil conservation, and biodiversity buffers are prioritized in capital allocation cycles based on strategic risk heatmaps (see Note 12.4). For FY 2025/26, over Rs. 75 Mn has been allocated toward energy transition and climate adaptation infrastructure.	Labor escalation risk, emergency rainfall repair costs, and certification audit costs are incorporated into operating budgets and financial sensitivity scenarios. These are reviewed quarterly at estate and TTE level.	TTE maintains a contingency reserve to manage volatility in revenue and cost flows due to climate extremes. This includes field disruption, tea transport bottlenecks, or unplanned slope failures during peak monsoons.	Medium-term investments are financed through a mix of internal cash flows and aligned sustainability-linked facilities within the Hayleys Group treasury structure. Where appropriate, donor-funded partnerships (e.g., UNIDO for micro-hydro) and green financing opportunities are considered for future biodiversity-linked investments.

TTE's strategic and financial planning processes are reviewed annually, and updated for emerging sustainability-related regulatory trends, climate scenarios, and market access conditions.

10.4.2 Anticipated Effects – Short Term (1–3 years)

CRRO/SRRO	Expected Effects on Financial Statements
Transition Risk	Gradual capital expenditure (CapEx) toward clean energy; minor operating expenses (OPEX) increase
Rainfall Risk	Increased budget allocations for flood damage recovery; short-term yield sensitivity
Labor Scarcity	Incremental payroll costs and housing investment; higher social benefit provisioning
Biodiversity Opportunity	Continued investments in agroforestry and ecosystem infrastructure; low cash flow impact

10.4.3 Anticipated Effects – Medium Term (3–5 years)

CRRO/ SRRO	Expected Effects on Financial Statements
Transition Risk	Improved energy cost efficiency; lower Scope 2 emissions; reduced exposure to carbon pricing risks
Chronic Climate Risk	Potential yield degradation affecting revenue
Labor Scarcity	Stabilization of productivity with social infrastructure; partial cost absorption via estate-level efficiencies
Biodiversity Opportunity	Improved soil quality, water retention, and slope stability; potential for nature-linked revenue (e.g., PES)

10.4.4 Anticipated Effects – Long Term (>5 years)

CRRO/ SRRO	Expected Effects on Financial Statements
Chronic Climate Risk	Yield decline may require replanting write-offs; productivity-linked revenue loss risk
Transition Risk	Lower Scope 1/2 emissions cost; enhanced brand valuation; stable energy cost profile
Biodiversity Opportunity	Potential to unlock long-term valuation models for restored ecosystem assets

CRRO/SRRO	Current Financial Effects				Key Drivers	Anticipated Financial Effects		
	2024/25 (Rs.)	2023/24 (Rs.)	YoY change	Financial Statements Note Reference		Short Term Rs.	Medium Term Rs.	Long Term Rs.
Statement of Cash Flow								
CRR2 – Physical Risk: Acute	↓ 362 Mn	↓ 256 Mn	↑ 41.4%	Investing Cash flow	Replanting + Factory repair and construction, major transport disruption due to landslide/flood events	↓ 350–400 Mn	↓ 300–350 Mn	↓ 250–300+ Mn
CRR3 – Physical Risk: Chronic	↓ 271 Mn	↓ 239 Mn	↑ 11.8%	Investing Cash flow	Same replanting, partially caused by soil stress/dry spells	↓ 250–300 Mn	↓ 200–250 Mn	↓ 200–225+ Mn
CRR1 – Transition Risk	↓ 52 Mn	↓ 55 Mn	↑ 6.3%	Cost of Sales	ESG system costs, GHG disclosures, digital compliance platform maintenance	↓ 50–55 Mn	↓ 40–45 Mn	↓ 30–35+ Mn
SRR1 – Social, Labour & Wage Risk	↓ 270 Mn	-	N/A	Cost of Sales	Wage inflation, estate housing, worker access roads and health/social services	↓ 250–300 Mn	↓ 225–250 Mn	↓ 150–200 Mn
SRO1 – Opportunity: Biodiversity	↑ 22 Mn	-	N/A	13-C	CAPEX for ecosystem restoration, biodiversity corridors, slope greening	↑ 10–15 Mn (investment only)	↑ 15–20 Mn (net investment)	Net neutral to mildly positive
Statement of Financial Position								
CRR2 – Physical Risk: Acute	Minor	Minor	N/A	N/A	CWIP impairment, bush loss, slope/road infra damage (declined in 2024/25)	↓ 75–125 Mn	↓ 50–75 Mn	↓ 15–25 Mn
CRR3 – Physical Risk: Chronic	↓ Subtle	↓ Subtle	Minor	N/A	No direct write-downs; gradual effect on bearer plant value and DTA	↓ 175–225 Mn	↓ 100–150 Mn	↓ 40–50 Mn
CRR1 – Transition Risk	↑ +41.7 Mn	Neutral	↑ Positive	13-A & 13-C	ESG-aligned infrastructure capitalised (solar, biomass); no liabilities posted	↓ Rs. 40–50 Mn	↓ Rs. 5–15 Mn	↓ Rs. 15–25 Mn
SRR1 – Social, Labour & Wage Risk	↓ Rs. 179 Mn	-	N/A	22	Employee benefits + social infra provisions rose; partially offset by grants	↓ Rs. 175–180 Mn	↓ Rs. 85–90 Mn	↓ Rs. 50–55 Mn
SRO1 – Opportunity: Biodiversity	↑ 22.8 Mn	-	N/A	13-C	Slope rehab, bunds, nature-based infra capitalised for first time	↑ Rs. 20–25 Mn	↑ Rs. 15–20 Mn	↑ Rs. 10–15 Mn
Statement of Financial Performance								
CRR2 – Physical Risk: Acute	↓ 23 Mn	-	N/A	N/A	Landslide recovery, emergency OPEX, improved slope resilience	↓ 20–40 Mn	↓ 15–30 Mn	↓ 5–20 Mn
CRR3 – Physical Risk: Chronic	↓ 23 Mn	↓ 10 Mn	↑ 138 %	Cost of Sales	Pest/disease rise, bush fatigue, erratic rainfall	↓ 20–50 Mn	↓ 15–35 Mn	↓ 10–20 Mn
CRR1 – Transition Risk	↓ 108 Mn	↓ 77 Mn	↑ 6%	Cost of Sales	ESG compliance scale-up, input change, assurance costs	↓ 50–75 Mn	↓ 30–65 Mn	↓ 15–40 Mn
SRR1 – Social, Labour & Wage Risk	↓ 270 Mn	-	N/A	Cost of Sales	Wage hike, absenteeism, estate infra and services	↓ 250–400 Mn	↓ 150–300 Mn	↓ 75–200 Mn
SRO1 – Opportunity: Biodiversity	↑ 38 Mn	-	N/A	6.1	Erosion control, slope yield resilience, minor price uplift	↑ 10–20 Mn	↑ 15–30 Mn	↑ 30–40 Mn

Note 11: Business Resilience

11.1 Purpose and Scope of Resilience Assessment

TTE defines business resilience as the company's ability to sustain long-term value creation while adapting to and managing sustainability-related risks and opportunities, particularly those related to climate change, biodiversity, and social workforce dynamics. This includes maintaining operational continuity, asset productivity, and financial stability under changing environmental and regulatory conditions. TTE conducted a structured business resilience assessment based on its sustainability-related risks and opportunities disclosed in Note 7. This assessment evaluates:

- The adaptive capacity of TTE's business model and strategy to respond to acute and chronic physical climate risks, transition risks, and nature-related opportunities,

SLFRS Sustainability Related Financial Disclosures

- The company's ability to adjust CapEx, OPEX, and strategic plans across different climate and policy environments, and
- The outcomes of scenario-based stress testing, spanning short-, medium-, and long-term time horizons defined in Note 7.1 and 10.2.

Scenario analysis was used to evaluate how the company would perform under multiple plausible climate futures. These scenarios were developed based on guidance from the Hayleys Group and reference internationally recognized climate and socioeconomic pathways.

For TTE, business resilience refers to the company's ability to sustain value creation in the face of sustainability-related risks, particularly those affecting climate, labor availability, and compliance. Resilience is embedded across:

- Tea production and estate operations,
- Workforce retention and social engagement,
- Compliance with evolving ESG and certification frameworks,
- Strategic investments aligned with global market and regulatory trends.

Given the long-term nature of the plantation sector, resilience planning spans replanting cycles, climate adaptation, and multi-capital stewardship (natural, human, social, and financial).

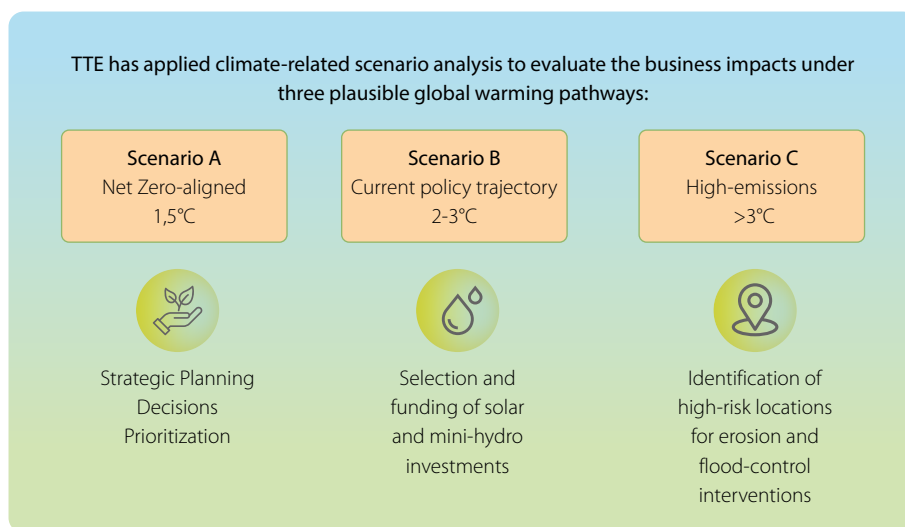

11.2 Climate Scenario Framework and Development

To assess the resilience of its business model and long-term value creation, TTE conducted climate-related scenario analysis in line with SLFRS S2. The process was guided by Hayleys Group and incorporated both global and regional scenario data, reflecting physical and transitional climate contexts, policy shifts, and operational exposure across estates. The scenario analysis was conducted during the 2024/25 reporting cycle.

Scenario Development Approach

Three distinct global scenarios were selected to capture a range of plausible climate futures, structured around IPCC-aligned Shared Socioeconomic Pathways (SSPs) and policy narratives:

Scenario	Narrative Description	Reference Pathway
Scenario A – Net Zero Future	A 1.5°C pathway with early global coordination, strong mitigation policy, technological innovation, and green finance support.	SSP1–2.6 / Carbon Policy Pathway (CPP)
Scenario B – Current Policy Trajectory	A 2–3°C warming world based on current national commitments (NDCs) with moderate implementation of ESG policies.	SSP2–4.5 / Current Pathway
Scenario C – High Emissions / Divergence Path	A >3°C world with minimal policy coordination, limited mitigation, and rising physical risks.	SSP3–7.0 / STEPS (Stated Energy Policies Scenario)

Scope of Assessment

- **Geographic Coverage:** All 16 estates and 15 factories, grouped by elevation, rainfall intensity, and temperature.
- **Material Risk and Opportunity Areas:**
 - Physical climate risks (floods, rainfall shifts, chronic heat, drought and temperature variation)
 - Transition risks (regulatory, cost of compliance, buyer ESG preference)
 - Nature-related opportunities (biodiversity, carbon removals)

These scenarios informed both financial and strategic decisions (see Notes 10.3 and 9.4) and were used to model potential estate-level yield variations, replanting timing, energy cost volatility, and infrastructure resilience planning.

11.3 Key Scenario Insights and Resilience Evaluation

The scenario analysis conducted by TTE produced several strategic insights into how the business may respond under distinct climate futures. These insights informed decisions on replanting priorities, CapEx reallocation, labor model resilience, and biodiversity investments. The table below summarizes the key findings from each scenario, highlighting both risks and opportunities, and their implications for business resilience:

Scenario Analysis – Climate Risks

Climate Risk Type	Scenario	Short Term (1–3 years)	Medium Term (3–5 years)	Long Term (5+ years)
Physical – Acute	A – Net Zero	↓ Rs. 100–150 Mn (CAPEX), resilience building continues	↑ Rs. 100–150 Mn/year OPEX savings from avoided repairs	↑ Rs. 50–100 Mn/year in resilience-linked net cash savings
	B – Current Policy	↓ Rs. 100–150 Mn emergency OPEX	↓ Rs. 100–200 Mn cumulative damage and repairs	↓ Rs. 200–250 Mn asset degradation and cost burden
	C – High Emissions	↓ Rs. 150–200 Mn/year repair OPEX from repeated disasters	↓ Rs. 300–350 Mn/year erosion + infrastructure damage	↓ Rs. 450–500 Mn/year disaster-related cash drain
Physical – Chronic	A – Net Zero	↓ Rs. 10–15 Mn yield loss (1.5–2%) offset by clone adaptation	↔ Net neutral to +Rs. 25 Mn	↑ Rs. 20–30 Mn/year PBT gain
	B – Current Policy	↓ Rs. 25–35 Mn loss (3–5% yield decline)	↓ Rs. 35–45 Mn loss (productivity + repair)	↓ Rs. 45–55 Mn/year erosion of profitability
	C – High Emissions	↓ Rs. 45–55 Mn (4–6% yield drop + rising OPEX)	↓ Rs. 55–65 Mn/year (loss from yield + energy + repair)	↓ Rs. 65–75 Mn/year loss from climate-related issues
Transition Risk	A – Net Zero	↑ Rs. 150–175 Mn ESG CAPEX (solar, compost)	↑ Rs. 200–250 Mn/year savings + PES inflows	↑ Rs. 250–300 Mn/year in cost-effective operations and carbon revenue
	B – Current Policy	↓ Rs. 50–100 Mn due to compliance burden + input volatility	↓ Rs. 100–150 Mn/year from cost volatility	↓ Rs. 450–500 Mn/year from lack of ESG positioning
	C – High Emissions	↓ Rs. 10–20 Mn (no access to ESG market + high OPEX)	↓ Rs. 25–35 Mn/year stranded asset + no ESG buffer	↓ Rs. 45–50 Mn/year profitability erosion + exclusion from finance

Resilience Snapshot under Climate Risks

Scenario	Physical Risk Resilience	Transition Readiness	Opportunity Capture	Overall Score
A	✓ High	✓ High	✓ High	● High
B	ⓘ Partial	ⓘ Moderate	ⓘ Constrained	● Moderate
C	✗ Low	✗ Low	✗ Lost	● Critical

Labour Scarcity and Wage Escalation Risk

Labour Shortage (%)	0% Wage Increase	25% Wage Increase	48% Wage Increase
0% Shortage	0	-28,125	-54,000
10% Shortage	-12,500	-43,750	-90,500
20% Shortage	-28,125	-63,281	-95,625
30% Shortage	-48,214	-87,786	-125,357

Sensitivity analysis shows that rising statutory wages (0% to 48%) and labour shortages (0% to 30%) can quickly erode per-tonne gross margins, turning baseline into losses of up to -125 357/MT under the worst stress band. This underscores the financial risk of wage inflation decoupled from productivity gains and the compounding impact of workforce scarcity. To mitigate these pressures,

SLFRS Sustainability Related Financial Disclosures

TTE remains structurally exposed to social-related risks driven by labour scarcity and wage inflation in the Sri Lankan plantation sector. These risks are primarily influenced by generational workforce migration, increased cost of living, and evolving expectations for estate-level social infrastructure. Additionally, recent political and regulatory interventions have led to sector-wide wage increases decoupled from productivity-linked models.

In FY 2024/25, the statutory daily wage rose to Rs. 1,350, with a further expected escalation under consideration. Sensitivity analysis conducted across wage escalation bands (0%, 25%, and 48%) and workforce availability (0%–30% shortage) revealed that TTE's gross margin per metric ton becomes increasingly negative, exceeding Rs. 2,800/MT under high wage scenarios without offsetting productivity gains.

The results suggest that even modest wage increases when not linked to output could result in sustained gross margin erosion and financial strain, particularly for labour-intensive operations in mid and low-grown estates. Labour shortages further constrain operational scale and increase per-unit fixed costs, although their marginal effect on unit cost is limited under fixed daily productivity assumptions.

To address this, TTE continues to strengthen its workforce resilience through:

- Expansion of the revenue-share wage model, linking pay to estate-level output and value
- Ongoing investment in estate housing, healthcare, and maternal services (Rs. 103.6 Mn in FY 2024/25)
- Mechanisation and automation pilots for productivity improvement
- Estate-level childcare and school facilities to support workforce continuity

Despite these measures, the company recognizes that further reforms in labour engagement models, mechanisation, and sector-level wage setting frameworks are critical to long-term resilience.

Scenario Analysis for Biodiversity Opportunity & Ecosystem Restoration

Talawakelle Tea Estates PLC assessed four TNFD-aligned scenarios to evaluate the financial impact of ecosystem restoration initiatives under different future conditions.

- ★ **Ahead of the Game:** Strong market and policy alignment with low degradation. Moderate investment (Rs. 100–150 Mn) delivers high Payment for Ecosystem (PES) income (Rs. 25–40 Mn/year) and rapid returns (3–5 years).
- + **Go Fast or Go Home:** High degradation triggers urgent ESG action. Investment needs rise (Rs. 150–200 Mn), but PES and blended finance still yield ROI in 5–7 years.
- **Sand in the Gears:** High degradation with weak policy support. No external income, high capital burden (>Rs. 200 Mn), and low ROI. High financial risk.
- ⓘ **Back of the List:** Low degradation but weak market support. Minimal returns and long payback (>8 years), despite lower costs.

Conclusion: Scenarios A and B demonstrate that verified, nature-positive investments are financially viable. Scenarios C and D highlight the risks of limited policy and market support.

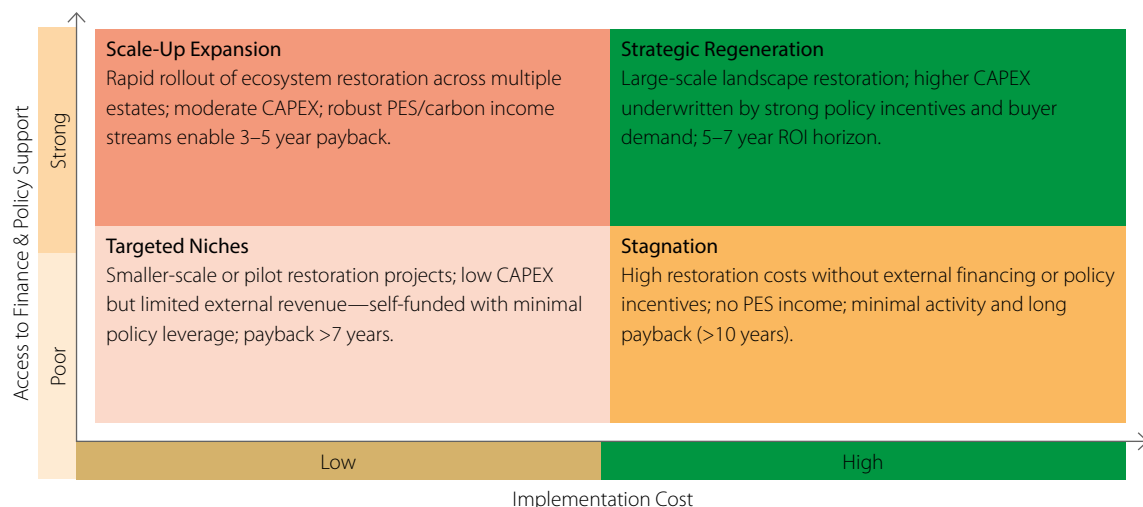

Scenario Matrix: Ecosystem Degradation vs. Market Alignment

Scenario	CAPEX Requirement	PES / Carbon Revenue	Cost of Capital	ESG Buyer Access	ROI Horizon	Overall Outlook
★ Ahead of the Game (Low degradation, High alignment)	Moderate Rs. 150–200 Mn	High: Rs. 25–40 Mn/year	↓ Lower (favorable)	↑ Strong demand	3–5 years	Strong returns, high confidence in scaling
+ Go Fast or Go Home (High degradation, High alignment)	High Rs. 100–150 Mn	Medium–High: Rs. 20–30 Mn/yr	↔ Slightly lower	↑ Yes	5–7 years	Cost-intensive, viable if policy delivers
● Sand in the Gears (High degradation, Low alignment)	Very High: Rs. 200+ Mn	None	↑↑ High (risk premium)	↓ Weak	>10 years	High vulnerability, low ROI scenario
ⓘ Back of the List (Low degradation, Low alignment)	Low Rs. 10–15 Mn	Low: Rs. 5–10 Mn/year	↔ Unchanged	↔ Weak	8–10 years	Stable but low-reward, minimal policy leverage

Financial Implications Summary:

Scenario	Key Financial Considerations
★ Ahead of the Game	Highest potential for nature credit monetization, PES revenue, and low-cost finance
✚ Go Fast or Go Home	High ESG obligations (traceability, assurance), but viable if blended finance is secured
• Sand in the Gears	TTE bears all restoration cost; ESG buyers exit; high capital cost; no nature-based cash inflow
① Back of the List	Minimal upside; PES marginal; restoration is self-funded without external validation benefits

Biodiversity Opportunity and Ecosystem-restoration Scenarios

Overall Resilience Assessment Table – TTE PLC

Risk / Opportunity	Exposure	Control Measures	Residual Vulnerability	Adaptive Capacity	Resilience Score
1. Physical Risk – Acute	High	Slope bunding, reforestation, emergency repair budgets, estate-level water buffers	Moderate (exposed slopes remain)	Bunding masterplan covers ~48%; steady CAPEX improving infrastructure	● Moderate
2. Physical Risk – Chronic	Moderate	Climate-smart clones, soil enrichment, rainfall retention bunds	Low	Progressive replanting strategy; RA certification and agronomy R&D	● Strong
3. Transition Risk	Moderate	Verified ISO 14064, SBTi alignment, ESG digitalisation, biomass/solar projects	Low to moderate	Early-mover advantage; ESG-linked investments already capitalised	● Strong
4. Social Risk (Labour & Wages)	High	Revenue-share wage pilots, housing/healthcare investment, childcare support	High (wage increases decoupled from productivity)	Strong estate service infrastructure, but wage inflation remains structurally unbuffered	● Moderate
5. Opportunity – Biodiversity/Nature	Moderate	Bunds, forest buffers, biochar compost, ecosystem restoration pilots	Low	High alignment with TNFD, PES-ready, RA verified = high revenue potential	● Strong

Resilience Score Summary

Risk/Opportunity	Resilience Score
Physical Risk – Acute	● Moderate
Physical Risk – Chronic	● Strong
Transition Risk	● Strong
Labour & Wage Risk	● Moderate
Biodiversity Opportunity	● Strong

Key Conclusions:

- TTE shows high resilience to chronic climate and transition risks due to early adaptation and ESG leadership.
- Acute physical risks remain moderately vulnerable where bunding and infrastructure work is incomplete.
- Labour-related risks are critical: productivity-linked models and mechanisation need expansion to offset wage inflation.
- Nature-based opportunities offer strong upside, provided PES/credit markets mature and scaling continues.

SLFRS Sustainability Related Financial Disclosures

11.4 Strategic and Operational Adaptation Capacity

TTE's ability to adapt to material sustainability-related risks and opportunities has been assessed through the lens of capital flexibility, workforce stability, agroecological diversification, and operational readiness. This section outlines how the company is strengthening its resilience through strategic and operational levels.

1. Capital Investment Flexibility

- **Renewable Energy Transition:** Mini-hydro projects under SBTi-aligned plans reduce GHG Scope 2 emissions and lower long-term electricity costs.
- **Climate Resilience Infrastructure:** Investments in new factory construction, slope protection, road drainage, and embankment stabilization reduce acute weather-related asset and access risk.
- **Targeted CapEx Sequencing:** High-risk estates (e.g., Kiruwanaganga) prioritized for climate-adaptive CapEx allocation in FY 2020/21 onward.

2. Workforce and Social System Adaptation

- **Retention-Focused Planning:** Long-term estate retention programs include housing, healthcare, childcare, and food security support.
- **Productivity incentive Structure Flexibility:** Adaptive productivity incentive models reviewed bi-annually to maintain competitiveness while preserving estate output.
- **Community Embeddedness:** Revenue share model mitigates commuting disruptions and maintains high workforce engagement.

3. Agroecological and Biodiversity-Based Adaptation

- **Replanting with Resilient Cultivars:** New climate resilient variety recommended by Tea Research Institute (TRI) use for ongoing.
- **Agroforestry Corridors:** Native species-based buffer zones reduce runoff, increase soil stability, and support ecosystem service resilience.
- **Land Use Prioritization:** Expansion is paused in favor of ecosystem conservation and yield optimization in existing blocks.

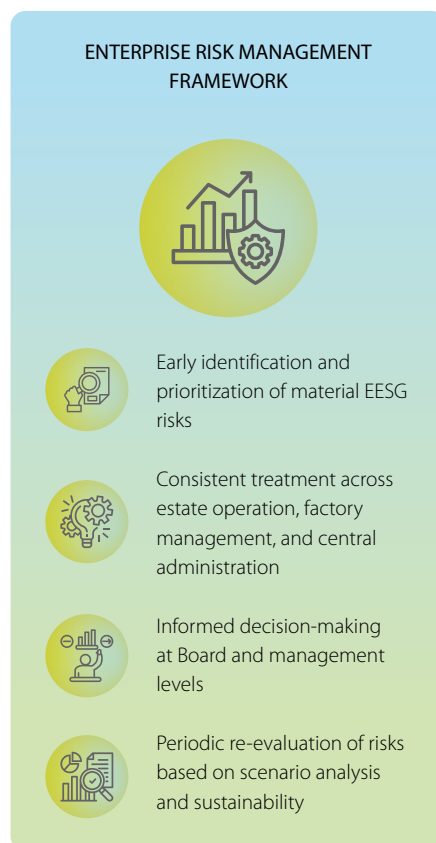

4. Operational Monitoring and Response Systems

- **Estate-Level Climate Surveillance:** Weather stations and digital dashboards track daily outputs and operation performance across all 16 estates.
- **Disruption Response Planning:** Transport and procurement contingency plans are in place for rainfall disruptions, with normal season stockpiling protocols.

These capabilities collectively contribute to TTE's business model resilience over all three planning horizons. Financial readiness and stress testing results are discussed in Note 10.3, and alignment with strategic targets is monitored under Note 13.4.

Note 12: Risk Management

12.1 Overview of Risk Management and Integration

TTE applies an enterprise-wide risk management (ERM) framework to identify, assess, priorities and monitor sustainability-related risks and opportunities including those arising from environmental, social, and governance (ESG) factors. Sustainability-related

risks and opportunities (SRROs) disclosed in Note 7 are fully integrated into the company's overall risk management systems and treated on par with operational, financial, and compliance risks.

The ERM Framework supports:

- Early identification and prioritization of material ESG risks,
- Consistent treatment across estate operations, factory management, and central administration,
- Informed decision-making at Board and management levels,
- Periodic re-evaluation of risks based on scenario analysis and sustainability trend monitoring (see Note 11.3).

All SRROs are assessed using the same criteria as other enterprise risks, based on:

- Likelihood of occurrence,
- Magnitude of potential financial impact,
- Time horizon of manifestation (short, medium, or long term),
- Speed of onset and controllability.

Material SRROs are flagged and embedded into the company-wide risk heatmap and are formally reviewed through the company's three-tier governance system (see Note 6.1). This integration ensures that risks such as transition cost exposure, extreme weather disruptions, chronic yield volatility, and workforce-related pressures are addressed through a unified risk culture across all business units and operational estates.

12.2 Risk Management Governance Structure and Oversight Roles

TTE follows a structured three-tier governance framework to oversee the identification, escalation, and mitigation of SRROs, in alignment with the company's ERM system.

1. Board-Level Oversight	2. Executive Risk Management Function
<p>The Board Audit Committee (BAC) holds ultimate responsibility for risk oversight, including material ESG and climate-related risks. The BAC reviews:</p> <ul style="list-style-type: none"> ESG risk exposure trends reported by management, Risk mitigation progress for identified material items (as per Note 7), ESG-linked financial impact implications (see Note 10). <p>These reviews are conducted on a quarterly basis, with additional sessions as needed during peak climate vulnerability periods (e.g., monsoon season).</p>	<p>The Environment, Social, Economic and Governance (ESEG) Steering Committee, chaired by the Director/CEO and advised by the Head of Finance and Head of Sustainability, are responsible for operationalizing ESG risk management. Responsibilities include:</p> <ul style="list-style-type: none"> Maintaining the sustainability risk register, Overseeing ESG data systems, audits, and estate-level controls, Coordinating risk reporting from estates, factories, and compliance teams. <p>The ESEG Committee meets at least once per quarter and is responsible for aligning ESG risk controls with strategic objectives (Note 9.1) and financial planning (Note 10.4).</p>
3. Operational Risk Ownership	
<p>At the estate levels, sustainability steering committee members are responsible for day-to-day ESG risk surveillance and reporting. Specific roles include:</p> <ul style="list-style-type: none"> Monitoring rainfall, Temperature, and other agriculture related issues, Tracking absenteeism and labor disruption trends, Logging biodiversity sightings and execution of recommendation. <p>All identified risks are escalated using structured reporting templates to the ESEG Committee, and those exceeding threshold levels are flagged for BAC review.</p>	

12.3 Risk Identification and Prioritization Process

TTE identifies and prioritizes SRROs through a structured multi-step process that is integrated into the company's ERM Framework.

1. Risk Identification Sources

Material ESG risks and opportunities are identified using inputs from:

- Climate data (rainfall intensity, temperature anomalies, long-term variability),
- Sustainability audit findings (e.g., Rainforest Alliance, ISO 14001),
- Estate-level operational reports and worker feedback,
- Market intelligence on buyer ESG expectations and global regulation shifts (e.g., carbon pricing, deforestation regulations),
- Scenario analysis conducted under Note 11.

This ensures both physical and transition risks are detected across estate, factory, supply chain, and export operations.

2. Risk Assessment Criteria

Identified risks are evaluated using the following criteria:

Criteria	Application
Likelihood	Probability of occurrence based on historical patterns, emerging data, and expert review.
Magnitude	Potential impact on revenue, OPEX, CapEx, or brand equity (linked to Note 5.4 thresholds).
Time Horizon	Classified into: <ul style="list-style-type: none"> Short (1–3 years) Medium (3–5 years) Long (>5 years)
Speed of Onset	How quickly the risk can manifest (e.g., flash floods vs. biodiversity degradation).
Controllability	Degree of operational or financial control TTE can exercise to mitigate exposure.

Each SRRO is then scored and color-coded within the enterprise risk heatmap and reassessed annually or when triggered by early warning indicators.

SLFRS Sustainability Related Financial Disclosures

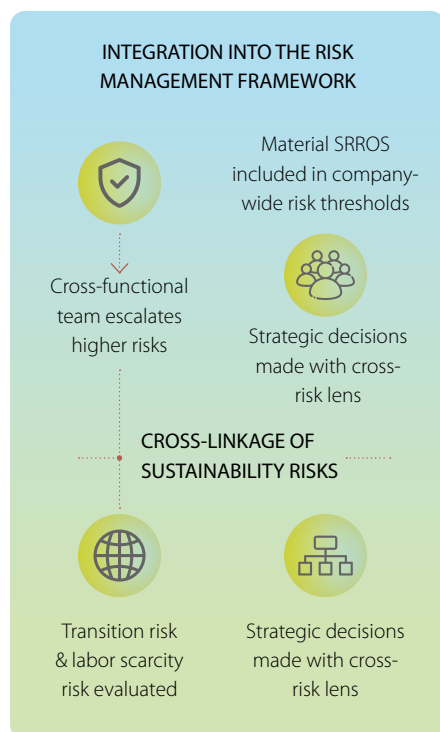

3. Risk Prioritization and Escalation

Risks assessed as material are escalated into:

- The Enterprise Risk Register, where they are tracked alongside financial and operational risks,
- The Board Audit Committee's risk review agenda,
- Strategic planning inputs, where required (e.g., replanting decisions, energy transition phasing).

This process ensures that only material ESG risks (as disclosed in Note 7.1) are subjected to Board-level decision-making while avoiding duplication with operational-level risk logs.

12.4 Integration into the Risk Management Framework

TTE applies a unified risk management approach in which SRROs are assessed, escalated, and mitigated using the same systems, thresholds, and governance protocols as all other enterprise risks.

Equal Treatment of Sustainability Risks

All material SRROs disclosed in Note 7 are:

- Incorporated into the Enterprise Risk Register, using a single cross-functional heatmap,

- Subject to review using standard company-wide risk thresholds (see Note 5.4),
- Escalated through the same reporting channels used for operational, strategic, and financial risks.
- This integration is designed to eliminate silos between ESG-specific assessments and core business risk functions. For example:
 - Transition risk is evaluated alongside financial volatility and regulatory risks,
 - Labor scarcity risk is treated alongside productivity and human resource continuity risks,
 - Biodiversity opportunity is tracked through both environmental risk lenses and long-term asset value considerations.

Cross-Linkage to Business Model and Strategy

The integration of ESG risks into risk management directly supports:

- Strategic realignment decisions (see Note 9.1 and 9.4), including replanting schedules and CapEx sequencing,
- Business model refinement (Note 8), especially with regard to rain-fed estate operations, community labor models, and biodiversity corridors,
- Financial planning sensitivity assessments (Note 10.3), including contingency reserve mechanisms.

This approach ensures that TTE's governance bodies, including the BAC, receive a comprehensive, connected view of all material risks financial, operational, environmental, and social enabling integrated, resilience-informed decision-making. (Refer Risk Management Report page 198)

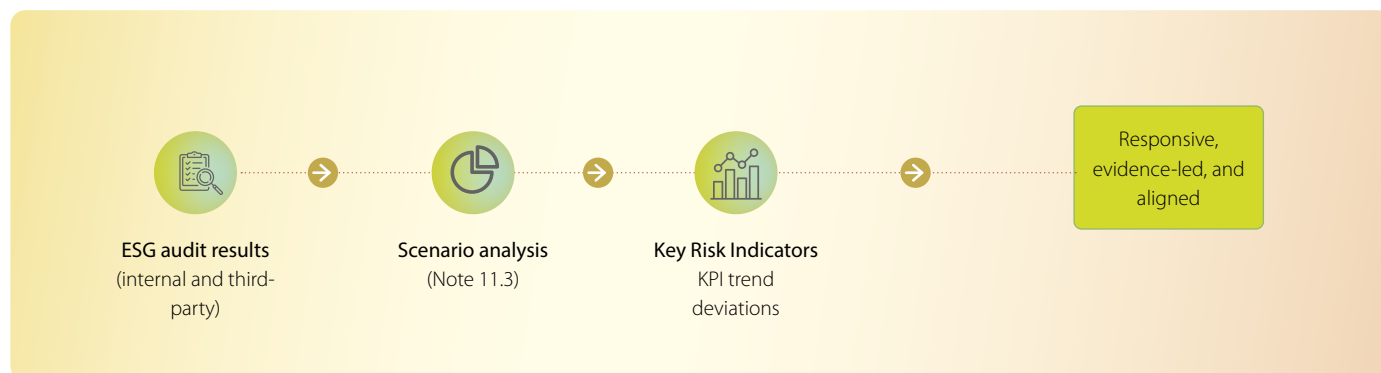

12.5 Risk Mitigation and Control Mechanisms

TTE applies a tiered approach to mitigating material sustainability-related risks, ensuring controls are embedded at both operational and strategic levels.

Risk-Specific Mitigation Examples

Material Risk / Opportunity	Mitigation Actions	Control Measures
Transition Risk (GHG regulations, buyer expectations)	<ul style="list-style-type: none"> • Phased investment in solar and mini-hydro and renewable energy systems • GHG inventory tracking and SBTi-aligned decarbonization plan 	<ul style="list-style-type: none"> • GHG audit compliance • Monthly energy monitoring via factory-level
Acute Physical Risk (Rainfall, slope failure)	<ul style="list-style-type: none"> • Infrastructure investment in culverts, slope stabilization, and bunds • Estate-level flood risk zoning and prioritization 	<ul style="list-style-type: none"> • Physical risk mapping with annual estate audits • Emergency preparedness Standard Operating Procedure (SOPs)
Chronic Climate Risk (Yield stress, long-term viability)	<ul style="list-style-type: none"> • Agroecological replanting program with resilient cultivars • Soil moisture retention and shade planting 	<ul style="list-style-type: none"> • Estate-specific replanting targets
Labor Scarcity Risk	<ul style="list-style-type: none"> • Housing, healthcare, education, and food security infrastructure to increase retention • Youth workforce engagement strategy 	<ul style="list-style-type: none"> • Quarterly absenteeism monitoring • Exit trend analysis at divisional level
Biodiversity Opportunity	<ul style="list-style-type: none"> • Establishment of biodiversity buffers, reforestation of degraded areas • Integration of native species into field layout 	<ul style="list-style-type: none"> • Geotagged biodiversity corridor mapping • Rainforest Alliance audit compliance logs

Mitigation Monitoring and Updates

Each mitigation action is assigned to a responsible unit (estate, factory, or central sustainability team), and progress is reviewed quarterly by the ESEG Steering Committee. Risk controls are revised as new insights arise from:

- ESG audit results (internal and third-party),
- Scenario analysis (Note 11.3),
- Key Risk Indicators (KRI) and KPI trend deviations (Note 13.4).

This ensures that risk mitigation is responsive, evidence-based, and aligned with both operational realities and financial planning constraints.

12.6 Monitoring, Review and Reporting Systems

TTE maintains a structured system for monitoring, reviewing, and reporting sustainability-related risks and opportunities. This system ensures early detection, timely escalation, and consistent oversight of material ESG risks at all governance levels.

1. Estate-Level Monitoring Systems	2. ESG Risk Reporting Dashboard	3. Governance-Level Reviews	4. Continuous Improvement
<p>Each estate maintains real-time or periodic tracking mechanisms for its most relevant sustainability risks:</p> <ul style="list-style-type: none"> • Weather and slope movement monitoring using rainfall gauges and physical hazard logs, • Labor availability and absenteeism tracking through daily estate productivity reports, • Biodiversity and buffer zone compliance monitored via Rainforest Alliance-aligned audit tools. <p>Estate-level risk observations are submitted monthly and escalated immediately for threshold breaches using standard reporting templates.</p>	<p>At the operational level, the central sustainability team aggregates estate-level data and consolidates it into a quarterly ESG risk report, containing:</p> <ul style="list-style-type: none"> • KRI deviations (e.g., labor absenteeism thresholds, rainfall exceedance events), • ESG audit non-compliances and action status, • Scenario trigger signals (e.g., multi-year yield variability or market risk alerts). <p>This report feeds into the enterprise risk management dashboard and is reviewed by the ESEG Steering Committee.</p>	<p>The Board Audit Committee (BAC) receives quarterly risk updates that integrate:</p> <ul style="list-style-type: none"> • Material SRROs from the enterprise risk register, • Financial planning implications (see Note 10.3), • ESG performance trend analysis (see Note 13.4), • Emerging risks flagged from scenario analysis and global policy developments. <p>Additional briefings are conducted for critical incidents or during climate-sensitive seasons (e.g., southwest monsoon).</p>	<p>TTE's risk review systems are updated annually in alignment with:</p> <ul style="list-style-type: none"> • Group-wide policy changes, • Lessons from ESG audits and near-miss reviews, • Stakeholder expectations including buyers and lenders. <p>This continuous cycle enables TTE to maintain a responsive and forward-looking risk monitoring culture, ensuring material ESG risks are controlled, and opportunities are capitalized on proactively.</p>

SLFRS Sustainability Related Financial Disclosures

12.7 Forward-Looking Risk Considerations

TTE continually monitors emerging sustainability-related risks and regulatory trends that may influence future business continuity, financial performance, and value creation. These forward-looking considerations are informed by scenario analysis (Note 11), market intelligence, and global climate and ESG policy trajectories.

1. Anticipated Risk Shifts

Emerging Risk Area	Potential Impact	Company Preparedness / Monitoring Approach
Global Climate Regulation (e.g., Carbon Border Adjustment Mechanism – CBAM)	Increased compliance and traceability burden for tea exports to EU markets.	Monitoring via Group Legal & Regulatory desk; digital traceability systems under review.
Rainfall Pattern Volatility	Higher frequency of flash floods and infrastructure damage, especially in Deniyaya Region.	Physical risk zoning maps updated bi-annually; resilience CapEx allocated.
Biodiversity-Linked Lending & PES Opportunities	New ESG financing channels tied to reforestation and ecosystem service performance.	Mapping of high importance restoration zones complete; donor funding and PES partnerships under development.
Deforestation-Free Supply Chain Policies	Increased demand for end-to-end assurance of zero land-use conversion.	Rainforest Alliance compliance maintained; land use and agroforestry boundaries digitally verified.
Labor Model Demographic Risk	Youth migration and aging field workforce risk long-term productivity in up-country regions.	Social retention investments continued; estate-based youth engagement pilots in progress.

2. Adaptive Risk Management Priorities

Going forward, TTE's ESG risk management function will emphasize:

- Integration of climate scenario triggers into the annual enterprise risk review,
- Alignment with SLFRS Sustainability Disclosure Standards based materiality processes,
- Continuous digitization of estate-level monitoring and early warning systems,
- Expansion of risk-linked performance indicators (KRIs).

- ESG KPIs are embedded into operational scorecards, annual budgeting cycles, and management performance evaluations for estate managers and divisional heads.

Source of Metrics

- Metrics are derived from a combination of:
 - Sustainability-related Frameworks and Standards mentioned in the Note 1.1
 - Industry-specific guidance (e.g., plantation sustainability metrics),
 - Company-defined indicators that address location-specific material sustainability risks.

Metrics are selected and maintained based on their ability to inform:

- Strategic decision-making (Note 9),
- Risk assessment and mitigation planning (Note 12),
- Investment prioritization (Note 10), and
- Business model resilience (Note 11).

Note 13: Metrics and Targets

13.1 Overview of ESG Metrics and Target Governance

TTE uses a structured framework to identify, track, and review sustainability-related metrics and targets that are directly linked to sustainability-related risks and opportunities disclosed in Note 7, ensuring that the information is relevant to the company's ability to generate or preserve value over time.

Governance and Oversight

- ESG metrics are monitored through a central ESG performance dashboard, maintained by the sustainability and compliance teams and reviewed quarterly by the ESEG Steering Committee.
- Strategic ESG performance, including metrics linked to climate change physical biodiversity, labor, and transition risk is reviewed quarterly by the Board Audit Committee.

The company distinguishes between metrics used for internal monitoring, regulatory compliance, and material risk/opportunity tracking. Only the latter are disclosed under Note 13.2–13.4 to ensure alignment with SLFRS S1/S2 Sustainability Disclosure Standards, materiality principles.

Material Metrics and Their Alignment to Sustainability-related risks and opportunities

Pillar	Metric	Connected SRRO	Measurement Scope	Standard / Framework	Time Horizon
Environmental	GHG emissions (tCO ₂ e)	Transition risk	Scopes 1–3 total	SLFRS S2	Short–Long
Environmental	Acute OPEX (Rs. Mn)	Acute physical risk	Estate disaster spend	SLFRS S2	Short–Medium
Environmental	Yield loss (Rs. Mn)	Chronic physical risk	Estate revenue loss	SLFRS S2	Medium–Long
Environmental	Restored area (ha)	Biodiversity opportunity	Restoration plots	TNFD core metric	Medium–Long
Social	Living-wage gap (%)	Labour cost risk	Estate workforce	Living-wage benchmark	Short–Medium
Social	Absenteeism rate (%)	Labour availability	Total workdays	TTE	Short
Social	Female participation (%)	Labour pool expansion	Field & factory	UNWEP	Short–Medium

- These metrics are validated quarterly through internal audits, and selected indicators undergo external verification via third-party certification (e.g., RA, ISO).
- Where applicable, performance is benchmarked against internal targets disclosed in Note 13.4 and linked to investment decisions (Note 10.3).

13.2 Climate-Related Metrics and Targets

TTE discloses climate-related metrics and targets to enable users to assess how the company monitors, manages, and progresses on material climate-related risks and opportunities. These disclosures reflect TTE's transition and adaptation strategies, and its alignment with national and global climate goals, including near- and long-term Science-Based Targets and the company's Net Zero roadmap.

The metrics presented in this section include operational and value chain greenhouse gas (GHG) emissions, physical and transition risk indicators, investment in climate action, and performance against validated climate targets. All disclosures apply to the company's fully consolidated operations under the operational control boundary and are aligned with the GHG Protocol, ISO 14064-1:2018, and sector-relevant guidance.

13.2.1 Cross-industry metrics

Greenhouse Gas (GHG) Emissions

TTE measures and discloses its greenhouse gas (GHG) emissions in alignment with the GHG Protocol, ISO 14064-1:2018, and SLFRS S2 requirements. The disclosures cover all consolidated operations under the operational control boundary and include Scope 1, Scope 2 (location-based), and relevant Scope 3 categories. The company has selected the operational control approach for its measurement of GHG emissions as it reflects the company's direct authority over day-to-day environmental performance, energy use, and emissions management at its estate, factory operations 3 Mini hydro companies under two subsidiary company.

Summary of GHG Emissions (in absolute gross measurement basis)

Scope	2024/25 (tCO ₂ e)	2023/24 (tCO ₂ e)	Interim Target (2030)	Target (2050)
Scope 1	8,160.01	9,263.04	↓42%	↓90%
Scope 2	1,703.0	1,961.62	↓42%	↓90%
Scope 3	13,568.20	13,970.06	↓30%	↓72%
Total	23,431.21	25,194.72	N/A	N/A

GHG Scope 1 and 2 Emissions

Description	Greenhouse gas emissions (metric tonnes CO ₂ e) 2024/25		
	Scope 1	Scope 2 (Note 2)	Total
Consolidated accounting group	8,160.01	1,703.0	9,863.01
Other investee (investment in associate, joint ventures) (Note 1)	Not applicable	Not applicable	Not applicable
Total (Operational control approach)	8,160.01	1,703.0	9,863.01

Note 1: The Company does not have investments in associates and joint ventures.

Note 2: Scope 2 emissions are measures based on the location-based measurement (LBM) approach. The company has not entered any contractual instruments for the purchase of electricity.

GHG Scope 3 Emissions

Value Chain GHG Emissions (Scope 3) by Category

#	Scope 3 Category	2024/25 (tCO ₂ e)	2023/24 (tCO ₂ e)
1	Purchased goods & services	5,799	6,145
2	Capital goods	126	61
3	Fuel- and energy-related activities	553	694
4	Upstream transport & distribution	590	517
5	Waste generated in operations	2	1
6	Business travel	79	38
7	Employee commuting	46	48
9	Downstream transport & distribution	1,207	1,254
10	Processing of sold products	828	769
12	End-of-life treatment	4,160	4,291
13	Downstream leased assets	180	152
	Total	13,568	13,970

13.2.2 Methodology for the measurement and disclosure of GHG Emissions

TTE calculates its greenhouse gas emissions using internationally recognized methodologies to ensure consistency, comparability, and accuracy across all scopes. The following standards and sources inform the GHG inventory:

GHG Measurement Standards Applied

- Greenhouse Gas (GHG) Protocol: A Corporate Accounting and Reporting Standard (2004)
- GHG Protocol Scope 2 Guidance, an amendment to the GHG Protocol Corporate Standard
- Corporate Value Chain (Scope 3) Accounting and Reporting Standard, a supplement to the GHG Protocol Corporate Accounting and Reporting Standard
- Technical Guidance for Calculating Scope 3 Emissions (Version 1.0), supplement to the Corporate Value Chain (Scope 3) Accounting and Reporting Standard

SLFRS Sustainability Related Financial Disclosures

GHG Disclosures

- SLFRS S2 – Climate-related Disclosures

GHG Internal Verification

- ISO 14064-1:2018 – for internal emissions assurance and verification
- SBTi FLAG Guidance – for land-sector related emissions disclosures

Key Assumptions and Sources used for GHG Measurement

Scope	Emission Category	Activity	Data Source	Emission Factor (EF) Source	Source of Global Warming Potential (GWP) Values
Scope 1	Stationary combustion	Diesel, Petrol, firewood for stationary thermal uses	Fuel invoices, estate-level use logs	2006 IPCC AR5 V2_2_Ch2_Stationary_Combustion; SLSEA/DEFRA	IPCC (AR6) 2021
Scope 1	Mobile combustion	Fuel used in estate vehicles and transport	Fuel bills, monthly estate summaries	2006 IPCC AR5 V2_3_Ch3_Mobile_Combustion, DEFRA factors	N/A
Scope 1	Fertilizer application	Fertilizer applied (N-based)	Estate-level application records	2006 IPCC AR5 V4_11_Ch11_N2O&CO2	IPCC (AR6) 2021
Scope 2	Purchased electricity	Electricity use (CEB grid)	Monthly CEB bills	SLSEA 2022 EF; location-based only	
Scope 3	Category 1: Purchased goods and services	Fertilizer, packaging, tea sacks	Purchase orders, ledger entries	DEFRA 2024, GZA Scope 3 Calculator (Expenditure based)	IPCC (AR5) 2014
Scope 3	Category 2: Capital goods	Emissions from construction and equipment	Asset ledger, CapEx registry	GZA Scope 3 Calculator (Expenditure based)	N/A
Scope 3	Category 3: Fuel and energy related activities	Upstream energy processing	Fuel and electricity purchase data	GZA Scope 3 Calculator (Expenditure based), SLSEA 2022 EF	IPCC (AR5) 2014
Scope 3	Category 4: Upstream transportation and distribution	Inbound logistics (inputs)	Good receiving records, estimated distance	GZA Scope 3 Calculator (Expenditure based)	IPCC (AR5) 2014
Scope 3	Category 5: Waste generated in operations	Tea waste, packaging waste	Estate-level logs	DEFRA 2024	IPCC (AR5) 2014
Scope 3	Category 6: Business travel	Staff travel (vehicle, air)	Travel logs, ticket records	DEFRA, ICAO Carbon Emissions Calculator (ICEC)	IPCC (AR5) 2014
Scope 3	Category 7: Employee commuting	Worker and staff commuting	Survey and route assumptions	DEFRA 2024	IPCC (AR5) 2014
Scope 3	Category 9: Downstream transportation and distribution	Factory to buyer logistics	Waybills, transporter data	DEFRA 2024, GZA Scope 3 Calculator (Expenditure based)	IPCC (AR5) 2014
Scope 3	Category 10: Processing of sold products	Tea blending, packaging by customers	Assumed industry avg.	GZA Scope 3 Calculator (Expenditure based)	IPCC (AR5) 2014
Scope 3	Category 12: End-of-life treatment of sold products	Disposal of tea bags, packaging	Sales data, industry ratios	DEFRA 2024	IPCC (AR5) 2014
Scope 3	Category 13: Downstream leased assets	Sub leased hectareage	Hectareage statement	Local research-based factor	IPCC (AR5) 2014

The IPCC AR5 (2014) Global Warming Potential values are used because our chosen emissions-calculator tool and relevant factors are built on those factors.

13.2.3 Other Cross-Industry Metrics

TTE discloses additional metrics reflect its exposure to climate-related physical and transition risks, the company's capital allocation to climate action, and integration of climate considerations into internal carbon pricing and executive remuneration policies.

Vulnerability of Assets or business operations to Climate-related Physical Risks

Metric	2024/25	2023/24	Comment
% of estate land in flood-/landslide-prone zones	6.1%	Not assessed	Mapped using geospatial risk overlays
Climate disruption cost (% of OPEX)	0.47%	0.35%	Linked to storm damage, road washouts, yield losses
Rainwater harvesting coverage	Not assessed	Not assessed	Capacity increase

Vulnerability of Assets or business operations to Climate-related Transition Risks

Metric	2024/25	2023/24	Comment
% of Scope 1 emissions from fossil fuels	9.1%	9.6%	Mainly diesel; mitigation underway via RE expansion
Fertilizer-linked emissions (N ₂ O share of Scope 1)	44.4%	33.6%	High-cost exposure if future regulation applies
% of strategic suppliers with low-carbon sourcing contracts	5%	1%	New procurement framework under rollout (2025/26)

Capital Deployment

Category	Amount (Mn)	Use
Renewable energy infrastructure	9	Small hydro, solar PV
Landscape-level adaptation	599	Bunding, drains, rainwater systems
Efficiency upgrades	-	VFDs, LED lighting, boiler retrofits
Total climate-aligned CapEx	608	CapEx

Climate-Related Opportunities

Metric	2024/25	2023/24	Target 2030	Comment
Premium income from certified tea	3%	3%	40%	Supports access to high-value export markets
Compost substitution for fertilizer	17%	14%	60%	Reduces GHGs and improves soil carbon
Renewable energy share	89%	88%	95%	Strategy under CapEx roadmap 2025–2027

Internal Carbon Pricing

TTE has not implemented internal carbon pricing as of FY 2024/25. The company is currently evaluating the feasibility of introducing a shadow price to support future investment and decarbonization planning.

Remuneration Linkage

TTE is in the process of evaluating the integration of climate-related performance into its remuneration framework. As of FY 2024/25, remuneration is not yet formally linked to specific sustainability-related risks or opportunities (SRROs).

SLFRS Sustainability Related Financial Disclosures

13.2.4 Industry-based Metrics

TTE industry-based metrics are aligned with the SLFRS S2 requirements and draw from the SASB Agricultural Products Standard, which provides sector-relevant indicators covering emissions, energy, water, and land use. (Refer page 328)

13.2.5 Climate related targets

Disclosure Category	Metric Name	Metric Type	Metric Definition	Objective of the Target	Unit of Measure	Comparative Information			Interim Target (2030)	Target (2050)
						(2023/24)	(2024/25)	YoY Change		
Transition Risk - GHG compliance & energy market shifts	Scope 1 & 2 GHG emissions	Core GHG Mitigation Metric	Absolute GHG emissions from fuel and electricity use (tCO2e)	Reduce direct emissions to align with TTE's net-zero pathway	tCO2e	2,447	2,567	↓4.6%	↓42%	↓90%
Transition Risk - Value chain exposure	Scope 3 GHG emissions	Value Chain Emissions	Emissions from purchased inputs, logistics, and customer lifecycle	Lower upstream/ downstream emissions through supplier engagement	tCO2e	9,847	9,905	↓0.5%	↓42%	↓90%
Chronic Physical Risk - Land-based degradation	Scope 1 & 3 FLAG emissions	Land Use Emissions (GHG)	Emissions/removals from soils, biomass, and landscape-level change	Enhance land carbon sinks and curb landscape-based emissions	tCO2e	9,434	10,762	↓12.3%	↓30.3%	↓72%

* Base Year for All Targets is 2022/23

Validation and Alignment

- Targets validated by the Science Based Targets initiative (SBTi) for near-term, long term and NetZero 1.5°C alignment
- FLAG sector targets follow SBTi FLAG Guidance (land-use sector) and validated by Science Based Targets initiative (SBTi)
- Adaptation metrics align with TNFD LEAP Framework
- Strategy supports Sri Lanka's NDCs under the Paris Agreement

Use of Carbon Credits

- TTE does not currently use carbon credits to meet targets
- Future use will prioritize as per the SBTi standard requirement:
 - Insetting (e.g., soil carbon, afforestation on TTE lands)
 - Verified standards (Gold Standard, VCS)
 - Transparent disclosure of credit type, volume, and application

13.2.6 Social-related metrics

Disclosure Category	Metric Name	Metric Type	Metric Definition	Objective of the Metric	Unit of Measure	Current Performance (2024/25)	Interim Target (2028)	Target (2030)
Wage Escalation - Cost Pressure Risk	Living Wage (Average daily wage per worker)	Labour Cost Metric	Statutory and negotiated daily wage (Rs) for permanent estate and factory workers	Ensure workers earn a living wage that supports their wellbeing and financial security.	% of gap closed	21.82 % current gap	80 % of the living-wage gap closed	100 % of the living-wage gap closed (parity)
Labour Cost Buffering - Wage-Productivity Linkage	Revenue-share wage model coverage	Social Resilience Metric	Percentage of workforce enrolled in the 45% revenue-share incentive wage scheme	Strengthen productivity and resilience by linking compensation to performance.	%	28%	40%	50%
Labour Availability - Absenteeism	Annual absenteeism rate	Workforce Availability Metric	Absenteeism rate among estate and factory workers vs total available workdays	Enhance operational continuity by reducing unplanned workforce absences.	%	<10%	<15%	<10%
Retention & Wellbeing	Workforce continuity investment	Enabling Infrastructure Spend	Annual CAPEX + OPEX for housing, maternal care, sanitation, schools and childcare	Improve employee retention through strategic investments in wellbeing infrastructure.	Rs Mn/ year	Rs. 103.6 Mn	Rs. 110 Mn/ year	Rs. 150 Mn/year
Labour Pool Expansion - Gender Inclusion	Female participation in field operations	Diversity & Labour Pool Expansion	Percentage of field roles (plucking, nursery) held by female estate workers	Build a more inclusive, diverse workforce by increasing women's roles in operations.	%	29%	32%	40%

13.2.7 Biodiversity-related metrics

Disclosure Category	Metric Name	Metric Type	Metric Definition	Objective of the Metric	Unit of Measure	Current Performance (2024/25)	Interim Target (2027)	Target (2030)
Dependencies & Impacts	Area under active ecosystem restoration (ha)	Core Sector Metric (TNFD FA3.1.1)	Total hectares under ecological restoration interventions (e.g., forest buffers, slope rehabilitation, agroforestry plots).	Expand natural capital by scaling landscape restoration.	Hectares	62 ha	100 ha (cumulative)	200 ha (cumulative)
Risks & Opportunities	Revenue from certified sustainable or nature-positive tea (%)	Cross-sector TNFD core metric	Percentage of total revenue from tea certified as Rainforest Alliance or meeting equivalent biodiversity/nature-positive standards.	Strengthen market resilience through premium certified sales.	%	88%	95%	100%
Opportunities	PES or carbon credit income from biodiversity-linked projects	Additional Metric (TNFD Sector/Custom)	Annual revenue generated from PES (Payment for Ecosystem Services) or nature-based carbon credit sales linked to biodiversity restoration.	Monetize ecosystem services to fund continued restoration.	Rs Mn/year	Rs. 3.5 Mn	Rs. 10 Mn/year	Rs. 20 Mn/year
Impacts	Soil organic carbon content in restored areas	Biome-aligned impact metric (TNFD T7)	Average increase in soil organic carbon (% per year) in areas under biodiversity enhancement (bunds, buffers, agroforests).	Enhance soil health and long-term productivity via carbon gains.	% increase	0.70%	+1.2% annually	+1.5% annually

13.3 Target Setting and Review Mechanism

TTE sets and reviews sustainability-related targets through a structured governance and operational process. Targets are set only where material risks or opportunities have been identified, and where measurable progress can influence financial or strategic decision-making (as disclosed in Notes 7–12)

Target-Setting Principles

TTE's ESG target-setting process is guided by the following principles:

- **Materiality-driven:** Targets are only established for metrics linked to material SRROs (e.g., transition risk, chronic climate risk, biodiversity opportunity).
- **Science-aligned and externally referenced:** Climate-related targets are aligned with the Science Based Targets initiative (SBTi) and the TNFD. Environmental performance targets align with Rainforest Alliance and ISO 14001 standards.
- **Operationally feasible:** Targets are designed considering the unique constraints and resource conditions across TTE's upcountry and low country estates.
- **Time-bound and measurable:** All key targets have baseline years, progress tracking indicators, and review cycles.

Target Approval and Review Governance

Step	Responsible Body	Review Cycle
Target proposal and baseline setting	Central sustainability team	Annually (pre-budget cycle)
Technical validation and feasibility	Estate superintendents and sustainability team	Annually
Alignment with group and international frameworks	Head of Finance and Head of Sustainability and	Annually
Board-level approval and target updates	ESEG Steering Committee → BAC → Board	Annually

Progress against targets is tracked in quarterly sustainability performance reviews and reported in ESG dashboards to the Board Audit Committee.

Mid-Cycle Target Adjustments

Targets may be revised in the following cases:

- Major scenario-driven shifts (e.g., high-emissions climate forecasts – see Note 11.3),
- Market or regulatory changes (e.g., new buyer audit protocols, labor law updates),
- New data systems or monitoring improvements enabling more accurate tracking.

13.4 Performance Against Targets

This section discloses TTE's performance against its ESG targets for FY 2024/25. It consolidates progress reported across the ESG Target and Progress Table (pages 76) and the ESG Consolidated Statement (pages 79).

Only targets linked to material risks and opportunities identified in Note 7 are included. For each, the TTE reports the metric, current year performance, baseline, target year, and progress status. All data has been reviewed internally and verified where required by third-party certification or audit.

Business Review

Overview

In 2024, the tea industry faced continued challenges, with a notable decline in crop production due to adverse weather conditions that disrupted harvesting cycles and reduced yields. Compounding these difficulties, a 35% wage increase implemented in September significantly impacted production costs across the sector. Despite this setback, the year proved resilient, as favorable market dynamics led to stronger prices at the Colombo Tea Auctions compared to the previous year. This price recovery helped cushion the impact of reduced volumes and additional wage cost, enabling us to sustain healthy revenue levels. Guided by our Regenerative Agenda 2030, we remained focused on operational excellence and quality assurance across our estates. As a result, we upheld our reputation for producing premium teas, securing strong auction rankings and delivering stable financial outcomes amidst a complex operating environment.

Field Development Programme – Investment: Rs. 268 Mn

Nursery Management	Soil Management	Harvesting	Replanting Programme	Crop Diversification	Commercial Forestry
To provide a consistent supply of healthy plants for replanting programs and to replace older or non-productive plants	To maintain soil fertility, promote healthy root systems, and ensure the plants' access to essential nutrients for optimal growth and high-quality tea production	To ensure high-quality tea production, with careful management of the harvest schedule to prevent over or under-harvesting, which could affect future yields	To maintain the productivity of the plantation and increase yields while addressing environmental factors like soil depletion and climate change	To increase revenue sources, enhance soil health through mixed cropping, and protect against economic risks associated with the volatility of the tea market	To create an additional revenue stream from timber, provide environmental benefits such as carbon sequestration, and improve soil and water conservation.

Tea Production

In 2024, the Sri Lankan tea industry faced an extremely challenging environment characterized by unpredictable adverse weather patterns, especially in the upcountry regions. This resulted in a notable downturn in crops across the sector, adding pressure to an industry already grappling with rising costs and fluctuating international demand.

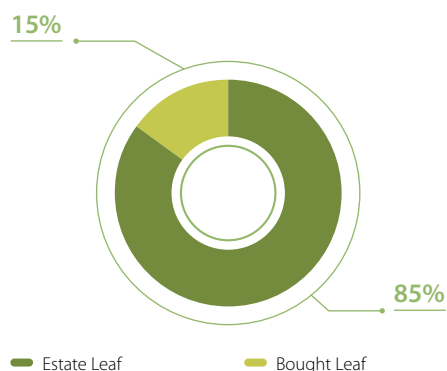

Against this backdrop, TTE recorded yield per Hectare (kgs/hect/annum) of 1268, signaling a drop from 1366 in FY 2023/24. Consequently, TTE's total crop declined from 5.72 million kg in 2023/24 to 5.52 million kg in 2024/25, a drop of 3.5%, largely attributed to weather-related disruptions across high-grown planting region.

High-grown crop volumes decreased significantly from 4.46 Mn kg in 2023/24 to 4.00 Mn kg in the current year, reflecting a decline of 10.4%. On the other hand, the low-grown segment remained resilient to record a 21.6% crop increase from 1.25 Mn kg in the previous year to 1.52 Mn kg for FY 2024/25.

Crop

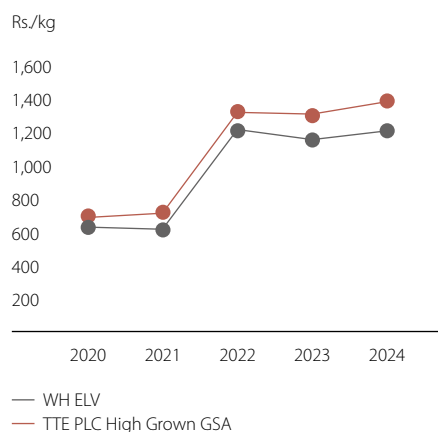

Est. Leaf & Bought Leaf

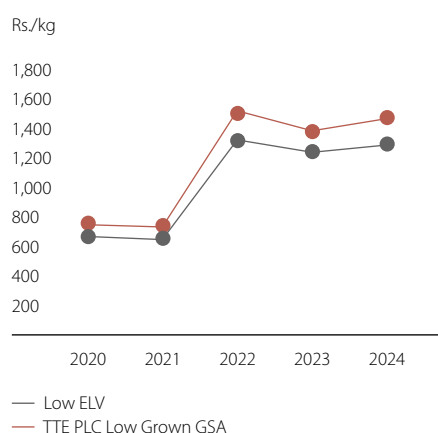

Notably however TTE succeeded in offsetting lower volumes by securing stronger prices at the Colombo Tea Auction, achieving an average of Rs. 112 / kg more per kg compared to the previous year's sale average. In the Western High Grown segment, national elevation prices moved up from Rs. 1,123.01 / kg in 2023 to Rs. 1,189.14 / kg in 2024, while TTE's high-grown GSA increased from Rs. 1,303.61 / kg to Rs. 1,374.48 / kg maintaining a solid premium of Rs. 185.34 / kg over national levels. Similarly, TTE's low-grown GSA advanced from Rs. 1,399.33 / kg to Rs. 1,483.46 / kg to surpass the low-grown national elevation prices of Rs. 1,304.38 / kg, by a robust Rs. 179.08 / kg.

Western High Grown (WHG) Elevation Against TTE PLC High Grown GSA

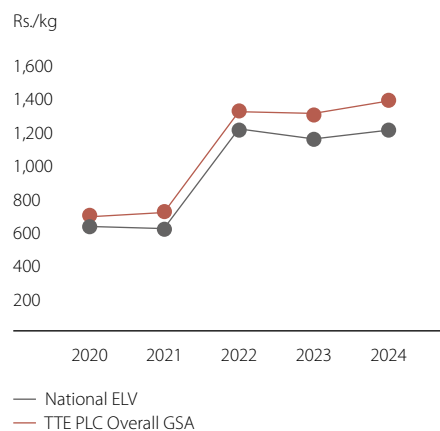

Low Grown (LG) Elevation Against TTE PLC Low Grown GSA

In another noteworthy accomplishment, TTE achieved an all-time record price, with the Company's overall gross sale average (GSA) increased from Rs. 1,326.06 in 2023 to Rs. 1,403.74 in 2024, which is an improvement of Rs. 77.68 compared to the previous year. Additionally, we surpass the national elevation average by Rs. 178.57.

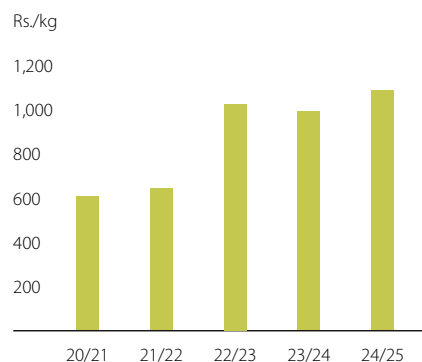

Securing premium prices at the Colombo Tea Auctions enabled TTE to safeguard overall turnover and sustain its No. 1 position across the high-grown, low-grown, and national level, both commendable achievements given the overall crop decline recorded during the current year. In further testimony to TTE's focus on quality excellence, six of the Company's marks were ranked among the top ten. Recording a total of 223 top prices and 01 all-time record during the year 2024.

Elevation & GSA

Meanwhile, cost pressure proved to be a serious drawdown on the Company's operations in the current year. Following a 35% wage increase introduced in September 2024, TTE incurred substantial additional costs amounting to approximately Rs. 270 Mn, pushing up the cost of production from Rs. 1,000.89 / kg in 2023/24 to Rs. 1,095.44 / kg in 2024/25.

TTE Cost of Production

Business Review

Nevertheless, supported by robust overall revenue performance, the Company delivered an operating profit of Rs. 1,444.7 Mn, marking an decrease of 7.04% over the Rs. 1,554.0 Mn reported in the previous financial year, a noteworthy accomplishment despite the pressures on cost structures. However overall profitability declined due to reduced investment income, reflecting the declining interest rates, which weighed on consolidated results compared to the prior year.

The commissioning of TTE's new factory in Kiruwanaganga marks a major milestone for the Company in the current financial year. The strategic investment in this state-of-the-art facility equipped to produce superior-grade teas, is set to be a key contributor in boosting TTE's sales average in the coming years. The factory with its enhanced processing capacity for value added and high-end premium teas, will also support TTE's efforts to explore the growing global demand for specialty teas

Field Development

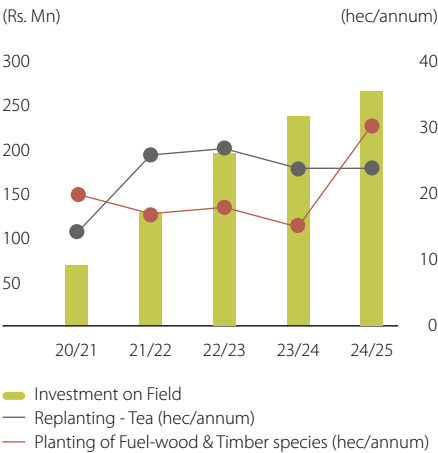

TTE made good progress on its field development operations throughout the year with a strong emphasis on supporting long-term productivity and sustainability. The investment in field development activities increased from Rs. 240 Mn in 2023/24 to Rs. 268 million in 2024/25.

Nursery management activities were expanded with the volume of plants raised in the nurseries increased significantly to give TTE better control over plant quality and available to meet the Company's replanting requirements.

Soil rehabilitation activities were also further enhanced with the integration of organic matter, introduction of earthworms, and application of compost to sustain soil fertility and boost soil health. Likewise cover crops continued to be planted to prevent erosion and improve soil structure of bare lands, in preparation for re-planting in due course.

The replanting programme was maintained, with 24 hectares replanted in 2024/25, consistent with the area replanted the year before. Much of the replanting efforts were directed towards the low-grown sector, which has proven to deliver higher yields in a much shorter harvesting time due to the warmer climate. Moreover, the replanting strategy is also aimed at reducing the dependency on bought leaf, especially given intensifying competitive pressures in that space.

Replanting Hectarge & Expenditure

Crop Diversification

TTE made significant strides in its crop diversification strategy in the current year. In line with the strategic decision made a few years ago, the Company continued to shift away from traditional rubber cultivation, with replanting efforts for the year driven by more commercially viable and sustainable crops such as cinnamon and coconut. In total, 36 hectares of cinnamon are already in active production while another 50 hectares in immature condition, including 18 hectares newly planted this year. Going forward, TTE aims to build on the successful expansion of cinnamon cultivation, having already achieved coverage of 100 hectares.

In parallel, coconut cultivation, which commenced in 2019, also gathered momentum in the current year, with plans to establish 100 hectares over the next five years.

Adding to these efforts, the Company embarked on a pilot project to grow strawberries under controlled conditions using poly-tunnels, underscoring TTE's commitment to crop diversification.

Commercial Forestry

TTE's commercial forestry operations remained on track with the Company's long-term five-year planting plan. The planting of fuelwood, mainly eucalyptus, expanded significantly in the current year with the total coverage nearly doubling from 15 hectares in 2023/24 to 30 hectares in 2024/25. Simultaneously nursery production was also scaled up to ensure guaranteed availability of high-quality plants for continuous planting cycles.

Meanwhile, in light of the lower demand this year due to sluggish market demand and lower timber prices, a strategic decision was made to focus on building up stock rather than harvesting, which it is hoped will provide a significant competitive advantage when demand picks up.

Renewable Energy

TTE made good headway in advancing its renewable energy strategy in the current year, investing Rs. 59.3 Mn to expand its solar footprint. Rooftop solar decks commissioned at Kiruwanaganga New Tea factory and several estate bungalows, collectively representing a generation capacity of 300kWp.

Total solar generation increased by 622,277 MWh to reach 669,071 MWh this year, enabling the TTE to record Rs. 12 million in revenue solely from its solar initiatives.

In addition, the full acquisition of all its mini hydro plants in the past has given TTE better control over the management of these renewable energy assets. Over the course of the year, total hydropower generation reached 7,975 MW, marking a 16% increase compared to last year. By contributing to the national grid, we generated an additional Rs. 94 million in revenue.

Business Review

The State-of-the-Art Kiruwanaganga Tea Factory

The newly commissioned Kiruwanaganga Factory represents a significant advancement in our operational capabilities, showcasing our dedication to innovation, environmental responsibility and sustainable value generation. This state-of-the-art facility incorporates cutting-edge technologies and optimized processes designed to enhance efficiency, minimize environmental impact and ensure the production of high-quality products, solidifying our commitment to long-term growth and stakeholder value.

The Great Western Glamping Site

The Great Western Glamping Site, situated within the stunning Great Western Mountain Range, offers an immersive experience amidst breathtaking landscapes and renowned tea estates. While the region is crowned by the sixth highest peak in Sri Lanka, towering at 2,215 meters, the glamping site itself can further enhance its appeal by focusing on eco-friendly practices and sustainable tourism initiatives. By minimizing its environmental footprint and actively engaging with local communities, Great Western Glamping Site can solidify its position as a premier destination for discerning travelers seeking adventure and tranquility in this remarkable natural setting.

Somerset Tea Boutique

Nestled amidst a picturesque landscape of verdant greenery, the Somerset Tea Boutique provides an exceptional respite for travelers and a haven for tea aficionados. Beyond offering a curated selection of the finest teas and delectable culinary accompaniments, the boutique elevates the experience with factory tours showcasing the tea-making process and delightful tea-tasting sessions. Somerset Tea Boutique also prides itself on providing factory-fresh, value-added tea packs, perfect for gifting or personal enjoyment. It is truly a destination where relaxation, education, and the exquisite world of tea converge.

TeaTel Tea Boutique

TeaTel Tea Boutique, situated on Vajira Road in Colombo, presents a refined experience centered around the exceptional Ceylon teas. Offering an extensive selection of giftable and elegantly packaged teas adorned with unique Sri Lankan cultural designs, TeaTel specializes in both Dimbula and Ruhuna varieties sourced directly from the esteemed Talawakelle Tea Estates PLC. Beyond the tea selection, the boutique provides a relaxing area for patrons to enjoy a hot or iced tea accompanied by a light snack, creating an inviting space for quiet reflection or productive work.

Araliya Bungalow

Escape the everyday hustle and discover serenity at our charming bungalow, nestled within the verdant landscapes of Galle. This tranquil retreat offers a respite from the city's noise, providing a comfortable and peaceful haven ideal for family outings or relaxing with friends. Immerse yourselves in nature's embrace and experience a restorative getaway designed for rejuvenation and connection.

Cinnamon Peeling Centre

At our Cinnamon Peeling Centre, nestled within the lush Moragalla Estate in Galle, we are dedicated to crafting the finest quality cinnamon quills. Utilizing time-honored techniques and the skilled hands of our experienced peelers, we meticulously transform raw bark, harvested directly from our own estate-grown cinnamon trees, into a premium-grade product. The result is a fragrant and pure cinnamon, reflecting the unique terroir of Moragalla and our unwavering commitment to excellence.

Story of Our Subsidiaries

Our Renewable and Clean Energy

Hydropower, also known as hydroelectric power, is a renewable energy source that generates electricity by harnessing the energy of flowing water such as rivers or streams flow downhill due to gravity. This movement creates kinetic energy in the water.

Our Stakeholder Engagement

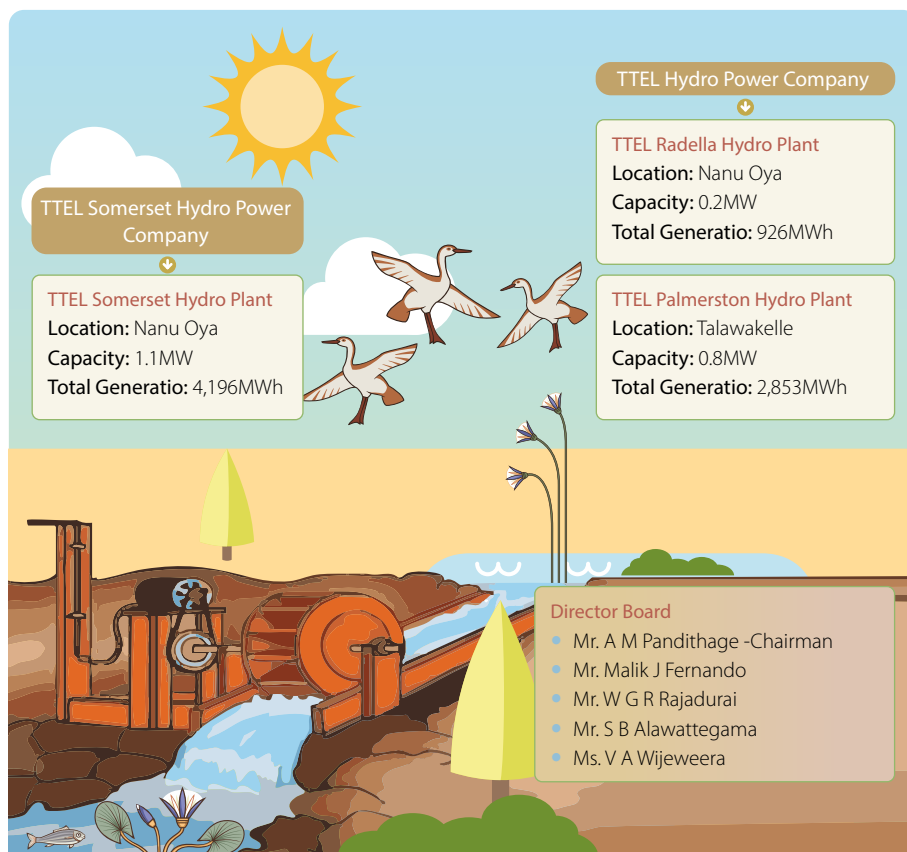

Principals/Government /Community/Employees

Our Subsidiaries

Located in the picturesque regions of Nanu Oya and Talawakelle, our three hydropower plants—Radella, Palmerston, and Somerset— are operated and managed by our fully owned subsidiaries, TTEL Hydro Power Company and TTEL Somerset Hydro Power Company. In line with our Regenerative Business Agenda 2030, we increased our stake in these subsidiaries to 100%, reinforcing our commitment to renewable energy.

Our Segment Activity

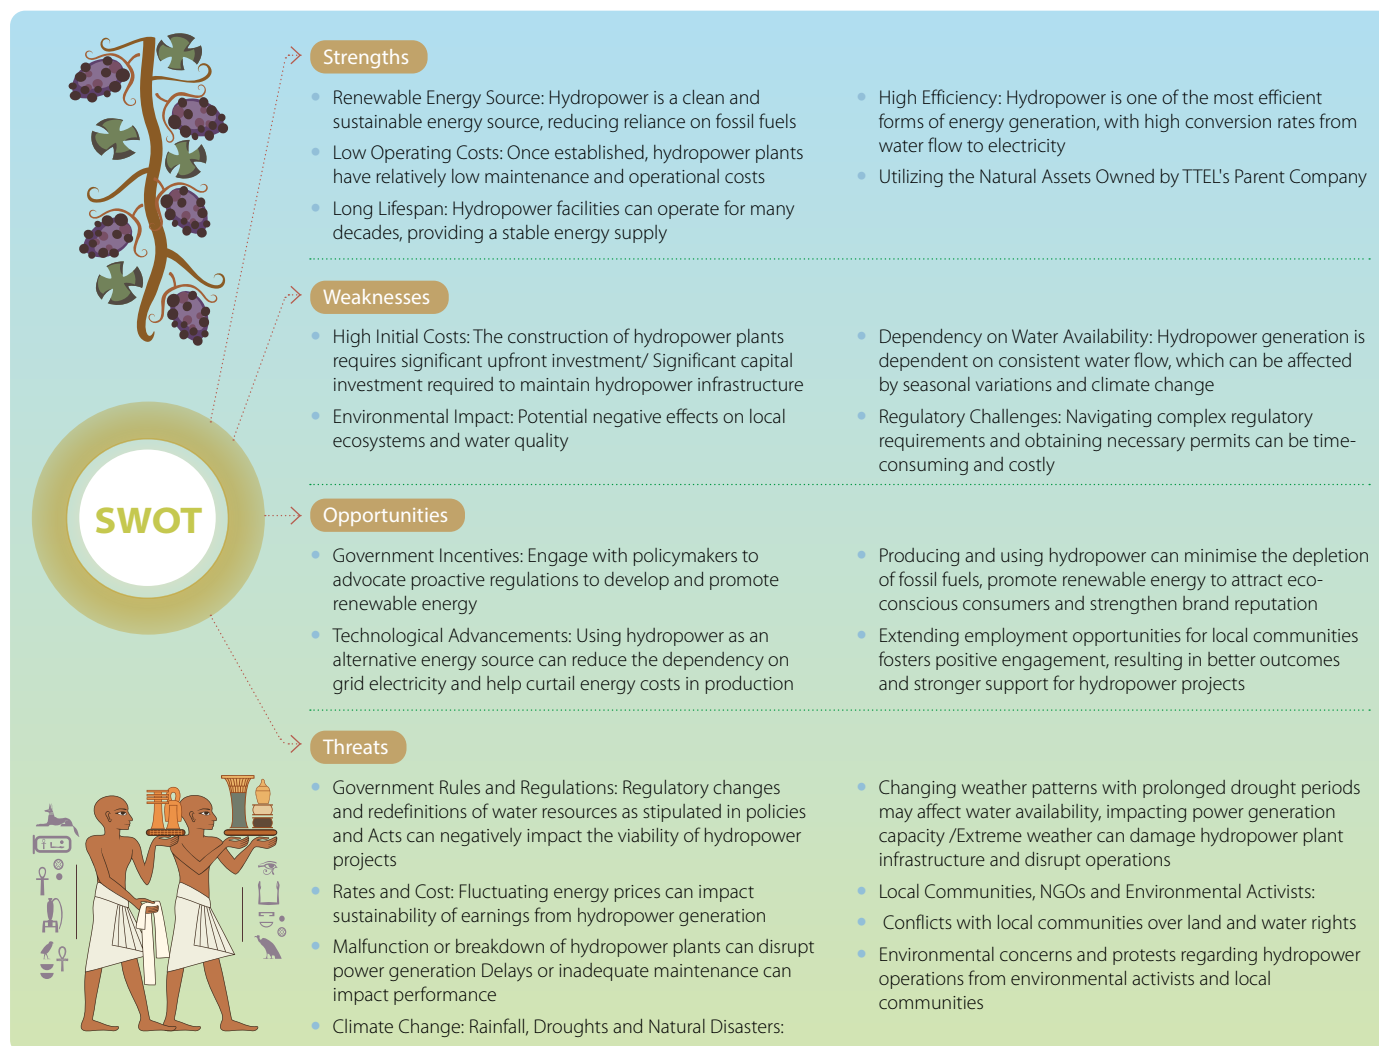

The core business of hydropower is centered on generating electricity by utilizing the kinetic energy of flowing or falling water. This electricity is then supplied to the national grid.

Story of Our Subsidiaries

Industry Analysis

The hydropower industry stands at the forefront of the renewable energy revolution, driven by the urgent need to combat climate change and the depletion of fossil fuels. With efficient and sustainable energy generation, we are uniquely positioned to capitalise on this shift. Despite facing challenges such as high initial costs and regulatory hurdles, significantly to a sustainable future. By combining the industry analysis with the SWOT analysis, to determine our strengths, and weaknesses against external opportunities, and threats. This integrated approach helps in strategic planning and decision-making.

Our 2030 Target

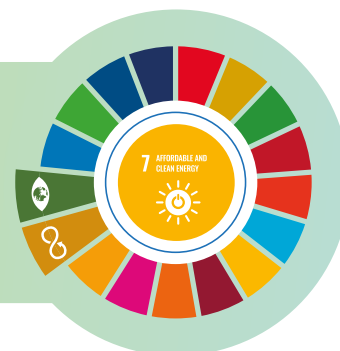

Increase Renewable Energy Generation continually

Contribution

Our investment in solar PV systems, hydro power and biomass plantation contributes directly to increasing renewable energy use

Target 7.2

- Looking ahead, the Company plans to increase hydropower generation by diversifying into other renewable sectors to strengthen energy security and support long-term sustainability goals.
- To further enhance efficiency and reliability, strategic investments will be made in advanced turbine technology and energy storage solutions. These upgrades are expected to improve overall performance and operational resilience.
- The Company is also committed to reducing its carbon footprint, with a clear target of achieving a significant reduction by 2025, reflecting a strong alignment with global climate objectives and responsible environmental stewardship.
- In addition, the Company aims to secure 2,500 International Renewable Energy Credits (IREC) by 2025/26. This initiative will support its transition toward cleaner energy while adding value through verified green energy production.

Future Roadmap

Economic Value Added

GRI 3-3 | 201-1 | 13.2.1, 13.2.2.1, 13.2.2.2

The tea sector's sustained strength continued this year, firmly establishing itself as a crucial cornerstone of the national economy. Its significant contribution played a vital role in the country's broader economic and social progress and demonstrated remarkable resilience in the face of many obstacles.

The economic value we created in the year on a consolidated basis, including hydropower operations, touched Rs.5,787.6 Mn. Given difficult market conditions, the value stood at 2.4 % below the level achieved in the previous year. Out of the value created, we distributed over 80% among our key stakeholders while retaining Rs. 1,192.2 Mn within the business, corresponding to 20%.

Environmental Management

As a plantation company, climate change impacts our crop production and leaf quality, in turn, affecting our financial viability both in the near and in the long term. As part of us environmental responsibility initiatives, we invest well on controlling carbon emissions and addressing the impacts of climate change on our business operations. In the year, we spent Rs. 58.3 Mn for environmental management.

We also invested in our second roof top solar power project.

Total Environment Cost

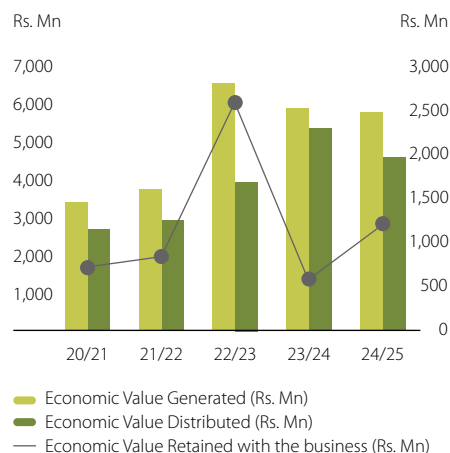

I Refer: Natural Capital, pages 178 to 192

To Expansion and Growth

Retained in Business - The amount retained for reinvestment and future growth increased significantly from Rs. 562 Mn in the previous year to Rs. 1,192 Mn in the current year, marking a notable growth of 111.9%. This sharp rise underscores the Group's strategic focus on strengthening its capital base and supporting long-term sustainability and expansion through internal reinvestment

Depreciation/Amortization - Depreciation and amortization expenses increased from Rs. 226.1 Mn in the previous year to Rs. 261.2 Mn in the current year, marking a 15.5% rise. This reflects the Group's continued investments in Property, Plant & Equipment and replanting, underscoring its commitment to modernizing operations and supporting future growth.

Hapi
The Life-Giver of Waters

Like Hapi's sacred floods, our water stewardship sustains growth, community, and continuity.

Financial Capital

Financial capital is a critical resource that enables organizations to invest in growth opportunities, expand operations, drive innovation, and ultimately deliver sustainable results that benefit all stakeholders. At its core, effective management of financial capital involves diligent performance monitoring, proactive capital and liquidity management, and disciplined cash flow oversight. With companies required to operate in an increasingly complex macroeconomic and geopolitical environment, the importance of robust financial controls and governance principles has only grown. Stringent policies and procedures around the deployment of capital, risk management, and reporting are essential to ensure financial resources are allocated prudently and in alignment with the organisation's strategic priorities. With the right people, processes and systems in place at TTE, We can harness the power of financial capital, and build the resilience and agility needed to navigate an uncertain world and generate long-term value creation.

GRI 3-3

Management Approach

Risks

Diverse weather conditions may impact revenue and profitability.

Ad-hoc regulatory policy changes resulting in unreasonably high wage increases.

Opportunities

Diversification into high-margin product lines and value-added exports.

Efficient capital investment offers long-term cost savings and financial resilience.

Material Matters

- Economic Performance
- Tax

Management Approach

TTE adopts a forward-looking approach to managing financial capital, balancing short-term performance with sustainable value creation. The Company's strategy centres on maintaining financial stability through diversification, prudent capital structuring, and disciplined cost management. By prioritising investments that enhance operational efficiency and asset productivity, TTE strengthens its capacity to absorb external shocks while continuing to deliver stakeholder value.

A key principle of this approach involves the use of internal funds (retained earnings) for strategic investments, thereby preserving independence and minimising exposure to financial risk. Profitability is managed not just through revenue growth but also through lean operational practices and strong working capital discipline.

Equally importantly, strong emphasis is placed on liquidity management, ensuring that operating cash flows are sufficient to meet reinvestment needs and shareholder commitments. In parallel, the Company actively manages its investment portfolio to generate steady financial income and support overall capital growth.

SDG's

- Target 2.3: Double the agricultural productivity and incomes of small-scale food producers.

- Target 7.2: Increase substantially the share of renewable energy in the global energy mix.

- Target 8.2: Achieve higher levels of economic productivity through diversification, technological upgrading and innovation
- Target 8.5: Achieve full and productive employment and decent work for all women and men, and equal pay for work of equal value
- Target 8.8: Protect labour rights and promote safe and secure working environments.

- Target 9.4: Upgrade infrastructure and retrofit industries to make them sustainable.

- Target 12.2: Achieve the sustainable management and efficient use of natural resources.
- Target 12.6: Encourage companies to adopt sustainable practices and integrate sustainability information into their reporting.

- Target 13.1: Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters.
- Target 13.2: Integrate climate change measures into national policies, strategies and planning.

Financial Capital

Analysis of Profit and Loss

Revenue

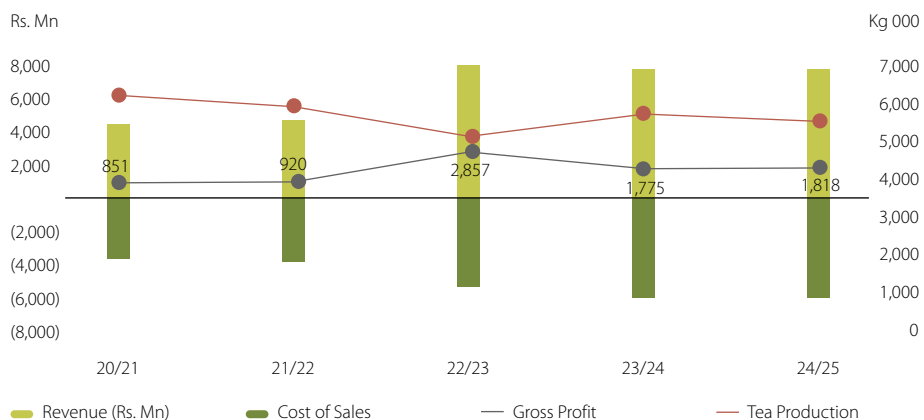

Despite the significant recovery of the economy and stabilisation of the currency following the severe economic crisis in 2022, Sri Lanka's tea industry continued to experience disruptions due to extreme weather conditions in 2024. In the face of adverse weather events, TTE's strategic initiatives including the implementation of precision agricultural practices focused on optimising quality and productivity, helped to contain the reduction in tea production to 3.5%. Moreover the emphasis on producing high-quality tea has resulted in improved prices, leading to an increase in tea revenue by Rs. 21.5 million with total revenue from tea reaching Rs 7,436 million in the current financial year.

Likewise, the Rubber and Cinnamon sectors also witnessed growth in FY 2024/25, with revenue increasing by Rs 2 million and Rs 8 million respectively. Furthermore, the Hydro power generation by two subsidiaries has contributed to a notable rise in revenue of Rs 25 million. Despite the contraction of other revenue streams by Rs. 14 million, TTE's total revenue for the current year registered an increase of Rs 42 million compared to the previous year, underscoring the Company's resilience and adaptability in the face of challenging circumstances.

Gross Profit (GP)

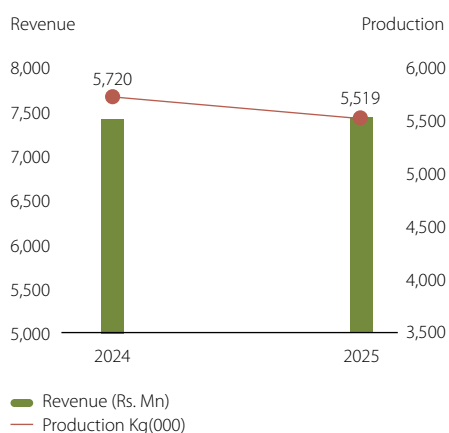

By implementing effective agricultural practices and leveraging lean management principles, TTE successfully maintained its cost of sales at a similar level to the previous year. This achievement comes despite a significant 35% increase in daily wages since September 2024, which was partially offset by lower expenses on fertiliser, electricity, and energy. As a result, gross profit saw a modest rise from Rs. 1,775 million in the previous year to Rs. 1,818 million.

Profit Before Tax (PBT)

GRI 207-1, 2

Despite a slight increase in gross profit, profit before tax during the year decreased from Rs. 2,135 million in 2024 to Rs. 1,771 million, mainly due to a decrease in fair value gains on biological assets and a decrease in financial income from investments in financial instruments in the prevailed low interest rate regime.

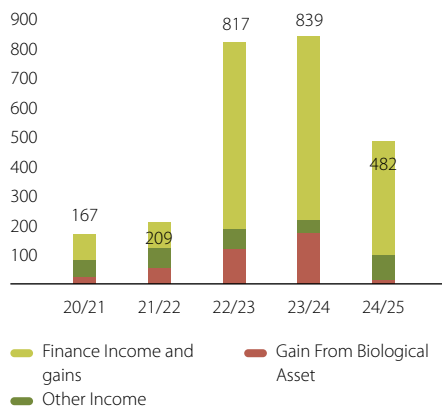

Bottom-line Performance

Rs. Mn

Other Income and Gains

Rs. Mn

Profit After Tax (PAT)

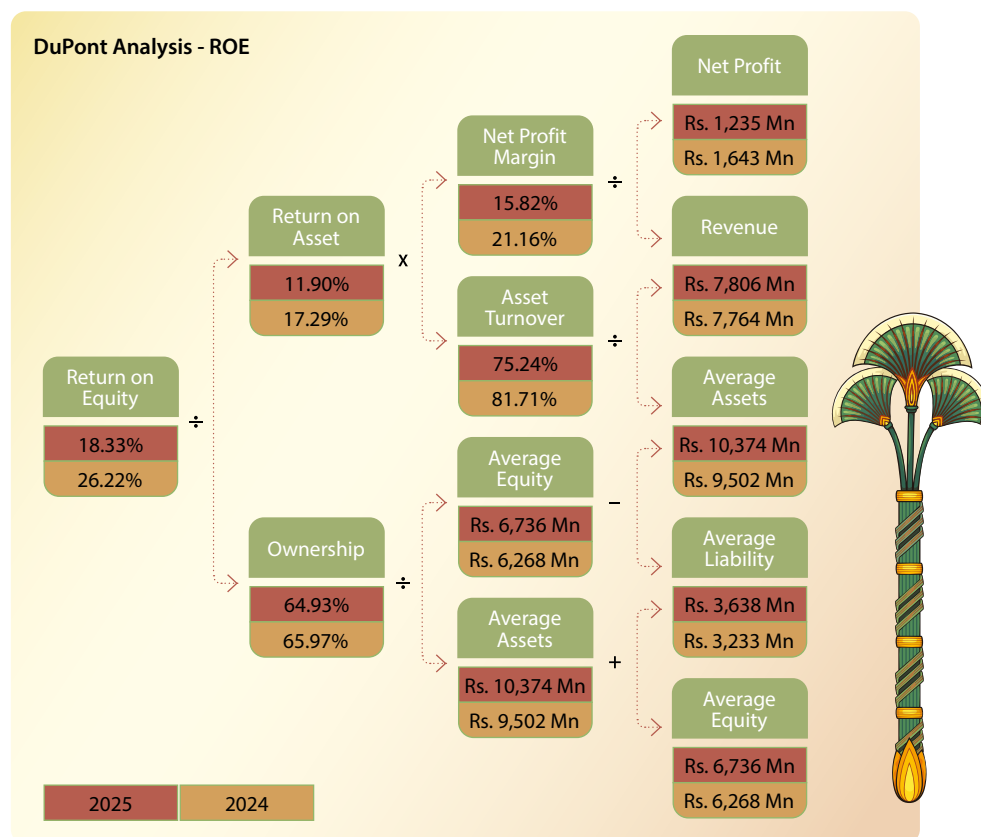

Despite the decrease in pre-tax profit, the Company's tax expenses increased from Rs. 352 Mn in 2024 to Rs. 475 Mn, (refer Note No 9 of to the Financial statements) owing to the end of tax concessions for profits on Agro-farming with effect from the current year. The increase in income tax expenses led to a decline in PAT from Rs. 1,643 million in the previous year to Rs. 1,235 million in the current year.

Profitability and Returns

Despite facing significant challenges—including weather-related crop losses, and the substantial 35% wage increase adding approximately Rs. 270 million in costs along with reduced returns on financial investments amounting to Rs. 236 million, a Rs. 148 million drop in fair value gains on biological assets, and a low-inflation environment—the Company delivered a commendable return on equity of 18.33%. However, this figure represents a decline from the previous year's ROE of 26.22%, which is well above the average market rate of return. TTE's share price increased by 22% year-on-year from Rs. 113.75 to Rs. 139.25.

Analysis of Financial Position

Equity and Reserves

TTE's capital structure is comprised primarily of equity capital, which minimises the sensitivity to interest rates fluctuations and strengthens the Company's working capital position. Construction of the state-of-the-art tea factory at Kiruwanaganga Estate in the current financial year was fully funded through equity at a cost of Rs. 714 million, representing the single largest investment in TTE's history

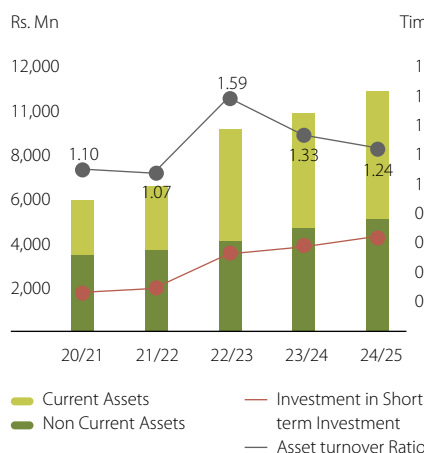

Funding Composition

Total Assets

TTE's total asset base grew by 10% to Rs. 10,890 million as at 31st March 2025, up from Rs. 9,858 million at the end of the previous year. This increase was primarily attributed to investments in property, plant, and equipment, right-of-use assets and short-term investments. The asset turnover ratio (excluding short-term investments), exceeded 1, indicating enhanced asset efficiency. Notably, 40% of total assets represent short-term investments, which generated Rs. 384 million in income during the financial year 2024/25

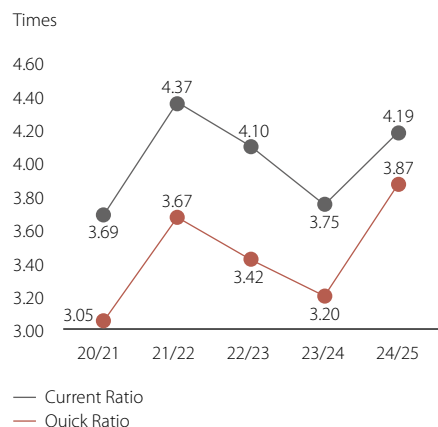

Total Assets

Liquidity Position

With a positive cash flow, TTE's liquidity position remained stable and strong in the year under review. The current and quick ratios exceeded 3.5 times, demonstrating the Company's ability to meet short-term obligations smoothly.

Current Ratio and Quick Ratio

Refer: 10 year summary on page 322

Vertical Analysis - Financial Position

Non-current assets have decreased from 58 percent to 47 percent of total assets in the last five years. Current assets have increased from 42 percent to 53 percent, mainly due to the growth in short-term investments. Long-term liabilities have been reduced from 27 percent to 21 percent and shareholders' equity has been increased from 62 percent to 65 percent within the capital structure over the last five years.

2.3 Cash Movement

Cash is the lifeblood of any business, ensuring its ability to cover expenses, reward investors, and drive growth. During the reporting year, operational cash flow amounted to Rs. 2,242 million, closely aligning with profit before tax and highlighting the Company's strong cash conversion efficiency. A total of Rs. 538 million was invested in field development activities and property, plant, and equipment, in line with the commitment to future expansion. Notably, while maintaining a healthy reinvestment strategy, Rs. 387 million was distributed as dividends to shareholders. A net cash inflow of Rs. 505 million was recorded at the end of the current financial year, the Company effectively generated sufficient operational cash to support both investment and financing activities.

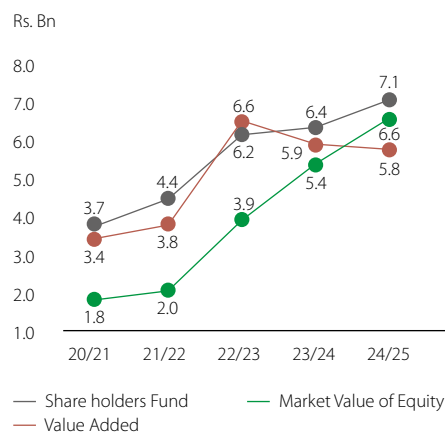

Cash Movement

2.4 Market Value Added

Over the past five years, the growth in value added has led to increase in shareholders' funds. This sustainable performance has been recognized by investors in the capital market, and by the end of 2024/25, market capitalization reached Rs. 6.6 billion.

Market Value Added

Refer: the shareholder Information on page 307

Manufactured Capital

In today's complex business environment—shaped by market volatility, productivity challenges, and the growing impact of climate change—effective management of our manufactured capital has become a strategic priority. This capital, comprising our tangible assets, plays a vital role in delivering sustainable value. It supports operational efficiency, enhances product quality, and helps contain production costs. The following section outlines the best practices that guide our capital expenditure (capex) decisions, enabling us to maintain efficient operations while advancing our consolidation and expansion initiatives.

The State-of-the-art Kiruwanaganga New Factory

Reinforcing TTE's commitment to sustainable innovation and operational excellence

Glamping Site

Nestled within the majestic Great Western Mountain Range, which boasts the sixth highest peak in Sri Lanka at an impressive elevation of 2,215 meters

Solar Power

Sustainability and reducing our environmental footprint, we have continued to invest in solar energy solutions

Hydro Power

Greater energy stability, reduced greenhouse gas emissions, and progress toward our long-term sustainability targets

GRI 3-3 | 13.22.1

Management Approach

Risks

Risk of existing machinery and infrastructure becoming outdated.

Damage to physical assets due to extreme weather events.

Opportunities

Investment in renewable energy and sustainable buildings to improve resilience

Integrate advanced technologies such as IoT and smart tools for data-driven real-time decision making

Material Matters

- Estate infrastructure
- Field Development
- Factory Maintenance
- Plant, Machinery & Equipment
- Renewable Energy

Management Approach

We manage our manufactured capital through a deliberate two-pronged approach to ensure that our assess and infrastructure remains efficient, agile, and aligned with the evolving needs of the business and its stakeholders. Our foremost priority is to build a robust and resilient physical infrastructure base that is capable of withstanding environmental challenges and meeting future growth demands. To further complement these efforts, we focus on integrating digital technologies and automation to further enhance productivity, lifespan and overall performance of our asset base.

Governance

Oversight

- Board of Directors

- Soil Management Guidelines

Monitoring and Reporting

- Hayleys CUBE" Sustainability Data Management System
- UN Sustainable Development Goals (SDGs)

Capital Performance FY 2024/25

Resource Allocation Highlights

Rs. 714.3 Mn invested in the construction of the Kiruwanaganga Factory

Rs. 42.6 Mn incurred in expanding the Somerset Estate-Tea Boutique Center

Rs. 14.9 Mn invested in the Glamping Project at Great Western Estate

Rs. 268 Mn invested in Field Development activities

Outputs for TTE

- Tea Production
- Solar power generation capacity
- Hydro power capacity
- Reduction in rejects due to AI based colour sorting technology

Stakeholder Outcomes	FY 2024/25	FY 2023/24	Value Enhanced (+) Preserved (=) Eroded (-)
Bought Leaf Process	4,183 MT	3,198 MT	Enhanced
Hydro Power Capacity	2.1MW	2.1MW	Preserved
Solar Power Capacity	819.86kWp	599.43kWp	Enhanced

SDG's

- Target 7.2: By 2030, increase substantially the share of renewable energy in the global energy mix.
- Target 7.3: By 2030, double the global rate of improvement in energy efficiency.

- Target 9.1: Develop quality, reliable, sustainable, and resilient infrastructure, including regional and transborder infrastructure, to support economic development and human well-being.
- Target 9.4: By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes.

- Target 12.2: By 2030, achieve the sustainable management and efficient use of natural resources.
- Target 12.5: By 2030, substantially reduce waste generation through prevention, reduction, recycling, and reuse.

- Target 8.2: Achieve higher levels of economic productivity through diversification, technological upgrading, and innovation, including through a focus on high-value-added and labor-intensive sectors.
- Target 8.3: Promote development-oriented policies that support productive activities, decent job creation, entrepreneurship, creativity, and innovation.

- Target 13.2: Integrate climate change measures into national policies, strategies, and planning.
- Target 13.3: Improve education, awareness-raising, and human and institutional capacity on climate change mitigation, adaptation, impact reduction, and early warning.

GRI 203-1, 2 | 13.22.3, 13.22.4

Our Manufacturing Footprint

Operating across 16 estates, 12 factories and 3 re-processing centers, our business model depends significantly on a diverse range of manufactured capital — from machinery, equipment, and IT hardware to estate infrastructure, including factory buildings and community assets. With a long-term perspective, we adopt a systematic management approach guided by a well-structured and comprehensive capital expenditure (capex) plan. This plan is developed annually during our corporate planning sessions under the direction of the Board of Directors and includes clearly defined budgets, timelines, and key performance indicators.

Our capex strategy serves a dual purpose: it aligns with our long-term strategic growth objectives while simultaneously addressing the operational needs of our estates. All new investments in property, plant, and equipment are subject to thorough due diligence, including need-based assessments to ensure they support our broader strategic goals. We rigorously follow up on these investments with feasibility studies and cost-benefit analyses to ensure they deliver solid returns. Sustainability is a key consideration in this process, and we strive to incorporate ESG principles in line with our certification standards.

More recently, significant investments have been directed toward the integration of AI-powered tools aimed at forecasting trends, optimizing resource utilization, and strengthening strategic planning through data-driven insights. As part of this digital advancement, Rs. 93.25 million was invested during the year to introduce AI-based colour sorters at the Deniyaya and Kiruwanaganga factories. Combining cutting-edge technologies from Japan, Germany, Sweden, and the UK, these precision-driven AI tools use sophisticated algorithms to identify and selectively retain or reject silver tips and gold tips, extracting residual black tea from waste, and sorting tea based on shape, length, and thickness. Moreover, these color sorters with their built-in self-recovery system ensure reliability and uptime, operate with minimal noise as well as ultra-low air and energy consumption.

Region	Estate	No. of Factories	Capability	Crop Distribution	%

Deniyaya	3	2	Orthodox - Rotorvane	1,354,197	25

Investment in (PPE) Property, Plant and Equipment

As a plantation company, PPE is critical for TTE's day to day operations. Investing in land improvements, machinery and production infrastructure is therefore vital for building the scalability to expand output and the agility to pivot operations in response to evolving market dynamics.

We Incurred a sum of Rs. 277Mn in the reporting year on new machinery & Equipment.

Asset Type	2024/25 Carrying Value (Rs.'000)	2023/24 Carrying Value (Rs.'000)
Biological Assets	3,464,726	3,216,999
Buildings	1,109,093	509,738
Motor Vehicles	469,028	408,556
Plant & Machinery	1,490,686	1,255,035
Furniture & Fittings	25,361	21,567
Equipment & Tools	186,027	215,046
Total	6,744,921	5,626,941

Journeying Towards Excellence

TTE PLC Metric

Investment in industrial and community infrastructure

Our 2030 Target

Increase annual investment in sustainable infrastructure across estates

Contribution

By procuring machinery and upgrading both industrial and community infrastructure, we foster inclusive and sustainable industrial development.

Target 9.1 | 9.4

Construction of the state-of-the-art Kiruwanaganga Tea Factory

Following the earth slip that impacted the factory premises in 2017, The management of TTE, along with the Sri Lanka Tea Board, recommended the relocation of the factory in the interest of employee safety. The affected facility was the Company's largest low-grown tea factory and was situated on the largest estate within our portfolio, spanning 338 hectares. This estate has consistently made a substantial contribution to the Company's profitability, and the resulting disruption posed a serious challenge to both operational continuity and financial performance.

With all necessary approvals secured in 2019, the construction of the new Kiruwanaganga Tea Factory commenced, overcoming numerous external challenges such as the COVID-19 pandemic, ongoing risks of landslides, and prevailing economic constraints. Despite these adversities, TTE ensured uninterrupted operations throughout the transition, a testament to its unwavering commitment to long-term resilience, business continuity, and stakeholder trust.

The new Kiruwanaganga facility stands as a landmark in TTE's journey toward modernized, sustainable industrial infrastructure. Designed in line with international environmental standards and the Green Building Concept, the factory reflects the Group's broader sustainability agenda. The facility has received multiple prestigious certifications, including:

- Rainforest Alliance
- ISO 22000:2018 (Food Safety Management)
- ISO 14064-1:2018 (Greenhouse Gas Emission Verification)
- Ecolabel Certification
- Science Based Targets
- UN Climate Neutral Now
- Mother & Child Friendly Seal for Responsible Businesses (MCFS)
- Responsible Care Certification
- Certificate of Ethical Trading

The Green Building Certification is also underway.

The factory has also been designed to support inclusive growth by integrating smallholder farmers into the formal tea supply chain, thereby contributing to local economic development.

In a strategic move to increase market share and capitalize on economies of scale, TTE invested Rs. 714.3 Mn in this state-of-the-art facility. The investment breakdown is as follows:

- Rs. 497.6 Mn for structural expansion
- Rs. 214.5 Mn for advanced plant and machinery, including automation
- Rs. 2.0 Mn for specialized factory equipment such as rollers, dryers, and precision color sorters

The 37,290 sq. ft. facility boasts a daily processing capacity of 14,000 kg of tea, with an annual output of 2 Mn kg of green leaf and 1.4 Mn kg of bought leaf. The plant incorporates advanced features such as dedicated elevators for tea transport and in-house tea tasting areas, aimed at enhancing both production efficiency and quality control.

Incorporating sustainable construction materials and energy-efficient technologies, the factory not only enhances environmental performance but also prioritizes the health, safety, and comfort of its workforce. This development represents a significant leap forward in industrial infrastructure within Sri Lanka's plantation sector.

Notably, the entire project was financed through internally generated funds, underscoring TTE's financial strength and disciplined capital management approach.

The ceremonial opening of the new Kiruwanaganga Tea Factory on 28th March 2025 marks a significant milestone in our operational journey—one that exemplifies our commitment to innovation, sustainability, and long-term value creation.

"Tea touches lives—connecting generations, supporting families, and sustaining communities. At TTE, we believe in nurturing the people and places behind every leaf, and in building a future rooted in responsibility and care."

Manufactured Capital

Expansion of the Somerset Estate-Tea Boutique Center

TTE invested a total of Rs. 42.6 million in the construction and expansion of the tea boutique center at the Somerset Estate. Of this, Rs. 37.9 million was allocated for building renovations aimed at achieving the desired aesthetic, including interior design, flooring, lighting, and minor structural modifications. The remaining Rs. 3.9 million and Rs. 0.8 million were invested in furniture and fittings, and equipment, respectively. This expansion aligns with TTE's strategy to develop a scalable model that supports future growth opportunities including larger space and expanded product range provide opportunities to enhance revenue, enhances & improves the overall customer experience in turn attracting more customers, streamlined operations contribute to more effective management of resources, ability to host events attracts additional patrons and creates new revenue streams.

Establishing a Glamping Site at the Greatwestern Estate

TTE invested a total of Rs. 14.9 million in a glamping project, comprising Rs. 13.5 million for the glamping tent and site-related expenses, Rs. 0.9 million for furniture and fittings, and Rs. 0.3 million for equipment. This investment reflects the Company's strategic move to capitalise on the growing demand for nature-based tourism

experiences. The initiative targets individuals looking for distinctive accommodations that provide not only breathtaking views but also easy access to local attractions and an outdoor experience that merges comfort with unique experience such as the Tea Factory tour, Mountain Hiking, Waterfall Trek, Estate Tour etc.

Nestled within the majestic Great Western Mountain Range, which boasts the sixth highest peak in Sri Lanka at an impressive elevation of 2,215 meters, this region, renowned for its breathtaking landscapes and lush tea estates, attracts a diverse clientele eager to experience the unparalleled beauty of tea country in a manner that is both comfortable and memorable which includes scenic mountain views, cozy comforts and fresh hill country air.

Estate Infrastructure Development

Our infrastructure development efforts encompass both the construction of new facilities and the renovation of existing assets, including factory buildings and processing floors. Beyond our operational needs, we are equally committed to enhancing the well-being of surrounding communities by developing estate roads, housing, and essential water and sanitation infrastructure.

To uphold the highest standards of quality, we engage experienced and well-regarded architects, contractors, and engineers. These professionals are selected through a transparent and formal tender process that emphasizes proven expertise and a strong track record in their respective domains.

Recognizing the value of collaboration, we actively engage with both government and non-governmental organizations operating in the plantation sector. These partnerships

enable us to implement community-focused infrastructure projects that are responsive to local needs and compliant with regulatory frameworks.

Through these initiatives, we aim to foster a sustainable and supportive environment—one that benefits our employees as well as the broader community in which we operate.

Worker Rest Room at Kiruwanaganga

As part of our ongoing efforts to enhance worker welfare and estate infrastructure, a dedicated rest room facility has been established within the estate premises. This rest room has been designed to provide a clean, safe, and comfortable environment for estate workers to take breaks, rest, and recuperate during their workday.

With the opening of the Kiruwanaganga New Tea Factory, we have invested Rs. 22Mn in this significant project located in close proximity to the new factory.

The facility includes well-ventilated seating areas, clean drinking water, sanitation amenities, and adequate lighting. It is strategically located to ensure easy accessibility for all workers, while also promoting better health and hygiene standards across the estate.

Developing Renewable Energy Infrastructure

Renewable energy infrastructure makes a vital contribution towards strengthening the resilience of TTE's physical asset base. Integrating renewable energy significantly enhances energy security, reducing dependence on fossil fuels, and mitigating operational risks linked to energy cost volatility.

Hydro Power

Plant	Capacity MW	Generation kWh	% Bud.Generation
Radella	0.2	926,557	113%
Somerset	1.1	4,196,275	110%
Palmerston	0.8	2,852,588	98%
Total	2.1	7,975,420	106%

Solar Power

Plant	Capacity Kwp	Generation kWh	% Bud.Generation
Bearwell	108.24	105,889	80%
Moragalla	149.80	136,608	76%
Deniyaya	118.19	96,828	67%
Dessford	113.95	126,949	95%
Calsay	109.68	88,403	63%
Kiruwanaganga	220.00	112,394	74%
Total	819.86	669,071	76%

Our journey toward renewable energy began with initial investments in mini hydro projects in 2005, followed by biomass energy in 2012. TTE's initial investment in solar energy in 2016 marked a major milestone in the company's strategy to achieve energy self-sufficiency.

We have since been working in line with the national renewable energy initiative led by the Ministry of Power and Renewable Energy and Business Development, and have invested in rooftop solar systems at six TTE factories and twelve bungalows across estates. The most recent investment of a 59.3 Mn solar deck at the Kiruwanaganga estate, and several estate bungalows marks the latest additions to TTE's renewable energy infrastructure. Together these investments have a generation capacity of 300kWp.

Building a Reliable IT Backend

We have long since realized the importance of a strong IT backend to seamlessly support our front end operations. Premised on this, we have progressively increased our investment in IT over the years. From bluetooth enabled digital weighing systems for accurate collection of harvesting data, to productivity tracking using QR technology and automated factory data collection systems have been introduced to measure field-to-factory variances on a daily basis, enabling continuous improvement, real-time access, and enhanced analytical capabilities for informed decision-making.

Every tea dispatch is tracked through a cloud based invoicing system to ensure all transactions are accurately recorded.

Field Development Programme

GRI 201-4

Our estates are RA (Rainforest Alliance) certified and are managed in accordance with the best practices outlined in the certification, covering key areas such as nursery management, harvesting, soil management, and replanting.

During the current financial year, we made significant progress in replanting Tea, Timber and Fuelwood crops across our high-grown estates. In our low-grown estates, we expanded the cultivation of Cinnamon, Coconut, and Agarwood alongside Tea. Total field development expenditure amounted to Rs. 268 million, reflecting a 12% increase compared to the 2023/24 financial year. Our replanting program also benefited from government grants totaling Rs. 7.2 Mn Refer Business Review, page 116 for further details.

Short Term

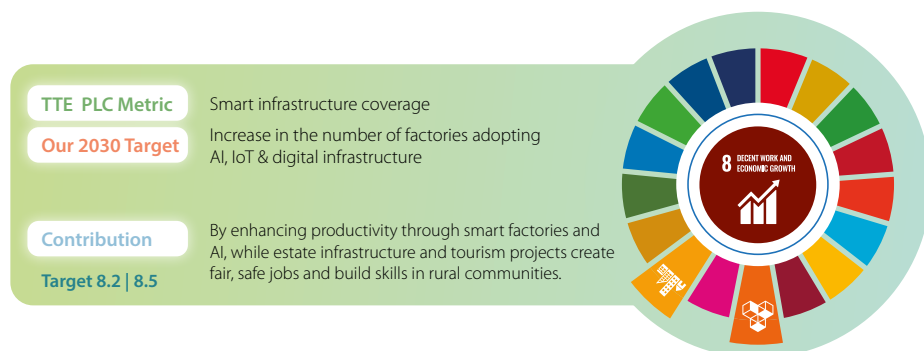

- Expand online dashboard systems to allow for real-time monitoring of key performance indicators (KPIs) and facilitate more effective management decisions

Medium Term

- Invest in IoT devices to improve the efficiency and quality of tea production through the provision of real-time data enabling better monitoring and control over the production process.

Long Term

- To develop a smart, sustainable, and scalable manufacturing ecosystem that ensures consistent product quality, minimizes environmental impact, and supports future growth.

Intellectual Capital

Our intellectual capital including innovation, certifications, proprietary knowledge, and institutional experience is a key differentiator in the global tea market. TTE's commitment to quality, R&D and digital transformation fuels our ability to anticipate change and deliver superior products. With top-tier certifications, internal expertise, and data-driven tools, we push boundaries while embedding sustainability across our value chain. This section highlights how knowledge and innovation drive operational excellence and brand value.

Strengthening Cybersecurity Resilience

We implement multi-layered cybersecurity measures, regular audits, and ISO-aligned practices to protect data, ensure resilience and mitigate digital threats.

TTE PLC leads forward faster in global sustainability and environmental responsibility

Advances sustainability through net-zero goals, community impact, renewable energy and pioneering eco-restoration aligned with global SDGs.

TTE PLC lead Sri Lanka's journey towards sustainable water and climate action through UNGC partnerships

Awards for FY 2024/25

1. Industry Leadership

1.1 Distinguished Corporate Reputation

A proud legacy represented by the unwavering commitment to quality, sustainable cultivation practices and innovation sets TTE apart in the highly competitive local plantation industry. Today, TTE today is recognised as one of the most respected Regional Plantation Companies (RPCs) in Sri Lanka, with our teas from both our high-grown and low-elevation estates consistently attracting strong demand at the Colombo Tea Auctions, often commanding premium prices well above national averages.

Our speciality artisanal teas too have carved out a distinct reputation as some of the finest Ceylon teas available in the global market. Renowned for their distinctive flavour profiles and unwavering quality, TTE's range of speciality artisanal teas has earned the trust and loyalty of buyers across the world. Through the rapid expansion into new markets in recent years, we remain focused on enabling more tea enthusiasts the world over to discover and savour the authentic, high-quality experience that defines our speciality artisanal teas.

At the same time, we continue to reimagine the tea experience beyond the traditional norms. Recognising that tea is not just a beverage, but a story steeped in culture, history, and nature, we are now venturing into tourism to create immersive, sensory-rich encounters with tea. From guided tours of our scenic estates and interactive tasting sessions to curated experiences that celebrate the heritage of Ceylon tea, we aim to offer a fresh perspective that blends leisure, learning and luxury. These new pathways enable us to connect with a broader audience and redefine how the world experiences and appreciates tea, from leaf to lifestyle.

1.2 Championing ESG

At TTE, we take pride in leading by example in championing Environmental, Social, and Governance (ESG). Our ESG Framework 2030 – Regenerative Agenda serves as the long-term strategy underpinning our commitment to operating responsibly, ethically, and sustainably in every aspect of our business.

Regenerative Business Agenda 2030

Environment

Our environmental agenda is built on the goal of delivering a net-positive impact, with a firm focus on sustainability, resource efficiency, and climate resilience. We are committed to implementing innovative, pragmatic, and regenerative practices aimed at preserving and restoring ecosystems within our operational footprint. .

Socio-economic

We place the highest priority on enhancing the well-being and empowerment of all our stakeholders, including employees, customers, suppliers, and estate-based communities. We are dedicated to cultivating an inclusive and equitable workplace, while continuously

investing in education, healthcare, and social infrastructure to uplift the quality of life within the communities we operate.

Governance

Our governance practices reflect our deep commitment to transparency, accountability, and ethical conduct. We remain agile and principled in navigating an evolving business landscape, striving to create long-term stakeholder value while upholding the highest standards of trust and corporate responsibility.

1.3 Standards and Certifications

Internationally recognised standards and best practices have been instrumental in reinforcing TTE's reputation for excellence and trust. Furthermore, adherence to internationally accepted operational and ethical standards provides tangible assurance to customers, business partners, and other stakeholders regarding the reliability, safety, and sustainability of our offerings.

Over the years, we have voluntarily adopted a number of leading standards and certifications. The integration of these benchmarks into our

operations amplifies our focus on continuous improvement in critical areas such as quality management, food safety, environmental stewardship, and social responsibility. This approach enables us to consistently deliver products that not only meet but often exceed the stringent expectations of customers in increasingly competitive and regulated global markets.

TTE PLC Metric

Investment in R&D Development

Our 2030 Target

Improve investment in R&D development

Contribution

R&D, cultivar development, MRL safety, and specialty tea innovations enhance local innovation and sustainable growth, while digitalisation supports modern, resilient infrastructure.

Target 9.5

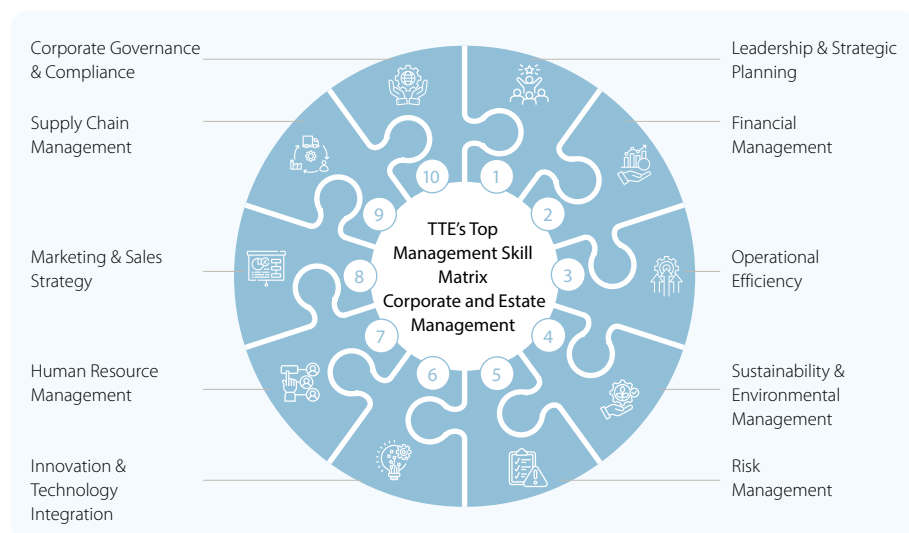

Intellectual Capital

2. Strategic Intangibles

2.1 Knowledge Base

TTE's extensive internal knowledge base, built over decades of experience in the plantation industry, serves as a key strategic intangible that provides a clear competitive advantage. Our teams Corporate Management and Estate Management Teams possess deep industry expertise, honed through years of hands-on experience across every facet of the plantation value chain. The collective knowledge enables the Company to adapt swiftly to industry changes, capitalise on emerging trends, and develop innovative solutions that enhance both product quality and operational efficiency.

Recognising the strategic value of our knowledge base, we are fully committed to bolster this wealth of expertise through ongoing investments in training and capacity building. By providing access to both local and international training opportunities, we empower our teams to refine their existing skills and acquire new competencies to keep them at the forefront of industry advancements. As part of our holistic approach to capacity building, we also promote cross-functional collaboration for the purpose of sharing best practices. Additionally, we encourage senior members to act as mentors to facilitate ongoing knowledge transfer within the organization.

2.2 Research and Development (R&D)

Key Research Initiatives
Our R&D investment accounts for Rs. 46 Mn

Field Operations Cultivar Development in Nurseries

Improve yield, quality and resilience to climate, pests and diseases

Factory Operations Innovative Processing Techniques

Enhance flavour, aroma and appearance of tea

Product Development Value Addition and Diversification

Develop high value-added specialty teas to best-fit evolving consumer preferences and market demands

Soil Management Soil Health Optimisation

Increase soil nutrition and overall ecosystem sustainability

Quality and Safety Minimum Residue Level

Promote sustainable cultivation practices to minimise pesticides and chemical residues

TTE's in-house R&D team plays a vital role in driving innovation and sustainability across the organisation. Our R&D efforts focus on key aspects starting with field operations where we explore the development of high yielding and climate resilient cultivar. In recent years our R&D efforts have also increasingly focused on soil health optimisation, specifically in regard to soil nutrition and overall ecosystem sustainability. Another key R&D priority is the adoption of sustainable cultivation practices to minimise pesticides and chemical residues in the tea leaf.

Likewise for factory operations we focus on innovative processing techniques to enhance the flavour, aroma and appearance of tea while value product development looks at developing high value-added specialty artisanal teas to best-fit evolving consumer preferences and market demands.

2.3 Automation and Digitalisation

Aligned with Industrie 4.0 principles, we have strategically invested in automation and digitalization despite our labor-intensive model. These initiatives have streamlined operations and significantly improved efficiency, bolstering our agility and responsiveness in today's dynamic business environment.

Business Disruptions and Continuity

Managing Cyber Security Threats

As a leading RPC, we proactively mitigate cybersecurity threats through a multi-layered approach. Collaborating with our parent company, we maintain a robust disaster recovery system featuring live and off-site backups. Network security is fortified with advanced firewalls, anti-malware, and encryption, while data is classified according to recommended standards.

Furthermore, we prioritize cybersecurity training and conduct regular internal and external audits, vulnerability assessments, and have updated our IT policies and procedures to align with ISO/IEC 27001:2022, ensuring operational resilience and data protection.

HRIS Oracle Cloud System

Integrated HR system streamlines executive hiring, performance, leadership growth and succession for strategic success.

Digital Employee Identification

QR code technology replaces NFC, offering a cost-effective, accessible and eco-friendly solution for estate worker identification.

Fixed GPS Navigation System

GPS tracking optimizes estate vehicle routes, reduces fuel use and enhances security against misuse and pilferage.

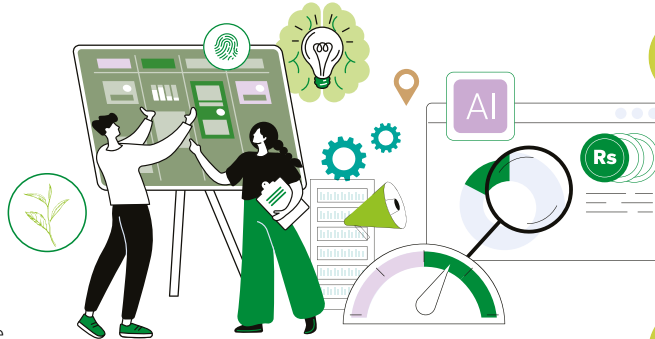

Digital Empowerment of Estate Management

Estate managers use mobile tablets for real-time performance tracking, enabling data sharing and informed decision-making.

Decision Support System

This system enables real-time KPI tracking and proactive planning, ensuring optimal performance across all estate properties.

Online Marketing Ledger System

The in-house IT team developed an end-to-end system streamlining operations and enhancing efficiency across the value chain.

Digital Weighing System

Digitizing green leaf weighing boosts efficiency, accuracy and transparency, enabling real-time insights for optimized estate operations.

2.4 Group Synergies

Being part of the Hayleys Group provides TTE with significant strategic advantages that drive growth and competitiveness. The Hayleys Group's extensive global footprint opens up access to new markets, while strong financial backing supports greater investment in innovation, infrastructure and sustainability initiatives.

Hayleys' expertise in supply chain management and logistics further enhances our operational efficiency, optimising costs while upholding the highest quality standards. Access to cross-industry knowledge-sharing further accelerates our progress through the adoption of global best practices, innovative business strategies, and technological advancements. Our employees also benefit through enhanced career development, leadership training, and exposure to industry expertise, building a motivated, future-ready workforce.

Trade-offs

With Financial Capital

We've continued to invest heavily in innovation and technology spending Rs. 46 Mn on R&D this year and upgrading our digital systems with tools like the HRIS Oracle Cloud, QR-based IDs for employees, and GPS tracking for logistics. These are big investments that can strain our finances in the short term. But we see them as essential building blocks for the future. They help us boost product quality, improve how we work, and strengthen our brand as a leader in sustainable, high-quality tea.

With Natural Capital

Our research into developing better tea cultivars, ensuring safety through MRL testing, and promoting regenerative farming helps reduce the use of chemicals, keep our soils healthy, and protect biodiversity. These efforts are shaping a smarter, more responsible way of managing the land. While things like field trials and test plots might use up a bit more water or temporarily disrupt normal land use, the long-term result is a healthier environment that supports both nature and our business for years to come.

Short Term

Strengthen R&D capacity with a focus on product innovation (e.g. specialty teas, low-residue cultivars), and expand third-party collaborations to bring global expertise into local contexts.

Medium Term

Leverage the HRIS Oracle Cloud System and in-house data analytics to enhance decision-making, performance monitoring and innovation across estates and factories.

Long Term

Position TTE as a knowledge hub in the global tea industry by combining cutting-edge research, sustainable certifications and digital transformation to drive product leadership and industry influence.

Future Roadmap

Social and Relationship Capital

Our relationships with communities, customers, suppliers and regulators are rooted in trust, transparency, and mutual benefit. At TTE, we go beyond compliance to foster inclusive growth through ethical sourcing, community development and responsible customer engagement. From supporting over 330,000 people through healthcare and education to strengthening supplier partnerships via traceability and fair procurement, this capital sustains our social license to operate. This section explores how we build resilient stakeholder relationships that drive long-term shared value.

Empowering Mothers and Children

Strengthened partnerships to enhance female worker wellbeing & childcare access, promoting child rights & empowering mothers across our estates.

360° Product Quality & Safety Assurance

We ensure 100% of our tea products undergo stringent quality checks from field to factory. With zero product recalls

A Home for Every Plantation Worker

Our flagship initiative to provide permanent, secure housing for estate workers, enhancing quality of life and long-term community wellbeing.

Empowering Communities Through Sustainable Cooking

Cookstove initiative reduces emissions and indoor pollution, improves community health and empowers families through sustainable, locally sourced cooking practices.

GRI 3-3 | 13.10.1, 13.12.1

Management Approach

Risks

Reputational damage from non-compliance with social and ethical standards

Lack of alignment on social values and responsible practices across the supply chain

Opportunities

Strengthen brand loyalty by showcasing strong ethical and social commitments

Empower communities through development initiatives, fostering long-term shared growth

Material Matters

- Premium Quality
- Sustainable production
- Traceability
- Product Responsibility
- Community Health &
- Wellbeing

Management Approach

TTE adopts an inclusive and ethical approach to managing social and relationship capital, focusing on building trust with customers, strengthening supplier relationships, and uplifting communities. We are committed to responsible business practices, collaborative partnerships, and impactful development, collectively contributing to long-term stakeholder value and sustainable business growth.

Capital Performance FY 2024/25

Resource Allocation Highlights

Invested Rs. 93.25 million to introduce AI-based colour sorters at the Deniyaya and Kiruwanaganga factories

Increase the frequency of product quality and food safety audits

Strengthened third-party verification of agrochemical safety in line with compliance with health standards

Improved labelling clarity on tea packaging focusing on grade, weight, and certifications

Appointed a Community Advisory Panel (CAP) to support more structured community engagement and policy advocacy

Invested Rs. 119 Mn in a home for every plantation worker

Outputs for TTE

- Zero incidents of non-compliance with regulations related to health and safety impacts of products; and zero product recalls issued/recalled
- Zero incidents of rejections and monetary fines of non-compliance with regulations related to product and service information and labelling

Stakeholder Outcomes	FY 2024/25	FY 2023/24	Value Enhanced (+) Preserved (=) Eroded (-)
Customer Satisfaction	92%	86%	Enhanced
Beneficiaries from living environment initiatives	8,034	17,676	Eroded
Beneficiaries from health and nutrition initiatives	245,004	183,494	Enhanced
Beneficiaries from community capacity building initiatives	32,863	40,979	Eroded
Beneficiaries from living youth empowerment initiatives	45,931	3,865	Enhanced

SDG's

- Target 1.2: Reduce by half the proportion of people living in poverty in all its dimensions.
- Target 1.4: Ensure all men and women have equal rights to economic resources, basic services, and ownership.

- Target 2.1: End hunger and ensure access to safe, nutritious, and sufficient food.
- Target 2.2: End all forms of malnutrition, particularly among children and vulnerable groups.

- Target 3.4: Reduce mortality from non-communicable diseases through prevention and treatment.
- Target 3.8: Achieve universal health coverage and access to quality essential healthcare services.

- Target 4.1: Ensure all children complete free, equitable, and quality primary and secondary education.
- Target 4.4: Increase the number of youth and adults with relevant skills for employment and entrepreneurship.

- Target 5.1: End all forms of discrimination against all women and girls everywhere.
- Target 5.5: Ensure full participation of women in leadership and decision-making.

- Target 6.1: Achieve universal and equitable access to safe and affordable drinking water.
- Target 6.2: Improve sanitation and hygiene, especially for women and girls.

Social and Relationship Capital

1. Strengthening Customer Trust

Management Approach

GRI 3-3 | 416-1, 2 | 13.10.1 | 13.10.2 | 13.10.3

Our approach to developing and retaining a loyal customer base is driven by a 360° value proposition focused on delivering 100% satisfaction throughout the customer journey. We serve diverse customer segments through quality assurance, regulatory compliance, and value-added offerings. Ongoing internal and external audits, along with weekly checks and monthly visits by our Sustainability and Quality Control Team, ensure globally accepted food safety and quality standards across the value chain.

1.1 Prioritising Product Quality and Safety

At TTE, quality and safety are not just compliance goals, but rather a promise we make to every single customer who purchases our products. Anchored by our Quality and Food Safety Policy, we adopt a comprehensive 360-degree approach to quality and safety spanning the entire product life cycle to ensure 100% of all TTE products are subject to stringent quality and safety testing. Essentially, from nurturing the finest tea plants in our nurseries to the moment our blends reach the customer, we embed rigorous quality and safety controls at every step.

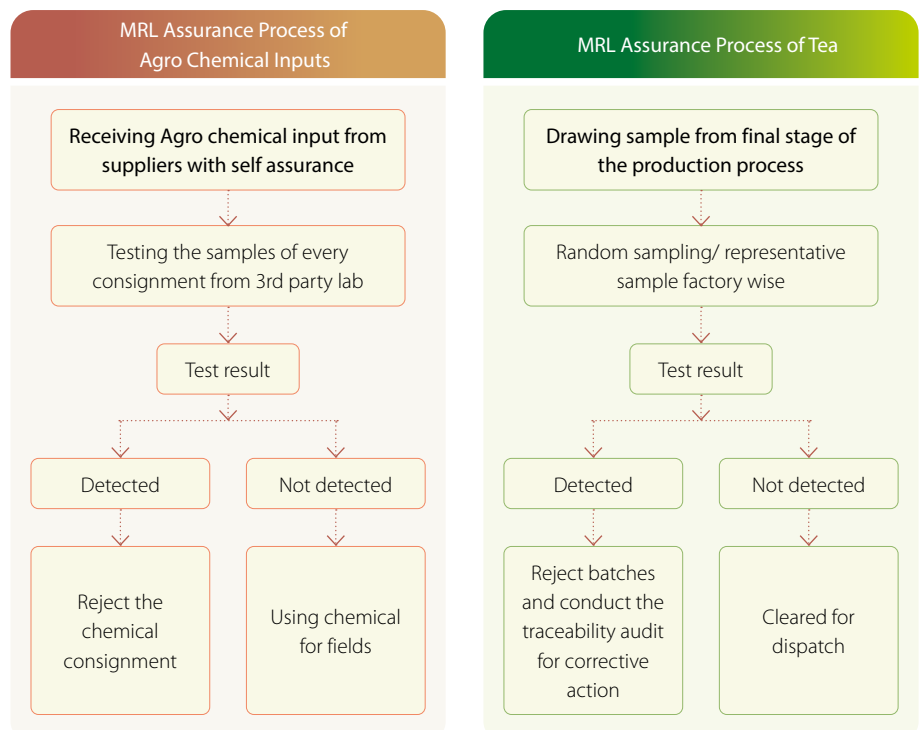

We have implemented specific guidelines on the responsible use of agrochemicals, including independent safety verification through random sampling. Every batch is thoroughly tested to ensure compliance with Maximum Residue Level (MRL) requirements. This commitment is further reinforced through collaboration with internationally recognised certification bodies, who validate and enhance our safety protocols, helping us deliver products that consistently meet and exceed global expectations.

Zero incidents of non-compliance with regulations related to health and safety impacts of products; and zero product recalls issued/recalled.

Quality Improvement Highlights FY 2024/25

**Grading and Sorting**

TTE invested Rs. 93.25 million to introduce AI-based colour sorters at the Deniyaya and Kiruwanaganga factories. These advanced machines, integrating technologies from Japan, Germany, Sweden, and the UK, use AI to sort tea by shape, length, and thickness while recovering black tea from waste

**Sampling and Testing**

- Conducted 15 quality and food safety audits during the financial year.
- Strengthened third-party verification of agrochemical safety in compliance with health standards.
- Implemented a random sampling and independent verification process for agrochemicals and tea products.
- Increased factory-level sampling to detect and eliminate contaminated batches before dispatch.
- Internal and third-party audit reports on food safety compliance
- MRL traceability audits to track potential contamination sources

1.3 Responsible Labelling

We understand that informed choices begin with clear, reliable information and strive to empower our customers through transparent and accurate product labelling. All our tea packages including paper sacks carry detailed product information in English in compliance with the guidelines set by the Sri Lanka Tea Board and the Colombo Tea Traders Association. Accordingly, each package clearly displays the Tea grade, Selling mark, Net weight, Invoice number and Bag count.

Meanwhile, the labelling of value-added tea packs is carefully designed in line with international labelling standards and contains information on ingredients, brewing instructions, storage guidelines, net weight, expiry date, batch number, origin of the tea and relevant certifications. Additionally, in keeping with the commitment to environmental responsibility and encouraging sustainable consumer behaviour, we have ensured our labels also include guidance on appropriate recycling and disposal practices.

Zero incidents of rejections and monetary fines of non-compliance with regulations related to product and service information and labelling

1.2 Innovation

Innovation is a key pillar of TTE's efforts to build customer trust, as it reflects the Company's ongoing commitment to excellence across products, processes, and capacity expansion.

Innovation Highlights FY 2024/25

Social and Relationship Capital

1.4 Customer Communication and Engagement

At TTE, we recognise that building customer trust goes hand in hand with meaningful, two-way communication. Engaging with our customers consistently and transparently not only helps us better understand their evolving needs and preferences but also allows us to deliver value-added experiences that go beyond the product itself.

We maintain regular interactions with our tea broker network. Daily briefings, weekly tea tastings and monthly review meetings with brokers help align expectations, gather insights and continuously enhance our offering and service quality.

We also maintain ongoing engagement with our direct buyers through targeted marketing campaigns, social media interactions, and buyer familiarisation tours. Moreover, to support our efforts to expand into new global markets, we participate in global tea events, exhibitions and road shows, enabling us to connect with diverse customer audiences.

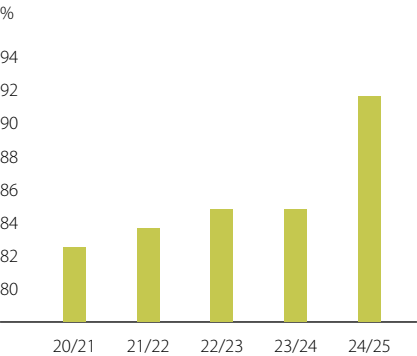

Notably, all customer data and insights gathered through our marketing and engagement efforts are treated as confidential. Strict data confidentiality policies in compliance with data protection laws are in place to safeguard data integrity.

1.5 Complaint Handling

GRI 2-25, 26

We believe that swift and effective complaint resolution helps to convert the customers' negative experience into a positive one, thereby strengthening relationships, and contributing to enhancing overall customer satisfaction and loyalty. As per our structured mechanism, every complaint we receive is logged, assessed and addressed promptly, supported by a feedback loop to enable quicker response times and better tracking. As part of our overall approach, we also conduct root cause analyses for each case to prevent recurrence and drive continuous improvement. In the reporting year, we recorded 11 formal complaints and fully resolved.

Social and Relationship Capital

1. Building a Reliable Supply Chain

GRI 2-6

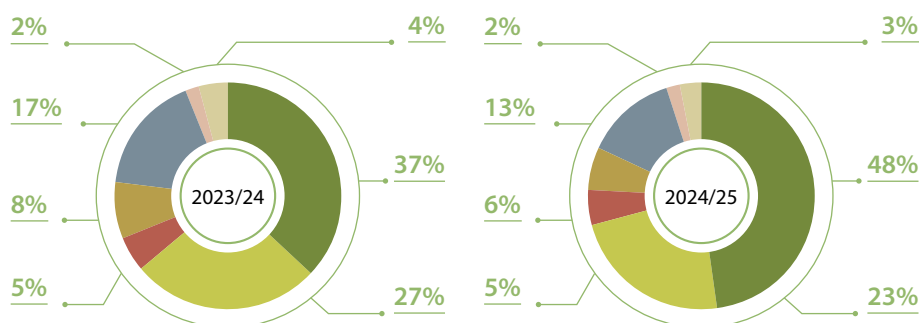

Management Approach

GRI 3-3 | 13.23.1,13.23.2,13.23.3,13.23.4

Our supply chain management approach is aimed at building a reliable network of suppliers who align with TTE's high operational standards and strategic sourcing needs. We follow a structured framework that includes supplier selection based on quality, compliance, and sustainability criteria, along with periodic audits and traceability protocols. Bought-leaf suppliers benefit from knowledge sharing, technical support, and fair payment practices. All suppliers are expected to meet ISO 14000 standards, with certifications from Rainforest Alliance and Ethical Tea Partnerships.

Supplier Payments

GRI 204-1

Supplier Types	2024/25 (Rs. Mn)	2023/24 (Rs. Mn)
Bought Leaf	944.96	721.17
Agro Chemical and Fertilizer	453.02	523.14
Fuel	100.13	90.48
Firewood	119.52	143.5
Machinery and equipment	253.77	334.91
Packing Material	38.23	38.33
Transport Service Provider	71.53	74.55
Total	1,981.17	1,926.08

2.1 Procurement Best Practices

GRI 407-1 | 13.18.2

As a large plantation Company, TTE works with a wide network of suppliers, the majority of whom are local entities or individuals based in the vicinity of our estates. Consequently, approximately 95% of our annual procurement spend is attributed to local suppliers from whom we procure bought leaf, agro chemicals and fertilisers, fuel, firewood, packaging materials and transport services. The Company's supply chain underwent a change in the current year following the Hayleys Group's decision to bring the procurement of for the plantation sector under the Central Sourcing Department, with effect from October 2024. This decision was aimed at leveraging Group synergies to negotiate better prices and ensure availability of critical inputs to minimise business disruptions.

In line with the principles outlined in the Procurement Policy, TTE conducts all supplier dealings with the utmost professionalism and transparency. We strictly adhere to all payment terms and contractual obligations. Furthermore, we do not engage in monopolistic or anti-competitive practices and are committed to offering fair opportunities to all qualified suppliers.

Supplier Assessed for Risks Related to corruption

Number of suppliers identified as having significant actual and potential negative environmental impacts	0

Supplier Social Assessment

GRI 414-1, 2

Percentage of new suppliers that were screened using social criteria	80%
Number of suppliers identified as having significant actual and potential negative social impacts	0

Our commitment to ethical and responsible sourcing is supported by a robust Supplier Management Framework designed to build partnerships with best-fit suppliers who align with TTE's business values and standards. accordingly, bought-leaf suppliers, who represent the largest segment of our supplier base, are carefully screened and onboarded to ensure quality and reliability.

For other supplier categories, we apply stringent screening and due diligence processes to assess their capabilities, experience, and track record as well as adherence to standards and certifications. The onboarding process for fuel and food suppliers also includes specific social and environmental assessments to ensure adherence to human rights and labour best practices, as well as compliance with all relevant environmental regulations. All existing suppliers are subject to periodic audits to verify continuity of regulatory compliance, social and environmental practices and adherence to traceability protocols. Our procurement teams also perform spot checks and site visits to obtain further assurance regarding licences and permits of fuel wood suppliers.

2.2 Supplier Development

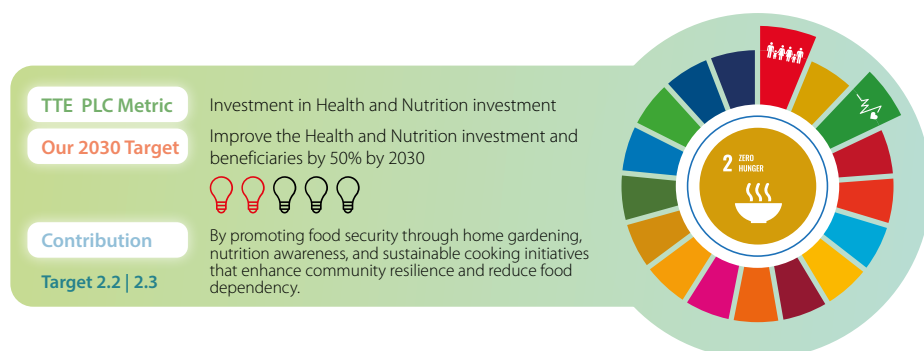

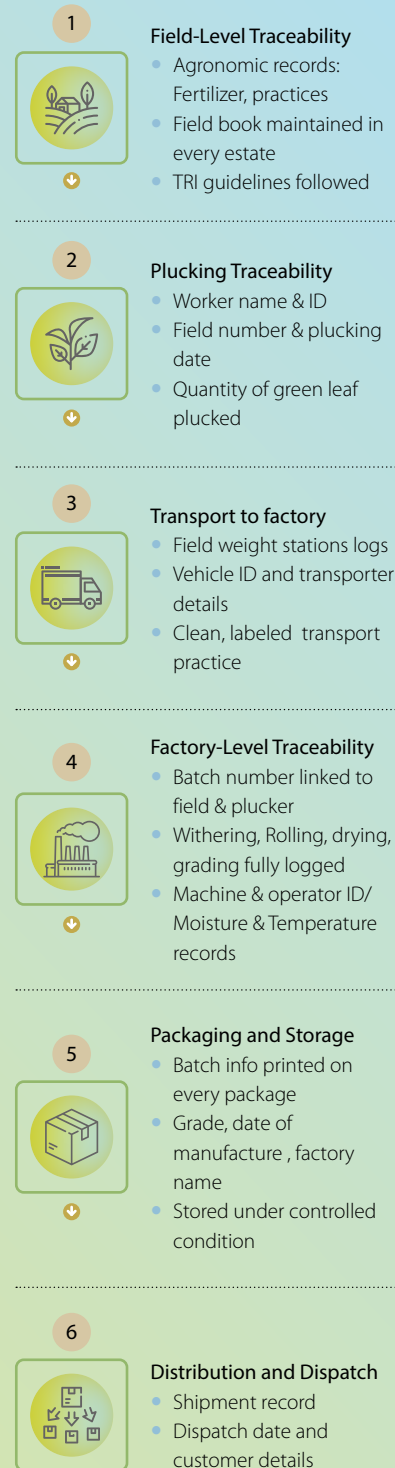

Supplier development is an important part of our overall approach to building a reliable supply chain. Much of our supplier development efforts are directed towards our bought leaf suppliers and fuel wood suppliers, who are typically micro entrepreneurs. With approximately 314 of bought-leaf suppliers being individual block managers operating within TTE's own estates under the Revenue Share Model, we offer technical advisory services to help suppliers maximise yields, improve output quality and minimise environmental degradation. Likewise, we continue to work with our fuelwood suppliers to encourage them to align with global best practices outlined under the Rainforest Alliance certification.

Supply Chain Traceability

At Talawakelle Tea Estates, we have implemented an end-to-end traceability system that ensures complete visibility from the tea field to the final customer. Our system not only guarantees food safety and compliance with international certifications like Rainforest Alliance but also enhances transparency, accountability, and operational excellence across every stage of production and logistics.

We trace every tea batch back to the plucker, field, machine, and process — supporting quality assurance, ethical sourcing, and sustainable practices.

3. Uplifting Communities

GRI 3-3 | 203-1, 413-1 | 13.12.1 | 13.12.2 | 13.22.1 | 13.22.3

Management Approach

We invest in providing the tools and knowledge to empower estate communities to grow as productive members of society. Our community investment strategy focuses on Living Environment, Health & Nutrition, Community Capacity Building, and Youth Empowerment. Guided by strong governance, risk management frameworks, and partnerships with organizations like Save the Children and Plantation Human Development Trust, we are committed to enhancing dignity, morale, and opportunities for all residents through continuous engagement and socially responsible practices.

A Home for Every Plantation Worker: Strengthening Our Commitment to Uplifting Communities

Our flagship initiative, A Home for Every Plantation Worker, stands as a powerful expression of our long-term commitment to community development. This programme is more than just a housing initiative—it's a cornerstone of our vision to uplift and transform estate communities. By providing secure, dignified and permanent housing for plantation workers and their families, we are laying the groundwork for long-term social and economic development.

Stable housing improves health, education outcomes and family wellbeing, creating a ripple effect that strengthens the community as a whole. This programme directly supports our broader commitment to uplifting communities by enhancing living standards, promoting social inclusion, and fostering a sense of pride and stability among estate families.

Strategic Focus:

Partnering with Housing Cooperative Societies to promote economic resilience and alternative livelihoods.

Key Initiatives:

- Housing loans and microfinance support
- Savings schemes
- Community-based training initiatives

Intended Impact:

Expand livelihood options, strengthen financial independence, and improve living standards through skill-building and support systems.

Progress Monitoring:

Awareness on Saving Habits

Youth Empowerment

Strategic Focus:

Equipping youth with essential skills, confidence, and awareness to pursue rewarding careers and life paths.

Key Initiatives:

- Vocational and technical training
- Soft skill and leadership development
- Education on relevant social topics

Intended Impact:

Develop a future-ready youth population that is empowered, employable, and capable of driving positive transformation.

Progress Monitoring:

Career Guidance Seminar for Youth

We recognize the importance of food security for our estate communities and are committed to ensuring access to safe, nutritious, and culturally appropriate food. Through home gardening, knowledge sharing on good agricultural practices, and capacity building, we help reduce food loss and improve household-level food resilience. Dedicated land is allocated for estate communities to cultivate vegetables, enhancing food availability and reducing dependency on external markets. These efforts strengthen local food systems and support sustainable, community-led nutritional well-being.

In partnership with public health authorities and NGOs, we conduct awareness programs on maternal nutrition, child feeding, and balanced diets. Our sustainable cooking initiative with World Vision and Tea Leaf Trust introduced efficient cookstoves that reduce indoor air pollution and improve food preparation. We also promote regenerative agriculture, soil health, and integrated pest management to preserve productive land and ensure yield stability.

In FY 2024/25, we invested:

- Rs. 80,000 in immunization programs
- Rs. 53.07 Mn in health and nutrition
- Rs. 613,475 in antenatal/postnatal care
- Rs. 1.15 Mn in supplemental medical services

As a result of our efficient practices, total food loss in our operations is approximately 0.1%. This minimal loss is achieved because any refuse tea remaining after the primary black tea manufacturing process is further processed for reuse. We are committed to reducing food loss through optimized harvesting, processing, and storage practices. In our supply chain, we continuously monitor and raise awareness among partners about food security and responsible resource management. We actively work to reduce food loss throughout our operations by:

- Enhancing green leaf handling and transport practices
- Implementing real-time monitoring and calibrated processing systems
- Conducting continuous staff training to minimize reject rates

These initiatives not only reduce waste but also improve resource efficiency, enhance processing effectiveness, and reinforce our commitment to sustainable and responsible production.

3.1 Understanding and Responding to Community Needs

GRI 203-2, 413-2 | 13.9.1, 13.9.2, 13.12.3

As a plantation company, we take deep responsibility for the well-being of the wider community residing within our estates. Currently, around 42,000 individuals who live across TTE's 16 estates. We play the role of caretaker for these extensive estate communities and strive to create a safe, inclusive, and enabling environment that supports their long-term development and quality of life.

Guided by our Social Policy we focus on improving living conditions, empowering women and youth, and promoting health and hygiene awareness.

For example, our flagship 'A Home for Every Plantation Worker', has been a cornerstone of our community development efforts for the past 13 years, with clearly defined objectives focused on housing, healthcare and nutrition, skills development, and youth empowerment.

These community-based initiatives are fully aligned with the broader sustainability agenda of the Hayleys Group and are driven with the direct oversight and engagement of our Board of Directors.

Each initiative is strategically planned and responsibly executed, with comprehensive assessments carried out to gauge both potential impacts and the long-term value of our community investments. We ensure that all actions are consistent with our organisational goals while being responsive to the needs of the communities we serve.

By fostering strong community relationships and championing inclusive growth, we aim to uplift the social fabric of our estates and ensure that the benefits of our operations are shared broadly and sustainably. In the past year, there have been no reported incidents of negative impacts on our estate and neighbouring communities.

Social and Relationship Capital

CSR Project : Building Social Capital Through Community Healthcare Support

In a commendable demonstration of corporate social responsibility, Talawakelle Tea Estates PLC, in partnership with CA Sri Lanka, made a significant donation of essential medicines to the Deniyaya Base Hospital. This initiative reflects the company's ongoing commitment to uplifting the communities in which it operates, especially by strengthening access to vital healthcare services. By supporting local medical institutions, Talawakelle Tea Estates PLC continues to foster trust, goodwill, and strong relationships within the community, contributing meaningfully to the nation's social capital.

Continuing Our Commitment to the “Mother & Child Friendly Seal” for Responsible Business

We have reaffirmed our commitment to the “Mother & Child Friendly Seal” by strengthening our partnership with the Centre for Child Rights and Business and Save the Children Fund. Through this collaboration, we have introduced impactful measures, systems and processes to support the wellbeing of our female workers and their children. A comprehensive strategy and action plan have been developed to address key challenges, enhance support for women in our workforce and ensure access to quality childcare across our estates-safeguarding the rights of every child and empowering working mothers.

Empowering Communities Through Sustainable Cooking: World Vision and Tea Leaf Trust's Cookstove Initiative”

World Vision and Tea Leaf Trust have launched a cookstove distribution program aimed at significantly reducing carbon emissions while promoting sustainable cooking practices and enhancing community well-being. The initiative focuses on providing environmentally friendly cooking solutions by supplying efficient cookstoves that decrease reliance on traditional, polluting methods. It also addresses health benefits by minimizing indoor air pollution, particularly for vulnerable groups like women and children, thereby reducing respiratory illnesses.

The program encourages sustainable practices through the use of local resources and eco-friendly materials and actively involves community members in the distribution and education processes to ensure that the benefits of the new cookstoves are fully understood and utilized. Additionally, regular monitoring and evaluation will assess the program's impact on emissions reductions and community health, allowing for continuous refinement and improvement of the initiative.

Impact to the Community from TTE's Operations

Positive Impacts

- Employment Opportunities
- Reduced inequalities through improved access to healthcare, education, and vocational training
- Better quality of life through support for livelihood development
- Stronger community infrastructure

Negative Impacts

- Dependence on plantation-based livelihoods, limiting economic diversification
- Disruption of traditional lifestyles and cultural practices due to modernisation and structural changes
- Environmental concerns such as soil degradation and contamination of natural water bodies

Journeying Towards Excellence

Step 1

Needs Identification

- Needs Assessments & Surveys: Engaging with employees & estate communities (selected Nos) to understand pressing issues.
- Stakeholder Consultations: Holding discussions with government agencies, social organizations and unions.
- Industry & Regulatory Requirements: Complying with legal frameworks and industry guidelines for community engagement.

Step 2

Evaluation & Approval

- Board-Level Review & Endorsement: Project proposals are evaluated by Corporate Management and HR/Operations leadership.
- Budget Allocation & Funding Decisions: Top Management approves funding for projects.
- Policy & Compliance Checks: Obtaining government & other regulatory approvals.

Step 3

Resource Allocation & Implementation

- Financial Resources: Setting aside funds from the Company's budget, grants, or partnerships.
- Human Capital: Assigning HR teams, employee volunteers and third-party experts to execute projects.
- Partnerships & Collaborations: Working with NGOs, government bodies and academic institutions.
- Technology & Infrastructure Support: Providing necessary tools, training and facilities for sustainable implementation.

Step 5

Continuous Improvement & Sustainability

- Lessons Learned & Best Practices: Reviewing completed projects to enhance future initiatives.
- Scaling & Replication: Expanding successful projects to other communities or regions.
- Long-term Commitment: Ensuring sustainability by integrating projects into the company's long-term CSR & ESG strategy.

Step 4

Execution & Monitoring

- Project Management Teams: Appointing dedicated teams or committees to oversee implementation.
- Periodic Progress Reviews: Conducting quarterly, bi-annual or annual reviews.
- Community Feedback Mechanisms: Engaging with beneficiaries and stakeholders.

TTE PLC Metric

Frequency of occupational accidents

Our 2030 Target

Ensure Zero work-related accidents and injuries by 2030

Contribution

Company's occupational health & safety programs, grievance mechanisms, and child-friendly estate model directly improve labor conditions.

Target 8.8

Short Term

Engagement with estate communities through improved grievance mechanisms, social audits and expanded access to healthcare, housing and childcare support.

Medium Term

Build stronger partnerships with NGOs, government agencies and buyers to co-create community development and food security programs that scale impact across the sector.

Long Term

Embed shared value creation into core business operations by transforming estate communities into empowered, self-reliant ecosystems ensuring long-term trust, stability and social license to operate.

Future Roadmap

Trade-offs

With Financial Capital

At TTE PLC, we see investing in our communities as an investment in our future. In FY 2024/25 alone, we spent over Rs. 119 Mn on key areas like healthcare, housing, youth development, and skills training reaching more than 250,000 people. While this level of spending does place pressure on our short-term finances, it's a deliberate and long-term commitment. These efforts help us build trust, reduce social risks, and create a more stable, supportive environment for our business to grow.

With Natural Capital

When communities are strong and informed, they become powerful allies in protecting the environment. Thanks to our inclusive approach, local residents now play an active role in caring for the land through initiatives like home gardening, training on soil health, using sustainable fuelwood, and adopting clean cookstoves. While giving communities access to shared land and resources can sometimes strain things like water and soil, we manage this carefully. The result is a shared responsibility for nature that helps protect our ecosystems and supports sustainable tea cultivation for the long run.

Human Capital

At Talawakelle Tea Estates, our people drive our success, fuel our innovation and embody our purpose. In 2024/25, we focused on building an inclusive culture where every voice is heard, every contribution is valued and every individual has the opportunity to grow.

From reimagining our workforce models to empowering women in leadership, from fostering wellbeing and safety to providing global learning opportunities, this year has been about nurturing our greatest asset-our people.

As we continue to champion diversity, innovation and sustainability, our human capital initiatives are paving the way for a future-ready, resilient workforce.

Revenue Share Model Transformation

Shifted traditional employment to a revenue-sharing approach, empowering workers as entrepreneurs with ownership and accountability in tea cultivation.

Empowering Women in Leadership

Strengthened gender equality with new female field supervisors and leadership initiatives, fostering diversity and inclusive decision-making across the estates.

Commitment to Employee Wellbeing

Enhanced workplace safety, health and wellbeing through comprehensive policies, training and employee support systems across all estates.

Global Learning and Development

Invested in global learning initiatives for senior managers and robust training programs, enhancing strategic skills and future readiness.

GRI 3-3 | 13.15.1, 13.16.1, 13.17.1, 13.18.1, 13.19.1

Management Approach

Risks

Risk of losing high-performing employees and the inability to attract individuals with the necessary expertise in a competitive market decreased morale, lower performance, and increased turnover if employees feel undervalued or disconnected from the organization's goals.

Opportunities

Improve workforce resilience by investing upskilling and targeted leadership development initiatives to keep employees motivated and engaged in organisational goals

Strengthen TTE's reputation as an employer of choice by fostering inclusivity and employee wellbeing

Material Matters

- Occupational Health & Safety
- Healthy Relations & Employee Satisfaction
- Gender Equality & Fair Remunerations
- Hiring & Retention
- Talent Development
- Compensation & Benefits
- Mother & Child Friendly Estates
- Performance & Rewarding

Management Approach

We believe that our people are the foundation of our success, and we are committed to creating an environment where they can thrive, grow and contribute meaningfully to the organisation's goals. Hence, we have adopted an integrated approach to human capital development guided by four key pillars that work together to shape a resilient and future-ready workforce. We focus on attracting and retaining the right talent based on efficient and ethical hiring practices alongside purpose-driven, yet competitive remuneration structures. At the same time we strive to build a skilled and competent workforce by investing in training and systematically measuring employee performance. Creating a safe and conducive workplace is central to our efforts, as we work to uphold the highest standards of employee well-being and workplace safety, while prioritising employee motivation and satisfaction by promoting a culture of recognition and shared success.

1. Talent Acquisition and Retention

GRI 202-2, 401-1

1.1 Recruitment and Selection

Recruitment at TTE is a well-planned and structured process. Our recruitment policy endorses a merit-based approach to attract the right talent aligned with the organisation's strategic goals, underscoring our commitment to equal opportunity and non-discriminatory employment.

Our multi-tiered approach supported by effective delegation of recruitment responsibilities across different levels of

the organisation enables purpose driven recruitment that correlate to organisational objectives. Under the guidance of the Corporate HR Department, the respective Estate Manager is responsible for recruiting the estate (manual) workforce. Recruitment of estate staff is carried out based on a staffing plan developed in consultation with the Director-Plantations and the Chief Executive Officer. Executive-level recruitments are handled by the corporate HR team, subject to the final approval by the Managing Director.

The scope of the executive recruitment framework was broadened in the current year with the creation of new executive level roles for Digital Marketing and Data Analytics in line with the emphasis on strengthening TTE's digital presence and the renewed focus on data-driven decision-making to improve overall strategic agility.

In the manual worker category, ongoing efforts to shift workers to the Revenue Share Model (RSM) gathered momentum in the current year, with approximately 97.2% of the total manual grade now hired on contract basis through the RSM.

Safeguarding Child Rights (Making Sure Children Are Treated Right)

GRI 408-1 | 13.17.2

TTE has a zero tolerance approach on child labour underscoring the commitment to align with national labour laws as well as the best practices set out under the International Labour Organization (ILO) Conventions and the United Nations Global Compact (UNGC) Principles. Accordingly, we take proactive measures to guarantee that our recruitment policies and operational practices strictly prohibit the employment of children under the legal working age of 18 years. A special clause pertaining to child protection has been included in the letter of appointment given for every new employee.

Our commitment goes beyond compliance, all TTE's estates has a dedicated focal point to safeguard child rights. A key responsibility of the Child Protection Focal Point is to raise awareness among our estate communities about the importance of education and encourage parents to ensure their children remain in school. Rigorous audits are also conducted regularly across our estates to identify any potential risks and for child-labour. As part of our overall approach, TTE is working work closely with the Save the Children Fund and the Centre for Child Rights and Business to implement standard child protection procedures across all levels of our operations.

At the same time, we expect our bought-leaf suppliers and other business partners to commit to our standards for the prevention of child labour. We provide training and conduct ongoing discussions with our suppliers and business partners to emphasise the importance of eliminating child labour within the supply chain.

In the year under review, no incidents of child labour were reported across TTE's operations, among bought leaf suppliers or any other business partners.

Employment Practices

GRI 13.20.1

At TTE, we uphold ethical, inclusive, and transparent employment practices. Our Ethical Recruitment Policy, applicable across all estates and factories, prohibits recruitment fees and the withholding of identity documents, and ensures contracts are issued in a language

understood by workers. As we do not engage third-party recruitment agencies, all recruitment is managed directly by TTE, ensuring full adherence to our internal standards. Non-compliance is addressed through formal grievance mechanisms, including our "We Care 360" platform.

We ensure fair and timely compensation, free from unjustified deductions, and provide in-kind benefits such as housing, childcare, and community services. While we do not use piece-rate systems, all significant sites disclose the proportion of in-kind remuneration through internal reporting.

To uphold labor rights across our value chain, we assess suppliers for compliance with national and international labor standards. We monitor risks such as informal or disguised employment and ensure workers are engaged through legally recognized contracts wherever applicable.

TTE's workforce practices reinforce safe, equitable, and rights-based employment supporting our broader commitment to decent work and sustainable livelihoods in Sri Lanka's plantation sector.

1.2 Remuneration and Benefits

GRI 202-1, 401-2

At TTE, we are committed to ensuring that all employees receive fair and competitive remuneration and benefits in full compliance with applicable labour laws and industry norms.

For manual grade employees, wages are determined in line with the minimum wage regulations under the Wages Board Ordinance. With nearly 98% of our estate workforce unionised across five worker categories, collective bargaining outlines conditions for annual increments and incentives. The collective bargaining agreement is formally

reviewed and updated at the time of renewal every three years.

Meanwhile, the management may extend discretionary allowances to supplement daily wages, based on the type and complexity of work undertaken. Salaries of estate staff are also set under the collective agreement.

TTE ensures compliance with all statutory benefit obligations, including contributions of 12% to the Employees' Provident Fund (EPF) and 3% to the Employees' Trust Fund (ETF), calculated on employees' basic salaries. Employees are also entitled to gratuity, as prescribed under the Gratuity Act, upon completion of the required period of continuous service.

On 10th September 2024, the minimum daily wage for plantation workers in Sri Lanka was raised to Rs.1,350/-. This wage increase will be in effect for three years. The new wage structure includes a basic salary of Rs.1,350/- plus an additional Rs.50/- based on productivity, representing a crucial step toward improving the livelihoods of plantation workers. The new wage structure was agreed upon after negotiations between the Regional Plantation Companies (RPCs), trade unions and the Wages Board.

Meanwhile an annual increment was granted on all estate staff salaries in keeping with the terms of the collective bargaining agreement.

For executives and above, salaries and benefits are set by the Human Resources and Remuneration Committee, based on factors such as job description, qualifications, experience, and performance, while ensuring alignment with industry benchmarks. Increments for executive grades are based on performance outcomes determined through the annual performance review process outlined below.

Rs. Mn	2024/25	2023/24	% Change
Remuneration	2,320.4	2,253.3	3.0
Performance incentives	968.6	1,022.3	(5.2)

Maternity Leave

GRI 401-3

In line with Sri Lanka's labour laws, all female employees are entitled to avail maternity leave. They are also allowed to avail the feeding entitlement of one hour. Currently, there is no scheme for paternal leave. However, all employees are given their statutory leave of 14 annual and seven days of casual along with 21 medical leave.

Maternal Leave Facets	Number
Total female employees	2,839
Maternity leave availed	39

Retention rate after 12 months of return to work (%): 71%	

2. Building a Skilled and Competent Workforce

GRI 404-3

2.1 Performance Management

The performance management process at TTE is designed as a strategic tool to assess, guide, and enhance employee performance at all levels, to ensure every employee from estate workers to corporate executives contributes meaningfully to the Company's overall success. The performance management process also creates a strong platform to potential candidates for promotions, increments and other recognition and rewards schemes.

Managing Performance of all Employee Categories

Executives

The performance of Executives is evaluated annually through a structured mechanism based on the Balanced Scorecard Methodology where employee performance is measured against predetermined targets at both individual and collective levels. Performance tracking and monitoring is facilitated through our cloud-based Human Resource Information System (HRIS). The annual performance review is conducted between each executive and their immediate supervisor, providing a transparent and interactive platform to discuss performance outcomes, identify training and development needs, and support career planning. These insights form the basis for decisions related to promotions, salary increments, and performance-based rewards. Exceptional performers are earmarked for further development through individual development plans that combine specialised training in leadership and management alongside coaching and mentoring by members of the senior management to prepare selected employees to take up higher career responsibilities.

Staff

The performance of estate staff is reviewed annually by the estate manager and subsequently validated by the Chief Executive Officer and Director Plantations. High performing staff are rewarded with special increments (in addition to the standard increment linked to the collective bargaining agreement) and granted promotions to higher grades as appropriate.

Estate staff awards

Human Capital

Monthly recognition of best tea harvesters

Manual Workers

Productivity of manual workers is evaluated on a daily basis against predefined minimum standards for green leaf plucking with employees who exceed these daily targets incentivised accordingly. To ensure accuracy and transparency, a digital weighing system is used, enabling fair and reliable measurement of individual output. Supporting this effort is the Future Navigator, a dedicated mobile application that enables estate management to track each plucker's performance in real time.

Performance of all categories of permanent employees are reviewed every year.

Enhancing Earning Capacity of Employees through the Revolutionary Revenue Share Model (RSM)

Our Revenue Share Model (RSM) was introduced in 2001 and it represents a transformative shift from the conventional attendance-based wage system for our estate workers. Based on the principle of entrepreneurship, the RSM scheme allocated designated plots of land within our estates to individual workers who assume the role of "block managers" responsible for the cultivation and harvesting of tea and are directly accountable for their output. We also provide technical assistance, training, and continuous advisory services. Meanwhile, participating Block Managers are integrated into our bought-leaf supplier network via a buy-back guarantee.

TTE's Deniyaya estate is now fully operated through the RSM scheme, which has inspired all other estates to begin adopting the RSM with a view to gradually phasing out the attendance-based traditional wage system in due course.

2.2 Training and Development

GRI 404-1, 2

At TTE, we are deeply committed to employee training. For optimal results, we work according to a pre-approved training plan and budget to provide targeted training using a combination of internal and external resources to deliver targeted training to employees across the organisation. Internally, members of our senior management team, including our Managing Director, frequently conduct motivational sessions and knowledge-sharing forums to inspire and guide employees. We also maintain a network of external training partnerships encompassing both public and private institutions.

FY 2024/25

In keeping with our structured and performance-driven approach, training needs for staff and executives are identified through the annual performance appraisal process. To further support ongoing learning, we encourage executive employees to undertake continuous professional development for which we offer scholarships, study loans, and course fee reimbursements for recognised professional and vocational qualifications.

Training for our estate workforce is coordinated through regional cluster HR units and estate-level HR teams, in consultation with the Corporate HR Department and consists mainly of motivational and productivity improvement related activities.

Beyond this, we also empower our estate workforce with the tools for long term personal and professional growth by delivering special programmes focused on critical areas such as occupational health and safety, nutrition and food security, gender and social awareness, and financial literacy.

Pathways to Leadership - "EmpowerU" Initiative

Providing Youth within the estate community, TTE has launched the "EmpowerU" project, which offers comprehensive training in tea cultivation, factory operations, office administration and supervisory skills through a blend of theoretical and practical sessions. This initiative aims to empower estate youth in the agricultural sector while establishing a sustainable framework for developing skilled individuals. Key objectives include increasing employment opportunities, enhancing management practices within tea estates and creating a robust support network for ongoing mentorship and learning. By investing in the skills and capabilities of young people, the "EmpowerU" project seeks to foster long-term growth and sustainability in the tea industry.

Human Capital

Engagement of International Gender Expert to Strengthen Equity Initiatives

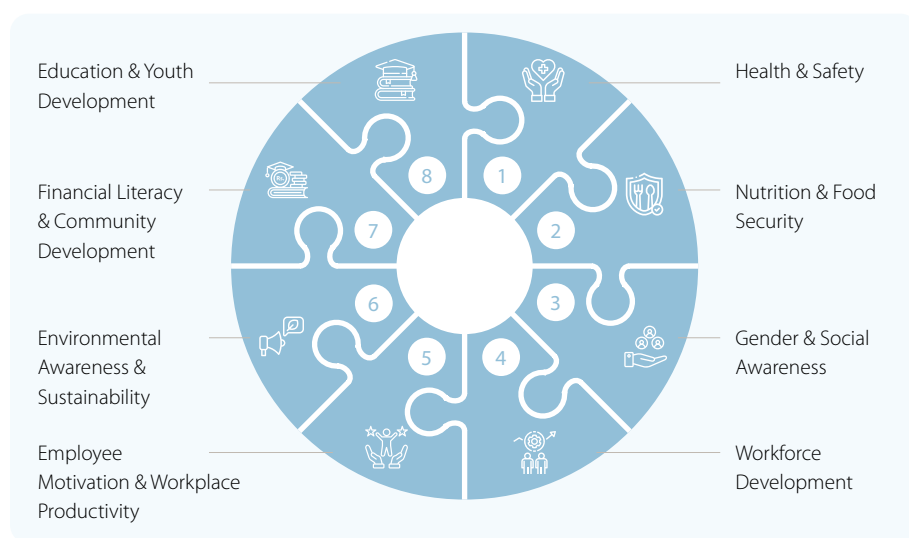

An international volunteer with expertise in gender equality from WUSC has been assigned to support our initiatives by contributing global knowledge and best practices in the field.

TTE Shines at Hayleys Symposium 2024

At the Hayleys Plantations Management Symposium 2024, TTE stood out as a leader in innovation and sustainability. Five TTE estates ranked among the Top 10 Best Presentations, highlighting the company's progressive approach to modern plantation management.

Showcasing initiatives under the theme "Intellectual Intervention & Innovation in Plantations towards Sustainability," TTE impressed with models focused on environmental stewardship, operational efficiency and community impact.

Senior Leadership Enhances Strategic Capabilities Through International Executive Training in Japan and Thailand

Management Development Programme: Experience Japanese Management in Thailand

Five Senior Managers participated in this specialized training program held in Thailand from 23rd -29th March 2025, aimed at enhancing managerial competencies through insights into Japanese management principles and practices.

Program on Transforming to Circular Economy Business Model (CEB)

Two Senior Managers participated in the international training program on Transforming to Circular Economy Business Model (CEB), conducted at the AOTS Kansai Kenshu Center in Osaka, Japan, from 5th - 18th February 2025. The program focused on sustainable business transformation through circular economy principles.

3. Safe and Conducive Workplace

GRI 406-1 | 13.15.4

3.1 Diversity, Equality and Inclusion (DEI)

Equity and Inclusion (DEI) is deeply embedded across TTE's operations through a formal DEI policy that articulates our stance against discrimination in any form. Guided by this policy, we strive to create a workplace where all individuals are treated equally, regardless of gender, background, religious beliefs or any other status protected by law. A key step in promoting workplace equality is the commitment to maintaining a 1:1 ratio in the basic salary offered to men and women in entry-level positions. We further strive to ensure there is no pay gap across similar roles throughout the organisational hierarchy.

Beyond equitable pay, we also prioritise equal opportunities for personal and professional growth, with all employees having access to training and career development opportunities designed to support their progression at every stage of their employment journey.

We also place special emphasis on training our managers to stand against discrimination by respecting the dignity and rights of every individual. These commitments are extended to our supply chain partners as well.

In the year under review, no incidents of discrimination were reported across TTE's operations, among bought leaf suppliers or any other business partners.

"HerLead" Project: A Milestone in Gender-Inclusive Leadership in the Tea Sector

The introduction of female supervisors under the HerLead project has been widely acknowledged as a pivotal achievement in advancing gender-inclusive leadership within the tea sector. These appointments underscore the project's dedication to empowering women in supervisory roles and fostering a more equitable and representative workforce. The efforts were prominently recognized at various events organized in celebration of International Women's Day, highlighting the significant contributions of women in leadership.

"Women in Leadership" (WIL) Programme

"Empowering Women in Leadership: Promoting Gender Equality in the Sri Lankan Tea Sector"

With the support of The Republic of Tea, the Ethical Tea Partnership–Sri Lanka (ETP) has collaborated with Talawakelle Tea Estates PLC (TTE) to implement the Women in Leadership (WIL) initiative, with a primary focus on advancing gender equality within the tea industry. Led by TTE, the project is designed to empower women to assume leadership roles and foster a more inclusive workplace culture.

The initiative delivers comprehensive leadership training to a diverse group of participants, including women such as tea harvesters, team leaders, field supervisors, and factory workers; men including estate managers, assistant managers, and field workers; as well as youth. A key objective of the program is to engage male leaders as active advocates for gender equality. Through this inclusive and participatory approach, the WIL project aims to drive meaningful transformation within the tea sector and strengthen the presence of women in leadership.

Human Capital

Ensuring Dignity of Work in the Sri Lankan Tea Sector

In Sri Lanka's 150-year-old tea industry, increasing women's participation and leadership is essential—not only to uphold human rights, but also to drive meaningful transformation for individuals, communities and the industry, while promoting dignity of work across the sector.

Sharing insights on current trends in Sri Lanka's tea industry and addressing key sustainability challenges at the Ethical Tea Partnership's inaugural forum in Sri Lanka.

Gender Parity Dashboard FY 2024/25

	2024/25	2023/24

Career Development Opportunities	5 females promoted	5 females promoted
	6:3 Gender Ratio (senior management)	6:2 Gender Ratio (senior management)

Ratio of Basic Salary between Men and Women

GRI 405-2 | 13.15.3

Our remuneration and benefits framework aligns with relevant labour laws and industry best practices, taking into account each employee's job role, qualifications, experience, and performance. We are committed to gender equality, ensuring that female employees receive the same entry-level basic salary as their male counterparts, maintaining a 1:1 ratio across all staff categories. Overall, there is no significant difference in the basic salary or wage scale between genders.

Living income and living wage

GRI 13.21.1, 13.21.2, 13.21.3

TTE is committed to fair compensation and economic dignity for all employees, aligning our wage structures with recognized living wage standards. In accordance with the Wages Board Ordinance, we guarantee a minimum daily wage of Rs. 1,350 for estate workers, supplemented by variable allowances based on job complexity and performance.

To enhance earnings, we offer initiatives such as the Revenue Share Model (RSM), which enables flexible work schedules and performance-based earnings. Incentive-based schemes like the

"Monthly Best Harvester" award and optimized plucking schedules further promote income growth and job satisfaction. The appointment of female supervisors reinforces our commitment to gender equity and inclusive leadership.

We apply the Anker methodology, aligned with Rainforest Alliance standards, to define and monitor living wages based on local living costs and household needs. Our annually updated wage matrix helps identify and close wage gaps. This process is supported through stakeholder collaboration with trade unions, NGOs, employer associations, and government agencies.

To monitor ongoing progress, we utilize the IDH Living Wage Roadmap system in conjunction with Rainforest Alliance-recommended monitoring tools to ensure robust tracking of wage commitments across all divisions.

Living income considerations are integrated into our sourcing, pricing, and remuneration strategies. Product pricing reflects the full cost of sustainable tea production, including fair compensation for workers.

We also monitor supplier wage practices through third-party certifications and internal audits to uphold living wage principles across the supply chain.

3.2 Human Rights

GRI 2-30 | 409-1 | 13.16.2

Talawakelle Tea Estates PLC (TTE) upholds a strong commitment to human rights and ethical labour practices, with particular emphasis on preventing forced or compulsory labour. We respect every employee's right to freely choose their employment without coercion, threats, or intimidation. All terms of employment, including resignation and termination procedures, are clearly communicated, ensuring alignment with national labour laws and ethical standards.

TTE does not operate in any country or region with identified high risks of freedom of association violations. Nonetheless, we proactively engage with unions and uphold formal collective agreements, which ensure transparent communication and consensus on significant operational decisions—such as amalgamations or sub-leasing of divisions.

We have also implemented a comprehensive Occupational Health and Safety (OHS) framework, aligned with our collective agreements and OHS Policy. Safety protocols are made accessible to all workers through translations in Sinhala and Tamil, and regular training is conducted to promote safe working environments.

An open-door policy and structured grievance redressal system—aligned with Rainforest Alliance guidelines—empower workers to raise and resolve issues at estate, cluster, or corporate HR levels. Monthly Labour Days further facilitate worker-management dialogue, reinforcing transparency and trust.

There were no reported grievances, lawsuits, or non-monetary fines related to labour or human rights violations during the reporting period.

We do not compel any employee to work against their will, and no cases of forced or compulsory labor were reported within our operations or supply chain during the reporting period. This is further verified annually through independent audits conducted under the Rainforest Alliance certification programme, which assesses compliance with human rights and ethical labor standards.

3.3 Employee Relations

GRI 2-25,26,30 | 402-1, 407-1 | 13.18.2, 13.21.1, 13.21.2, 13.21.3

As a large organisation with 5,200+ employees, we place a strong emphasis on open communication to earn trust and respect of our employees. We encourage managers at all levels to build strong relationships with their teams through regular meetings and team briefings. The performance appraisal process also serves as a platform for open discussion between employees and their respective superiors.

Further, with over 77 % of our workforce represented by collective bargaining agreements, monthly meetings with union representatives are deemed an essential part of our employee relations framework. We fully recognize and support our employees' freedom of association and the right to collective bargaining. Nearly 98% of our estate workforce is unionized, spanning five distinct worker categories. Wages for manual workers are determined in accordance with the Wages Board Ordinance, guaranteeing a minimum daily wage of Rs. 1,000. Collective bargaining plays a vital role in negotiating incentives and annual increments, reinforcing our commitment to fair compensation and workers' rights.

Meanwhile, employees are informed of operational changes within 4 weeks prior to implementation. Executives are informed via email, while notice boards are used to communicate operational changes to estate staff and manual workers. Union representatives are also informed of operational changes at the monthly meetings.

We encourage employees to proactively report their grievances. Our open-door policy empowers all employees to come forward with their concerns. The 'Chat with HR' platform is a

dedicated mechanism for all corporate office employees to openly express their concerns, grievances, and ideas with the HR team.

Employees can also access our formal grievance handling and resolution process which has been developed in line with the Rainforest Alliance certification. Monthly labour days also provide an ideal platform for workers to engage with the management and resolve their concerns. All grievances are treated seriously and investigated promptly by the relevant authorities. Depending on the nature of the grievance, it may be escalated to the regional cluster units or to the corporate HR team for guidance on resolving the issue.

Additionally, our whistleblower policy actively encourages all employees to report any breaches of their rights or misconduct of superiors/subordinates while ensuring utmost confidentiality.

3.5 Occupational Health and Safety

GRI 403-1, 2, 3, 4, 5, 7, 8, 9, 10 | 13.19.2, 13.19.3, 13.19.4, 13.19.5, 13.19.6, 13.19.8, 13.19.9, 13.19.10, 13.19.11

The health and safety of our employees is of paramount importance. As a plantation Company, we are acutely aware of the occupational risks associated with our field and factory operations and have made a firm commitment to safeguard every individual within our premises, including employees, contractors, and visitors. Our efforts are supported by a comprehensive OHS policy and Safety Manual developed in compliance with all national (OHS) regulations set out under the Factories Ordinance No. 45 of 1942 and Amendments thereto and global best practices for preventive safety measures, safety risk assessments, hazard identification procedures and incident investigation protocols.

A dedicated OHS Committee at each estate provides oversight for the proper implementation of the procedures encapsulated in the Safety Manual. The Committee, which comprises a cross functional team from each estate and factory, and includes union representatives, is also responsible for identifying workplace hazards, resolving issues, and updating safety protocols. As well as for investigating incidents/near-misses and reporting to the Managing Director and the senior leadership team on a monthly basis, thereby creating a feedback loop to facilitate continuous improvement of safety infrastructure and protocols. Awareness on Occupational Health Safety conducted for estate management and factory staff and workers by the District Factory Inspecting Engineer.

- Support new measures introduced to enhance and upgrade health and safety standards across the estate
- Provide support to carryout health and safety risk assessments, annual audit and plans.
- Monitor workplace injuries and implement corrective action to minimise the risk of future incidents

Human Capital

4. Employee Motivation and Satisfaction

GRI 403-6 | 13.19.7

4.1 Employee Wellbeing

To complement our strong focus on OHS, we have adopted a holistic approach to safeguard employee wellbeing. Workman's compensation insurance safeguards the financial wellbeing of our estate and factory workers in the event of injury or illness from the workplace. In addition, we have partnered with Janashakthi Insurance to offer our manual workers a special medical insurance scheme for their routine healthcare needs.

Moreover our robust employee wellbeing programme focuses on holistic welfare, emphasising both physical and mental wellbeing of our employees and the communities living within our estates. The multifaceted programme includes regular health camps, mobile medical clinics, and awareness sessions on key health topics including maternal care, child nutrition, sanitation, and disease prevention. In collaboration with regional health authorities and NGOs, we frequently organise special clinics that provide screenings for chronic illnesses such as diabetes, hypertension, and vision impairment.

4.2 Rewards and Recognition

Great Place to Work

TTE was proudly awarded the Great Place to Work® certification following a comprehensive evaluation of its workplace culture and employee satisfaction. The assessment considered critical indicators such as employee turnover, productivity, participation, and engagement. TTE achieved an outstanding 99% employee satisfaction score, reflecting a deeply engaged, motivated and content workforce.

- Among 15 Best Workplaces for Women in Sri Lanka for 2024

South Asian Business Excellence Award 2024

- Best Use of CSR Practices in Community Development - WINNER
- Best Use of CSR Practices in Women & Children Empowerment -WINNER
- Best Place to Work (Work, Health & Safety) - WINNER

TTE PLC Metric

Total Training hours & investment

Our 2030 Target

Improve the capacity building investment and beneficiaries by 50% by 2030

Contribution

We invested Rs. 11 Mn in FY 2024/25 for leadership development and training across estates, ensuring inclusive access to education and career growth.

SDG Target 4.3

Championing Excellence in Tea Harvesting : Best Tea Harvester Contest

In a remarkable tribute to the skill and dedication of Sri Lanka's tea harvesters, TTE successfully conducted the third edition of its Best Tea Harvester Competition in March 2025, at the Dimbula Cricket Club Grounds in Nanu Oya, drawing enthusiastic participation and support from plantation communities.

A total of 16 female tea pluckers, each a winner of their respective estate-level competitions, competed in the grand finale. The competition emphasized not only harvesting speed but also the critical importance of precision in maintaining the high-quality standards of Ceylon tea. Expert evaluators from the Tea Research Institute assessed each participant on both yield and leaf quality.

Ms. Anthony Iresha Rajaletchumi from Great Western Estate emerged as the overall champion, demonstrating exceptional skill by harvesting 6.2 kilograms of tea in just 15 minutes. In recognition of her outstanding performance, she was awarded a cash prize of Rs. 500,000 along with additional accolades.

This annual event continues to celebrate the invaluable contributions of tea harvesters while promoting excellence and pride in the profession.

Short Term

- Introduce a digital wellness app or platform that provides employees with resources like mental health support, stress management, fitness tracking & nutrition guidance to enhance employee wellbeing, reduce absenteeism & boost morale.

Medium Term

- Create an internal mobility program that allows employees to explore different roles or functions within the company for skill enhancement.

Long Term

- Set up a leadership development program tailored to future challenges in tea plantation management & sustainability.

NATURAL CAPITAL

Natural capital is central to our operations and long-term sustainability. From soil and water to biodiversity and climate stability, these ecosystems serve as both inputs and beneficiaries of our responsible practices. At TTE, we take a regenerative approach minimizing impacts while restoring ecosystems through soil conservation, reforestation, and climate-smart agriculture. This section explains how we measure, manage, and improve our environmental footprint to protect the landscapes we rely on.

Use of Drones to Minimize Agrochemical Usage

Deploying agricultural drones to apply pesticides or fertilizers more precisely and uniformly, targeting only where necessary.

Motor System Optimization to Reduce Energy Consumption

Improving the efficiency of electric motors in factory operations by upgrading to energy-efficient models or optimizing load, speed, and controls.

Waste to Energy

Biogas project converts estate waste into energy, reducing methane emissions and promoting circular economy practices.

Chemical Leasing Model

Adopted chemical leasing to cut agrochemical use, reduce GHG emissions, and promote climate-smart, low-emission tea cultivation.

GRI 3-3 | 13.1.1, 13.7.1, 13.8.1

Management Approach

Risks

Rising temperatures and erratic weather patterns threaten crop yields, biodiversity, and water availability.

Unsustainable land use and agrochemical reliance can degrade soil health and ecosystem stability.

Opportunities

Prioritise regenerative agriculture to enhance soil fertility to improve long-term productivity.

Material Matters

- Materials
- Soil and Land
- Energy
- Water
- Climate
- Waste
- Biodiversity & Ecosystems

Management Approach

Our approach to preventing Natural Capital loss environmental policies are anchored to 4 pillars: Climate Action, Resource Conservation, Sustainable Land Management and Ecosystem Restoration, that collectively represent a holistic commitment to preserving and enhancing the natural environment while ensuring the long-term sustainability of our operations. Our climate action strategy prioritises decarbonisation through energy reduction initiatives and strategic investments in renewable energy aimed at lowering emissions and enhancing climate resilience, while commitment to resource conservation aims to minimise waste and drive circular economy principles. Meanwhile our efforts towards sustainable land management aim to preserve and protect the Country's agricultural lands. Likewise we continue to demonstrate our leadership in ecosystem restoration through high impact projects that focus on reversing or at the very least halting nature loss.

Resource Allocation Highlights

Rs. 60.4 Mn invested in renewable energy

ISO 50001 Energy Management System implemented at Mattakelle Tea Factory

247 hectares of land allocated for fuelwood cultivation

Implemented the Net Positive Water Impact Policy

Implemented the Net Positive Business Policy

Commenced a large-scale reforestation project to establish a forest corridor in Sri Lanka's central highlands

Outputs for TTE

- 4.8% year on year increase in energy intensity
- 5.86% year on year increase in renewable energy generation
- 27% reduction in Scope 1 and Scope 2 emissions in line with SBTi baseline targets set in 2020
- 15.7% year on year decrease in the use of agrochemicals

Stakeholder Outcomes	FY 2024/25	FY 2023/24	Value Enhanced (+) Preserved (=) Eroded (-)
Emissions CO ₂ owing to climate action initiatives (emission reduction)	23,431tCO ₂ e	25,194tCO ₂ e	Enhanced
Conservation of water bodies	147	147	Preserved
Renewable energy usage	88%	86%	Enhanced
Contamination of water bodies due to spills	NIL	NIL	Preserved

SDG's

- Target 6.6: Protect and restore water-related ecosystems, including forests, wetlands, and rivers.
- Target 6.4: Increase water-use efficiency and ensure sustainable freshwater withdrawals.

- Target 12.2: Achieve sustainable management and efficient use of natural resources.
- Target 12.4: Reduce chemical pollution and waste generation through responsible production.

- Target 13.1: Strengthen resilience and adaptive capacity to climate-related disasters.
- Target 13.2: Integrate climate change measures into policies and planning.

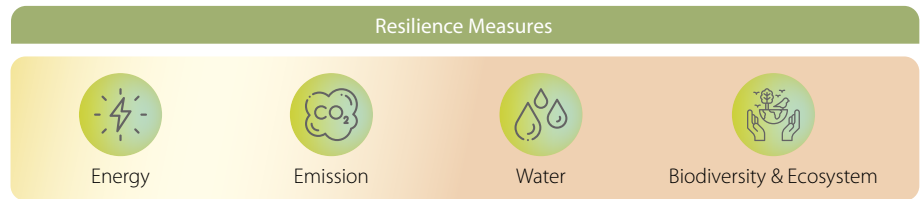

- Target 15.1: Ensure the conservation, restoration, and sustainable use of terrestrial ecosystems.
- Target 15.2: Promote sustainable management of forests and halt deforestation.

NATURAL CAPITAL

Climate Adaptation and Resilience

"Recognizing the dual challenge of contributing to and being impacted by climate change, we have embedded climate resilience across our natural capital strategy to protect and enhance the ecosystems we rely on"

At Talawakelle Tea Estate PLC, we recognize that safeguarding our natural capital goes hand-in-hand with building resilience to climate change. As extreme weather patterns, water stress, and biodiversity loss become more frequent, we are proactively adapting our operations to withstand these risks while contributing to climate resilience across the landscapes we manage.

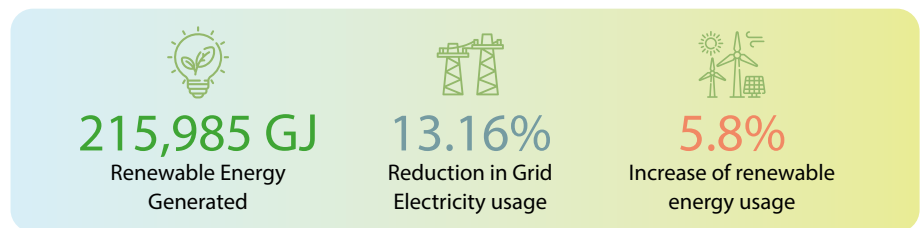

Our estate operations have integrated **climate-smart water management** practices, including rainwater harvesting, contour drains, and efficient irrigation systems—enhancing our ability to adapt to seasonal variability and prolonged droughts. Through the adoption of **energy-efficient** technologies and the reduction of fossil fuel dependency, we are not only lowering our carbon footprint but also reinforcing energy security in the face of future climate volatility. We are strengthening ecosystem resilience by expanding biodiversity corridors, conserving native flora, and restoring degraded areas. These nature-based approaches serve as buffers against landslides, erosion, and erratic rainfall, while protecting critical habitats.

Our strategy also draws on indigenous knowledge and scientific innovation to build community and ecological resilience. By aligning our adaptation actions with our emissions reduction, water stewardship, and biodiversity goals, we ensure that our climate response is holistic, inclusive, and future-ready.

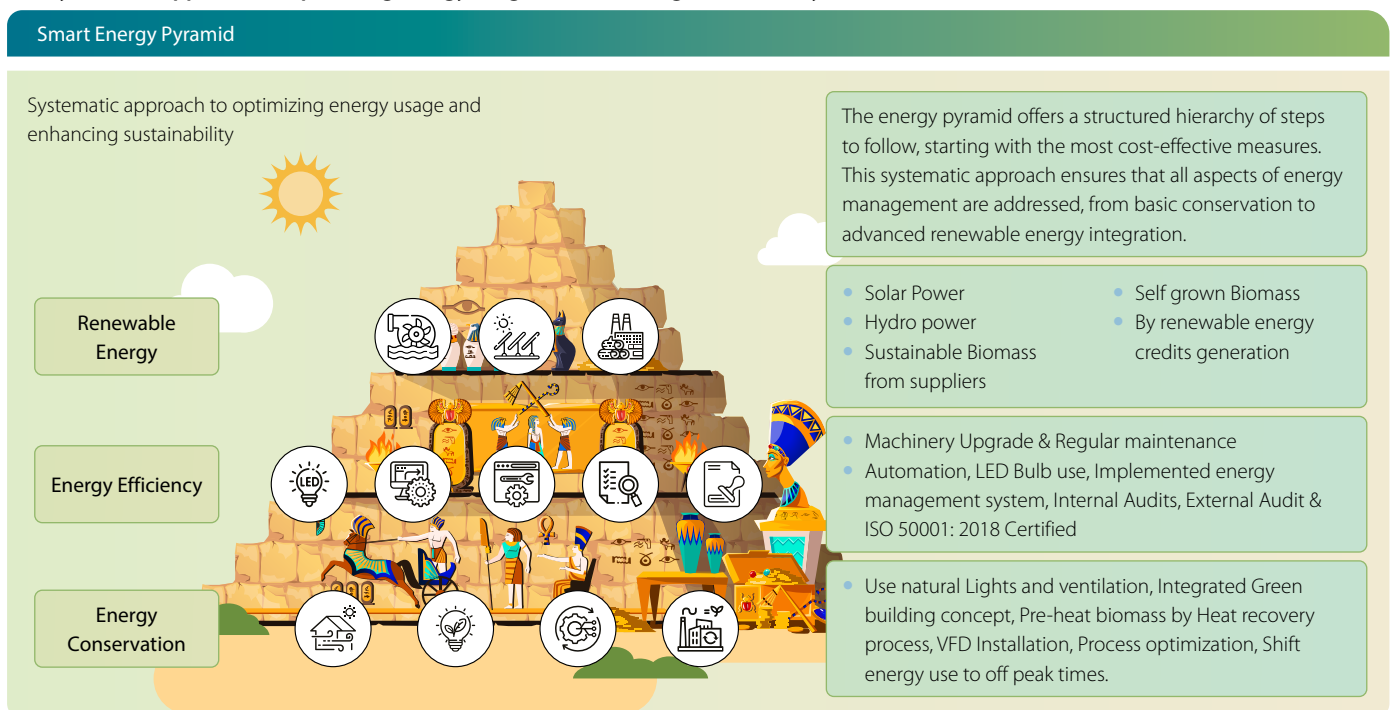

For further details, refer to the Climate Adaptation and Resilience section under SLFRS Sustainability Disclosures on page 81

Energy Management

GRI 302-1, 2, 3, 4, 5

TTE Systematic Approach to Optimizing Energy Usage and Enhancing Sustainability

As a tea manufacturing company, our core operations are centered on agricultural processing rather than the design or modification of energy-consuming products, limiting our direct influence on the energy requirements of end-use products. However, we acknowledge that our midstream operations withering, rolling, and drying are highly energy-intensive, relying on a mix of direct on-site generation and grid-supplied electricity. As operations grow, improving energy intensity remains a strategic priority. Guided by our Energy Management Policy and aligned with ISO 50001:2018, we continue to invest in energy-efficient technologies and renewable energy solutions to enhance process efficiency. A significant milestone was the successful ISO 50001 implementation at Mattakelle Tea Factory, supported by the National Cleaner Production Centre. With this achievement, 2 TTE factories now operate under the ISO 50001 framework, reinforcing our commitment to energy efficiency, sustainable growth, and long-term emissions reduction.

Reducing Energy Consumption

During the year, TTE recorded a 2.4% change in total energy consumption, driven by continuous improvements in energy efficiency and process optimisation. We have also taken steps to reduce the energy intensity of our operations for example, by upgrading to energy-efficient machinery and enhancing heat recovery systems in tea drying processes. These improvements not only lower our operational footprint but also reduce the energy required per unit of product, supporting our goals in sustainability and climate adaptation, while ensuring consistency and traceability in tracking energy performance across sold products and services.

Invest in Renewable Energy

Our investment in renewable energy is critical in lowering our overall carbon footprint. Over the years, we have expanded our renewable energy portfolio through investments in mini-hydros, biomass, and more recently, through rooftop solar installations with the aim of achieving energy self sufficiency. As of March 31, 2025, these combined initiatives have enabled TTE to meet a significant portion of its energy requirements through renewable sources, with clean energy accounting for 88% of our annual consumption.

Biomass

Biomass remains the largest contributor to TTE’s renewable energy mix, accounting for 85% of total usage. As early adopters of biomass technology, all TTE factories are equipped with biomass-powered steam systems for the tea drying process.

Our biomass production draws on fuelwood and briquettes. This year, fuelwood from licensed third-party suppliers met 78% of our demand. To reduce supply chain risks, TTE has allocated over 80 hectares within high-grown estates for fuelwood cultivation, including 29.5 hectares added this year. Eucalyptus spp. makes up 76% of this area, with the rest under mixed forestry.

Solar Energy

Solar energy accounts for 0.96% of the Company’s total energy mix. To-date TTE has invested over LKR 59.3 Mn in rooftop solar systems at 6 of our estates. In the current year alone, we allocated significant resources toward solar expansion, including the latest addition to our network, Kiruwanaganga Tea Factory. This factory stands as a benchmark in sustainable design, incorporating energy-efficient systems, natural lighting, and recycled materials, all of which align with global green building principles. With this latest solar rooftop installation, our collective generation capacity increased to 300 KWp. Generation recorded for the current financial year was 2,064.5 GJ.

HydroPower

Hydropower has served as a reliable renewable energy source for TTE for many years, supported by investments in mini-hydro plants that harness natural water flow to generate renewable energy. Mini-hydros located at our Somerset, Radella and Palmerston estates which are within designated hydro-catchment areas in Sri Lanka, contribute approximately 13.3% to TTE’s renewable energy mix.

Renewable Energy

FY	2024/25	2023/24	tCO ₂ e Saving
Biomass (GJ)	185,137	177,085	-
Hydropower (GJ)	28,783	24,697	5452.72
Solar Power (GJ)	2,064.50	2,240	406

NATURAL CAPITAL

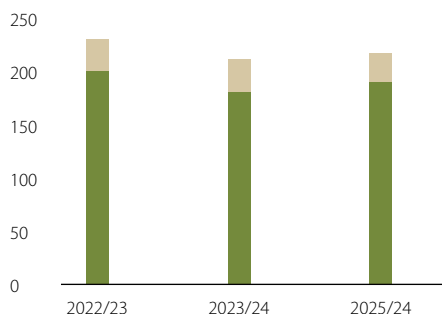

Motor System Optimization to Reduce Energy Consumption

To address high electricity consumption at Holyrood Estate, we implemented a Motor System Optimization Project. Using the PEL 103 Power Logger, we assessed key motors and identified inefficiencies caused by outdated models and repeated rewinding. Many motors operated below optimal efficiency. The assessment recommended replacing old motors with IE3-class energy-efficient models and installing Variable Frequency Drives (VFDs) for the dryer fan to align energy use with operational needs. This initiative aims to enhance system performance, optimize power usage, and reduce electricity consumption—contributing to our Natural Capital conservation efforts.

NATURAL CAPITAL

Emission Intensity by Scope

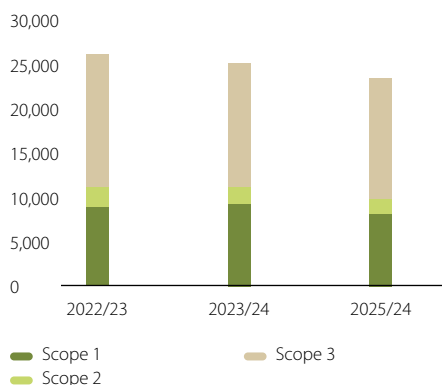

(Kg CO₂e/Tea Kg)

In FY 2024/25, Talawakelle Tea Estates PLC recorded a total GHG emission intensity of 4.24 kg CO₂e per kg of made tea. The graph above provides a detailed breakdown across Scope 1, Scope 2, and Scope 3 emissions, offering transparency into our carbon performance. Compared to the 2022/23 baseline, we achieved a 7.18% overall reduction in emissions, primarily driven by a 13.2% reduction in Scope 2 emissions. Emission calculations included CO₂, CH₄, N₂O, and HFCs, and were conducted in accordance with ISO 14064-1:2018 standards, certified by the Sri Lanka Climate Fund. Scope 1 and 3 reductions continue to be tracked under our broader emissions reduction roadmap.

GHG Emission (3 Year Trend)

Emission (tCO₂e)

SBTi Commitment

TTE has further advanced its commitment to the Net Zero emission target by aligning with the Science-Based Targets (SBT) to set ambitious carbon reduction goals to support the achievement of global climate action objectives. In the four years since embarking on the SBTi journey, the most recent verification of TTE's Near-Term Targets have confirmed

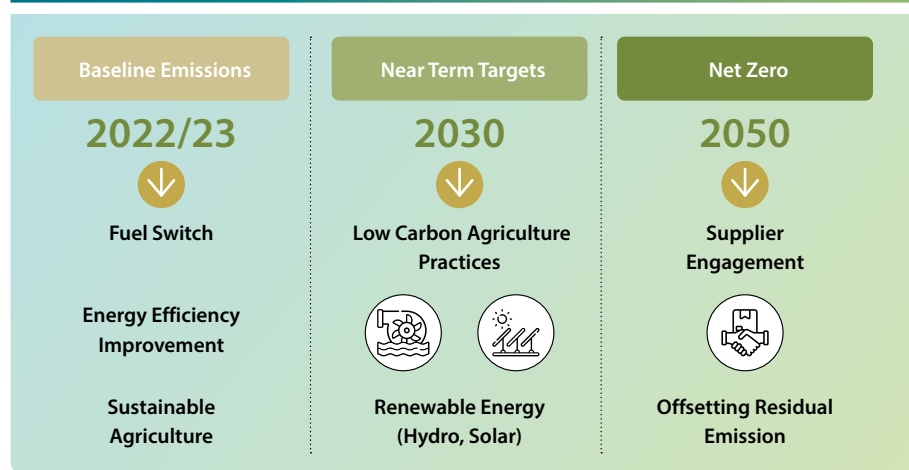

a 27% reduction in Scope 1 and Scope 2 emissions, which is consistent with the baseline targets established in 2022/23.

Driving Decarbonisation Across the Value Chain

Recognising that decarbonisation is a collective responsibility, we have extended our climate action efforts beyond our own operations by collaborating with buyers, brokers, and other key stakeholders across the value chain to co-develop sustainable codes and establish carbon inventory benchmarks for midstream and downstream activities. TTE is also an active member of the Climate Emergency Task Force, an industry-driven initiative focused on driving large-scale climate action within and beyond the plantation sector.

TTE's GHG Emission Reduction Strategic Plan

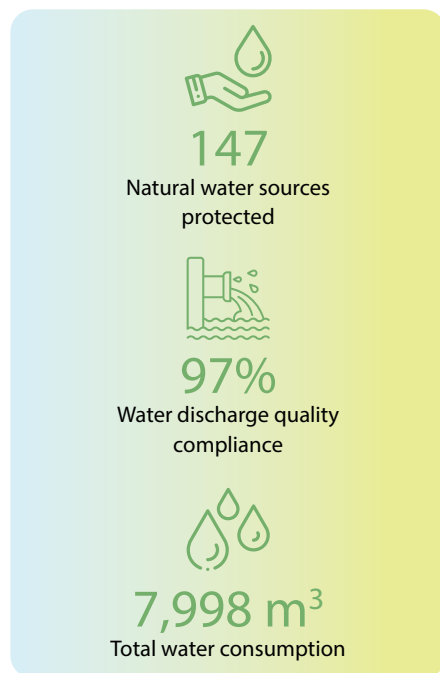

Chemical Leasing for Low-Emission Agriculture

Talawakelle Tea Estates PLC, in collaboration with Lanka Responsible Care, adopted a Chemical Leasing model shifting from volume-based agrochemical sales to a performance-focused approach. In the plantation sector, nitrogen-based fertilizers are a major source of GHG emissions. By optimizing fertilizer and pesticide application, this initiative aims to reduce chemical use and lower emissions from soil. It enhances productivity, operational efficiency, and supports climate-smart agriculture reinforcing our commitment to sustainable, low-emission tea cultivation in Sri Lanka.

Water Management

GRI 303-1, 2, 3, 4, 5 | 13.7.2, 13.7.3, 13.7.4, 13.7.5, 13.7.6

As a plantation Company, TTE's water footprint is minimal. Water is used mainly for employee consumption, factory cleaning and gardening. Water requirements are met through surface water extraction from natural water bodies as well as rainwater harvested from tanks located within our estates. Over the years, TTE has made substantial investments towards rainwater harvesting infrastructure and other technology to reduce water wastage. At our new Kiruwanaganga factory, we have invested in rainwater harvesting systems that work to replenish and restore groundwater water.

To minimise water extraction, we focus on eco-friendly irrigation systems and prioritise water recycling initiatives across our operations, where possible and practical. TTE has also established chemical-free buffer zones around water bodies. As a member of the CEO Water Mandate, TTE reports on its water stewardship initiatives annually.

We follow the
UN CEO Water Mandate Principle

CEO Water Mandate

Effluent Management

As an initiative to manage effluent discharge, our estates have established wastewater purification systems equipped with sedimentation and filtration tanks to treat both factory and domestic wastewater. Additionally, we promote bioremediation by conserving natural vegetation and planting recommended species such as *Canna generalis*, *Tithonia diversifolia*, *Vetiveria zizanioides*, and *Wedelia trilobata* along wastewater flow.

Water Source Protecting

As part of our ongoing commitment to environmental stewardship, Talawakelle Tea Estates PLC continues to lead the St. Clair Restoration Project an initiative focused not only on restoring biodiversity but also on protecting critical watershed areas that feed into one of Sri Lanka's major water sources. Through strategic reforestation, riparian buffer zone management, and long-term monitoring, we aim to safeguard water quality and availability for both ecosystems and surrounding communities. This project is a cornerstone of our sustainable water management efforts, and we remain actively engaged with local and national stakeholders to ensure its continued impact.

Surface water Megalitre	2024/25	2023/24	Variance
Total water withdrawn	7.998	7.723	3.6%
Total water consumption	0.555	0.521	6.5%
Total water discharge	7.443	7.201	3.4%

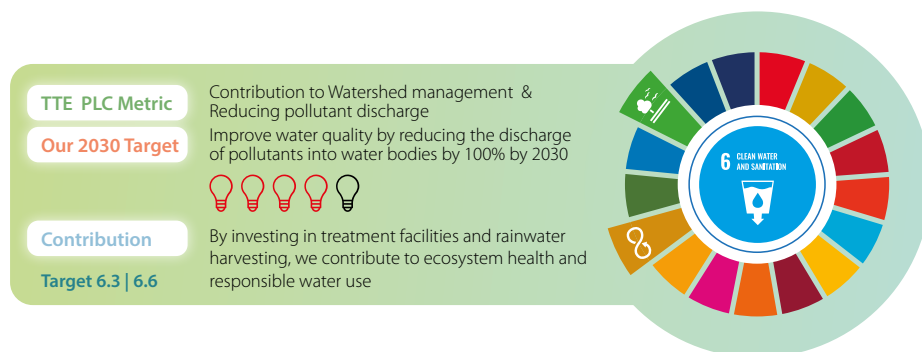

Water Risk Assessment

Type	Water Source	Availability	Quality	Access
Water Stress Basin	Talawakelle Region	Medium Risk	High Risk	Low Risk
	Nanu Oya Region	Medium Risk	High Risk	Low Risk
	Deniyaya Region	High Risk	Medium Risk	Low Risk
Non-stressed Basins	Galle Region	N/A	N/A	N/A

NATURAL CAPITAL

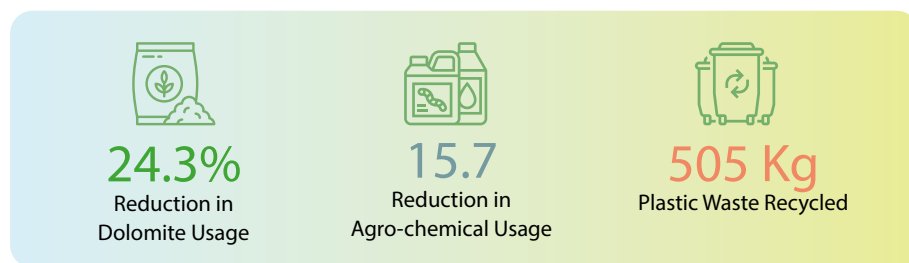

As part of our Nature-Positive Business Policy, we began our Net-Positive Water Impact (NPWI) journey, guided by the Water Resilience Coalition under the CEO Water Mandate. A pilot assessment, supported by TTE PLC and IWMI under the Ministry of Irrigation's IWWRRMP, was completed using a tailored NPWI scorecard.

We also assessed water availability, quality, and access across our operational regions. Based on this, we remain committed to responsible water management. In water-stressed areas, especially where local communities face high risk, we take proactive steps to reduce water usage and conserve shared water resources.

Material Consumption

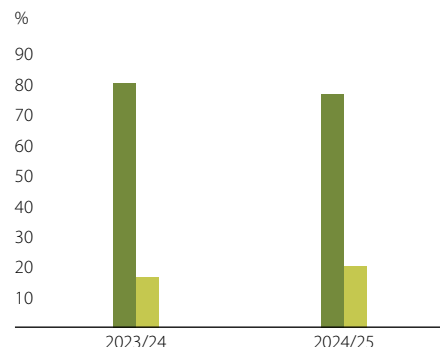

GRI 301-1, 2, 3

With operations extending across 16 estates covering cultivation, processing, and packaging, our material usage is significant. Aligned with our Regenerative Agenda, we are transitioning from a traditional linear economy model to a circular approach focused on resource efficiency and the 4Rs reuse, recycling, recovery, and reduction. We actively prioritize the use of renewable inputs wherever feasible and ensure prudent management of non-renewable resources. Green leaf, our core raw material, represents over 86% of total input, while non-renewables such as fertilizers, agrochemicals, and dolomite account for the remaining 14%. Currently, recycled materials are not integrated into our production process. As an export-focused operation, reclaiming and reusing packaging materials is not practical. However, we utilize recyclable paper sacks and prefer suppliers who provide sustainable, low-footprint packaging solutions.

Material Consumption	2024/25	% Share	2023/24	% Share
Factory Operations				
Green Leaf	20,213	79.1%	22,071	80.87%
Packing material	83	0.3%	75	0.27%
Total renewable materials (Tons)	20,296	79.4%	22,146	81.14%
Field operation				
Fertilizer	3,624	14.2%	2,971	10.89%
Agrochemicals	11.8	0.0%	14	0.05%
Dolomite	1,634	6.4%	2,161	7.92%
Total Non renewable materials (Tons)	5,270	20.6%	5,146	18.86%

Renewable Vs Non-Renewable Material Usage

Renewable Material percentage
Non-Renewable Material percentage

Waste Management

GRI 306-1, 2, 3, 4, 5 | 13.8.2, 13.8.3, 13.8.4, 13.8.5, 13.8.6

Waste Generation and Significant Waste-Related Impacts

TTE's waste management policy is driven by circular economy principles that underscore the Company's commitment to reducing waste sent to landfills. Policy dictate 7R practices - refuse, reduce, reuse, recycle, reclaim, repair, and replace. As part of this approach, organic waste is repurposed into compost and biogas, while refuse tea is converted into value-added products. Agricultural waste is reused to make briquettes, used as biomass fuel.

Non-biodegradable waste such as metal, glass, plastic, polythene and paper are collected, segregated and responsibly disposed of, most often, through recycling channels. Empty agrochemical containers are returned to suppliers for reuse while hazardous e-waste including used bulbs is responsibly stored and subsequently disposed through a waste disposal company authorized by the Central Environmental Authority

Management of Significant Wasterelated Impacts

TTE's waste management policy is driven by circular economy principles that underscore the Company's commitment to reducing waste sent to landfills. Policy dictate 7R practices - refuse, reduce, reuse, recycle, reclaim, repair, and replace. As part of this approach, organic waste is repurposed into compost and biogas, while refuse tea is converted into value-added products. Agricultural waste is reused to make briquettes, used as biomass fuel.

Non-biodegradable waste such as metal, glass, plastic, polythene and paper are collected, segregated and responsibly disposed of, most often, through recycling channels. Empty agrochemical containers are returned to suppliers for reuse while hazardous e-waste including used bulbs is responsibly stored and subsequently disposed through a waste disposal company authorized by the Central Environmental Authority.

Waste to Energy

As part of our sustainable waste management strategy, we initiated a biogas project at Dessford Estate, Nanu Oya, using food, kitchen, and garden waste to generate renewable energy. This project not only reduces methane emissions and environmental pollution but also lessens reliance on LP gas and chemical fertilizers turning waste into a valuable resource while promoting circular economy principles.

Waste Management Within Estate

Talawakelle Tea Estates PLC, in partnership with the Nanu Oya Pradeshiya Sabha, has implemented a structured waste segregation initiative across its estates. Moving beyond awareness, the program introduces a practical system where estate residents are required to separate and hand over waste biodegradable and non-biodegradable every Friday. Public Health Inspectors and Environmental Officers provided clear guidance on proper segregation methods.

Waste type and disposal	2024/25	2023/24
Waste diverted from disposal (Kg)		
Composting		
Biodegradable mix waste	222,200	132,414
Recycling		
Glass	206	396
Plastic	505	871
Polythene	277	1,014
Metal/Iron	128	457
Paper	707	2,422
Total Recycling	1823	5,159
E waste	209	287
Bulbs used	789	643
Total on site storage	998	930
Waste directed to disposal (Kg)		
Authorized Landfill		
Non hazardous mix waste	-	6,786
Total Waste Generation	225,021	145,289

During the reporting period, no significant spills were recorded across any of our estates or facilities. As a result, there were no spill-related incidents disclosed in the financial statements. Our operations maintained strict environmental safeguards and spill prevention protocols, ensuring zero occurrences of oil, fuel, waste, or chemical spills that could impact soil or water surfaces.

TTE PLC Metric

Our 2030 Target

Contribution

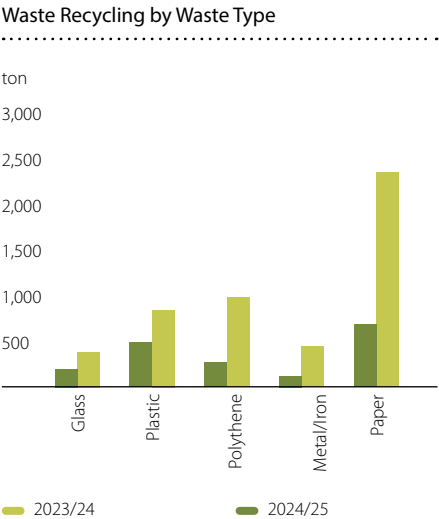

Target 12.5 | 12.4

Waste generation within in our estate

Increase the adoption of permaculture practices by 100% of estates by 2030

Estate-level waste segregation, composting, and biogas use help reduce environmental pollution and promote circular economy principles

NATURAL CAPITAL

Sustainable Land Management

GRI 13.5.1, 13.6.1, 13.6.2

As a tea plantation Company, TTE PLC has a deep-rooted connection to the land. We recognize that the health of our plantations is vital for our operations and as such have put in place key measures to protect, conserve and nurture soil vitality in line with the Rainforest Alliance Sustainable Agriculture Standard.

Improving Soil Health

We take a multi-faceted approach to improving soil health. Fertilizers supply key nutrients like nitrogen, phosphorus, and potassium to boost plant growth, yield, and soil fertility. Weedicides and herbicides control weeds competing for nutrients, water, and sunlight, while fungicides prevent diseases like mildew and rust. Adaptive Management Systems use real-time weather, environmental, and climate data, along with IoT devices, to monitor soil health indicators such as pH, carbon levels, and temperature. This enables timely adjustments for optimal use of fertilizers, agrochemicals, water, and nutrients, strengthening climate resilience. To promote long-term fertility, we've developed the 4K Soil Nutrient Framework, focusing on soil testing, organic matter, erosion control, and water management to sustain moisture and microbial activity. We also engage in public-private partnerships for research. A key initiative is our collaboration with the Universities of Sabaragamuwa and Wayamba, leading to the development of biochar and vermicompost units. Biochar, with its porous structure, enhances soil fertility, water retention, and nutrient levels supporting regenerative agriculture across our estates.

Soil management

4R of Nutrients Framework

The 4Rs promote best management practices (BPMs) to achieve cropping system goals while minimizing field nutrient loss & maximizing crop uptake

Right Source

- Use of appropriate fertilizer types (e.g., nitrogen-based, organic alternatives).
- Preference for slow-release or stabilized fertilizers to minimize leaching.
- Soil testing conducted to match fertilizer type with nutrient needs.

Right Rate

- Periodic calibration of equipment to ensure precise application.
- Avoidance of over-fertilization to reduce nutrient runoff and GHG emissions.

Right Time

- Avoidance of application during heavy rainfall to reduce runoff.
- Split applications during the season to improve efficiency.

Right Place

- Use of drones or mechanized tools for site-specific application.
- Buffer zones maintained near water sources to prevent contamination.

Minimizing Agrochemical Use

Although TTE PLC does not maintain a standalone policy on agrochemical usage, the Company's comprehensive environmental policy governs all related practices, ensuring alignment with broader environmental objectives. In accordance with recommendations from the Tea Research Institute (TRI), only registered agrochemicals procured from authorized local suppliers are utilized, with strict adherence to national quality, safety, and regulatory standards. All applications and transport procedures follow established precautionary protocols, and personnel involved in chemical handling are thoroughly trained, equipped with appropriate personal protective equipment, and comply with all safety guidelines. Through participation in the Chemical Leasing initiative in collaboration with Lanka Responsible Care, TTE PLC gains valuable insights into minimizing agrochemical runoff and mitigating environmental absorption. Central to this approach is the continuous monitoring and evaluation of chemical application processes. Beyond conventional practices, the Company emphasizes integrated pest management through biological remediation. Guided by Food and Agriculture Organization (FAO) principles and good agricultural practices, priority is given to natural pest control methods that support ecosystem health and biodiversity. In partnership with the TRI, TTE PLC is also engaged in ongoing research to identify and implement sustainable, nature-based solutions that reduce pesticide dependency and exposure.

Minimizing Agrochemical Use

As part of its commitment to responsible chemical usage, TTE monitors pesticide application based on toxicity hazard levels. In the reporting year,

Type of pesticide	Intensity Per hectare	Use amount (2024-2025)	Hazardous level
Herbicides (Weeds and unwanted plants) Glyphosate	1.4- 2.8 L per hectare	13969L	Slightly hazardous (Class III)
Fungicides (Fungi (molds, mildew, etc. copper hydroxide)	280-420g per hectare	670Kg	Moderately hazardous (Class II)

Hazardous level according to WHO recommended classification for pesticide with no use of extremely or highly hazardous substances. This reinforces the Company's emphasis on low-toxicity solutions that protect both human health and the environment.

Use Drone for Minimize Agrochemical Usage

Harnessing drone technology, we've reimagined agrochemical application—ensuring precise, efficient spraying across our tea fields while significantly reducing chemical use and safeguarding both workers and the environment.

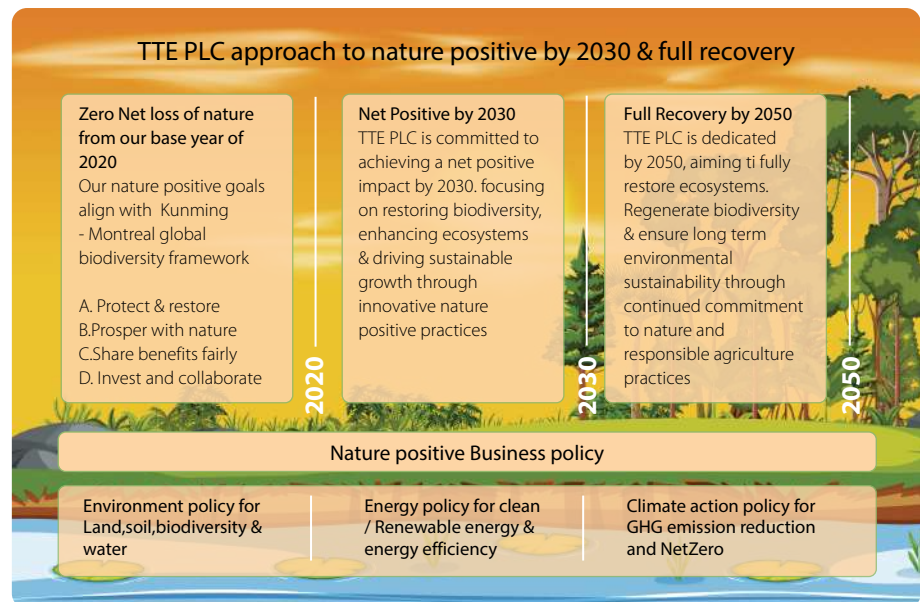

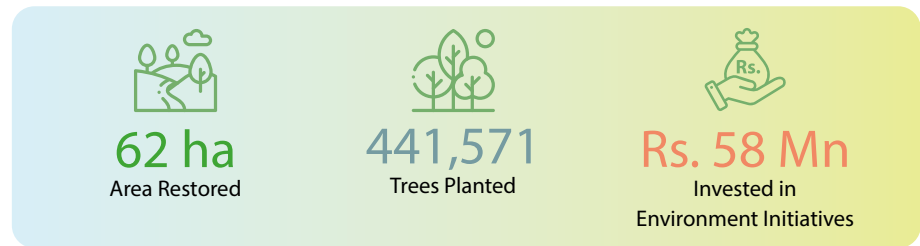

Land Management Inside the Estates

To promote sustainable land management, our estates implement contour plowing, terracing, and vegetative buffer zones to reduce erosion. We also adopt soil conservation techniques, rainwater harvesting, and moisture retention practices to preserve soil health and ensure long-term agricultural productivity.

Ecosystem Conservation and Biodiversity Restoration

GRI 101-1, 2, 3, 4, 5, 6, 7, 8 | 13.3.1, 13.3.2, 13.3.3, 13.3.4, 13.3.5 | 13.4.1, 13.4.2, 13.4.3, 13.4.4, 13.4.5

Policies to halt and reverse biodiversity loss & Nature Conservation

In 2024, TTE went beyond mainstream efforts to unveil its Nature-Positive Business Policy in 2024 to formally declare its commitment to halting and reversing nature loss. Mapped against the Kunming-Montreal Global Biodiversity Framework, our Nature-Positive Policy aims for Zero Net Loss of Nature from our 2020 baseline and strives for a Net Positive impact by 2030 through transformative regenerative agriculture and regenerative business practices. By prioritizing biodiversity restoration, ecosystem regeneration, and sustainable growth, we are dedicated to achieving Full Recovery by 2050.

Nature Ecosystem Conservation & Biodiversity Management

TTE is committed to a zero-conversion policy for all lands under its management since the 2020 cut-off date, ensuring that no natural ecosystems have been cleared or significantly altered for tea cultivation or estate development. All 16 estates are confirmed conversion-free through internal biodiversity mapping and land-use records.

In compliance with Rainforest Alliance certification, we monitor land-use changes and biodiversity to prevent deforestation and the conversion of forests, wetlands, or ecologically sensitive areas. Estate boundaries are regularly reviewed, and any development is carefully assessed to minimize environmental impact.

We increasingly rely on biomass from our own fuelwood plantations, improving traceability and reducing risks tied to third-party supply chains. We also engage in multi-stakeholder, landscape-level initiatives such as preserving a wildlife corridor near Horton Plains and conserving High Conservation Value (HCV) areas close to St. Clair Waterfall—supporting ecosystem connectivity and community-based biodiversity efforts.

At Talawakelle Tea Estates (TTE), we apply the mitigation hierarchy to manage and minimize our biodiversity impacts, recognizing our estates are located in high-value biodiversity regions, including the central highlands (vital water catchments) and estates bordering the Sinharaja Rainforest.

NATURAL CAPITAL

1) Avoidance:

We strictly avoid forestland conversion, and activities such as hunting, capturing, or trafficking of wildlife are prohibited across all estates. Buffer zones are maintained near protected areas to prevent disturbances to natural ecosystems.

2) Minimization:

We regularly conduct environmental audits and ecological surveys to monitor our impact. We maintain an inventory of 113 faunal species (44 of which are classified as endangered, vulnerable, or threatened by the IUCN), along with 31 floral species, and adjust estate operations based on scientific data.

3) Restoration & Rehabilitation:

We engage in proactive conservation and restoration measures in degraded areas, with goals focused on ecosystem recovery and protection of native flora and fauna. Local community involvement, awareness campaigns, and education initiatives support ongoing ecosystem restoration, enhancing ownership and stewardship.

Access to Biodiversity Resources and Fair Distribution of Benefits

Currently, Sri Lanka does not have specific national regulations on access and benefit-sharing (ABS), and Talawakelle Tea Estates PLC (TTE) does not engage in research or commercial activities involving the genetic or biochemical composition of resources.

However, in the spirit of fair and equitable benefit-sharing, TTE has implemented voluntary measures to support community wellbeing and biodiversity protection. Estate communities are permitted to collect firewood and non-timber forest products from our estate areas in a regulated and environmentally responsible manner.

Additionally, our biodiversity restoration projects including reforestation, habitat conservation, and ecological buffer zone management have created employment opportunities for local residents, especially in tree planting and land rehabilitation. These actions not only contribute to conservation but also enhance local livelihoods.

Identification of Biodiversity Impacts

Our organization began biodiversity assessments by identifying risk areas in alignment with the Rainforest Alliance standard,

helping us recognize key ecological zones and potential operational impacts.

Building on this, and as a TNFD Early Adopter, we are now applying the LEAP approach (Locate, Evaluate, Assess, Prepare) to assess actual and potential impacts on biodiversity from our direct operations, including estates, factories, and other sites we own or manage.

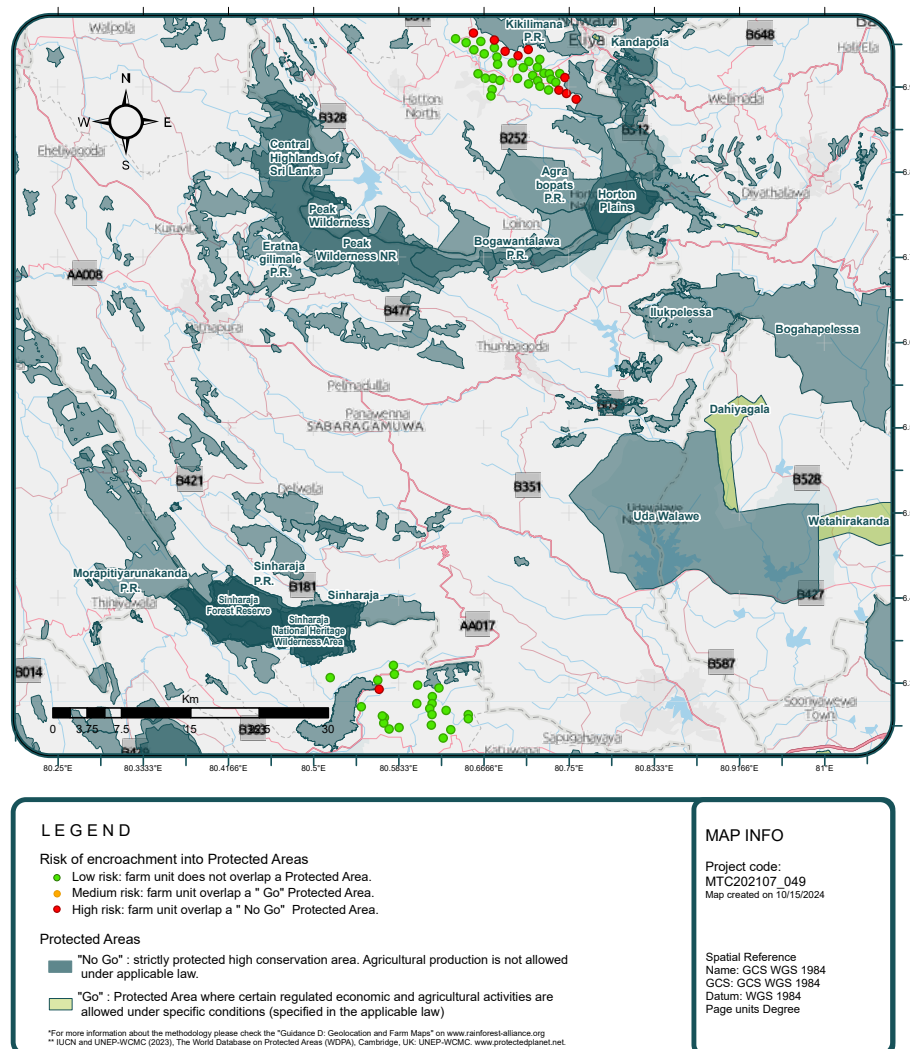

We use tools like the WWF Biodiversity Risk Filter and ENCORE to evaluate:

- Proximity of sites to ecologically sensitive areas,
- Health and importance of local ecosystems,
- Biodiversity impact drivers such as land use, pollution, and water use.

These tools help overlay site-specific data with global biodiversity datasets, enhancing our understanding of where significant impacts may occur. This ongoing process informs our conservation actions, risk management, and future reporting aligned with the TNFD framework.

Locations with biodiversity impacts

According to the Rainforest Alliance standard, we have identified that approximately 15% of our operational sites are in or near ecologically sensitive areas. These areas include zones of biodiversity importance, high ecosystem integrity, and key ecosystem services. This identification helps guide our biodiversity risk assessments and informs conservation efforts across our operations.

(Risk of encroachment into Protected Areas)

Direct drivers of biodiversity& ecosystem loss & changes to the state of biodiversity

Since 1992, our company has maintained a strict policy of zero conversion of natural ecosystems into commercial land. As a result, 0 hectares of natural ecosystems have been converted across our operational sites after this reference year.

Although no ecosystem degradation occurred, several important native and endemic tree species have been identified and preserved within estate areas. These include:

Local Name	Scientific Name	Status
Maha rathmal	<i>Rhododendron arboreum ssp. zeylanicum</i>	Endemic
Bombu / Wal bombu	<i>Symplocos cochinchinensis ssp. laurina var. laurina</i>	Native
Bulu	<i>Terminalia bellirica</i>	Native
Keena	<i>Calophyllum tomentosum</i>	Endemic
Aridda	<i>Camposperma zeylanicum</i>	Endemic
Gini sapu / Sapu	<i>Michelia champaca var. champaca</i>	Native

Ecosystem Services

We have identified ecosystem services and beneficiaries that are or could be affected in various ways through on-ground biodiversity observations, estate-level natural resource monitoring with biodiversity experts, and stakeholder input, including estate managers and community feedback.

Ecosystem Service Type	Ecosystem Service	Beneficiaries
Provisioning Services	Freshwater for domestic and agricultural use from estate-managed watersheds	Estate workers, surrounding local communities
Regulating & Maintenance Services	Erosion control from vegetation on steep slopes	Local communities (protection from landslides), plantation operations (soil stability)
	Microclimate regulation and shade from preserved native tree cover	Tea crop (yield and quality), plantation workers
	Water purification and retention in riparian zones	Downstream users, communities, company's own agricultural operations
Cultural Services	Aesthetic and recreational value of scenic landscapes (e.g., forested valleys, water streams)	Local residents, eco-tourists, estate employees
	Spiritual and cultural significance of endemic species and old trees	Spiritual and cultural significance of endemic species and old trees

Large-scale Reforestation Project to Establish a 13 km Forest Corridor Along the Naanu Oya and Agra Oya in Sri Lanka's Central Highlands

TTE, in collaboration with the Wildlife and Nature Protection Society (WNPS) PLANT, launched a large-scale reforestation project in Sri Lanka's central highlands to establish a 13 km forest corridor along the Naanu Oya and Agra Oya. A formal Memorandum of Understanding (MoU) was signed between TTE and WNPS to restore 11 hectares of riparian buffer zone within the Company's estates. The initiative brought together 15 companies to collectively raise Rs. 5.2 million for ecosystem conservation. Two universities joined as technical partners, and several NGOs signed MOUs to support conservation efforts.

Project Scope: Covers Somerset, Bearwell, Dessford, Radella, Palmerston, Great Western, and Logie estates.

Objective: Plant over 50,000 native trees across 150–200 acres, with local community engagement in planting, nursery development, and biodiversity monitoring.

Fauna and flora observation

NATURAL CAPITAL

Actions Taken to Avoid, Minimize Negative Impacts on Biodiversity

To uphold our commitment to biodiversity, we follow a dedicated biodiversity management plan focused on minimizing ecological impact. We avoid forest-to-tea land conversion, strictly prohibit wildlife hunting, capturing, and captivity, and enforce zero tolerance for invasive species. Field inputs are screened for pests and diseases, while buffer zones are maintained near protected areas. We refrain from using banned agrochemicals, reduce synthetic fertilizer use, and prioritize soil health. Factories are located in less ecologically sensitive zones, and habitat corridors have been established to enhance landscape connectivity and reduce fragmentation.

Short Term

- Expand estate-level environmental data collection systems to better track resource use such as water and energy consumption and improve responsiveness to environmental risks.

Medium Term

- Increase investment in nature-based solutions such as biodiversity corridors, reforestation and regenerative agriculture to enhance soil health, water retention and climate resilience across estates.

Long Term

- Establish TTE as a leader in climate-smart agriculture by integrating renewable energy, circular waste practices and ecosystem restoration into all plantation operations, achieving a net-positive environmental impact.

Future Roadmap

TTE PLC Metric

Area (ha) of restored or rehabilitated habitat

Our 2030 Target

Net-positive impact by restoring and protecting 100 hectares of land

Contribution

Completed 62 hectare of forest restoration

Target 15.1 | 15.5 | 15.9

Trade-offs

With Financial Capital

At TTE, we continue to invest more in sustainable practices that protect the environment and secure the future of our business. In FY 2024/25, we spent Rs. 58 Mn on initiatives such as reforestation, soil conservation, and renewable energy infrastructure. While these efforts come with high short-term costs, they're designed to deliver long-term value by building climate resilience, reducing environmental risks, and cutting operational costs through better efficiency and reduced reliance on fossil fuels. For example, our renewable energy systems generated 215 GJ this year, helping us lower our greenhouse gas emissions and move closer to energy independence.

With Human Capital

These environmental efforts don't just benefit nature they also create meaningful jobs and learning opportunities for our estate communities. In FY 2024/25, over 3,679 estate workers took part in activities like tree planting, compost making, biodiversity corridor restoration, and integrated pest management. These projects help protect our ecosystems while also giving workers new skills, boosting incomes, and creating a stronger sense of ownership. By involving people directly in conservation work, we are not only nurturing the land but also empowering our people to become long-term stewards of it.

Future Snapshot

The future of Talawakelle Tea Estates PLC unfolds as a landscape where innovation and sustainability converge, shaping a resilient and regenerative plantation sector. As a leader committed to transformative change, TTE is positioning itself at the forefront of industry evolution—integrating cutting-edge technology with ecological stewardship to foster abundant, healthy estates. Our vision extends beyond cultivation—creating a legacy of environmentally conscious practices, inclusive communities and diversified business streams that elevate the standards for Sri Lanka's plantation industry. Guided by purpose and advanced strategies, TTE's journey aims to craft a sustainable, prosperous future for generations to come.

Winning With the Customer

Crafting authentic relationships based on transparency and responsibility, TTE will place consumer trust at the core of its growth strategy. Focused on delivering ethically sourced, traceable and premium teas, the company will leverage comprehensive branding to tell compelling stories rooted in social and environmental impact. Expanding into rapidly growing markets, particularly those focused on wellness and sustainability, every product and touchpoint will exemplify excellence, integrity and purpose-driven innovation, reaffirming TTE's commitment to exceeding expectations in a competitive landscape.

- Building long-term, reciprocal customer relationships founded on sustainability.
- Expanding specialty, organic, and wellness-oriented tea offerings aligned with trends.
- Entering high-growth markets with innovative, transparent branding stories.

Operational Excellence

Streamlining operations through advanced digital solutions, TTE aims to embed regenerative principles deeply into its core processes. Deploying intelligent farm management systems, climate-resilient cultivars and diversified cropping strategies, the company will enhance productivity while safeguarding natural resources. The adoption of renewable energy and mechanisation will further elevate operational efficiencies,

setting new industry benchmarks. This approach ensures that sustainability and high performance can coexist, transforming the estate's landscape into a model of ecological balance, technological innovation and agricultural excellence.

- Scaling up mechanisation, automation, and intelligent data-driven management.
- Developing climate-smart cultivars and diversifying crops for resilience.
- Embracing green energy solutions to power our estates sustainably.

Nurturing Our People

Building a future where talent and community thrive in harmony, TTE will foster an inclusive, dynamic workplace centered on empowerment and growth. By promoting gender equality, creating opportunities for leadership, and extending profit-sharing models, the company will unlock new pathways for estate communities to flourish. Investments in skill development and wellbeing initiatives will cultivate a motivated, innovative workforce that drives the company's regenerative ambitions while strengthening their social and economic resilience through diversification into ventures like cinnamon and strawberries.

- Expanding income-sharing and skill development programs for estate workers.
- Promoting women's leadership and participation across the business.
- Creating vibrant, empowered communities with diversified income sources.

Environmental Stewardship and Climate Action

TTE will advance its role as an environmental steward by implementing scalable regenerative agricultural practices. The deployment of smart technologies, water conservation initiatives including rainwater harvesting and biodiversity preservation will promote a resilient ecosystem. Collaborations with research institutions will refine climate adaptation strategies, ensuring estates remain resilient amid climate shifts. These efforts aim to minimize the ecological footprint, conserve vital resources and position TTE as a global leader in sustainable plantation management, safeguarding the environment for future generations.

- Investing heavily in regenerative agriculture and climate-smart practices.
- Scaling renewable energy projects across hydropower and solar domains.
- Implementing advanced water management systems like rainwater harvesting.

Business Diversification

Diversification will unlock new avenues for growth, transforming TTE into a multi-dimensional enterprise. The company will develop branded organic and specialty teas alongside expanding into high-potential crops such as cinnamon, coconut and strawberries. Strategic alliances will accelerate product development and market reach, while the advent of agro-tourism and experiential retail will foster consumer engagement and new revenue streams. Coupled with an ambitious renewable energy pipeline, TTE aims to become a pioneering force not just in tea but across sustainable agriculture, wellness and energy sectors building a resilient, future-ready enterprise.

- Developing branded organic and specialty tea lines for global markets.
- Expanding into agro-tourism and experiential tea visits.
- Building a renewable energy pipeline to position TTE as a sector leader in green power.

In essence, Talawakelle Tea Estates PLC's future is a harmonious blend of tradition and innovation; grounded in sustainability, powered by technology and driven by passionate people; set to redefine the landscape of Sri Lanka's plantation industry for generations to come.

Independent practitioner's assurance report to the Board of Directors of Talawakelle Tea Estates PLC on the Integrated Annual Report 2024/25

Scope

We have been engaged by Talawakelle Tea Estates PLC to perform a 'limited assurance engagement,' as defined by Sri Lanka Standard on Assurance Engagements, here after referred to as the engagement, to report on Talawakelle Tea Estates PLC's Information on how it's strategy, governance, performance and prospects, in the context of its external environment, lead to the creation, preservation or erosion of value over the short, medium and long term (the "Subject Matter") contained in Talawakelle Tea Estates PLC's (the "Entity's") Integrated Annual Report for the year ended 31 March 2025 (the "Report").

Other than as described in the preceding paragraph, which sets out the scope of our engagement, we did not perform assurance procedures on the remaining information included in the Report, and accordingly, we do not express a conclusion on this information.

Criteria applied by Talawakelle Tea Estates PLC

In preparing the Subject Matter, Talawakelle Tea Estates PLC applied the Integrated Reporting Framework (<IR> Framework) issued by the International Integrated Reporting Council (IIRC) ("Criteria"):

Such Criteria were specifically designed for the purpose of assisting in determining whether the capital management, stakeholder engagement, business model, strategy, organizational overview & external environment outlook presented in the Integrated Annual Report is presented in accordance with the relevant criteria; As a result, the subject matter information may not be suitable for another purpose.

Talawakelle Tea Estates PLC's responsibilities

Talawakelle Tea Estates PLC management is responsible for selecting the Criteria, and for presenting the Subject Matter in accordance with that Criteria, in all material respects. This responsibility includes establishing and maintaining internal controls, maintaining adequate records and making estimates that are relevant to the preparation of the subject matter, such that it is free from material misstatement, whether due to fraud or error.

Ernst & Young's responsibilities

Our responsibility is to express a conclusion on the presentation of the Subject Matter based on the evidence we have obtained.

We conducted our engagement in accordance with the Sri Lanka Standard for Assurance Engagements Other Than Audits or Reviews of Historical Financial Information (SLSAE 3000 (Revised)), and the terms of reference for this engagement as agreed with the Talawakelle Tea Estates PLC on 23 April

2025. Those standards require that we plan and perform our engagement to express a conclusion on whether we are aware of any material modifications that need to be made to the Subject Matter in order for it to be in accordance with the Criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusions.

Our independence and quality management

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Professional Accountants issued by the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) and have the required competencies and experience to conduct this assurance engagement.

EY also applies quality management standards, which requires that we design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Partners: D K Hulangamuwa FCA FCMA LLB (London), A P A Gunasekera FCA FCMA, Ms. Y A De Silva FCA, Ms. G G S Manalunga FCA, W K B S P Fernando FCA FCMA, B E Wijesuriya FCA FCMA, R N de Saram ACA FCMA, Ms. N A De Silva FCA, N M Sulaiman FCA FCMA, Ms. L K H L Fonseka FCA, Ms. P V K N Sajeewani FCA, A A J R Perera FCA ACMA, N Y R L Fernando ACA, D N Gamoe ACA ACMA, C A Yalagala ACA ACMA, B Vasanthan ACA ACMA, W D P L Perera ACA

Principals: T P M Ruberu FCMA FCCA MBA (USJ-SL), G B Goudan ACA ACMA, Ms. P S Paranavitane ACA ACMA LLB (Colombo), D L B Karunathilaka ACA, W S J De Silva Bsc (Hons) - MIS Msc - IT, V Shalithivel B.Com (Sp)

A member firm of Ernst & Young Global Limited

Description of procedures performed

Procedures performed in a limited assurance engagement vary in nature and timing from and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our procedures were designed to obtain a limited level of assurance on which to base our conclusion and do not provide all the evidence that would be required to provide a reasonable level of assurance.

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

A limited assurance engagement consists of making enquiries, primarily of persons responsible for preparing the subject matter and related information and applying analytical and other appropriate procedures.

Our procedures included:

- Performed a comparison of the content of the Integrated Annual Report against the Guiding Principles and Content Elements given in the Integrated Reporting Framework (<IR> Framework).
- Checked whether the information contained in the Integrated Annual Report – Financial Capital element information has been properly derived from the audited financial statements.
- Conducted interviews with the selected key management personnel and relevant staff and obtained an understanding of the internal controls, governance structure and reporting process relevant to the Integrated Report.
- Obtained an understanding of the relevant internal policies and procedures developed, including those relevant to determining what matters most to the stakeholders, how the organization creates value, the external environment, strategy, approaches to putting members first, governance and reporting.

- Obtained an understanding of the description of the organization's strategy and how the organization creates value, what matters most to the stakeholders and enquiring the management as to whether the description in the Integrated Report accurately reflects their understanding.
- Checked the Board of Directors meeting minutes during the financial year to ensure consistency with the content of the Integrated Report.
- Tested the relevant supporting evidence related to qualitative & quantitative disclosures within the Integrated Report against identified material aspects.
- Read the Integrated Report in its entirety for consistency with our overall knowledge obtained during the assurance engagement.

We also performed such other procedures as we considered necessary in the circumstances.

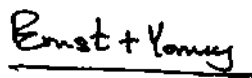

Emphasis of Matter

Economic, Environment, Social and Intellectual capital management data/information are subject to inherent limitations given their nature and the methods used for determining, calculating and estimating such data. Such inherent limitations are common in Sri Lanka.

We also do not provide any assurance on the assumptions and achievability of prospective information presented in the Entity's Annual Report.

Conclusion

Based on our procedures and the evidence obtained, we are not aware of any material modifications that should be made to the information contained in the Integrated Annual Report of Talawakelle Tea Estates PLC for the year ended 31 March 2025, in order for it to be in accordance with the Criteria.

27 May 2025
Colombo

Illuminating the Path to Growth

With the energy of the sun god, we cultivate with clarity and purpose, harnessing light to power tomorrow.

Risk and Opportunity Management Report

Talawakelle Tea Estates PLC has navigated decades of industry challenges through a strong and evolving Risk and Opportunity Management Framework, enabling the Company to effectively manage risks while unlocking the new opportunities. We have fully integrated the Climate-Related Risks and Opportunities (CRRO) and Sustainability-Related Risks and Opportunities (SRRO), in line with SLFRS S1 and S2, into our Risk and Opportunity Management Report—enhancing its scope, depth, and relevance. Amid fluctuating climate conditions, market dynamics, and socio-economic changes, TTE continues to grow as a resilient, sustainable, and forward-thinking plantation company—committed to creating long-term value for all stakeholders.

TTE's Enterprise Risk and Opportunity Management (EROM) Framework

The EROM framework is a robust, comprehensive system designed to identify, assess, manage, and monitor risks and opportunities across all levels of the organization. Its primary objective is to ensure business continuity, protect the TTE's integrity, uphold its reputation, and enhance its position in the industry. The framework is wide-reaching and designed to address all potential risks and opportunities that could potentially influence The Company's efforts to remain competitive and resilient against the backdrop of the dynamic and fast-paced business environment. The EROM framework is an essential component of TTE's operational architecture that underpins the Company's ability to generate consistent value regardless of externalities.

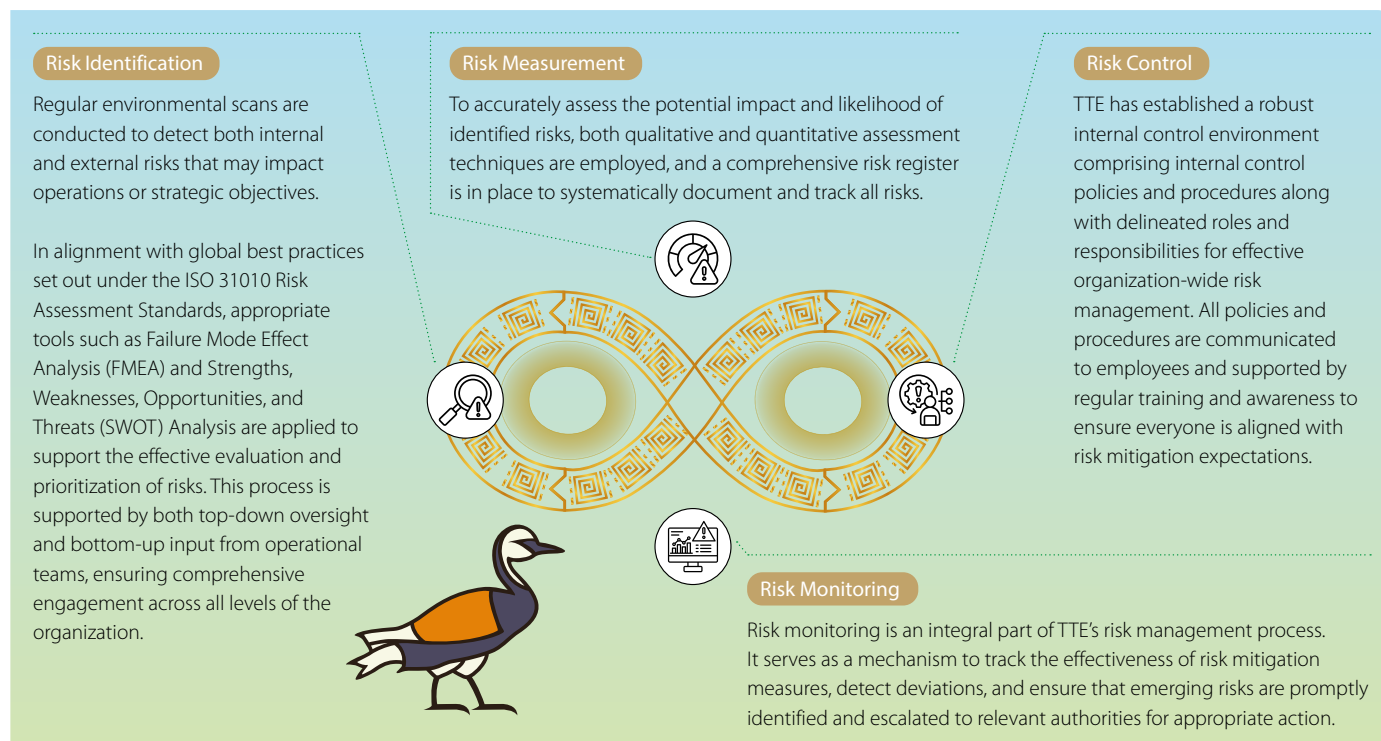

Risk Register

The Risk Register is a critical instrument for capturing, organising, and monitoring significant risks that could affect the achievement of strategic and operational goals. The Risk Register is essentially a living document that documents risk as they evolve, their potential consequences, probability of occurrence, and the mitigation strategies. By offering a structured and transparent view of TTE's evolving risk landscape, the Risk Register supports informed and timely decision-making. It ensures that appropriate controls and response mechanisms are effectively implemented and regularly reviewed across all level of the organisation.

Risk and Opportunity Management Process

At the heart of the EROM Framework is a structured Risk Management Process pivoted on four interconnected steps to identify, assess, control, and monitor key risks and opportunities across all levels of the organization. This proactive and integrated process enables the company to protect its competitive advantage, ensure financial stability, and meet stakeholder expectations consistently.

Risk Management Process

Risk Governance and Oversight

The TTE Board remains the key custodian entrusted with the responsibility of steering the organization's risk management agenda. The Board establishes clear policies and controls to embed risk considerations into strategic planning and decision-making, thereby ensuring risk is not only managed, but leveraged as a tool for resilience and long-term value creation.

Hayleys PLC Board & Risk Management Committee

TTE Board & Risk Management Committee

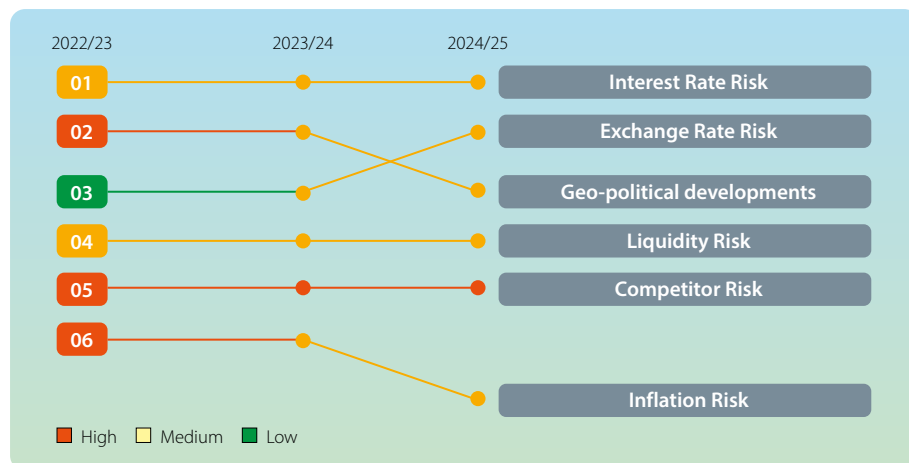

Risk and Opportunity Management Report

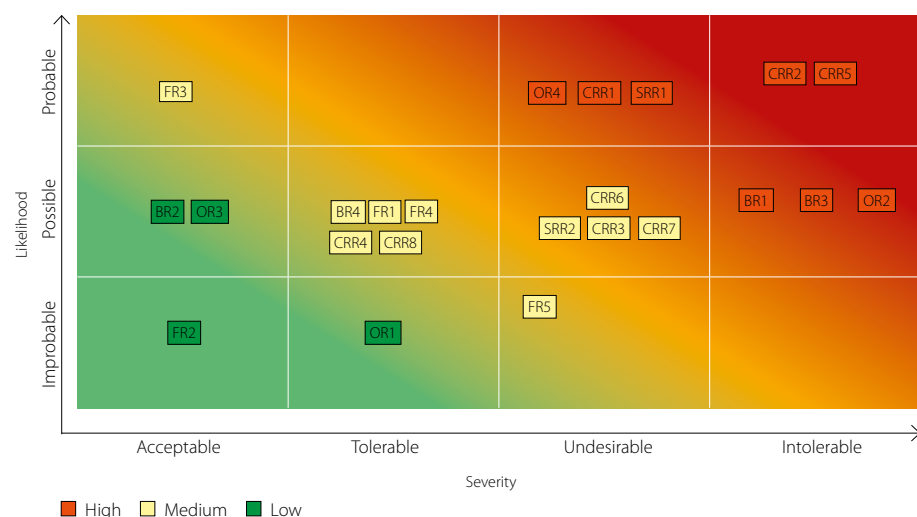

Risk Awareness Culture

The effectiveness of the EROM Framework is fundamentally anchored in a strong culture of risk awareness. The Board sets the tone at the top to promote the importance of risk consciousness across the organization.

TTE's Risk and Opportunity Universe

Risk Matrix

Insurance As a Risk Management Tool

We use Insurance as a risk management tool, where we periodically assess the insurance risks against the unforeseen, thereby minimizing potential business interruptions. Insurance coverage includes the plantations, factories and their storage along with risk factors affecting machinery, building, stocks, and work in progress.

Business Continuity and Crisis Management Plans

Our comprehensive plan for business continuity and crisis management ensures likely business disruptions are handled with the minimum loss to property, plant, equipment and any danger to human life. Though annually reviewed, the plan is e-visited where necessary making any required adjustment depending on the disruptive factor in hand.

Strategic Risk

Strategic risks for plantation companies are fundamental threats that could undermine their long-term viability and competitive standing, moving beyond daily operational issues to systemic challenges. Key among these are the severe impacts of climate change, including acute weather events and chronic shifts that directly jeopardize crop yields and infrastructure. Market disruptions, driven by evolving consumer demands for sustainable products or the emergence of disruptive technologies, threaten traditional business models and market access. Persistent labor shortages coupled with rising wage costs pose a significant threat to operational capacity and profitability. At the same time, unfavorable regulatory and geopolitical shifts can fundamentally alter operating costs and market entry. Furthermore, failure to innovate and adopt new technologies can lead to declining productivity and competitiveness, and significant supply chain disruptions can halt operations. Lastly, severe brand and reputation damage, often stemming from social or environmental missteps, risks the crucial social license to operate. Effectively navigating these complex and interconnected strategic risks demands proactive planning, substantial investment, and collaborative efforts across the industry.

Legal Risk

For plantation companies, particularly in a context like Sri Lanka, legal risks represent a significant threat, stemming from non-compliance with a complex web of laws, regulations, and contractual obligations, as well as changes in the legal landscape. These risks span critical areas such as land tenure and ownership disputes, often rooted in historical complexities or evolving government policies. Labor and employment law non-compliance presents substantial exposure, covering everything from minimum wage adherence and working conditions to critical issues like a child or forced labour, which can trigger severe penalties and reputational damage. Furthermore, stringent environmental laws governing pollution, agrochemical use, and biodiversity protection demand rigorous adherence to avoid fines and operational restrictions. Taxation and financial regulations, including compliance with SLFRS and foreign exchange rules, also pose considerable legal hurdles. Finally, contractual breaches with buyers or suppliers, alongside the loss of vital sustainability certifications due to non-compliance, can severely impact market access and profitability. Effectively navigating these multifaceted legal risks necessitates a robust internal compliance framework, continuous legal oversight, and proactive engagement with relevant authorities.

Managing TTE's Top Risks

Business Risks (BR)			Mitigation Strategies	Risk Grading	
				2024/25	2023/24
BR1	Geo-political developments	Ongoing Russia-Ukraine conflict and tensions in the Middle East disrupted major trade routes, such as the Suez Canal, leading to increased shipping costs and delays which affected tea exports from key producers like India and Sri Lanka to markets in Europe and the Gulf region.	<ul style="list-style-type: none"> Continuous and proactive evaluation of factors that affect the business given the geopolitical conflicts and uncertainties Diversifying in new markets around the world Strengthened relationships with business partners domestically and internationally for early detection of disruptive occurrences Review and update contingency plans 	 High	 High
BR2	Macroeconomic and political developments	Economic and political stability had a mixed impact on the tea industry. While the economic stabilization efforts and policy reforms provided a more conducive environment for growth, the government's decision to increase tea plantation workers' daily wages by 70% raised concerns among producers about increased production costs and competitiveness in the global market.	<ul style="list-style-type: none"> Scenario testing and proactively identifying action plans to mitigate risks Maintaining close contact with trade organizations and various associations that are relevant to the tea industry to be in touch with latent and emergent demands of the domestic consumer 	 Low	 Low
BR3	Threat from civil unrest	The threat of civil unrest abated significantly in 2024 against the backdrop of improving economic conditions and greater political stability	<ul style="list-style-type: none"> Ongoing review of business continuity plans. 	 High	 High
BR4	Inflation Risk	Inflation moderated in 2024	<ul style="list-style-type: none"> Continuing with cost-efficiency initiatives 	 Medium	 High

Financial Risks			Mitigation Strategies	Risk Grading	
				2024/25	2023/24

Company and Industry Analysis

The analysis of competitor entry in the Sri Lankan plantation sector will identify potential new players (domestic, expanding, foreign investors, diversified companies, and organized smallholders) and evaluate the ease of their entry based on barriers like land, regulations, capital, expertise, supply chains, brand loyalty, labor, and infrastructure, considering the specific Sri Lankan context. Timely communication of potential threats and strategic responses to internal stakeholders is vital for preparedness.

This analysis will compare the company's specific risks and assessment of these risks with prevailing industry risk factors. It will evaluate the suitability and robustness of the company's mitigation strategies in addressing these industry-wide challenges. Furthermore, the strength of the company's risk governance framework and the transparency of its risk reporting will be compared to the industry's best practices and the needs of key stakeholders. This comparison aims to determine how well the company is positioned to navigate the inherent risks of the Sri Lankan plantation sector compared to its peers.

Timely and effective communication with key stakeholders is crucial for a plantation company's risk response, ensuring trust, managing expectations, preventing misinformation, demonstrating responsibility, protecting reputation, and supporting business continuity. This involves establishing clear channels, developing key messages, being transparent, and proactive, and tailoring communication to different stakeholder groups.

Governance Framework

A robust Governance Framework for Board-level knowledge and training in a plantation company in Sri Lanka is crucial for effective oversight, strategic decision-making, and long-term sustainability. It ensures that the Board of Directors possesses the necessary expertise and understanding of the complex issues facing the sector.

• Skills and Experience Mapping

The Board should periodically assess the skills, experience, and knowledge present among its members against the key requirements of the plantation industry.

- Agronomy and Plantation Management

Understanding crop cultivation, land management, pest and disease control, and sustainable farming practices relevant to tea, rubber, coconut, etc

- Financial Management and Accounting

Expertise in financial reporting, cost management, investment analysis, and understanding commodity price volatility.

- Risk Management and Compliance

Knowledge of enterprise risk management, regulatory frameworks (land, labor, environment), and sustainability reporting standards (including SLFRS S1 and S2).

- Sustainability and Environmental Issues

Understanding climate change impacts, biodiversity, conservation, and sustainable agricultural practices specific to Sri Lanka.

• Induction and Onboarding for New Directors

- Company Overview

History, business model, operations, key assets (land), financial performance, and strategic objectives specific to the plantation sector in Sri Lanka.

- Industry Dynamics

Overview of the Sri Lankan plantation industry, key crops, market trends, regulatory landscape, and major players.

- Sustainability Context

In-depth briefing on the environmental and social challenges and opportunities facing the Sri Lankan plantation sector, including climate change vulnerabilities and sustainable development goals.

- Risk Management Framework

Understanding the company's ERM framework, key risks (including those related to climate, labor, and commodity prices), and mitigation strategies.

- Governance Policies and Procedures

Familiarization with the Board's charter, committee mandates, code of conduct, and relevant corporate governance regulations in Sri Lanka.

- Site Visits

Opportunities to visit the company's plantations and processing facilities to gain a firsthand understanding of operations.

- Meetings with Key Management

Interactions with senior management to discuss strategy, operations, and key challenges.

- Relevant Documentation

Provision of key reports, strategic plans, and governance documents.

The company implementing a comprehensive Governance Framework focused on Board-level knowledge and training, plantation companies in Sri Lanka can equip their directors with the necessary expertise to navigate the complexities of the industry, make informed strategic decisions, effectively oversee risk management (including climate-related and sustainability risks), and drive long-term sustainable value creation. This is particularly critical in a sector facing significant environmental, social, and economic challenges.

In the plantation company in Sri Lanka, management oversight on risks would specifically address the unique challenges of the sector, such as climate change impacts on crop yields, labor relations in plantation settings, commodity price volatility in global markets, and compliance with Sri Lankan environmental and land regulations. Effective management oversight ensures that the company is not only aware of these risks but also actively taking steps to mitigate them and protect the long-term value of the organization.

Risk and Opportunity Management Report

Strategy

The identification of material risks and opportunities for a plantation company in Sri Lanka is a crucial process that informs its strategic planning, risk management, and sustainability reporting (including alignment with standards like SLFRS S1 and S2). "Material" in this context refers to risks and opportunities that could reasonably be expected to influence the decisions of the company's primary stakeholders, including investors.

Business resilience for Sri Lankan plantation companies in the face of climate change demands a proactive and adaptive approach. It involves not only preparing for and mitigating physical threats like extreme weather and altered growing conditions but also strategically leveraging the emerging opportunities within a low-carbon global economy. This includes embracing sustainable practices, accessing green financing, and catering to evolving consumer preferences for climate-friendly products, ultimately ensuring long-term viability and competitive advantage in a changing world.

Disclosure of impacts on and by the Plantation business involves transparently communicating how the plantation company affects the environment, society, and economy and how external factors, including climate change, market shifts, and regulatory changes, affect the company. This disclosure is crucial for accountability, stakeholder engagement, and long-term sustainability, and is increasingly expected by investors and regulators, particularly with the advent of standards like SLFRS S1 and S2. By comprehensively disclosing their impacts on and by the business, plantation companies in Sri Lanka can demonstrate their commitment to sustainability, build stronger relationships with stakeholders, and contribute to a more resilient and responsible industry.

Matrices and Targets

Measuring the impacts of metrics and targets within a plantation company's sustainability efforts, particularly in the context of S1 and S2 disclosures and broader ESG performance in Sri Lanka, involves a systematic process of tracking progress, quantifying outcomes, and evaluating the effectiveness of the company's goals. By employing robust measurement frameworks to track the outcomes of their sustainability metrics and targets, Sri Lankan plantation companies can effectively quantify the tangible value generated by their initiatives, strengthen

accountability to stakeholders, and foster a culture of continuous improvement that propels them towards a more environmentally sound, socially responsible, and economically resilient future.

Disclosing risk-related metrics of the matrices and targets within a plantation company's reporting, particularly in the context of SLFRS S1 and S2 and broader Enterprise Risk Management (ERM), involves transparently communicating how the company monitors and manages its exposure to significant risks through quantifiable measures and established goals. This provides stakeholders with insights into the company's risk profile, its efforts to mitigate potential negative impacts, and its progress in achieving risk management objectives.

By providing this level of detail, the plantation company can effectively communicate its commitment to managing risks and leveraging opportunities through clear and measurable targets, enhancing transparency and accountability for its stakeholders. However, the context of the previously highlighted regression results suggests that the drivers behind these targets might be heavily influenced by external institutional pressures.

The Future of Sri Lanka's Plantations by 2030

The global plantation industry faces significant challenges that threaten its productivity, profitability, and sustainability, with climate change, soil degradation, and labour shortages among the foremost risks. For Sri Lanka's plantation sector, addressing these risks by 2030 is crucial.

To ensure the long-term prosperity and significant contribution of Sri Lanka's plantation sector to the national economy, a decisive and forward-thinking approach is essential. By 2030, the sector must proactively embrace climate-resilient crop varieties and implement sustainable soil management techniques to safeguard productivity in an increasingly volatile environment. Simultaneously, addressing the pressing issue of labor shortages necessitates a strategic integration of advanced technologies, including mechanization, coupled with tangible improvements in working conditions to attract and retain a skilled workforce. Navigating the inherent instability of market fluctuations and adapting to evolving policy changes will also be paramount. Furthermore, a concerted national effort to tackle water scarcity and a steadfast commitment to aligning with global sustainability standards are crucial to meeting discerning consumer demands. Strategic planning, dedicated investment in cutting-edge research, and a resolute embrace of technological advancements will serve as the cornerstones for effectively navigating these multifaceted challenges and securing a vibrant and sustainable future for Sri Lanka's plantations.

As we look towards 2030, the global plantation industry faces numerous risks that threaten productivity, profitability, and sustainability. For Sri Lanka's plantation sector, understanding and addressing these risks is essential for crafting effective strategies that ensure long-term success. This editorial explores the key challenges and opportunities that will shape the sector's future.

We will be intensely focused on:

- Climate Change
- Soil Degradation
- Pests and Diseases
- Labour Shortages
- Market Fluctuations
- Policy and Regulatory Changes
- Technological Advancements
- Water Scarcity
- Sustainability and Consumer Preferences
- Biodiversity Loss

Corporate Governance Report

Chairman's Introduction to Corporate Governance

At Talawakelle Tea Estates PLC (TTE), we believe good governance is a key differentiator that positions us for sustained growth in an ever-changing landscape. Hence our commitment to robust governance goes beyond mere compliance; it is a fundamental pillar woven into the very fabric of our organizational culture. Governance shapes our strategic decision-making, risk management frameworks, and all our stakeholder interactions. We are dedicated to continuously evolving our governance architecture to protect the interests of our shareholders and also to foster trust, confidence, and long-term sustainability in our relationships with employees, customers, suppliers, and the wider community.

The Board

Throughout the year, the Board of Directors remained actively engaged in guiding the Company's strategic direction and ensuring the continued success and sustainability of our operations. The Board convened four times during the year and held an additional session to approve the budget for the upcoming financial year and to review the Company's long-term strategy and business plan.

Board Refreshment

Our ongoing Board refreshment process resulted in several Board changes in the current year. We welcomed Mr. Darshana Gunasekara and Ms. Harshani Randiligama to the TTE Board in December 2024 as a Non Executive and Independent Non Executive respectively. Mr. Gunasekara brings extensive financial and executive expertise from his successive roles as Chief Financial Officer, while Ms. Randiligama brings a wealth of executive experience accumulated through various positions in local

and international companies. Additionally, Mr. Milinda Hewagama, who serves as the Group Chief Financial Officer of the Hayleys Group with extensive experience in financial reporting, ESG, tax, risk, safety, and corporate secretarial functions, also joined the TTE Board in May 2025, as a Non -Executive Director.

Board Committees

I am pleased to report that all Board Committees were actively involved in executing their mandates, as outlined by their respective TOR's. The Audit Committee assisted the Board in monitoring the integrity of financial reporting, reviewing the effectiveness of internal controls, risk management, and compliance.

The Related Party Transaction Review Committee continued its valuable work to ensure that all related party transactions during the year were conducted in an orderly manner and complied with the necessary regulatory requirements.

Likewise, the Remuneration Committee remained proactive in reviewing and strengthening the Company's compensation structures to ensure they remain competitive and effective in retain high-performing executives.

The Nomination and Governance Committee continued to support the Board refreshment process that led to the appointment of three new Directors during the year. The Committee also undertook to monitor the publication of twelve policies mandated under section 9 of the CSE's revised Listing Rules on Corporate Governance issued in 2024.

Conclusion

I would like to confirm that Talawakelle Tea Estates PLC has fully adhered to the corporate governance directives established under the latest regulations issued by the Colombo Stock Exchange for listed entities, as well as the principles set forth in the Code of Best Practices on Corporate Governance (2023), issued by Institute of Chartered Accountants of Sri Lanka. On behalf of the Board, I further declare that the Board of Directors, Corporate Management, and employees of TTE have conducted the affairs of

the Company in good faith, in strict compliance with the provision of the Hayleys Way - Code of Conduct including the Anti-Bribery and Corruption Policy, and all other relevant conduct practices.

The Board is satisfied that it has effectively discharged its duties and obligations during the year, ensuring the highest standards of governance, accountability, and oversight. We also confirm that the fit and proper assessment criteria stipulated in the Listing Rules have been duly met and that the Company has complied with the requirements of the Policy on Matters Relating to the Board.

Mohan Pandithage
Chairman

Corporate Governance Report

Talawakelle Tea Estates PLC (TTE) Corporate Governance Approach

GRI 2-9

TTE's approach to corporate governance is anchored in a strong commitment to transparency, accountability, and ethical conduct across every face of its operations. While fully aligned with the regulatory requirements applicable to entities listed on the Colombo Stock Exchange, TTE goes beyond compliance to integrate global best practices into its governance framework.

The Company's internal constitution, including its Articles of Association, governance policies, charters, and code of conduct, are all carefully designed to uphold both regulatory standards and internationally recognised principles of good governance. This commitment is further accentuated by a strong commitment to ethical behaviour at all levels of the organisation, underpinning decision-making processes and fostering responsible relationships with all stakeholders.

The Board

TTE's Board of Directors functions as the Company's highest governing authority, providing strategic direction and oversight in line with its Terms of Reference as outlined in the Board Charter. As the chief custodian of the organisation, the Board is responsible for establishing TTE's mission, vision, and long-term goals, while offering entrepreneurial leadership to drive the effective execution of strategic initiatives in the best interest of all stakeholders.

The Board is also the main authority responsible for establishing a governance framework that represents the Company's commitment to transparency, accountability, and ethical integrity. Moreover, as the apex governing body entrusted with oversight and control of the Company, certain key matters, particularly those of strategic, financial, operational, and legal significance, are expressly reserved for the Board's direct consideration and approval.

In compliance with the revised Corporate Governance Listing Rules issued by the Colombo Stock Exchange in 2024, a comprehensive Policy on Matters Relating to the Board of Directors was introduced. This policy consolidates the Board's role and responsibilities.

Matters Reserved Expressly for Board Consideration

Risk Capital and Liquidity Planning

- Changes relating to the Company's capital structure
- Approval of the annual capital plan
- Approval of risk appetite

Financial Results and Dividends

- Approval of interim and final financial statements, dividends and any significant change in accounting policies or practices

Strategy

- Approval of the Company's strategic plan
- Reviewing actual performance against strategy
- Approving capital projects, investments, acquisitions, mergers and disposal

Remuneration

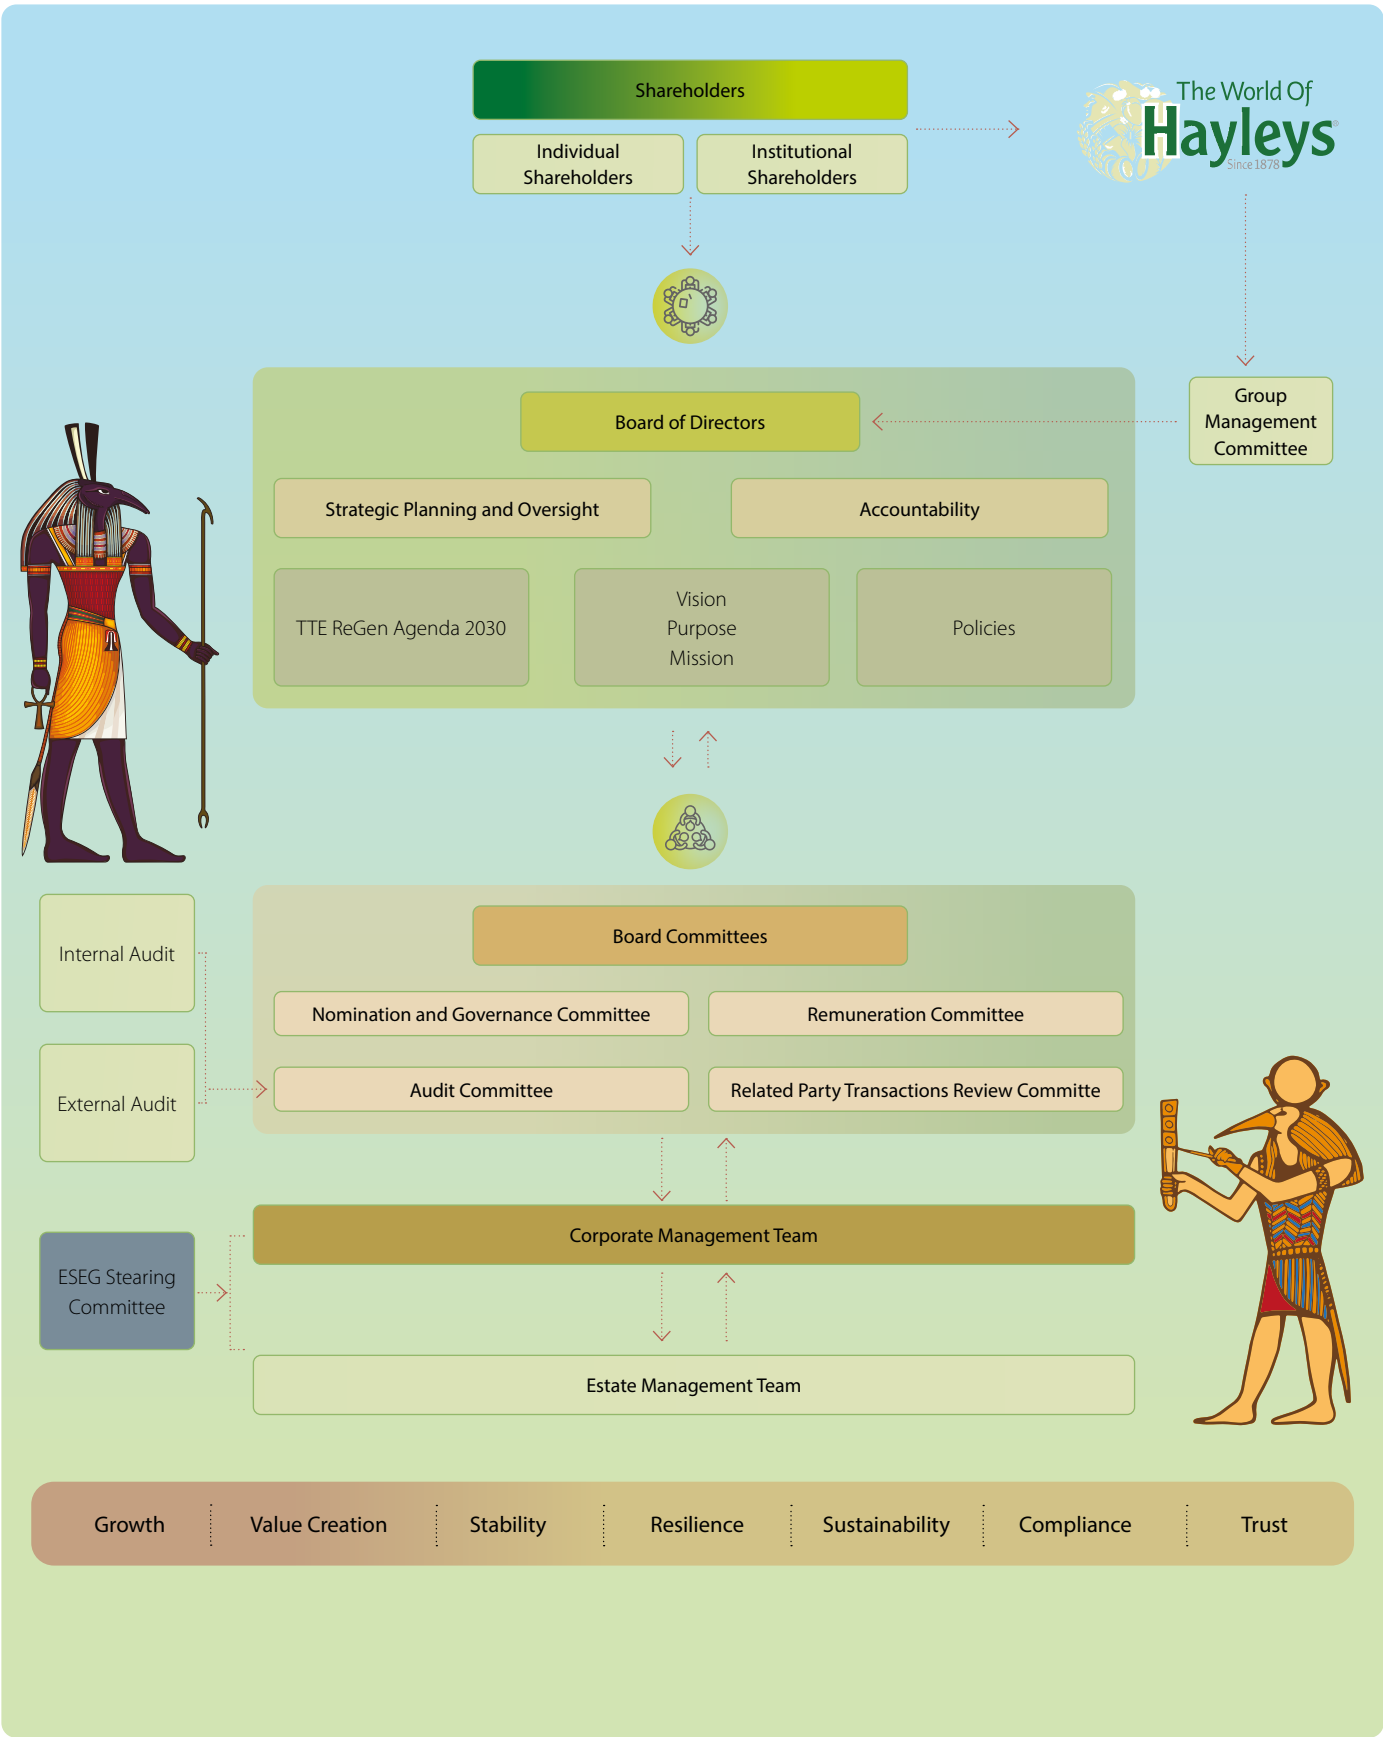

- Approval of the framework for determining the policy and specific remuneration of the MD and Executive Directors and KMP's
- Approval of Non-Executive Director payments

Board and Sub Committee Membership

- Board Appointments and removals
- Establishment of Board Committees and their membership

Governance and Control

- Approval of principal regulatory filings
- Review and update the Terms of Reference (TOR) of Board Sub Committees
- Approval of Board and Board Sub Committees performance evaluation process
- Review and update the Corporate Governance Framework
- Approval of division of responsibilities between the MD and the Chief Executive Officer
- Appointment (or removal) of the Company Secretary or Key Management Personnel (KMPs)

Corporate Governance Report

Board Composition

GRI 2-9, 2-17

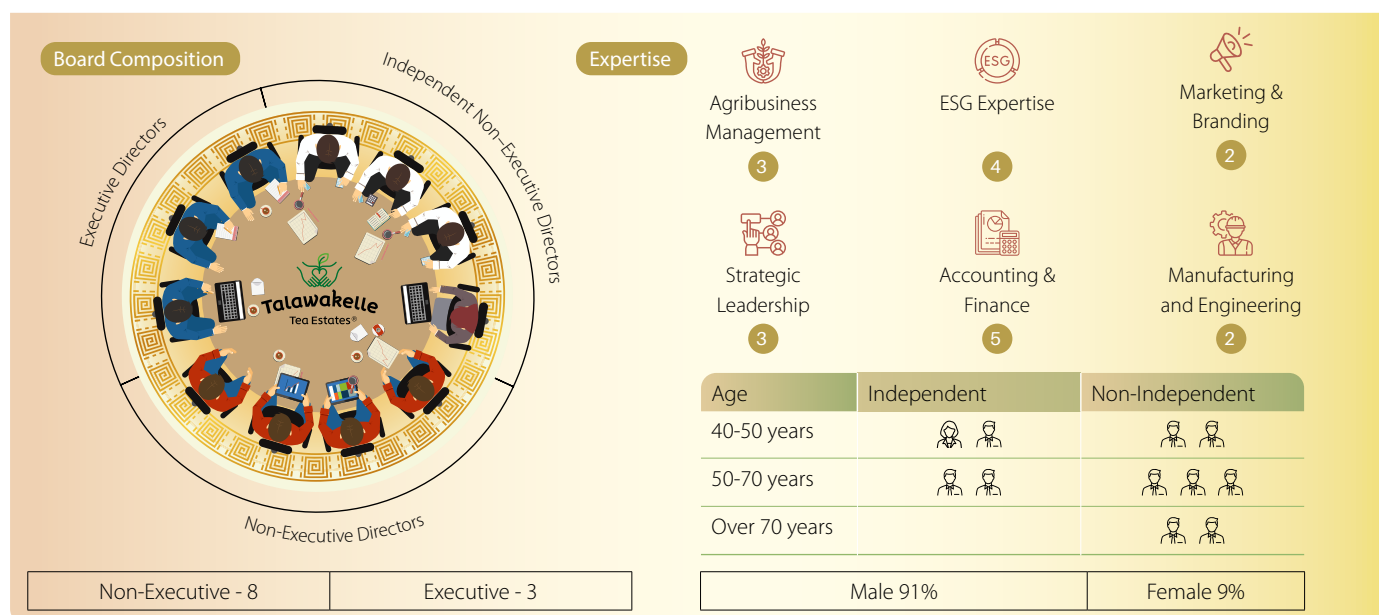

TTE is governed by a well-structured and balanced Board. The Board composition is guided by the Company's Articles of Association along with applicable statutory requirements, including the Listing Rules of the Colombo Stock Exchange and, where relevant, sector-specific regulations.

In the year under review, the composition of the TTE Board was realigned to reflect the enhanced focus on balance and diversity outlined in the revised Corporate Governance Listing Rules introduced by the Colombo Stock Exchange

The new Board balance and diversity guidelines were incorporated into the new Policy on Matters Pertaining to the Board of Directors, implemented in line with section 9 of the new CSE listing rules issued in 2024. .

As at 31st March 2025, the TTE Board consisted of 10 Directors, consisting of 03 Executive Directors and 07 Non-Executive Directors, of whom 04 were Independent Non-Executive Directors. On May 5, 2025, Mr Milinda Hewagama was appointed as a non-executive non-independent director. This composition is considered appropriate and compliant with all relevant regulatory frameworks applicable to the Company's scope of operations.

Corporate Governance Framework

Board Changes for FY 2024/25

New Appointments	Resignations	Retirement	Re-election
Mr. A. M. J. Fernando was appointed as Non-Executive Director with effect from 1st August 2024	Mr. D. C. Fernando, Non-Executive Director, resigned with effect from 1st August 2024	Mr. M. J. Fernando, Non-executive Director, retired by rotation	Mr. M.J. Fernando, Non-executive Director, being eligible offer for re-election.
Mr. J. D. N. Gunasekera was appointed as an Non-executive Director with effect from 27th December 2024	Mr. M. H. Jamaldeen, Non-executive Director resigned with effect from 14th November 2024	Lt.Col Janak Manuja Kariapperuma, independent Non-executive Director, retired by rotation	Lt.Col Janak Manuja Kariapperuma, independent Non-executive Director, being eligible offer for re-election.
Ms. H. Randiligama was appointed as an Independent Non-executive Director with effect from 27th December 2024	Ms. M. D. A. Perera, Non-executive Director resigned with effect from 24th December 2024		
Mr. T Milinda Hewagama was appointed as an Non-executive Director with effect from 5th May 2025	Mr. A. M. J. Fernando, resigned as an Alternative Director to Mr. D.C Fernando w.e.f 1st August 2024 and in 24th December 2024 resigned as a Non-Executive Director		

Non-Executive Directors

The presence of Non-Executive Directors (NEDs) on the TTE Board brings an essential layer of independent oversight, contributing to sound decision-making and strengthening the integrity of Board processes. By actively engaging in Board deliberations, sub-committees, and governance activities, NEDs reinforce transparency, accountability, and ethical conduct across the organisation in turn building stakeholder confidence and trust.

To preserve their independence, all Independent Non-Executive Directors are required to be free from any relationships or associations that could materially impair, or be perceived to impair, their ability to act in the best interests of the Company. The independence of each NED is assessed in accordance with the criteria set out in the Corporate Governance Code issued by the Institute of Chartered Accountants of Sri Lanka.

The Board affirms that all currently serving Non-Executive Directors meet the established independence criteria and continue to contribute meaningfully to the effective oversight and governance of TTE.

Process for Determining Directors' Independence

Definition	Assessment	Outcome for FY 2024/25
Independence is determined against criteria as set out in the Listing Rules of the Colombo Stock Exchange and in compliance with Schedule C of the CA Sri Lanka Code of Best Practice on Corporate Governance 2023.	<div>Independent assessment of directors is conducted annually by the Board, based on annual declaration and other information submitted by Non-Executive Directors</div> <div>The Board discusses the possibility of any impairment of Directors independence due to extended Board tenures, and collectively evaluates the re-election of such Board members</div>	<div>The Board is satisfied there are no relationships or any other circumstances likely to affect or appear to affect directors' independence during the period under review.</div> <div>Mr S L Athukorala remains on the Board as Non-Executive Directors</div> <div>With effect from 27th December 2024, Mr. Darshana Gunasekera was appointed as an Non-executive Director and Ms. H. Randiligama was appointed as an Independent Non-executive Director. Mr. Milinda Hewagama was also appointed on 05th May 2025 as Non Executive Independent Director</div>

Appointment / Re-Election / Resignation / Retirement of Directors

GRI 2-10

To institutionalise clear guidelines for Director appointments, re-elections, resignations, and retirements, TTE adopted a Policy on Corporate Governance, Nominations and Re-election, effective from September 2024, in line with the revised CSE Listing Rules on Corporate Governance.

Under this policy, the Board Nominations and Governance Committee (NGAC) was assigned the responsibility of evaluating potential candidates for new appointments. The Committee will conduct a rigorous assessment of each nominee's professional qualifications, industry experience, integrity, and overall reputation, while also checking for any conflicts of interest or excessive external commitments that may impair their ability to fulfil their duties. Due consideration will also be given to each candidate's profile, including factors such as age, gender, and other attributes that may enhance the Board's diversity and overall effectiveness. Recommended candidates are then submitted to the Board for approval, with any interim appointments formally ratified by shareholders at the subsequent AGM.

In accordance with the Company's Articles of Association, one-third of all the Directors except the Managing Director and those who have been appointed to the Board since the last AGM, retire by rotation and submit themselves for re-election at the AGM. The Board undertakes to review directors' eligibility for re-election taking into account their past performance, including participation, engagement, and contributions to Board matters.

In compliance with corporate governance and regulatory requirements, all new Board appointments are promptly disclosed to the Colombo Stock Exchange (CSE). These disclosures include a profile of the appointee, outlining their qualifications, sectoral experience, directorships in other companies, and any shareholding in TTE. The same disclosure process is followed in the event of a Director's resignation.

Profiles of all current Board members are featured on pages 38 to 41 of the annual report.

Duties and Responsibilities of Individual Directors

All Board members are expected to commit the necessary time and effort to fulfill their responsibilities effectively. This includes active participation in Board meetings, where they leverage their expertise, skills, and experience to contribute to informed decision-making. Additionally, all Directors are required to participate in the annual self-assessment process, a key component of the comprehensive Board evaluation framework, ensuring continuous enhancement of governance effectiveness and strategic oversight.

Conflicts of Interest

GRI 2-15

All Directors of the TTE Board are expected to act with the highest standards of good faith in all dealings on behalf of the Company, while proactively avoiding situations that could give rise to actual or perceived conflicts of interest.

Clear protocols have been established for identifying, disclosing, and managing conflicts of interest. Directors are required to exercise due diligence in identifying such situations and are obligated to disclose any potential conflicts to the Board without delay.

Upon appointment, and thereafter on a quarterly basis, all Directors are required to formally declare their direct, indirect, beneficial, and non-beneficial interests in any existing or proposed contracts involving the Company. These declarations are recorded in the Directors' Interests Register, which remains available for inspection in accordance with applicable regulations.

Where a conflict of interest arises, the Director concerned is expected to recuse himself or herself from all related Board deliberations and to abstain from voting on the matter in question.

Corporate Governance Report

Oversight of conflict of interest matters falls under the purview of the Related Party Transactions Review Committee (RPTRC), which is tasked with reviewing disclosures made by Directors and recommending appropriate courses of action to the Board to address and mitigate any conflicts in a fair and transparent manner.

The Company confirms that no Director holds a direct or indirect interest in any contract or proposed contract with the Company, other than those disclosed in Note 32 of the Financial Statements.

Board Directors Access to Information and Resources

GRI 2-16

During the reporting period, no critical concerns were formally communicated to the highest governance body. Board Members continued to receive Board Packs well in advance, ensuring adequate time for review and informed decision-making. Directors maintained unrestricted access to additional information and resources as needed. Continuous professional development was supported through company-funded training and learning opportunities. An annual self-assessment process also helped identify director training needs. A structured induction program was conducted for new Board Members during the year, covering essential governance and operational modules to ensure alignment with fiduciary responsibilities and strategic oversight.

Directors Remuneration

GRI 2-19, 20

The TTE Board is committed to ensuring that its remuneration practices are fair, responsible, and transparent. The Company aligns with the Remuneration Policy giving priority to responsible and performance-driven remuneration based on the following principles:

- Rewarding performance in the context of prevailing industry benchmarks;
- Ensuring remuneration is commensurate with the level of expertise, contribution, business performance, and shareholder value creation

In keeping with these guidelines, the Company's Remuneration Committee is entrusted with the responsibility of recommending appropriate remuneration

structures for Executive Directors and Key Management Persons (KMPs), to attract and retain top-tier professionals by offering industry-competitive packages that reflect the responsibilities and risk profile of each role. Executive remuneration includes a variable component linked to the achievement of sustainable business objectives, including performance against ESG-related targets.

Remuneration of Executive Directors is fully compliant with the provisions set out in Schedule G of the Code of Best Practice on Corporate Governance issued by the Institute of Chartered Accountants of Sri Lanka (2023). There are no contractual clauses entitling Executive Directors to additional compensation in the event of early termination. Any such payments, if applicable, would be at the sole discretion of the Board.

In preserving the independence, objectivity, and quality of oversight, Non-Executive Directors (NEDs) are remunerated through fixed fees for their service on the Board and its Committees. These fees are benchmarked annually against market norms to ensure they remain competitive and aligned with best practices in corporate governance.

In the current year the Board adopted a formal Policy on Remuneration, in line with the revised CSE Listing Rules on Corporate Governance.

For Financial Year 2024/25, the aggregate remuneration paid to Executive and Non-Executive Directors amounted to Rs. 53.6 million.

Board Succession Planning

TTE has a well-structured Board succession planning process in place to ensure continuity of executive leadership at Board level. This process is guided by a formal Board Succession Procedure. The NGC plays a central role in reviewing Board succession matters, evaluating potential successors from the Company's Key Management Personnel (KMPs), while identified potential candidates are onboarded for targeted development, under the oversight of the Nominations and Governance Committee.

Induction and Training for Directors

GRI 2-17

All newly appointed Directors undergo a structured induction programme designed to familiarise them with TTE's structure, strategy, and operations. As part of this process, each Director receives an orientation pack

containing key internal policies and external reference materials to help them gain a well-rounded understanding of the business. The induction also includes meetings with the Board chairman, MD, members of the senior management team and site visits to meet estate management to gain an insight into day-to-day activities.

Further, Directors are provided with access to ongoing training, both internal and external to help them stay informed on emerging issues, regulatory changes, and industry best practices.

Key Board Responsibilities

GRI 2-27

Regulatory Compliance

The Board of Directors of TTE assumes the ultimate responsibility for ensuring that the Company operates with integrity and in strict adherence to all applicable legal, regulatory, and ethical standards.

In discharging this responsibility, the Board, supported by its Committees and the Senior Leadership Team maintains ongoing vigilance of the Company's compliance requirements to ensure enterprise-wide conformance with regulatory obligations.

Moreover, the Board strives to stay abreast of evolving regulatory requirements and developments through proactive engagement with regulatory authorities, legal counsel, and subject matter experts to ensure that the Company's practices remain aligned with the latest governance expectations and promote early adoption of new regulations where possible.

Recognising the importance of fostering a culture of compliance, the Board has also instituted formal communication channels through which employees and stakeholders may confidentially report concerns or suspected breaches of regulatory or ethical standards.

During the year under review, the Board oversaw the implementation of the new requirements introduced under Section 9 of the CSE Listing Rules on Corporate Governance, with all requisite measures taken in a timely manner to ensure full compliance with the stipulated timelines and regulatory expectations.

There were no incidents of non-compliance of regulations reported in the current financial year.

Financial Reporting and Assurance

The Board holds ultimate responsibility for ensuring the integrity and accuracy of the Company's financial reporting. This includes overseeing the preparation of financial statements that reflect a true and fair view of the Company's financial position and performance. The Board responsibility extends to ensuring appropriate internal controls and accounting policies are in place to safeguard assets, prevent irregularities, and support transparent, timely, and reliable financial disclosures in line with applicable laws, regulations, and reporting standards.

As part of the overall responsibility for financial reporting, The Board reviews and approves all financial reporting outputs, including quarterly and annual reports, thereby ensuring the transparency and integrity of published financial information.

To align with the revised Corporate Governance provisions of the CSE Listing Rules, the Board approved the Policy on Control and Management of Company Assets and Shareholder Investments in September 2024 setting out clear guidelines for asset utilisation, risk mitigation, and internal controls. Likewise the Policy on Corporate Disclosures was approved by the Board in September 2024, to promote greater transparency, accuracy, and consistency in the communicating financial and operational information to stakeholders.

The Board seeks independent assurance regarding the Company's internal control and financial reporting ecosystems. Internal Auditors assure the efficacy of the internal control environment while the external Auditors validates the integrity of the Company's financial position. The Board Audit Committee, on behalf of the Board reviews the plans and work output of both external and internal auditors, including coordinating activities to support the combined assurance model.

For more information, please refer to the Directors' Statement on Internal Control, the Annual Report of the Board of Directors on the Affairs of the Company (pages 230 to 234), and the Statement of Directors' Responsibility (page 235).

Risk Management and Internal Control

The Board discharges its risk oversight responsibilities through a well-structured Integrated Risk Management Framework supported by a robust internal control framework. Oversight of critical risk areas is delegated to the Board Audit Committee. The Board regularly reviews these insights to determine appropriate responses in alignment with the Company's strategic objectives.

In fulfilling this role, the Board also fosters a strong risk-aware culture across the organisation, setting the tone from the top and ensuring that risk management is embedded into day-to-day operations and decision-making at every level.

Reflecting this commitment, a formal Policy on Risk Management and Internal Control was adopted with effect from September 2024, in compliance with the revised Corporate Governance provisions of the CSE Listing Rules. This policy reinforces the Company's proactive approach to identifying, assessing, and mitigating risks in a dynamic business environment.

For more information - please refer to the Risk and Opportunity Management Report on page 198.

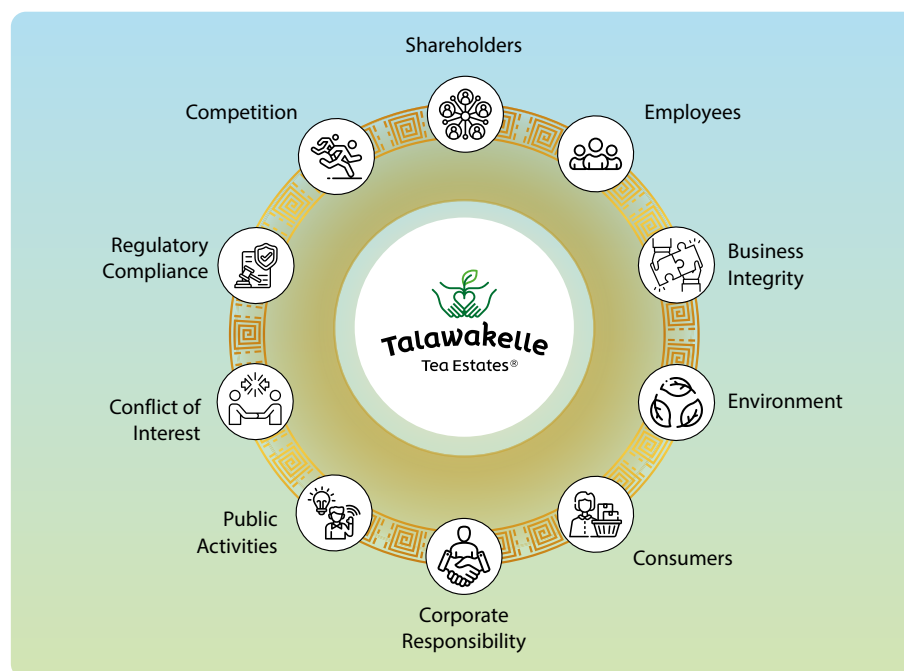

Conduct and Ethics

GRI 2-16, 23, 24, 25, 26 | 3-3 | 13.26.1

As a member of the Hayleys Group, TTE is guided by a strong commitment to ethical leadership and integrity, with the Board setting a clear tone from the top to embed ethical practices across all aspects of the Company's operations. This commitment is further reinforced through the company's Policy on Internal Code of Business Conduct and Ethics which aligned with the "Hayleys Way" – which serves as the foundation to promote responsible decision-making and ethical behaviour at every level of the organisation.

The "Hayleys Way" sets out the standards of conduct expected from all employees and Directors of the Hayleys Group Companies, providing clear guidance on appropriate business behaviour, reinforcing core values and establishing a unified ethical framework to promote a culture of responsibility, accountability, and transparency.

All members of TTE are expected to uphold the principles outlined in the "Haleys Way," which includes key policies such as the Anti-Bribery and Corruption and Whistleblowing – both essential in safeguarding integrity and ethical standards.

Corporate Governance Report

Policy on Anti-Bribery and Corruption Policy

In line with the revised Corporate Governance provisions of the CSE Listing Rules, the TTE Board approved the Policy Anti-Bribery and Corruption in the current year. The policy reinforces a zero tolerance approach to bribery and corruption, including kickbacks, and facilitation payments. It also sets out specific guidelines regarding the giving and receiving of gifts in the course of business, ensuring that such practices do not compromise integrity or create conflicts of interest.

This Policy applies uniformly to all TTE Directors and employees without exception. To ensure continued awareness and compliance, regular training sessions are conducted for both employees and the Board. Furthermore, business partners and third parties acting on the Company's behalf are strongly encouraged to uphold the core principles of the Policy, thus ensuring TTE's operations and relationships are not at risk for bribery or corruption.

Policy on Whistleblowing

In line with the revised Corporate Governance provisions of the CSE Listing Rules, the TTE Board approved the Policy on Whistleblowing. The policy provides a safe, confidential, and structured channel for employees and other stakeholders to report concerns related to unethical behaviour, misconduct, violations of laws or regulations, or breaches of conduct.

The policy is designed to promote a culture of openness, accountability, and integrity, ensuring that individuals feel empowered to raise genuine concerns without fear of retaliation, harassment, or victimisation. Reports made under the Whistleblower Policy are treated with the utmost confidentiality and are independently reviewed to ensure objectivity and fairness.

Policy awareness is reinforced through regular communication and training to ensure employees and all stakeholders understand their rights and responsibilities under the policy.

No complaints were received through the Whistleblower Channel in the current financial year.

The IT Steering Committee provides oversight over key IT initiatives, ensuring they are strategically aligned, efficiently executed, and deliver tangible value to the business. The Group IT Policy and Group Information Security Policy, together governs the management of IT resources, data protection, and safeguarding the integrity and confidentiality of critical information assets. Periodic audits are conducted to evaluate the performance and security of IT systems, with findings used to drive continuous improvement. The Group Head of IT also serves as the Chief Information Security Officer (CISO), overseeing the TTE's information security posture. Cybersecurity remains a critical focus, regularly featured on the agenda of the Group Management Committee and escalated to the Board when necessary based on risk exposure, impact, and materiality.

Human Capital Governance

As a large plantation Company with operations spread across multiple estates and factory operations, the Board ensures that a structured governance framework is in place to manage the complexities of human resource management effectively.

While overall strategic direction and Policy oversight remain with the Board, day-to-day responsibilities are systematically delegated. The Central HR Head is entrusted with translating Board directives into Company-wide HR policies and frameworks covering areas such as recruitment, performance management, learning and development, and employee engagement. The Board has directed DE&I (Diversity, Equity and Inclusion) as a key theme across all these aspects.

At the operational level, Estate HR Managers are responsible for implementing these policies on the ground. They act as the primary touch-points for employees across estates, ensuring that all HR initiatives are aligned with the Company's principles of fairness, equity, and inclusion. This includes managing employee welfare, addressing grievances, and creating a safe, healthy, and respectful work environment that supports the physical and mental wellbeing of all employees.

Anti-Corruption

GRI 205-1, 2, 3 | 13.26.2, 13.26.3, 13.26.4

In 2024/25, all (16 estates, 15 factories, and Head Office) representing 100% of operations were assessed for corruption risks. No significant risks were identified.

TTE's Anti-Bribery and Corruption Policy was communicated and/or trained as follows:

- Governance Body: 10 Directors (100%) received the policy communication.
- Employees: 60% of employees across all estate and factory regions have received the anti-corruption policy communication. All staff at the supervisory level (100%), as well as all employees at the management and executive levels (100%), have been covered and formally communicated on the anti-corruption policies and procedures.
- Business Partners: 503 active contractors and suppliers (23%) received the policy through onboarding or contract clauses, mostly operating in the Central and Sothern province.
- Training Coverage: 97 employees (21%) in relevant roles received tailored, role-specific anti-corruption training, with all operational regions covered. None of the Board Directors received anti-corruption training during this reporting year.

There were no confirmed incidents of corruption during the year, and no dismissals, contract terminations, or legal proceedings were reported.

Information Technology (IT) and Digital Governance

The Board holds ultimate accountability for IT governance, ensuring that strategic investments in technology and digital infrastructure are aligned with the Company's long-term business goals and risk management priorities.

For more information - please refer to the Human Capital Report on page 164

ESG Governance

GRI 2-9, 12, 13, 14

The TTE Board holds ultimate responsibility for ESG governance, ensuring that sustainability considerations are integrated into the Company's overall strategy and operations. TTE's approach is aligned with the Hayleys Group's broader ESG structures, where the Hayleys Board holds overall responsibility for formulating the Group's aspirations, strategies, and policies relating to ESG and sustainable development. Supporting these efforts, the Company's ESEG Steering Committee, chaired by the CEO of TTE monitors, manages, and oversees Sustainability-related Risks and Opportunities (SRROs) and Climate-related Risks and Opportunities (CRROs), provides quarterly updates to the TTE Board and the Hayleys Group Management Committee. In addition, the Audit Committee also reviews the Company's principal risks, including those related to sustainability.

TTE's principle approach to ESG is based on integrating CRROs and SRROs into the overall strategy in line with short, medium, and long term business targets. Performance against SRROs and CRROs targets is carefully measured and reported, ensuring transparency and accountability to stakeholders.

The Board also acknowledges its responsibility to report transparently to stakeholders on TTE's commitment to sustainable value creation through the Annual Report.

In compliance with the provisions of the CSE's new listing rules on Corporate Governance issued in 2024, a formal Policy on Environmental, Social and Governance Sustainability was approved by the Board and implemented with effect from September 2024.

Stakeholder Engagement

GRI 2-25, 26

While the Board retains high-level responsibility for stakeholder engagement, the day-to-day management of these relationships has been delegated to the Company's leadership. As per the guidelines set by the Board, operational management are tasked with implementing appropriate initiatives to interact with stakeholders to understand their concerns and expectations.

Further details on the methodologies employed for engaging with different stakeholders, including the frequency of engagement and other pertinent information, can be found in the Stakeholder Engagement section on page 61 to 65 of this report.

Shareholder Relations

The Board is firmly committed to cultivating strong, trust-based relationships with shareholders through timely, accurate, and transparent communication. Shareholders are kept apprised of the Company's strategic direction, financial performance, and material developments through periodic disclosures to the Colombo Stock Exchange (CSE), the publication of quarterly and annual financial statements, and TTE's Annual Integrated Report.

In keeping with its commitment to inclusive and meaningful engagement, the Board actively encourages shareholder participation at the Annual General Meeting, which serves as a vital platform for dialogue and accountability. Shareholders are further afforded the opportunity to engage directly with the Company Secretary, thereby ensuring their perspectives are acknowledged and addressed beyond formal assemblies.

In compliance with the provisions of the CSE's new listing rules on Corporate Governance issued in 2024, the Board approved the Policy on Relations with Shareholders and Investors.

Annual General Meeting (AGM)

The AGM serves as the main platform for shareholders to connect with the TTE's leadership. All Directors and senior management members are present at the AGM, facilitating two-way dialogue between shareholders and key decision makers of the Company.

The Annual Report, notice of the AGM, resolutions requiring shareholder approval, and voting instructions are distributed to shareholders at least 15 working days prior to the meeting, thus allowing ample time for shareholders to prepare for the AGM.

TTE's 2023/24 AGM held on June 2024 concluded successfully with a high degree of shareholder participation. The Company's 2024/25 AGM is scheduled to be held on 23rd June 2025.

BOARD MEETINGS

Board meetings are held every quarter or more often when needed. The Chairman takes the lead in ensuring effective Board meetings by ensuring all Directors have the opportunity to contribute, thereby promoting open, constructive discussions and encouraging diverse perspectives, while keeping a strict focus on addressing all agenda items, including deliberation of Board resolutions.

Senior management members are also often attend Board meetings on invitation.

Access to Information

All Board Directors are entitled to access information necessary for effective preparation and meaningful participation in meetings. Directors can request to review details pertaining to operations, financial performance, risks, and strategic plans, as well as access any relevant documents at any time. They are also permitted to engage with members of the senior management to seek clarifications as required. Additionally, Directors have the option to obtain independent professional advice as needed to enable them in fulfilling their responsibilities as Board members. All such expenses are borne by the Company.

Corporate Governance Report

The Company Secretary is responsible for preparing and maintaining the minutes of each Board meeting. These minutes are first reviewed and approved by the Chairman before being circulated to the Directors and relevant members of the Corporate Management who participated in the meeting.

A total of 04 Board meetings were held in FY 2024/25.

Attendance at Meetings

[illegible]

Division of Responsibilities

GRI 2-11

The division of responsibilities at the leadership level is designed so that no one individual has unfettered decision making powers, enabling both governance and management functions to be conducted with the highest standards of professionalism and integrity.

To this end, there is a clear separation of roles between TTE's Chairman and Managing Director (MD)/ CEO, ensuring that their respective responsibilities are distinct and effectively managed.

Moreover, given that TTE's Chairman - Mr. A.M. Pandithage serves in an Executive capacity, the Company has appointed a Senior Independent Director - Mr. N. Ekanayake who has served in this capacity since 27 December 2024.

Chairman

- Provides strategic leadership and direction to the Board
- Ensures Board effectiveness by fostering active participation, balanced debate, and collaboration among members
- Sets the Board's annual work plan and agenda in coordination with the Company Secretary and MD/CEO
- Promotes transparent and regular communication with shareholders, ensuring their views are conveyed to the Board
- Upholds stakeholder trust and ensures an appropriate balance of power between Executive and Non-Executive Directors
- Oversees the performance and effectiveness of the Board and its Sub-Committees

Managing Director / CEO

- Prepares and recommends budgets aligned with the Company's strategic objectives for Board approval
- Monitors organisational performance, ensuring compliance with applicable regulatory and policy frameworks, with regular reporting to the Board
- Ensures that operations are conducted within the risk appetite approved by the Board
- Establishes an efficient and well-structured organisational framework for the Company
- Oversees succession planning and performance evaluation of the Executive Team
- Fosters a corporate culture aligned with the Company's core values

Senior Independent Director (SID)

- Acts as a trusted intermediary, representing the views of Non-Executive Directors and supporting open dialogue on governance matters
- Addresses Board effectiveness issues by raising concerns with the Chairman or relevant Board members
- Supports the Chairman and MD/CEO on Board matters and facilitates Director interactions
- Serves as the primary contact for Directors to confidentially discuss unresolved concerns, including those related to the Chairman-MD/CEO relationship
- Meets annually with Non-Executive and Executive Directors separately to discuss governance matters and communicates key concerns to the Board
- Attends shareholder meetings and remains informed of shareholder concerns

Company Secretary

- Guides the Board in discharging its duties in line with corporate governance best practices
- Keeps the Board informed of relevant legislative and regulatory developments
- Ensures Board and General Meetings comply with the Articles of Association and applicable laws and regulations
- Maintains accurate minutes of Board meetings, ensures review by the Chairman, circulation to members, and formal approval
- Keeps the official minute book accessible for inspection by any Director
- Provides Directors with access to necessary advice and services to ensure compliance with governance procedures
- Facilitates Directors' requests for independent professional advice at the Company's expense

Corporate Governance Report

Board Sub Committees

To assist in performing its oversight role, the Board has appointed several sub-committees to provide oversight in specific key areas. In keeping with good governance best practices, the Chairman of each Board sub-committee is required to present an update to the Board outlining any significant matters discussed at their respective Board sub-committee meetings held since the previous Board meeting.

In compliance with the provisions of the CSE's new listing rules on Corporate Governance issued in 2024, the Policy on Board Committees was approved by the Board to standardise the governance processes of all Board sub-committees, detailing their respective Terms of Reference (TOR), reporting obligations, and structural composition.

Company Secretary

The Company Secretary plays a crucial role in ensuring the effectiveness of the Board and its governance framework. As a trusted advisor to the Board, the Company Secretary is responsible for providing guidance on corporate governance practices, regulatory compliance, and Board procedures. Directors have unrestricted access to the Company Secretary.

Board and Board Sub Committee Evaluation

GRI 2-18

The effectiveness of the Board and its sub-committees is assessed on an annual basis through a comprehensive self-assessment completed by all Directors. This assessment provides valuable insights into the Board's composition, balance, strategic focus, decision-making processes, and overall performance. It serves as a critical tool for identifying both strengths and areas for improvement to ensure the Board remains aligned with best practices and is equipped to meet the evolving challenges and opportunities faced by the organisation.

Evaluating the Performance of the Managing Director / CEO

The performance of TTE's Managing Director/CEO is subject to an annual evaluation conducted through a structured process designed to assess the achievement of pre-established targets and objectives. This process is overseen by the Board and involves a thorough review of pre-agreed performance metrics. Based on this evaluation, the Board considers and makes necessary adjustments to the MD/CEO's remuneration in recognition of accomplishments and to drive continued performance improvement.

Statement by the Senior Independent Director

[Profile of Mr. Nandana Ekanayake is given on page 40 of this report.

In order to comply with Section 9.6.3 of the Listing Rules of the Colombo Stock Exchange, the Board of Directors of the Company designated me as the Senior Independent Director (SID) of the Company with effect from 27th November 2024. Mr. Lakshman Athukorala, served as the Senior Independent Director until such time.

Section 9.6.3 of the Listing Rules and the Code of Best Practice on Corporate Governance 2023 issued by the Institute of Chartered Accountants of Sri Lanka provide that in situations where the Chairman and CEO are the same person or where the Chairman is not an Independent Director, a Senior Independent Director (SID) shall be appointed. At Talawakelle Tea Estates PLC although the Chairman is not the CEO, he is not an Independent Director.

Role of the Senior Independent Director

The Senior Independent Director (SID) provides guidance to the Chairman on matters of governance of the Company.

The role of the SID also provides emphasis to transparency on matters relating to governance and calls for a review of the effectiveness of the Board.

The SID makes himself available to any Director or any employee to have confidential discussions on the affairs of the Company, should the need arise.

Activities During the Year

In line with the regulatory requirements, I presided over the following meetings and exercised my voting rights where necessary.

Meetings were held with the Non-Executive Directors without the presence of the Executive Directors. At these meetings the performance of the Chairman and the Executive Directors were appraised.

A meeting was held with only the Independent Directors. Discussions were held on matters relating to the Company and the operation of the Board.

The outcome of these meetings together with recommendations was duly informed to the Chairman and the Board.

The Company follows a policy of strict compliance with mandatory requirements while embracing voluntary adherence, in order to enhance stakeholder acceptance and making a positive impact on value creation.

I believe that I have fulfilled the obligations entrusted to the SID in accordance with the Corporate Governance guidelines.

N Ekanayake
Senior Independent Director

05th May 2025

Nominations and Governance Committee Report

GRI 2-10

Composition

The Nominations and Governance Committee ("the Committee") of the Company was established in January 2023. The Committee is appointed by and is responsible to the Board of Directors and comprises two Independent Directors and one Non-Executive Director.

The following changes took place during the financial year in compliance with the Governance Rules stipulated in Section 9 of the Listing rules of the Colombo Stock Exchange and the Code of Best Practice on Corporate Governance issued by CA Sri Lanka.

The members who served on the Committee during the financial year are as follows:

- Mr. Lakshman Athukorala who served as the Chairman of the Nominations and Governance Committee was reclassified as Non-Executive Director on 27th December 2024 and consequently stepped down as the Chairman of the Committee and continued to serve as a member.
- Mr. Nandana Ekanayake an Independent Non-Executive Director was appointed as the Chairman of the Committee on 27th December 2024.
- Ms. Minette Perera who was a member of the Committee resigned from the Company with effect from 24th December 2024.

Attendance

The Committee meets as often as may be deemed necessary. The Committee met three times during the year.

Name of the Member		Number of meetings eligible to attend	Number of meetings attended	Date of appointment to the Committee
Mr. Nandana Ekanayake*** (Appointed as Chairman on 27th December 2024)	Chairman	3	3	08th January 2024
Mr. Lakshman Athukorala** (Ceased to be Chairman w.e.f. 27th December 2024)	Member	3	3	1st January 2023
Mr. Malaka Talwatte***	Member	3	3	08th January 2024
Ms. Minette Perera** (Resigned w.e.f. 24th December 2024)	Member	2	2	1st January 2023

**Non-Executive Director

***Independent Non-Executive Director

The Chairman of the Committee is an Independent Non- Executive Director.

The Committee has well-defined terms of reference approved by the Board outlining the Committee's purpose, composition, quorum, authority, responsibilities, and meeting related matters.

Hayleys Group Services (Private) Limited the secretaries of the company, acts as the secretary to the committee.

Duties of the Nominations and Governance Committee

- To evaluate and recommend the appointment of Directors to the Board and Committees, considering the required skills, experience and qualifications necessary.
- To consider and recommend (or not recommend) the re-election of current directors taking into account the combined knowledge, experience, performance and contribution made by the Director to meet the strategic demands of the Company and the discharge of the Board's overall responsibilities and the number of directorships held by the Director in other listed and unlisted companies and other principal commitments.
- To establish and maintain a formal and transparent procedure to evaluate, select and appoint/ re appoint Directors of the Company.
- To establish and maintain a set of criteria for selection of Directors such as academic / professional qualifications, skills, experience and key attributes required for eligibility taking into consideration the nature of the business of the Company and industry specific requirements.
- To establish and maintain a suitable process for the periodic evaluation of the performance of Board Directors and the Managing Director of the Company to ensure their responsibilities are satisfactorily discharged.
- To consider if a Director is able to and has been adequately carrying out his or her duties as a Director, taking in to consideration the number of Listed Company Boards on which the Director is represented and other principal commitments.
- To review the succession plans for the Board of directors and key Management Personnel.
- Review and recommend the overall corporate governance framework of the Company taking into account the Listing Rules and other applicable regulatory requirements and industry best practices.
- To review and update the corporate governance policies/ framework in line with regulatory and legal developments relating to same.

- To receive reports from the Management on compliance of the corporate governance framework of the Company including the Company's compliance with provisions of the Securities and Exchange Commission Act, Listing Rules of the Colombo Stock Exchange and other applicable laws and reasons for any deviations or non-compliances.

Disclosure of Activities

GRI 2-23, 24

The Board performance evaluation was carried out and discussed at Board meetings. Any major issues relating to the Company are updated to the Independent Directors by the Chairman or Managing Director. Special Board meetings are called if the need arises to discuss any important or critical matters. No such special meeting were held during the financial year.

Newly appointed Directors were given an induction to the Company prior to their first Board meeting. The orientation programme includes inviting the Directors to the factories and estates to gain an understanding of the operations of the Company and its subsidiaries. Requirements as per the Listing Rules and applicable rules and regulations are informed to the new Directors. Existing Directors are regularly updated with corporate governance requirements, Listing Rules and other applicable laws.

Non-Executive Directors have submitted declarations regarding their independence / non independence. The fitness and propriety of the Directors were examined. All Independent Directors of the Company meet the criteria set out in the Listing Rules of the Colombo Stock Exchange for determining independence.

The Company has adopted the following policies, with effect from 1st October 2024, and has uploaded them to the Company's website in accordance with the Corporate Governance Rules of the Colombo Stock Exchange;

1. Policy on Matters Relating to The Board of Directors
2. Policy on Board Committees
3. Policy on Corporate Governance Nominations and e-election
4. Policy on Remuneration
5. Policy on Corporate Disclosure

6. Policy on Risk Management and Internal Controls
7. Policy on Internal Code of Business Conduct and Ethics for Directors and Employees including policies on trading in the entity's listed securities
8. Policy on Anti-Bribery and Corruption
9. Policy on Whistleblowing
10. Policy on Control and Management of Company Assets and Shareholder Investments
11. Policy on Environment Social and Governance Sustainability
12. Policy on Relations with Shareholder and Investor

Re-Appointments/ Re- Elections

One Third (1/3) of the all the directors except the Managing Director and those who have been appointed to the Board since the last Annual General Meeting, retire by rotation in terms of the Articles of Association and being eligible submit themselves for re-election at the Annual General Meeting.

Accordingly, the Committee has recommended to re-elect Lt. Col. Manuja Kariapperuma and Mr. Malik J. Fernando to the Board at the Annual General Meeting to be held on 23rd June 2025, based on their performance and the contribution made to achieve the objectives of the Board.

Lt. Col. Manuja Kariapperuma was appointed to the Board on 15th August 2020, and last re-appointed as a Director in June 2022. His directorships and other principal commitments are given in the profile on page 39. He does not serve on any Board Committees.

Mr. Malik J. Fernando was appointed to the Board on 15th January 1998, and last re-appointed as a Director in June 2022. His other directorships and other principal commitments are given in the profile on page 39. He does not serve on any Board Committees.

Mr. Darshana Gunasekara, Non-Executive Director and Ms. Harshani Randiligama, Independent Non-Executive Director who were appointed to the Board on 27th December 2024 and Mr. Milinda Hewagama, Non-Executive Director who was appointed to the Board on 05th May 2025 will come up for re-election by the shareholders at the Annual General Meeting. Their profiles in pages 40 and 41 set out their other principal commitments and directorships. They do not serve on any committees.

Due to the invaluable contribution made to the Board as a result of their many years of experience, industry knowledge and business acumen, the Committee has recommended to reappoint Mr. Mohan Pandithage and Mr. Lakshman Athukorala who are over seventy years and who retire in terms of Section 210 of the Companies Act No. 7 of 2007.

None of the Directors who are being proposed for re-election or their family members, have any relationship with the Directors of the Company or shareholders having more than 10% of the shares of the Company.

The committee has ensured Board diversity by bringing a wide range of experience and skills to the Board. Age and gender diversity have been essential factors contributing to the effective performance of the Company's Board

The Corporate Governance requirements stipulated under the Listing Rules of the Colombo Stock Exchange are met by the Company and details are given in pages 207 to 220.

Audit Committee Report

COMPOSITION

The Audit Committee ("the Committee") is appointed by and is responsible to the Board of Directors. The Committee comprises two Independent Non-Executive Directors and one Non-Executive Director.

The following changes took place during the financial year in compliance with the Governance Rules stipulated in Section 9 of the Listing rules of the Colombo Stock Exchange.

The members who served on the Committee during the financial year are as follows:

- Mr. Lakshman Athukorala who served as the Chairman of the Audit Committee was reclassified as Non-Executive Director on 27th December 2024 and consequently stepped down as the Chairman of the Audit Committee on 27th December 2024, and continued to serve as a member.
- Mr. Nandana Ekanayake, an Independent Non-Executive Director was appointed as the Chairman of the Audit Committee on 27th December 2024.
- Ms. Minette Perera who was a member of the Committee resigned from the Company with effect from 24th December 2024.

The Committee is chaired by a Senior Chartered Accountant. He is a Fellow Member of the Institute of Chartered Accountants of Sri Lanka (FCA), an Associate Member of the Institute of Certified Practising Accountants (CPA), Australia and a Fellow Member of the Certified Management Accountants (FCMA) of Sri Lanka. The other members possess relevant knowledge, qualifications and experiences in financial reporting, control, legal and regulatory requirements.

Brief profiles of each member are provided on pages 38 to 41 of this report. Their individual and collective financial knowledge and business acumen and the independence of the committee, are brought to bear on their deliberations and judgments on matters that come within the committee's purview.

Hayleys Group Services (Private) Limited, the Secretaries of the Company, acts as the secretary to the committee.

Charter of the Audit Committee

The Audit Committee Charter is periodically reviewed and revised with the concurrence of Board of Directors to make sure that new

developments relating to the function of the Committee are updated. The terms of reference of the Committee are clearly defined in the Charter of the Audit Committee.

The "Rules on Corporate Governance" under the Listing Rules of the Colombo Stock Exchange, and "Code of Best Practice on Corporate Governance" issued by the Institute of Chartered Accountants of Sri Lanka in 2023, further regulate the composition, roles and functions of the Audit Committee.

Meetings of the Audit Committee

The Committee meets as often as may be deemed necessary. The Committee had quarterly formal meetings and the member attendance records are given below.

Name of the Member		Number of meetings eligible to attend	Number of meetings attended
Mr. Nandana Ekanayake*** (Appointed as Chairman on 27th December 2024)	Chairman	4	4

Mr. Malaka Talwatte***	Member	4	4
Ms. Minette Perera** (Resigned w.e.f 24th December 2024)	Member	2	2

**Non-Executive Director

***Independent Non-Executive Director

The Chairman of the Board, Managing Director, Director/Chief Executive Officer, Director-Finance of the Company and Hayleys Group Chief Financial Officer attend the meetings of the Committee by invitation.

Other members of the Board of Directors, Management Committee of the Company and the Head of Group Management Audit and System Review Department (MA & SRD) of Hayleys PLC were present at the meetings of the Committee where appropriate. The External Auditors are also invited to be present where relevant.

The proceedings of the Committee are regularly reported to the Board of Directors. Audit Committee meeting papers, including the agenda, minutes and related reports and documents, are circulated to the committee members in advance.

The Authority of the Audit Committee

- Recommend appointment, reappointment, dismissal, service period and fees of the external auditors and internal audit service providers.
- Establish and maintain a direct communication channel with the external auditors.
- Resolve any issues regarding financial reporting between the management and the external auditors.
- Pre-approve all auditing and non-audit services performed by the firm of external auditors and internal audit service providers.
- Seek any information it requires from employees or external parties relating to investigations.
- Meet with the management and external auditors as necessary to carry out the assigned duties.

Activities in 2024/25

The Audit Committee, inter alia, engaged in the following activities during the financial year under review.

Financial Reporting System

The Committee reviewed the quality and integrity of the financial reporting system adopted by the Group in the preparation and presentation of its quarterly and annual Financial Statements to ensure reliability of the processes and consistency of the accounting policies and methods adopted and their compliance with the Sri Lanka Accounting Standards (SLFRSs and LKASs) issued by The Institute of Chartered Accountants of Sri Lanka (ICASL), financial reporting requirements under the Companies Act No. 07 of 2007 and Listing Rules of the Colombo Stock Exchange / Securities and Exchange Commission Act.

The Committee also reviewed the key judgements applied in the preparation of Consolidated Financial Statements, which are described in the relevant accounting policies and detailed Notes to the Financial Statements on pages 254 to 305.

The Committee, in its evaluation of the financial reporting system, also recognized the adequacy of the content and quality of routine management information reports forwarded to its members.

The Audit Committee obtained Statements of Compliance from the Business Unit Heads where appropriate. Having reviewed the financial reporting system, the Committee is satisfied that the system complies in all material respects with the regulatory and statutory requirements. The Committee reviewed the adequacy of disclosures and presentation formats of the draft Annual and Interim Financial Statements before recommending their publication to the Board and also adequacy of the content and quality of routine management information forwarded to its members.

The Committee engaged in discussion with the Company's External Auditors on the results of the External Auditors' examinations and their judgement on the acceptability of the accounting principles adopted by the Company.

The Committee recommended the Financial Statements to the Board for its deliberations and issuance.

Internal Control Systems

The Committee reviewed the process to assess the effectiveness of the Internal Financial Controls that have been designed to provide reasonable assurance to the Directors that assets are safeguarded and the financial reporting system can be relied upon in preparation and presentation of Financial Statements.

The Hayleys Group Management Audit and Systems Review Department reports on key control elements and procedures followed by the Group that are selected according to the Annual Audit Plan. The Annual Internal Audit Plan is approved by the Audit Committee and reviewed the progress on a quarterly basis in order to reflect the changing business needs and to ensure new and emerging risks are considered. During the financial year 2024/25, 12 audits were performed. The Committee reviewed the findings and recommendations together with management's responses on the observations made by internal auditors and provided recommendations for improvement.

A part of the Internal Audits was outsourced in financial year 2024/25 to leading audit firms in line with an agreed annual group audit plan. The Committee also invited representatives from the audit firms to make presentations on their observations and findings.

Follow up reviews were scheduled to ascertain that audit recommendations are being acted upon.

The Committee evaluated the internal audit function covering key areas such as scope, quality of internal audits, independence and resources. The Committee appraised the independence of the Group Management Audit and Systems Review Department in the conduct of their assignments.

Risk Management

While the Board of Directors reserve the primary responsibility on business risk management, the Board establishes the responsibility to the Audit Committee to oversee the risk management process of the Company.

The Audit Committee reviewed the Risk Register prepared and presented by the management of the Company in each of its meetings.

The Risk Register include key business risks on strategic, operational, financial, investment, governance, information technology and system security (ISS) aspects of the business.

The Management also reported to the Audit Committee, matters pertaining to sustainability/ ESG, as part of sustainability reporting. The Committee reviewed Sustainability Related Risks/Opportunities (SRROs) and Climate Related Risks/Opportunities (CRROs), affecting the business.

The Committee reviewed the Risk Management framework adopted by the Company including processes, practices and responsibilities of managing the identified risks.

The Committee also reviewed the key audit observations made in respect of subsidiary companies.

A review of the insurance policies and their adequacy were also carried out.

External Audit

During the year, the Committee reviewed the external audit scope and the strategy. The Audit Committee discussed the audit plan and the scope of the external audit with Messrs. Ernst & Young, Chartered Accountants. The Audit Results Report and the Management Letters issued by the External Auditors with regard to the Financial Statements and Internal Controls are circulated and reviewed at the Audit Committee.

The Committee obtained written assurance from the External Auditors that they are, and have been, independent throughout the audit engagement in accordance with all relevant professional and regulatory requirements, and has determined that the auditors' independence is intact. The Committee reviews the appointment of the External Auditor annually and makes recommendations to the Board accordingly. The Committee is satisfied that the independence of the External Auditors had not been impaired by any event or service that gives rise to a conflict of interest. Due consideration has been given to the nature of the services provided by the Auditors and the level of Audit and non-audit fees received by the Auditors, in order to ensure that it did not compromise their independence.

The Audit Committee provides the opportunity to External Auditors to meet Audit Committee members independently, if necessary.

Audit Committee Report

Appointment of External Auditors

The Audit Committee has recommended to the Board of Directors that Messrs. Ernst & Young, Chartered Accountants, continue as External Auditors for the financial year ending 31st March 2026 after evaluating the scope, delivery of the audit, resources and the quality of the assurance initiatives taken during the financial year 2024/25.

The current Auditor Messrs. Ernst & Young, Chartered Accountants was initially appointed as External Auditor in 2012 and continues to hold that position at present. A partner rotation of the Auditors takes place periodically. A rotation of partner took place in the financial year 2022/23.

Compliance

The Committee received confirmation from the Managing Director and Director Finance on the Group's operational and financial status. It was satisfied that the financial records are properly maintained and that the financial statements accurately reflect the Group's operations and financial position. The Committee also obtained representations from the management of the Company on the adequacy of provisions made for possible liabilities and reviewed reports tabled by the Group certifying their compliance with relevant statutory requirements. Further, the Committee obtained regular updates on HR and Legal regarding compliance matters.

Ethics and Good Governance

The Committee continuously emphasized on upholding ethical values of the staff members. In this regard, Internal Code of Business Conduct and Ethics, the policies on Whistleblowing and Anti-Bribery and Corruption were put in place. The Policies were followed by educating and encouraging all members of the staff. All appropriate procedures are in place to conduct independent investigations into incidents reported through Whistleblowing or identified through other means. The Whistleblower Policy guarantees strict confidentiality of the identity of the Whistleblowers.

Support to the Committee

The Committee received information and support from the Management during the year to enable it to carry out its duties and responsibilities effectively.

Evaluation of the Committee

An independent evaluation of the effectiveness of the Committee was carried out by the other members of the Board during the year. Considering the overall conduct of the Committee and its contribution on the overall performance of the Company, the Committee has been and rated as highly effective.

Remuneration Committee Report

GRI 2-19, 20

Composition

The Remuneration committee ("the Committee") of the Company was established in January 2023 in compliance with Section 9 of the listing Rules of Colombo Stock Exchange. The Remuneration Committee ("the Committee") of the Company is appointed by and is responsible to the Board of Directors and comprises two Independent Non Executive Directors and one Non- Executive Director.

The following changes took place during the financial year in compliance with the Governance Rules stipulated in Section 9 of the Listing rules of the Colombo Stock Exchange.

The members who served on the Committee during the financial year are as follows:

- Mr. Lakshman Athukorala who served as the Chairman Remuneration Committee was reclassified as Non-Executive Director on 27th December 2024 and consequently stepped down as the Chairman of the Committee on 27th December 2024, and continues to serve as a member.
- Mr. Nandana Ekanayake, an Independent Non-Executive Director was appointed as the Chairman of the Remuneration Committee on 27th December 2024.
- Ms. Minette Perera who was a member of the Committee resigned from the Company with effect from 24th December 2024.

Attendance

Name of the Member		Number of meetings eligible to attend	Number of meetings attended
Mr. Nandana Ekanayake*** (Appointed as Chairman on 27th December 2024)	Chairman	1	1
Mr. Lakshman Athukorala** (Ceased to be Chairman w.e.f. 27th December 2024)	Member	1	1
Mr. Malaka Talwatte***	Member	1	1
Ms. Minette Perera** (Resigned w.e.f 24th December 2024)	Member	1	1

**Non-Executive Director

***Independent Non-Executive Director

The Chairman of the Committee is an Independent Non-Executive Director.

The Remuneration Committee has well defined Terms of Reference.

The members of the Committee are free from business, operational, personal or other relationships which may interfere with their independent, unbiased judgement.

Responsibilities of the Remuneration Committee

- To make recommendations to the Board of Directors regarding the framework of remuneration to the Executive Directors and Senior Management.
- To evaluate the compensation of the Managing Director, Executive Directors and the Senior Management.
- To review the guidelines and parameters for the compensation structures of Senior Management within the Group taking into consideration industry norms.
- To review from time to time information related to Executive and Non-Executive Directors payments, to ensure that they are on par with the market/industry rates.
- To evaluate the performance of the Managing Director, Executive Director and the Senior Management, against predetermined targets and goals set by the Board.
- To assess and recommend to the Board of Directors promotions of the Senior Management and to address succession planning.
- To recommend annual salary increments and bonuses.

The committee in performing its duties obtains the assistance of the managing director of the company to provide relevant information to the committee and to assist in their analysis and deliberations except when his own compensation package is reviewed. The managing director and the board chairman participate by invitation in the meetings of the remuneration committee as and when necessary.

Remuneration Policy

The remuneration policy of the Group is to attract, motivate and retain a highly qualified and experienced executive team, and reward performance accordingly in the backdrop of industry norms. These compensation packages provide compensation appropriate for each business within the Group and commensurate with each employee's level of expertise and contributions, bearing in mind the business' performance and shareholder returns.

The remuneration packages which are linked to individual performances are aligned with the Company/Group's short term and long-term strategy.

All Non-Executive Directors (other than Directors who are employed by Hayleys PLC) receive a fee for serving on the Board and serving on sub committees. They do not receive any performance related incentive payments.

Activities in 2024/2025

During the year, the Committee reviewed the performance of the Managing Director, Executive Directors and Senior Management, based on the targets set in the previous year and determined the bonus payable and the annual increments.

Reviewed the compensation parameters of the Senior Management and implemented market corrections where necessary. The Committee also recommended that compensation packages to be in line with the market median.

Recommended the bonus payable and annual increments to be paid based on the ratings of the Performance Management System.

The aggregate remuneration of the Executive and Non-Executive Directors for the financial year amounted to Rs. 53.5 Mn.

**Non-Executive Director

***Independent Non-Executive Director

The Chairman of the Committee is an Independent Non- Executive Director. Profiles of the Committee members are given in Pages 38 to 41.

The Chairman, Managing Director, Director/Chief Executive Officer, Director Finance and any other officers as may be required by the Committee attend the meetings by invitation.

The Company Secretaries act as the Secretaries to the Committee and Minutes of Committee meetings are tabled at the Board meetings, thereby providing the Directors access to the deliberations of the Committee.

The Duties of the Committee

- To review in advance all proposed related party transactions of the Group either prior to the transaction being entered into or, if the transaction is expressed to be conditional on such review, prior to the completion of the transaction.
- Seek any information the Committee requires from the Management, employees or external parties with regard to any transaction entered into with a related party.

- Obtain knowledge or expertise to assess all aspects of proposed related party transactions where necessary, including obtaining appropriate professional and expert advice from suitably qualified persons.
- To recommend where necessary, to the Board and obtain their approval prior to the execution of any related party transaction.
- To monitor that all related party transactions of the entity are transacted on normal commercial terms and are not prejudicial to the interests of the entity and its minority shareholders.
- Meet with the Management, Internal Auditors/External Auditors as necessary to carry out the assigned duties.
- To review the transfer of resources, services or obligations between related parties regardless of whether a price is charged.
- To review the economic and commercial substance of both recurrent/ non-recurrent-related party transactions
- To monitor and recommend the acquisition or disposal of substantial assets between related parties, including obtaining "competent independent advice" from independent professional experts with regard to the value of the substantial asset of the related party transaction.
- To ensure that there is an adequate and effective process in place to capture information which is relevant to its review function.

Task of the Committee

The Committee reviewed the related party transactions and their compliances of Talawakelle Tea Estates PLC and its subsidiaries and communicated the same to the Board.

The Committee in its review process recognized the adequacy of the content and quality of the information forwarded to its members by the Management.

Policy and Terms Of Reference

The Committee has established a clear Policy and Terms of Reference approved by the Board, setting forth the procedure to identify the related parties and the process of reporting the transactions with related parties to the Committee on a quarterly basis. The Policy outlines the composition of the Committee, meeting procedures and the responsibilities of the Committee. It also specifies the approval processes and disclosure requirements, including market announcements and Annual Report disclosures. The Policy guides the Committee and makes them responsible for ensuring that no director or major shareholder takes advantage of their position to the detriment of the interest of minority shareholders.

Disclosures

A detailed disclosure of all the related party transactions including recurrent and non-recurrent related party transactions which are required to be disclose under Section 9.14.8 of the Listing Rules of the Colombo Stock Exchange has been made in Note 32 to the financial statements given in pages 254 to 305 this report.

Declaration

A declaration by the Board of Directors on compliance with the rules pertaining to related party transactions appears on the report of the Board of Directors on page 228 of this Annual Report.

Annual Report of the Board of Directors on the Affairs of the Company

General

The Board of Directors of Talawakelle Tea Estates PLC ("the Company") have pleasure in presenting the Annual Report of the Board of Directors on the affairs of the Company and of the Group together with the Audited Consolidated Financial Statements for the year ended 31st March 2025.

The details set out herein provide the pertinent information required by the Companies Act No. 07 of 2007 ("the Companies Act"), the Listing Rules of the Colombo Stock Exchange (CSE), the Code of Best Practice on Corporate Governance 2023 issued by the Institute of Chartered Accountants of Sri Lanka and are guided by recommended best accounting practices.

The Financial Statements were reviewed and approved by the Board of Directors on 5th May 2025.

Principle Activities, Business Review and Future Developments

The principal activity of Talawakelle Tea Estates PLC is the cultivation and manufacture of tea, rubber and cinnamon. The fully owned subsidiaries of the Company, TTEL Hydro Power Company (Private) Limited and TTEL Somerset Hydro Power (Private) Limited are engaged in generating hydro power.

There were no material changes in the nature of business of the Company and the Group during the financial year.

There has been no non-compliance with laws or regulations and the Directors to the best of their knowledge and belief, confirm that the Company has not engaged in any activity that contravenes applicable laws and regulations. There have been no material fines imposed on the Company by the Government or any regulatory authority in any jurisdiction where the Company operates.

Group Structure

The Group Structure is given on page 29.

Vision, Mission, Purpose and Corporate Conduct

The Company's vision, mission and purpose statement are given on page 6. The 'Group Code of Business Conduct and Ethics - Hayleys Way' provides the frame work for our corporate conduct. The Group is committed to conduct its business operations with honesty, integrity, to comply with the laws and regulations of

the country and with respect to the rights and interests of all stakeholders.

Business Review/Future Development

A review of financial and operational performance and future business developments of the Group is contained in the Chairman's Statement (pages 20 to 23) Managing Director's Review (pages 24 to 27) and Management Discussion and Analysis (pages 116 to 193) of the Annual Report.

These reports, together with the audited financial statements, reflect the state of affairs of the Company and the Group.

Financial Statements

The Financial Statements of the Company and the Group prepared in conformity with the Sri Lanka Accounting Standards (SLFRS/LKAS) as required by Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995 and comply with the requirements of the Companies Act. The Financial Statements of the Company and the Group for the year ended 31st March 2025, have been duly signed by the Chief Financial Officer and two Directors of the Company. Refer page 226.

Auditor's Report

The Company's Auditors Messrs. Ernst and Young, Chartered Accountants carried out an audit on the Financial Statements of the Company and the Group as at 31st March 2025, and their Report is given on pages 250 to 253.

Accounting Policies

The Significant Accounting Policies adopted in the preparation of the Financial Statements of the Company and the Group are given on pages 260 to 271.

The Financial Statements and Notes thereto give a true and fair view of the Company's and the Group's financial position as of 31st March 2025 and of their performance for the year-ended on that date.

There were no material changes in the Accounting Policies adopted with those of the last year other than disclosed in note 2.3 to the financial statements.

Group Revenue

The revenue of the Group during the year was Rs. 7,805.6 Mn (2023/24 Rs. 7,763.6 Mn). An analysis of the Group's revenue, profits and asset allocation relating to different segments are given in Note 6 to the Financial Statements.

Management Fees

No management fee has been charged by Hayleys Plantation Services (Pvt) Ltd from financial year 2014/15 consequent to a board decision to waive off management fee.

Corporate Governance

The Company has complied with the revised Corporate Governance rules laid down under the Listing Rules of the Colombo Stock Exchange and the recommendations provided in the Code of Best Practice on Corporate Governance 2023, issued by the Institute of Chartered Accountants of Sri Lanka. The Corporate Governance Report on pages from 207 to 220 discusses this further.

Mr. Nandana Ekanayake was appointed as the Senior Independent Director, in accordance with the Corporate Governance requirements. The Board was of the opinion that Mr. Mohan Pandithage should remain as the Executive Chairman of the Company due to his extensive

experience, deep insights and domain knowledge evidenced through the leadership provided to the Company. Please refer the Senior Independent Director's Report on page 221.

The Directors and Managing Director satisfy the Fit and Proper Assessment Criteria stipulated in the Listing Rules of the Colombo Stock Exchange. There were no non-compliances by any Director or Managing Director during the financial year.

The Directors have declared all material interests in contracts involving the Company and the Group and they refrain from voting on matters in which they have a material interest.

The Board has updated themselves with the applicable laws, rules and regulations and are aware of the changes to the Listing Rules of the Colombo Stock Exchange and other regulatory requirements.

Directors' Meeting

The number of Directors' meetings comprises Board meetings, Sub-Committees meetings and the attendance of Directors at these meetings are given on page 216 Furthermore, the Directors contributed towards policy advocacy and direction by participating in the deliberations of the Board-appointed Subcommittees on strategic review, procurement and disposal of assets.

Board Subcommittees

The Board, while assuming the overall responsibility and accountability for the affairs in the management of the Company, has appointed an Audit Committee, Remuneration Committee, Nominations and Governance Committee and Related Party Transactions Review Committee with specific terms of reference.

The Committee Reports are given on pages 222 and 228 of this report.

Related Party Transactions

The related party transactions of the Group during the year have been reviewed by the Related Party Transactions Review Committee and are in compliance with the Section 09 of the CSE Listing Rules. Please refer Related Party Transactions Review Committee Report on page 228.

Directors' Responsibility for Financial Reporting

The Directors are responsible for the preparation of the Financial Statements of the Company to present a true and fair view of the state of its affairs. The Directors are of the view that these Financial Statements have been prepared in conformity with the requirements of the Sri Lanka Accounting Standards, The Companies Act and the Listing Rules of the Colombo Stock Exchange. The Statement of Directors' Responsibility for Financial Reporting is given on page 225 which forms an integral part of the Annual Report of the Board of Directors.

Auditors

The Financial Statements for the year have been audited by Messrs. Ernst & Young, Chartered Accountants.

The Auditors Messrs Ernst & Young, Chartered Accountants were paid Rs. 7.26 Mn (2023/24 - Rs. 6.65Mn) as audit fees and audit related work of the Company and Rs. 1.42 Mn (2023/2024 - Rs. 1.85 Mn) as audit fees by the two subsidiaries, TTEL Hydro Power Company (Private) Limited and TTEL Somerset Hydro Power (Private) Limited.

As far as the Directors are aware, the Auditors of the Company and of the Subsidiaries do not have any relationships (other than that of an Auditor) with the Company or any of its Subsidiaries other than those disclosed above. The Auditors also do not have any interests in the Company or any of its Group companies.

Messrs. Ernst & Young, Chartered Accountants have expressed their willingness to continue in office and in accordance with the Companies Act, a resolution proposing the re-appointment of Messrs. Ernst & Young, Chartered Accountants, as Auditors and to authorize the directors to determine their remuneration is being proposed at the Annual General Meeting.

Statement of Directors' Responsibility

The Directors are responsible under Sections 150 (1), 151, 152 (1) and 153 of the Companies Act No. 07 of 2007 ('the Companies Act'), to ensure compliance with the requirements set out therein to prepare Financial Statements for each financial year giving a true and fair view of the state of affairs of the Company and the Group as at the end of the financial year and of the profit and loss of the Company and the Group for the financial year.

The Directors are also responsible, under Section 148 of the Companies Act to ensure that proper accounting records are kept to enable determination of the financial position with reasonable accuracy, preparation of Financial Statements and audit of such statements to be carried out readily and properly.

The Board accepts responsibility for the integrity and objectivity of the Financial Statements presented. The Directors confirm that in preparing the Financial Statements, appropriate accounting policies have been selected and applied consistently while reasonable and prudent judgments have been made so that the form and substance of transactions are properly reflected. They also confirm that the Financial Statements have been prepared and presented in accordance with the Sri Lanka Accounting Standards, the Companies Act and the Listing Rules of the Colombo Stock Exchange.

The Directors are of the opinion, based on their knowledge of the Company and the Group key operations and specific inquiries, that adequate resources exist to support the Company and the Group, on a going concern basis over the next year. These Financial Statements have been prepared on that basis.

The Directors have taken proper and sufficient measures to safeguard the assets of the Group and, in that context, have instituted appropriate systems of internal control and accounting records to prevent and detect frauds and other irregularities. These have been reviewed, evaluated and updated on an ongoing basis.

The Directors have confirmed that the Company satisfied the solvency test requirement under Section 56 of the Companies Act for first, second, third interim dividends paid. Solvency certificates were obtained from the Auditors in respect of the Interim dividends paid.

The external Auditors, Messrs. Ernst & Young, Chartered Accountants who were reappointed in terms of Section 158 of the Companies Act were provided with every opportunity to undertake the inspections they considered appropriate to enable them to form their opinion on the Financial Statements. The Report of the Auditors, shown on pages 250 to 253 sets out their responsibilities in relation to the Financial Statements.

Compliance Report

The Directors confirm that to the best of their knowledge, all statutory payments relating to employees and the Government that were due in respect of the Company and the Group, and its subsidiaries as at the Balance Sheet date have been paid or provided where relevant.

By Order of the Board,

Hayleys Group Services (Private) Limited
Secretaries

05th May 2025

Managing Director's, Chief Executive Officer's and Director- Finance's Responsibility Statement

The Financial Statements of Talawakelle Tea Estates PLC and the Consolidated Financial Statements of the Group as at 31st March, 2025 are prepared and presented in compliance with the requirements of the following:

- Sri Lanka Accounting Standards issued by CA of Sri Lanka;
- Companies Act No 07 of 2007;
- Sri Lanka Accounting and Auditing Standards Act No 15 of 1995;
- Listing rules of the Colombo Stock Exchange;
- Code of Best Practice on Corporate Governance-2023 issued by CA Sri Lanka.

We confirm that the significant accounting policies used in the preparation of the Financial Statements are appropriate and are consistently applied, as described in the Notes to the Financial Statements. The significant accounting policies and estimates that involved a high degree of judgment and complexity were discussed with the Audit Committee and our External Auditors. During the year, company opted for the voluntary second year adaptation of SLFRS S1 and S2 Sustainability Disclosure Standards, in line with the transitional relief allowed for early adopters and obtained Independent limited assurance on SLFRS Sustainability Disclosure Standards S1 and S2 from Messers Ernest & Young.

We have also taken proper and sufficient care in installing systems of internal control and accounting records to safeguard assets and to prevent and detect frauds as well as other irregularities. These have been reviewed, evaluated and updated on an ongoing basis. Reasonable assurances that the established policies and procedures of the Company have been consistently followed were provided by periodic audits conducted by Group's internal auditors. However, there are inherent limitations that should be recognized in weighing the assurances provided by any system of internal controls and accounting.

The Audit Committee of the Company meets periodically with the Internal Auditors and the Independent Auditors to review the effectiveness of the audits and to discuss auditing, internal control and financial reporting issues. The Independent Auditors and the Internal Auditors have full and free access to the Audit Committee to discuss any matter of substance.

The Financial Statements were audited by independent external auditors, Messers Ernst & Young, Chartered Accountants. Their report is given on pages 250 to 253 of the Annual Report.

The Audit Committee approves the audit and non-audit services provided by the External Auditor, in order to ensure that the provision of such services do not impair their independence.

We confirm that,

- the Company and its subsidiaries have complied with all applicable laws, regulations and prudential requirements;
- there are no material non-compliances; and
- there are no material litigations that are pending against the Group other than those disclosed in the Note 32 to the Financial Statements in this Annual Report.

Directors' Statement on Internal Controls

The following statement fulfils the requirement to publish the Directors' Statement on internal control as per the Code of Best Practice on Corporate Governance 2023 issued by CA Sri Lanka.

The Board of Directors is responsible for maintaining a sound system of internal controls to safeguard shareholders' investments and the Company's assets. The Board has established an ongoing process for identifying, evaluating and managing the significant risks faced by the Company and Group. This process includes enhancing the system of internal controls as and when there are changes to business environment or regulatory guidelines. The process is regularly reviewed by the Board.

The Board is of the view that the system of internal controls in place is sound and adequate to provide reasonable assurance regarding the reliability of financial reporting, and the preparation of financial statements for external purposes and is in accordance with relevant accounting principles and regulatory requirements.

The Board has implemented the following to obtain reasonable assurance that proper systems of internal controls are in place:

- Instituted various committees to assist the Board in ensuring the effectiveness of Company's operations and the operations are in accordance with the corporate strategies and annual budget.
- The Management Audit and System Review Division (MA & SRD) to review and report on the internal control environment in the Company and Group. Audits are carried out on all subsidiaries in accordance with the annual audit plan approved by the Audit Committee. Findings are submitted to the Audit Committee for review at their periodic meetings.
- The Audit Committee reviews internal control issues identified by MA & SRD and management, and evaluates the adequacy and effectiveness of the risk management and internal control systems. They also review the internal audit functions with particular emphasis on the scope of audits and quality of internal audits. The minutes of the Audit Committee meetings are tabled at the Board meetings of Talawakelle Tea Estates PLC.

- The adoption of Sri Lanka Accounting Standards comprising LKAS and SLFRS, processes that are required to comply with new requirements of recognition, measurement, presentation and disclosures were introduced and implemented. The required processes were put in place to adopt the SLFRS S1 and S2 Sustainability disclosure Standards. Continuous monitoring is in progress to ensure effective reporting of the required processes.
- The comments made by External Auditors in connection with the internal control system during the financial year were taken into consideration and appropriate steps have been taken to incorporate them where appropriate.

Conclusion

The Board having implemented the above is aware that such systems are designed to manage rather than eliminate the risk of failure to achieve business objective and can only provide reasonable and not absolute assurance against material misstatements of loss.

The Board of Directors confirm that the financial reporting system has been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Financial Statements for external purposes has been done in accordance with the Sri Lanka Accounting Standards, requirements of the company's Act No 7 of 2007 and the Listing Rules of the Colombo Stock Exchange.

Independent practitioner's assurance report to the Board of Directors of Talawakelle Tea Estates PLC on the Sustainability reporting criteria presented in the Integrated Annual Report FY 2024/25

Scope

We have been engaged by Talawakelle Tea Estates PLC to perform a 'limited assurance engagement', as defined by Sri Lanka Standard on Assurance Engagements, here after referred to as the engagement, to report on Talawakelle Tea Estates PLC's Economic, Environment, Social and Governance (EESG) indicators (the "Subject Matter") contained in Talawakelle Tea Estates PLC's (the "Entity's") Integrated Annual Report for the year ended 31 March 2025 (the "Report").

Other than as described in the preceding paragraph, which sets out the scope of our engagement, we did not perform assurance procedures on the remaining information included in the Report, and accordingly, we do not express a conclusion on this information.

Criteria applied by Talawakelle Tea Estates PLC

In preparing the Subject Matter, Talawakelle Tea Estates PLC applied the following criteria ("Criteria"):

- The Global Reporting Initiative's (GRI) Sustainability Reporting Guidelines, publicly available at <https://www.globalreporting.org>
- GRI 13: Agriculture, Aquaculture and Fishing Sectors 2022

Such Criteria were specifically designed for the purpose of assisting you in determining whether Entity's Economic, Environment, Social and Governance (EESG) indicators contained in the Entity's Report is presented in accordance with the relevant criteria; As a result, the subject matter information may not be suitable for another purpose.

Talawakelle Tea Estates PLC's responsibilities

Talawakelle Tea Estates PLC management is responsible for selecting the Criteria, and for presenting the Subject Matter in accordance with that Criteria, in all material respects. This responsibility includes establishing and maintaining internal controls, maintaining adequate records and making estimates that are relevant to the preparation of the subject matter, such that it is free from material misstatement, whether due to fraud or error.

Ernst & Young's responsibilities

Our responsibility is to express a conclusion on the presentation of the Subject Matter based on the evidence we have obtained.

We conducted our engagement in accordance with the Sri Lanka Standard for Assurance Engagements Other Than Audits or Reviews of Historical Financial Information (SLSAE 3000 (Revised)), and the terms of reference for this engagement as agreed with the Talawakelle Tea Estates PLC on 23 April 2025. Those standards require that we plan and perform our engagement to express a conclusion on whether we are aware of any material modifications that need to be made to the Subject Matter in order for it to be in accordance with the Criteria, and to issue a report. The nature, timing, and extent of the procedures selected depend on our judgment, including an assessment of the risk of material misstatement, whether due to fraud or error.

We believe that the evidence obtained is sufficient and appropriate to provide a basis for our limited assurance conclusions.

Our independence and quality management

We have maintained our independence and confirm that we have met the requirements of the Code of Ethics for Professional Accountants issued by the Institute of Chartered Accountants of Sri Lanka (CA Sri Lanka) and have the required competencies and experience to conduct this assurance engagement.

EY also applies quality management standards, which requires that we design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Description of procedures performed

Procedures performed in a limited assurance engagement vary in nature and timing from and are less in extent than for a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. Our procedures were designed to obtain a limited level of assurance on which to base our conclusion and do not provide all the evidence that would be required to provide a reasonable level of assurance.

Independent Assurance Report

Although we considered the effectiveness of management's internal controls when determining the nature and extent of our procedures, our assurance engagement was not designed to provide assurance on internal controls. Our procedures did not include testing controls or performing procedures relating to checking aggregation or calculation of data within IT systems.

A limited assurance engagement consists of making enquiries, primarily of persons responsible for preparing the subject matter and related information and applying analytical and other appropriate procedures.

Our procedures included:

- Validated the information presented and checked the calculations performed by the organization through recalculation.
- Performed a comparison of the content given in the Report against the criteria given in the selected sustainability standards/frameworks.
- Conducted interviews with relevant organization's personnel to understand the process for collection, analysis, aggregation and presentation of data. Interviews included selected key management personnel and relevant staff.
- Read the content presented in the Report for consistency with our overall knowledge obtained during the course of our assurance engagement and requested changes wherever required.
- Provided guidance, recommendations and feedback on the improvement of the sustainability reporting indicators to improve the presentation standard.

We also performed such other procedures as we considered necessary in the circumstances.

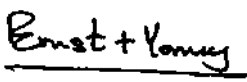

Emphasis of matter

Economic, Environment, Social management data/information are subject to inherent limitations given their nature and the methods used for determining, calculating and estimating such data. Such inherent limitations are common in Sri Lanka.

We also do not provide any assurance on the assumptions and achievability of prospective information presented in the Entity's Report.

Conclusion

Based on our procedures and the evidence obtained, we are not aware of any material modifications that should be made to the information on the Economic, Environment, Social and Governance (EESG) contained in the Integrated Annual Report of Talawakelle Tea Estates PLC for the year ended 31 March 2025, in order for it to be in accordance with the Criteria.

Notes to the Consolidated ESG Statement

Section 01 – Basis of Preparation

General Reporting Standards and Principles

Refer: page 10; ESG Report – 2024/25 of Talawakelle Tea Estates PLC, www.talawakelletea.com

The Consolidated ESG Statement for Talawakelle Tea Estates PLC presents key sustainability indicators that are materially relevant to the company's operations and stakeholders, in alignment with globally accepted ESG disclosure practices and assurance frameworks. This version reflects enhanced disclosure maturity for the year ended 31 March 2025, incorporating material updates and verified data.

The statement is prepared in accordance with the following applicable frameworks and standards:

Narrative Reporting

- International Integrated Reporting Framework (<IR>) – 2021
- Guidelines for Presentation of Annual Reports by CA Sri Lanka – 2025

Sustainability Reporting

- GRI Sustainability Reporting Standards
- GRI 13: Agriculture, Aquaculture and Fishing Sector Standard – 2022
- Sustainability Accounting Standards Board (SASB) - Sustainability Accounting Standard for Agricultural Products (Version 2023-12)
- Colombo Stock Exchange: Communicating Sustainability – Version 02

Greenhouse Gas (GHG) Emission Reporting

- ISO 14064-1:2018 – Quantification and Reporting of GHG Emissions
- Greenhouse Gas (GHG) Protocol: A Corporate Accounting and Reporting Standard (2004)
- GHG Protocol Scope 2 Guidance, an amendment to the GHG Protocol Corporate Standard
- Corporate Value Chain (Scope 3) Accounting and Reporting Standard, a supplement to the GHG Protocol Corporate Accounting and Reporting Standard

- Technical Guidance for Calculating Scope 3 Emissions (Version 1.0), supplement to the Corporate Value Chain (Scope 3) Accounting and Reporting Standard
- FLAG Emissions Disclosure under GHG Protocol Land Sector Guidance – 2023

Climate-related Financial Disclosures

- SLFRS S1 – General Requirements for Disclosure of Sustainability-related Financial Information
- SLFRS S2 – Climate-related Disclosures

Governance

- Code of Best Practices on Corporate Governance – CA Sri Lanka – 2023

Reporting Principles

Reporting principles are aligned with GRI, SLFRS S1 and S2, and SASB, ensuring quality, comparability, and relevance of data.

- **Inclusivity:** Stakeholder engagement spans internal and external actors including customers, suppliers, estate communities, and business partners. This year's report deepens stakeholder integration through the use of grievance logs, feedback analytics, and engagement outcomes.
- **Materiality:** The report reflects issues of strategic importance identified through double materiality assessments. Climate transition, biodiversity, and labour dynamics were among the top material topics validated for 2024/25. Issues are linked to specific strategies, targets, and performance metrics.
- **Responsiveness:** The report demonstrates how the company responded to evolving expectations e.g., SBTi re-verification, GHG Scope 3 expansion, and scenario analysis for climate resilience aligned with SLFRS S2.
- **Impact:** The report conveys positive and negative impacts across capitals natural, human, social, and intellectual. This year introduces FLAG-related land sector impacts and enhanced biodiversity investment tracking.

- **Consolidation:** ESG data covers field and factory operations, corporate and regional offices, and all support divisions. Hydropower operations under TTEL subsidiaries are also included.
- **Accuracy, Completeness, Verifiability:** Data has undergone internal verification through the Hayleys Cube sustainability data platform and external limited assurance for key disclosures, reinforcing transparency and credibility.
- **Comparability:** A consistent methodology has been used across periods, unless otherwise noted. Historical baselines are retained where material. Any changes in calculation methodology are transparently disclosed within each section.

Section 02 – Environmental Performance

2.1 Energy Consumption

Refer: page 180

Total energy consumption in FY 2024/25 stood at 217,833 GJ, reflecting a 2.43% change compared to FY 2023/24. The energy profile includes both direct (99.5%) and indirect (0.5%) energy use, with a continued shift toward more sustainable sources.

Reporting Methodology

Covers all operational energy inputs electricity, thermal energy (firewood and briquettes), and fossil fuels (diesel and gasoline). Data is sourced from utility bills, meter readings, and fuel usage logs across all estates and processing units.

2.2 Renewable Energy

Refer: page 181

In FY 2024/25, renewable energy generation reached 30,848 GJ, marking a 14.5% increase from FY 2023/24. Renewable sources include three mini-hydropower plants and five rooftop solar installations, contributing significantly to decarbonisation under the company's FLAG targets.

Unit	Type	Capacity (kW or kWp)
Radella	Mini Hydro	200
Somerset	Mini Hydro	1,100
Palmerston	Mini Hydro	800
Bearwell	Solar	108.24
Moragalla	Solar	149.08
Kiruwanaganga	Solar	220
Dessford	Solar	113.95
Deniyaya	Solar	118.19
Calsay	Solar	109.68
Total		2,100 (Hydro) + 819.14 (Solar)

Reporting Methodology

Solar generation data is captured through system-integrated meters. Hydropower output is recorded by TTEL Hydropower Company (Pvt) Ltd and TTEL Somerset Hydropower Company (Pvt) Ltd.

2.3 Water Consumption

Refer: page 185

Total water consumption reached 555 cubic meters in FY 2024/25, representing a 6.5% (increase) from FY 2023/24. Rainwater harvesting continues to be the primary water source for field activities, while treated mains water is used only for factory cleaning.

Reporting Methodology

Water data is sourced from utility bills, meter logs, and estimates (where meters are absent). Rainwater usage is tracked through irrigation logs at estate level.

2.4 Renewable Materials

Refer: page 186

Renewable materials including green leaf and eco-packaging accounted for 79.4% of the total material use in FY 2024/25. Non-renewable materials such as agrochemicals and dolomite made up the remaining 20.6%.

Reporting Methodology

Material usage data is compiled from estate-level procurement and application records. The renewable ratio is calculated based on total tonnage consumed across all estates.

2.5 Waste

Refer: page 186

The Company maintained structured waste management across operations, with non-hazardous waste making up 99.5% and hazardous waste constituting 0.5% of total waste generated. Efforts to reprocess refuse tea and reduce landfill waste continued.

Reporting Methodology

Each estate maintains a waste logbook covering quantity, category, disposal methods, and related costs. Internal audits verify the completeness and consistency of entries.

2.6 Emission

Refer: page 183

Total GHG emissions for FY 2024/25 stood at 23,431 tCO₂e, an increase/decrease of 25,194 over FY 2023/24. This includes:

- **Scope 1** (Direct): 8,160 tCO₂e
- **Scope 2** (Indirect – energy): 1,703 tCO₂e
- **Scope 3** (Indirect – other): 13,568 tCO₂e

FLAG emissions were also disclosed for the first time in line with updated GHG Protocol Land Sector Guidance, enhancing alignment with SBTi targets.

Reporting Methodology

Emissions were calculated using ISO 14064-1:2018, the GHG Protocol, and IPCC AR5 emission factors. Scope 3 coverage includes purchased goods, logistics, employee commuting, business travel, and waste. Estimations were applied where primary data was unavailable.

Emission Factor Sources

- Energy: IPCC AR5, 2006
- GWP: IPCC 6th Assessment Report (2020)

Scope 3 Categories Included

#	Category	Method
1	Purchased goods and services	Screening + Quantification
2	Capital goods	Screening only
3	Fuel- and energy-related activities	Screening + Quantification
4	Upstream transport and distribution	Screening + Quantification
5	Waste in operations	Screening + Quantification
6	Business travel	Calculation
7	Employee commuting	Screening + Quantification
8	Upstream leased assets	N/A
9	Downstream transport and distribution	Screening + Quantification
10	Processing of sold products	N/A
11	Use of sold products	Quantification
12	End-of-life treatment of sold products	Screening
13	Downstream leased assets)	Screening
14	Franchises	N/A
15	Investments	N/A

2.7 Environment and Biodiversity Conservation

Refer: page 189

In FY 2024/25, the Company invested Rs. 58.3 million, a 24%% increase from FY 2023/24, toward biodiversity protection, ecosystem restoration, and regenerative agriculture. Projects aligned with TNFD-aligned scenario analysis and TTE's nature-positive pathway.

Reporting Methodology

Estate and central finance teams report conservation expenditures. Verified through financial records and linked to specific project outcomes (e.g., restoration acreage, corridor connectivity).

Notes to the Consolidated ESG Statement

2.8 Environmental compliance

Refer: page 241

No breaches of environmental laws and regulations were reported in FY 2024/25. Independent audits and regulatory inspections confirmed full compliance across operational locations.

Reporting Methodology

Reported incidents are verified against records from the Central Environmental Authority (CEA) and other local bodies. Internal audits supplement formal inspection outcomes.

Section 03 – Social Performance

3.1 Employees

Refer: page 166

As at 31 March 2025, the total employee strength stood at 5,247, reflecting a 22% (increase) compared to 2023/24. Workforce stability remained a priority amidst sector-wide labour pressures.

Reporting Methodology

Headcount includes all full-time employees and excludes contract labour, outsourced personnel, and interns. Verified against HRIS and payroll data.

3.2 Employee Turnover

Refer: page 167

Employee turnover rate for FY 2024/25 stood at 3.4%, versus 11.2% in 2023/24. Retention efforts focused on housing, welfare improvements, and leadership pipeline development.

Reporting Methodology

Turnover rate = (Number of voluntary separations ÷ Average annual headcount) × 100. Temporary employees excluded.

3.3 Employee Trust Index

Refer: page 176

The Great Place to Work® survey conducted independently during the year reported a Trust Index of 99%, reaffirming TTE's standing among Sri Lanka's most employee-trusted workplaces.

Reporting Methodology

Survey conducted across job categories, capturing anonymised feedback. GPTW Global Model used to benchmark results against international standards.

3.4 Occupational Accidents

Refer: page 175

In FY 2024/25, there were 56 occupational incidents resulting in 62 lost workdays reflecting a 9.6% change from the previous year. A zero-fatality target was maintained.

Reporting Methodology

Reported using the Lost Time Injury Frequency Rate (LTIFR) per million hours worked. Includes estate operations but excludes contractors and interns.

3.5 Training Hours

Refer: page 170

Average training hours per employee Reduced to 1.91 hours in 2024/25, representing a 17% reduction over the previous year, driven by new digital tools, ESG awareness, and productivity upskilling.

Reporting Methodology

Training logs were compiled from HR records and verified against training plans. Average is computed as: total training hours ÷ average headcount.

3.6 Training Investment

Refer: page 171

Training investment dropped by 23.6% to Rs. 11 million in 2024/25, with emphasis on ESG compliance, regenerative agriculture, and managerial development.

Reporting Methodology

Capex and Opex allocated to training were extracted from estate accounts and consolidated into corporate-level reporting. Third-party invoices included for audit trail.

3.7 Gender Diversity

Refer: page 19

In 2024/25, the gender ratio in leadership stood at 55:8 (M:F), and at board level at 10:1, reflecting ongoing gaps. The company reaffirmed its commitment to the 2030 Gender Equality Agenda through targeted leadership mentoring for women.

Reporting Methodology

Based on year-end employee list for those in leadership roles (Assistant Manager and above). Board gender ratio computed from director register.

3.8 Community Development

Refer: page 160

Community development investment reached Rs. 119 million in 2024/25 (14.8% increase vs 2023/24), under the "Home for Every Plantation Worker" programme. Key projects focused on:

- New housing units and sanitation infrastructure
- School support and digital education initiatives
- Nutrition and maternal health campaigns
- Youth skills development and entrepreneurship

Reporting Methodology

Investment records compiled from estate-level community development plans. Contributions from government/NGOs accounted separately. Verified against audited accounts.

3.9 Customer Satisfaction

Refer: page 156

Customer satisfaction reached 92% in 2024/25, reflecting proactive engagement and low complaint ratios. Product complaints/rejections dropped to 11 cases (vs 5 in 2023/24), driven by process automation and compliance to MRLs.

Reporting Methodology

Customer feedback collected bi-annually via digital platforms in line with ISO 9001:2015. Complaints and rejections tracked through a central quality control registry.

3.10 Supplier Assessment

Refer: page 159

2,157 supplier assessments were conducted in FY 2024/25, covering 80% of the supplier base. ESG-aligned assessment criteria were fully operationalised, with emphasis on:

- Human rights and wage compliance
- Environmental footprint of inputs
- Responsiveness to climate-related risks

Reporting Methodology

Assessments conducted jointly by Head Office and estate teams. Templates aligned to Hayleys Supplier Code and ESG KPIs. Evidence is documented and reviewed annually.

3.11 Laws and Regulations

Refer: page 174

No breaches of labour or social-related laws were recorded in FY 2024/25. All estates maintained compliance with wage board decisions, union agreements, and national employment regulations.

Reporting Methodology

Compliance tracked via internal audits, regulatory notifications, and statutory inspection reports. External legal counsel is consulted for incident classification when required.

Section 04 – Governance Performance

4.1 Board Quality

Refer: page 210

The Board structure as at 31 March 2025 maintained a balanced 4:7 ratio of Independent to Non-Independent Directors, consistent with previous years. Diversity of expertise across finance, sustainability, and operational domains strengthened oversight over ESG matters, including SLFRS S1/S2 compliance.

Reporting Methodology

Board profiles and independence classifications are reviewed against regulatory guidelines and company records. Attendance, committee participation, and ESG oversight responsibilities are also considered.

4.2 Training on Code of Conduct

Refer: page 213

In FY 2024/25, a total of 1,139 training hours were conducted across all divisions to internalise the updated Code of Business Conduct and Ethics, including additions relating to climate governance, biodiversity responsibility, and supplier due diligence.

Reporting Methodology

Training hours tracked through attendance logs and HR reports. The rollout schedule is aligned with the governance calendar and risk review cycles.

4.3 Whistle-blower Cases

Refer: page 214

No whistle-blower cases were recorded in FY 2024/25. Continuous awareness campaigns and assurance of confidentiality under the Group's Whistle-blower Policy contributed to an open reporting culture.

Reporting Methodology

Cases (if any) are logged confidentially through a third-party platform and reviewed by the Group's Internal Audit Division. Documentation is secured in a central compliance register.

4.4 Management Systems

Refer: page 75

All 7 core management systems remained certified under internationally accredited bodies. Certifications included ISO 14001, ISO 45001, Rainforest Alliance, and ISO 9001, supporting the company's integrated ESG assurance framework.

Reporting Methodology

Total certified systems reported against the total number of implemented systems across estates, factories, and corporate divisions. Audit certificates are retained and verified annually.

4.5 System Failure

Refer: page 148

No major system non-conformities were identified in FY 2024/25. This outcome reflects rigorous internal audits, digital monitoring through Hayleys Cube, and enhanced estate-level accountability mechanisms.

Reporting Methodology

Non-conformities identified in internal/external audits are captured in a centralised audit register. Severity and recurrence are reviewed by the management committee.

4.6 ESEG Meetings

Refer: page 19

The ESEG (Economic, Social, Environmental, and Governance) Steering Committee held 4 meetings during FY 2024/25. Discussions focused on:

- SBTi re-verification and FLAG emissions integration
- SLFRS S1/S2 implementation and external assurance readiness
- TNFD-aligned biodiversity scenario planning Stakeholder grievance response monitoring

Reporting Methodology

Meeting frequency and agenda compliance verified against the ESEG Steering Committee Charter. Minutes are documented and reviewed quarterly by the Sustainability and Risk Management Committees.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF TALAWAKELLE TEA ESTATES PLC

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

We have audited the financial statements of Talawakelle Tea Estates PLC ("the Company") and the consolidated financial statements of the Company and its subsidiaries ("the Group"), which comprise the statement of financial position as at March 31, 2025, and the statement of profit or loss, statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements of the Company and the Group give a true and fair view of the financial position of the Company and the Group as at March 31, 2025, and of their financial performance and cash flows for the year then ended in accordance with Sri Lanka Accounting Standards.

Basis for opinion

We conducted our audit in accordance with Sri Lanka Auditing Standards (SLAuSs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by CA Sri Lanka (Code of Ethics) and we have fulfilled our other ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's responsibilities for the audit of the financial statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying financial statements.

Key audit matter	How our audit addressed the key audit matter
<p>1. Measurement of Bearer Biological Assets</p> <p>As of 31 March 2025, the Group's bearer biological assets amounted to Rs. 2,205 Mn and represented 20% of the Group's total assets. Bearer Biological Assets comprised of Rs 659 Mn Immature Plantations and Rs 1,546 Mn of Mature plantations, as disclosed in Note 13B. to the financial statements.</p> <p>Measurement of Bearer Biological assets in the financial statements was a key audit matter due to following:</p> <ul style="list-style-type: none"> • The materiality of the reported bearer biological asset balance; and • The degree of management's judgement involved in identification of costs to be capitalized as immature plantations, point at which transfers are to be made from immature plantations to mature plantations and identification of possible indicators of impairment, as disclosed in Note 3.7.7.1 to the financial statements. 	<p>Our audit procedures included the following key procedures:</p> <ul style="list-style-type: none"> • Obtained an understanding of management's expense allocation process and the identification of expenses to be capitalized in relation to immature plantations. • Tested the significant expenses incurred by capital expenditure authorizations and other corroborative evidence. • Assessed the reasonableness of depreciation provided on the matured plantations by performing independent computations. • Inspected the ageing profile of the immature biological assets as of the reporting date to ensure that possible indicators of impairment have been identified, assessed for probable impairment charges/ losses accounted for in the financial statements. <p>We also assessed the adequacy of the disclosures made in notes 3.7.7.1 and 13B to the financial statements.</p>
<p>2. Retirement Benefit Obligation</p> <p>As disclosed in Note 22 to the financial statements, the Group's retirement benefit obligation amounted to Rs. 1,182 Mn and represented 31% of the Group's total liabilities as of 31 March 2025. The value of the retirement benefit obligation was based on the actuarial valuation carried out by an external actuary engaged by the Group.</p> <p>This was a key audit matter due to:</p> <ul style="list-style-type: none"> • The materiality of the reported retirement benefit obligation balance; and • The degree of assumptions, judgements and estimation uncertainties associated with measurement of the retirement benefit obligation. <p>Key areas of significant assumptions, judgements and estimates used in assessing the value of the retirement benefit obligation included judgements involved in ascertaining the discount rate and future salary / wage growth rate as disclosed in Notes 3.14 and 22 to the financial statements.</p>	<p>Our audit procedures included the following key procedures:</p> <ul style="list-style-type: none"> • Assessed the competence, capability and objectivity of the external actuary engaged by the Group • Tested the data used in the valuation of retirement benefit obligations by agreeing key information to source documents and accounting records. • Read the external actuary's report and identified the key estimates made and the approach taken by the actuary in determining the value of the retirement benefit obligation. • Assessed the reasonableness of the significant judgements, assumptions and estimates made by the external actuary such as discount rate and future salary / wage growth rate in measuring the value of the retirement benefit obligation. <p>We also assessed the adequacy of the disclosures made in notes 3.14 and 22 to the financial statements.</p>

Independent Auditors' Report

Other information included in The Company's 2025 Annual Report

Other information consists of the information included in the Annual Report, other than the financial statements and our auditor's report thereon. Management is responsible for the other information.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with Sri Lanka Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's and the Group's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SLAuSs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SLAuSs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Classify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal controls of the Company and the Group.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with ethical requirements in accordance with the Code of Ethics regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

As required by section 163 (2) of the Companies Act No. 07 of 2007, we have obtained all the information and explanations that were required for the audit and, as far as appears from our examination, proper accounting records have been kept by the Company.

CA Sri Lanka membership number of the engagement partner responsible for signing this independent auditor's report is M-2448.

Significant Accounting Policies

GRI 2-1

1. REPORTING ENTITY

Talawakelle Tea Estates PLC was incorporated on 22 June 1992 under the Companies Act No. 17 of 1982 (The Company was re-registered under the Companies Act No. 07 of 2007) in terms of the provisions of the Conversion of Public Corporation and Government-Owned Business Undertakings into Public Companies under Public Companies Act No. 23 of 1987.

The registered office of the Company is located at No. 400, Deans Road, Colombo 10, and Plantations are situated in the planting districts of Talawakelle, Nanuoya, Galle and Deniyaya. All companies in the Group are limited liability companies incorporated and domiciled in Sri Lanka.

The ordinary shares of the Company are listed on the Colombo Stock Exchange of Sri Lanka.

The Consolidated Financial Statements of Talawakelle Tea Estates PLC comprises the Company and its fully owned Subsidiaries namely TTEL Hydro Power Co (Pvt) Ltd and TTEL Somerset Hydro Power (Pvt) Ltd (together referred to as the 'Group').

1.1 Principle Activities and nature of the operations

During the year, the principal activities of the company were the cultivation and manufacturing of Tea, Rubber and Cinnamon. Principal activities of other companies in the Group are as follows.

Company	Nature of the business	Registered office
TTEL Hydro Power Co (Pvt) Ltd	Generating hydropower	No. 400, Deans Road, Colombo 10
TTEL Somerset Hydro Power (Pvt) Ltd	Generating hydropower	No. 400, Deans Road, Colombo 10

1.2 Holding Company

The Company is a subsidiary of Hayleys Plantation Services (Pvt) Ltd which is a subsidiary of Dipped Products PLC whose ultimate parent enterprise is Hayleys PLC.

1.3 Date of Authorization for issue

The financial statements of Talawakelle Tea Estates PLC for the year ended 31 March 2025 were authorized for issue by the Board of Directors on 05 May 2025.

1.4 Responsibility for Financial Statements.

The responsibility of the Directors in relation to the Financial Statements is set out in the Statement of Directors' Responsibility Report in the Annual Report.

2. BASIS OF PREPARATION

2.1 Statement of Compliance

The Financial Statements of the Company and the Group comprise the Statement of Profit or Loss, Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Equity, Statement of Cash Flow together with Accounting Policies and Notes to the Financial Statements (the "Consolidated Financial Statements") have been prepared in accordance with Sri Lanka Accounting and Auditing Standards Act No. 15 of 1995, which requires compliance with the Sri Lanka Accounting Standards promulgated by the Institute of Chartered Accountants of Sri Lanka (CASL) and with the requirements of the Companies Act No. 07 of 2007.

2.2 Basis of Measurement

These Consolidated Financial Statements have been prepared in accordance with the historical cost convention other than following items in the Financial Statements.

- Managed consumable biological assets are measured at fair value.
- Harvested Agricultural Produce growing on bearer biological assets are measured at fair value less cost to sell.
- Defined Benefit Obligation is measured using projected unit credit method.
- Where appropriate, the specific policies are explained in the succeeding Notes.

No adjustments have been made for inflationary factors in the Consolidated Financial Statements.

2.3 New accounting standards, interpretations and amendments adopted by the group

No significant impact resulted on the financial statements of the Group due to changes in Accounting Standards and disclosures during the year.

2.4 Functional and Presentation Currency

The Financial Statements are presented in Sri Lankan Rupees (Rs.), which is the Group's functional and presentation currency. All financial information presented in Sri Lankan Rupees has been given to the nearest rupee, unless stated otherwise.

2.5 Materiality and Aggregation

Each material class of similar items is presented separately in the Consolidated Financial Statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below are consistent with those used in the previous year. Accounting policies of subsidiaries are consistent with the policies adopted by the Group.

3.1 Going Concern

The Consolidated Financial Statements have been prepared on the assumption that The Company is a going concern. The Directors have made an assessment of the Group's ability to continue as a going concern in the foreseeable future. Furthermore, board is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as going concern and they do not intend either to liquidate or to cease operations of Group. Therefore, the Consolidated Financial Statements continue to be prepared on the going concern basis.

3.2 Basis of Consolidation

The Consolidated Financial Statements comprise the Financial Statements of the Group and its subsidiaries as at 31st March 2025. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

At the Company level investments in subsidiaries are recognized at cost.

3.2.1 Business Combinations

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any Non-Controlling Interest in the acquiree. For each business combination, the Group elects whether it measures the Non-Controlling Interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition - related costs are expensed as incurred and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

If the business combination is achieved in stages, any previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in

the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

3.3 Current versus non-current classification

The Group presents assets and liabilities in statement of financial position based on current/ non-current classification. An asset as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period.

Or

- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period.

Or

- It does not have a right at the reporting date to defer the settlement of the liability for at least twelve months after the reporting date.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

3.4 Fair Value Measurement

The Group measures financial instruments and non-financial assets at fair value at each statement of financial position date. Fair value related disclosures for financial instruments and non-financial assets that are measured at fair value or where fair values are disclosed are summarized in the following notes:

- Managed Consumable Biological Assets Note 13C
- Produce Growing on Bearer Biological Assets Note 15

Significant Accounting Policies

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or,
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- **Level 1** - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- **Level 2** - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- **Level 3** - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of significant assets, such as managed biological assets. Involvement of external valuers is decided upon annually by the Management Committee after discussion with and approval by the Company's Audit Committee. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Management Committee decides, after discussions with the Group's external valuers, which valuation techniques and inputs to use for each case.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

3.5 Foreign Currencies

The Group's consolidated financial statements are presented in Sri Lankan Rupees, which is also the parent company's functional currency. For each entity the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency.

Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of monetary items that are designated as part of the hedge of the Group's net investment of a foreign operation. These are recognised in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss. Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation

differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

3.6 Cash dividend and non-cash distribution to equity holders of the parent

The Company recognizes a liability to make cash or non-cash distributions to equity holders of the parent when the distribution is authorized and the distribution is no longer at the discretion of the Company. A distribution is authorized when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

Non-cash distributions are measured at the fair value of the assets to be distributed with fair value re measurement recognised directly in equity.

Upon distribution of non-cash assets, any difference between the carrying amount of the liability and the carrying amount of the assets distributed is recognised in the statement of profit or loss.

3.7 Property, Plant & Equipment

The group applies the requirements of LKAS 16 on 'Property Plant and Equipment' in accounting for its assets which are held for and use in the provision of the services, for rental to other or for administration purpose and are expected to be used for more than one year.

3.7.1 Basis of Recognition

Property Plant and Equipment is recognised if it is probable that future economic benefit associated with the assets will flow to the Group and cost of the asset can be reliably measured.

3.7.2 Measurement

Items of Property, Plant & Equipment are measured at cost, less accumulated depreciation and accumulated impairment losses, if any.

3.7.2.1 Borrowing Cost

Borrowing costs that are directly attributable to acquisition, construction or production of a qualifying asset, which takes a substantial period of time to get ready for its intended use or sale are capitalized as a part of the asset.

Borrowing costs that are not capitalized are recognised as expenses in the period in which they are incurred and charged to the Statement of profit or loss.

The amounts of the borrowing costs which are eligible for capitalisation are determined in accordance with LKAS 23 – 'Borrowing Costs'.

Borrowing costs incurred in respect of specific loans that are utilized for field development activities have been capitalised as a part of the cost of the relevant immature plantation. The capitalization will cease when the crops are ready for commercial harvest. During the year company has not capitalized borrowing cost to the bearer plants.

3.7.3 Owned Assets

The cost of Property, Plant & Equipment includes expenditures that are directly attributable to the acquisition of the asset. Such costs includes the cost of replacing part of the property, plant and equipment and borrowing costs for long term construction projects if the recognition criteria are met. The cost of self-constructed assets includes the cost of materials and direct labour, any other cost directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located.

Purchased software that is integral to the functionality of the related equipment is capitalized as a part of that equipment.

When significant parts of property, plant and equipment are required to be replaced at intervals, the entity recognises such parts as individual assets (major components) with specific useful lives and depreciation, respectively. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in the statements of profit or loss as incurred. The present value of the expected cost for the decommissioning of the asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met.

Capital work-in-progress is transferred to the respective asset accounts at the time of first utilization or at the time the asset is commissioned.

3.7.4 Leases

The Group assesses at the contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short term leases and leases of low-value assets. The Group recognises lease liability to make lease payments and right to use of assets

representing the right to use the underlying assets.

3.7.4.1 Right of Use Assets

The Group recognises right to use of assets at the commencement date of a lease (i.e., the date the underlying asset is available for use). Right of use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right to use of assets includes the amount of lease liabilities recognized, initial direct cost incurred, and lease payments made at or before the commencement date less any lease incentive received.

Right of use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets. If ownership of the leased asset transferred to the Group at the end of the lease period or the cost reflect the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

3.7.4.2 Lease Liabilities

At the commencement date of the lease, the Group recognises lease liability measured at the present value of lease payment to be made over the lease term. The lease payment includes fixed payments (including in-substance fixed payments) less any lease incentive receivables, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

The lease payment also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflect the Group exercising the option to terminate.

Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because of the interest rate implicit in the lease is not readily determinable. After the commencement date, amount of lease liability is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of the lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

3.7.5 Derecognition

An item of property, plant and equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Statement of profit or loss when the asset is derecognized.

3.7.6 Land Development Cost

Permanent land development costs are those costs incurred in making major infrastructure development and building new access roads on leasehold lands.

These costs have been capitalised and amortized over the remaining lease period.

Permanent impairments to land development costs are charged to the Statement of Profit or Loss in full or reduced to the net carrying amounts of such assets in the year of occurrence after ascertaining the loss.

3.7.7 Biological assets

Biological assets are classified in to mature biological assets and immature biological assets. Mature biological assets are those that have attained harvestable specifications or are able to sustain regular harvests. Immature biological assets are those that have not yet attained harvestable specification. Tea, rubber, other plantations and nurseries are classified as biological assets.

Biological assets are further classified as bearer biological assets and consumable biological assets. Bearer biological assets includes tea and rubber plants, those that are not intended to be sold or harvested, however used to grow for harvesting agricultural produce from such biological assets. Consumable biological assets includes managed timber trees those that are to be harvested as agricultural produce or sold as biological assets.

The entity recognize the biological assets when, and only when, the entity controls the assets as a result of past events, it is probable that future economic benefits associated with the assets will flow to the entity and the fair value or cost of the assets can be measured reliably.

3.7.7.1 Bearer Biological Asset

The bearer biological assets are measured at cost less accumulated depreciation and accumulated impairment losses, if any, in terms of LKAS 16 – “Property, Plant & Equipment”.

Significant Accounting Policies

The cost of land preparation, rehabilitation, new planting, replanting, crop diversification, inter-planting and fertilizing, etc., incurred between the time of planting and harvesting (when the planted area attains maturity), are classified as immature plantations. These immature plantations are shown at direct costs plus attributable overheads. The expenditure incurred on bearer biological assets (Tea, Rubber, Cinnamon etc.) which comes into bearing during the year, is transferred to mature plantations.

3.7.7.2 Infilling Cost on Bearer Biological Assets

The land development costs incurred in the form of infilling have been capitalised to the relevant mature field, only where the number of plants per hectare exceeded 3,000 plants and, also if it increases the expected future benefits from that field, beyond its pre-infilling performance assessment. Infilling costs so capitalised are depreciated over the newly assessed remaining useful economic life of the relevant mature plantation, or the unexpired lease period, whichever is lower.

Infilling costs that are not capitalised have been charged to the Statement of profit or loss in the year in which they are incurred

3.7.7.3 Consumable Biological Asset

Consumable biological assets include managed timber trees those that are to be harvested as agricultural produce or sold as biological assets. Expenditure incurred on consumable biological assets (managed timber trees) is measured on initial recognition and at the end of each reporting period at its fair value less cost to sell in terms of LKAS 41. The cost is treated as approximation to fair value of young plants as the impact on biological transformation of such plants to price during this period is immaterial. The fair value of timber trees are measured using DCF method taking in to consideration the current market prices of timber, applied to expected timber content of a tree at the maturity by an independent professional valuer. All other assumptions and sensitivity analysis are given in Note 13C.

The main variables in DCF model concerns

Variable	Comment
Timber content	Estimate based on physical verification of girth, height and considering the growth of the each species in different geographical regions. Factor all the prevailing statutory regulations enforced against harvesting of timber coupled with forestry plan of the Company
Economic useful life	Estimated based on the normal life span of each species by factoring the forestry plan of the Company
Selling price	Estimated based on prevailing Sri Lankan market price. Factor all the conditions to be fulfill in bringing the trees in to saleable condition.
Planting cost	Estimated costs for the further development of immature areas are deducted.

The gain or loss arising on initial recognition of consumable biological assets at fair value less cost to sell and from a change in fair value less cost to sell of consumable biological assets are included in profit or loss for the period in which it arises.

Permanent impairments to Biological Asset are charged to the Statement of profit or loss in full and reduced to the net carrying amounts of such asset in the year of occurrence after ascertaining the loss.

3.7.7.4 Nursery Plants

Nursery cost includes the cost of direct materials, direct labour and an appropriate proportion of directly attributable overheads, less provision for overgrown plants.

3.7.8 Depreciation and Amortization

(a) Depreciation

Depreciation is recognised in the Statement of profit or loss or on a straight-line basis over the estimated useful economic lives of each part of an item of Property, Plant & Equipment since this is most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Assets held under leases are depreciated over the shorter of the lease term and the useful lives of equivalent owned assets unless it is reasonably certain that the Group will have ownership by the end of the lease term. Lease period of land acquired from SLSPC will be expired in year 2045. The estimated useful lives for the current and comparative periods are as follows:

	No. of Years
Buildings	21.25 (Over the remaining lease period)
Roads	5
Plant & Machinery	20
Electronic Machinery	13
Solar System	15
Hydro Power Plant	30
Motor Vehicles-Utility	10
Motor Vehicles-Supervisory	5
Green House	5
Equipment	4
Furniture & Fittings	10
Computer Accessories	4

	No. of Years
Mature Plantations Tea	21.25 (Over the remaining lease period)
Rubber	20
Cinnamon	20
Coconut	06

Depreciation of an asset begins when it is available for use and ceases at the earlier of the date on which the asset is classified as held for sale or is derecognized. Depreciation methods, useful lives and residual values are reassessed at the reporting date and adjusted prospectively, if appropriate. Mature plantations are depreciated over their useful lives or unexpired lease period, whichever is less.

No depreciation is provided for immature plantations.

(b) Amortization

The leasehold rights of assets taken over from SLSPC are amortized in equal amounts over the shorter of the remaining lease period and the useful lives as follows:

	No. of Years
Right of Use land	21.25 (Over the remaining lease period)
Improvements to land	21.25 (Over the remaining lease period)
Right of Use Building	05
Buildings	21.25 (Over the remaining lease period)
Machinery	20
Development Cost	15
ERP System	10

3.7.9 Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in the Statement of profit or loss in the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates.

The amortization expense on intangible assets with finite lives is recognized in the statement of profit or loss in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit or loss when the asset is derecognized.

3.7.9.1 Research and Development

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Group can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale
- Its intention to complete and its ability and intention to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of

the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation is recorded in cost of sales. During the period of development, the asset is tested for impairment annually.

A summary of the policy applied to the Group

Development Cost

Useful lives	Finite
Amortisation Method Used	Amortised Straight line over the right to generate hydro power.
Period of amortisation	15 Years
Internally generated or acquired	Acquired

3.8 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

3.8.1 Financial Assets

3.8.1.1 Initial Recognition & Measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortized cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, (i.e., the date that the Group commits to purchase or sell the asset).

The Group's financial assets include cash and short-term deposits, investments and trade and other receivables.

3.8.1.2 Subsequent Measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)

Significant Accounting Policies

- Financial assets at fair value through profit or loss

a) Financial assets at amortized cost (debt instruments)

The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

Financial instruments at amortized cost comprise of trade receivables, amounts due from related parties, deposits, advances and other receivables.

b) Financial assets at fair value through OCI (debt instruments)

The Group measures debt instruments at fair value through OCI if both of the following conditions are met:

- The financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognized in the statement of profit or loss and computed in the same manner as for financial assets measured at amortized cost.

The remaining fair value changes are recognized in OCI. Upon derecognition, the cumulative fair value change recognized in OCI is recycled to profit or loss. The Group does not have any debt instruments at fair value through OCI.

c) Financial assets at fair value through OCI

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under LKAS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

d) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortised cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

3.8.1.3 Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired

- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the asset is recognised to the extent of the Group's continuing involvement in the asset. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

3.8.1.4 Impairment of financial assets

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

3.8.2 Financial liabilities

3.8.2.1 Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, bank overdrafts and loans and borrowings.

3.8.2.2 Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as described below:

(a) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

Gains or losses on liabilities held for trading are recognized in the statement of profit or loss.

(b) Financial liabilities at amortized cost

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the Profit or Loss Statement when the liabilities are derecognized as well as through the effective interest rate method (EIR) amortization process.

Financial liabilities comprise interest bearing loans and borrowings, trade payables, other payables, income tax payables and amounts due to related parties.

3.8.2.3 Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the

derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

3.8.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Consolidated Statement of Financial Position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

Financial risk management objectives and policies have been disclosed under Note 35.

3.9 Harvestable agricultural produce on bearer biological assets

In accordance with LKAS 41, company recognise agricultural produce growing on bearer plants at fair value less cost to sell. Change in the fair value of such agricultural produce recognized in profit or loss at the end of each reporting period.

For this purpose, quantities of harvestable agricultural produce ascertained based on harvesting cycle of each crop category by limiting to one harvesting cycle based on last day of the harvest in the immediately preceding cycle. Further 50% of the crop in that harvesting cycle considered for the valuation.

For the valuation of the harvestable agricultural produce, the company uses the following price formulas.

- Tea – Bought Leaf rate (current month) less cost of harvesting & transport

3.10 Inventories

Finished Goods Manufactured from Agricultural Produce of Biological Assets.

These are valued at the lower of cost and estimated net realisable value. Net realisable value is the estimated selling price at which stocks can be sold in the ordinary course of business after allowing for cost of realisation and/or cost of conversion from their existing state to saleable condition.

Input Material, Spares and Consumables

At actual cost on weighted average basis.

Agricultural produce harvested from biological assets

Agricultural produce harvested from biological asset are measured at their fair value less cost to sell at the point of harvest. The finished and semi-finished inventories from agricultural

produce are valued by adding the cost of conversion to the fair value of the agricultural produce.

3.11 Cash and Cash Equivalents

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand form an integral part of the Group's cash management and are included as a component of cash and cash equivalents for the purpose of the Statements of Cash Flow.

3.12 Impairment of Non-Financial Assets

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit or loss in expense categories consistent with the function of the impaired asset, except for properties previously revalued with the revaluation taken to Other Comprehensive Income. For such

Significant Accounting Policies

properties, the impairment is recognised in Other Comprehensive Income up to the amount of any previous revaluation.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Goodwill is tested for impairment annually as at 31st March 2024 and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually as at 31st March at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

3.13 Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit or loss net of any reimbursement

3.14 Employees Benefits

GRI 201-3

(a) Defined Contribution Plans - Provident Funds and Trust Fund

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to Provident and Trust Funds covering all employees are recognised as an expense in profit or loss in the periods during which services are rendered by employees.

The Company contributes 12% on consolidated salary of the employees to Ceylon Planters' Provident Society (CPPS)/Estate Staff Provident Society (ESPS)/ Employees' Provident Fund (EPF).

All the employees of the Company are members of the Employees' Trust Fund, to which the Company contributes 3% on the consolidated salary of such employees.

(b) Defined Benefit Plan

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The liability recognised in the Financial Statements in respect of defined benefit plan is the present value of the defined benefit obligation at the reporting date. The defined benefit obligation is calculated annually using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash flows using the interest rates that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related liability. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised as in retained earnings through other comprehensive income. Past service costs are recognised immediately in statement of profit or loss. The provision has been made for retirement gratuities from the first year of service for all employees, in conformity with LKAS 19, Employee Benefits. However, under the Payment of Gratuity Act No. 12 of 1983, the liability to an employee arises only on completion of 5 years of continued service.

The Liability is not externally funded.

The key assumptions used in determining the retirement benefit obligations are given in Note 23.

3.15 Capital Commitments and Contingencies

Capital commitments and contingent liabilities of the Group have been disclosed in the respective Notes to the Financial Statements.

3.16 Events Occurring after the Reporting Date

All material events after the Statement of Financial Position Date have been considered where appropriate; either adjustments have been made or adequately disclosed in the Financial Statements.

3.17 Earnings per Share

The Group presents basic earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

3.18 Deferred Income

3.18.1 Grants and Subsidies

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income over the period necessary to match the grant on a systematic basis to the costs that it is intended to compensate. Where the grant relates to an asset, it is recognised as deferred income and released to income in equal amounts over the expected useful life of the related asset.

Where the Group receives non-monetary grants, the asset and the grant are recorded gross at nominal amounts and released to the Statement of profit or loss over the expected useful life and pattern of consumption of the benefit of the underlying asset by equal annual installments. Where loans or similar assistance are provided by governments or related institutions with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as additional government grant. Assets are amortised over their useful lives as follows.

Grants related to Property, Plant & Equipment other than grants received for forestry are initially deferred and allocated to income on a systematic basis over the useful life of the

related Property, Plant & Equipment as follows: Assets are amortised over their useful lives or unexpired lease period, whichever is less.

Buildings	21.25 years (Over the remaining lease period)
Roads	5 Years
Glamping Site	5 Years

Grants received for forestry are initially deferred and credited to income once when the related blocks of trees are harvested.

3.19 Statements of Profit or Loss

For the purpose of presentation of statement of profit or loss, the function of expenses method is adopted, as it represents fairly the elements of the Group's performance.

3.19.1 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. Under SLFRS 15, revenue is recognised upon satisfaction of performance obligation.

The Group is in the business of cultivation, manufacture and sale of black tea, rubber, other crops and hydro (Plantation Produce). Revenue from contracts with customers is recognized when control of the goods are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods. The Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods before transferring them to customer.

3.19.1.1 Revenue from contracts with customers

- Sale of Plantation produce

Revenue from sale of plantation produce is recognized at the point in time when the control of the goods are transferred to the customer. Black tea produce are sold at the Colombo tea Auction and the highest bidder whose offer is accepted shall be the buyer, and a sale shall be completed at the fall of the hammer, at which point control is transferred to the customer. Revenue from sale of other crops are recognized at the point in time when the control of the goods has been transferred to the customer generally upon delivery of the goods to the location specified by the customer and the acceptance of the goods by the customer.

There is no element of financing present as the Group's sale of plantation produce are either on cash terms (Immediate payment or advance payment not exceeding 30 days) or on credit terms of 7 days.

- Rendering of services

Service income from Group comprised with sale of hydro energy to the Ceylon Electricity Board (CEB). Revenue from sale of hydro energy recognized at the point of hydro energy releases to the national grid at a pre-determined unit price.

3.19.1.2 Other Source of Income

Revenue recognition criteria for the other source of income as follows;

- Rental Income

Rental income is recognized on an accrual basis in accordance with the substance of the relevant agreement.

- Dividend Income

Dividend income is recognized when the right to receive payment is established.

- Interest Income

Interest income is recognized based on effective interest method.

Interest income on financial assets at FVTPL is recognized as part of net gains or losses on these financial instruments.

Interest income of financial assets at amortized cost is calculated by using the effective interest method and is recognized as other income.

3.19.2 Expenses

All expenditure incurred in the running of the business and in maintaining the Property, Plant & Equipment in a state of efficiency is charged to revenue in arriving at the profit or loss for the period.

3.19.2.1 Finance Income and Finance Cost

Finance income comprises interest income on funds invested. Interest income is recognised as it accrues in profit or loss.

Finance costs comprise interest expense on borrowings, unwinding of the discount on provisions, changes in the fair value of financial assets at fair value through profit or loss, and losses on hedging instruments that are recognised in profit or loss. Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

The interest expense component of finance lease payments is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

3.19.2.2 Taxes

GRI 207-2,3

3.19.2.2.1 Current Income Tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Group operates and generates taxable income.

Current income tax relating to items recognised directly in equity is recognised in equity and not in the statement of profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

3.19.2.2.2 Deferred Tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

Significant Accounting Policies

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in Other Comprehensive Income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognised subsequently if new information about facts and circumstances change. The adjustment is either treated as a reduction in goodwill (as long as it does not exceed goodwill) if it was incurred during the measurement period or recognised in profit or loss.

3.20 Statement of Cash Flows

The Statement of Cash Flow has been prepared using the 'indirect method'. Interest paid is classified as operating cash flows, while dividends paid and Government grants received are classified as financing and investing cash flows, for the purpose of presenting the Statement of Cash Flow.

3.21 Segment Reporting

Segmental information is provided for the different business segments of the Group. An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components.

Since the individual segments are located close to each other and operate in the same industrial environment, the need for geographical segmentation has no material impact.

The activities of the segments are described on Note 6.2 in the Notes to the Financial Statements.

Revenue and expenses directly attributable to each segment are allocated to the respective segments. Revenue and expenses not directly attributable to a segment are allocated on the basis of their resource utilisation, wherever possible.

Assets and liabilities directly attributable to each segment are allocated to the respective segments. Assets and liabilities, which are not directly attributable to a segment, are allocated on a reasonable basis wherever possible. Unallocated items comprise mainly interest bearing loans, borrowings, and expenses.

Segment capital expenditure is the total cost incurred during the period to acquire segment assets that are expected to be used for more than one accounting period.

All operating segments' operating results are reviewed regularly to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

4. USE OF ESTIMATES AND JUDGMENTS

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions

that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised, if the revision affects only that period and any future periods affected.

Information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the Financial Statements is included in the following notes:

4.1 Taxation

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Group operates and generates taxable income.

Current tax relating to items recognised directly in Other Comprehensive Income is recognised in Other Comprehensive Income and not in the Statement of Profit or Loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

4.2 Deferred Tax

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Significant judgement was required to determine the total provision for current, deferred and other taxes pending the issue of tax guidelines on the treatment of the adoption of SLFRS in the financial statements and the taxable profit for the purpose of imposition of taxes. Uncertainties exist, with respect to the interpretation of the applicability of tax laws, at the time of the preparation of these financial statements. The Group

recognized assets and liabilities for current deferred and other taxes based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income, deferred and tax amounts in the period in which the determination is made.

4.3 Measurement of Retirement Benefit Obligation

The present value of the retirement benefit obligation determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate; future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting period.

In determining the appropriate discount rate, management considers the interest rates of Sri Lanka government bonds with maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables. Future salary increases are based on expected future inflation rate and expected future salary increase rates of the Company.

Further details about Retirement benefit obligations are provided in Note 23.

4.4 IFRIC Interpretation 23 Uncertainty over Income Tax Treatment

The Interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of LKAS 12 Income Taxes. The Company applies significant judgement in identifying uncertainties over income tax treatments. It assessed whether the Interpretation had an impact on its financial statements. The Company determined that it is probable that its tax treatments will be accepted by the taxation authorities.

4.5 Fair Valuation of Consumable Biological Assets

The fair value of managed timber depends on number of factors that are determined on a discounted method using various financial and nonfinancial assumptions. The growth of the trees is determined by various biological factors

that are highly unpredictable. Any change to the assumptions will impact to the fair value of biological assets. Key assumptions and sensitivity analysis of the biological assets are given in the Note 13C.

4.5.1 Bearer Biological Assets

A mature plantation is an area of land developed with crops such as tea, rubber and other crops which has been brought into bearing ready for commercial harvesting. Hence, transfer of immature plantations to mature plantation fields happens at the point of commencement of commercial harvesting which depends on growth of plants, weather patterns and soil condition. Therefore, immature to mature transfer require significant management judgment in determining the point at which a plant is deemed ready for commercial harvesting.

4.6 Leases - Estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the company's stand-alone credit rating).

5 STANDARDS ISSUED BUT NOT YET EFFECTIVE

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's financial statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

5.1 SLFRS 17 – Insurance contracts

SLFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, SLFRS 17 will replace SLFRS 4 Insurance Contracts (SLFRS 4) that was issued in 2005. SLFRS 17 applies to all

types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features.

The core of SLFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

SLFRS 17 is effective for annual reporting periods beginning on or after 1 January 2026, with comparative figures required. Early application is permitted, provided the entity also applies SLFRS 9 and SLFRS 15 on or before the date it first applies SLFRS 17.

The amendments are not expected to have a material impact on the Group financial statement.

5.2 Lack of exchangeability – Amendments to LKAS 21

The amendments specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking.

The amendments also require disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

The amendments will be effective for annual reporting periods beginning on or after 1 January 2025. Early adoption is permitted but will need to be disclosed. When applying the amendments, an entity cannot restate comparative information. The amendments are not expected to have a material impact on the Group financial statement.

Notes to the Financial Statements

As at 31 March	2,117,564	635,269	2,150,281	645,084

Notes to the Financial Statements

10. INCOME TAX EXPENSE (Contd.)

10.4 Deferred Tax (Assets) and Liabilities (Contd.)

year ended	Group		Company	
	2025	2024	2025	2024
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
Deferred Tax Assets	(461)	(601)	-	-
Deferred Tax Liabilities	635,269	645,084	635,269	645,084
	634,808	644,483	635,269	645,084

The Inland Revenue (Amedment) Act no 45 of 2022 was certified by the speaker on 19th December 2022. The Standard rate of Income tax has been increased to 30% from 24% w.e.f 1st October 2022. Accordingly, deffered tax asset & liability have been computed at 30%.

11. EARNINGS PER SHARE

11.1 Basic Earnings Per Share

The calculation of the basic earnings per share is based on the profit attributable to owners of the parent and the weighted average number of ordinary shares outstanding during the year.

11.2 Diluted Earnings Per Share

The calculation of diluted earnings per share is based on the profit attributable to owners of the parent and the weighted average number of ordinary shares outstanding after adjustment for the effect of all dilutive potential ordinary shares.

There were no potentially dilutive ordinary shares outstanding at any time during the year/previous year.

Basic/diluted earning per share calculated as follows.

year ended	Group		Company	
	2025	2024	2025	2024
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
Amounts used as the Numerator :				
Net profit attributable to equity holders of the parent	1,234,839	1,644,739	1,231,244	1,632,348
Amounts used as the Denominator :				
Weighted average number of ordinary shares of the parent	47,500,000	47,500,000	47,500,000	47,500,000
Basic/Diluted Earnings Per Share (Rs.)	26.00	34.63	25.92	34.37

12. RIGHT OF USE ASSETS

	Notes	Group		Company

12.2 Right-of-use asset-Building

Talawakelle Tea Estates PLC (Head Office) as a tenant, occupying a building which belongs to Hayleys PLC (Ultimate Parent) and which was previously accounted as an operating lease under LKAS 17. Since, the SLFRS 16 supersedes LKAS 17 Leases, The Company adopted SLFRS 16 using the modified retrospective method of adoption to above lease arrangement. The effect to the Statement of Financial Position and depreciation of building to 31 March 2025 are as follows:

year ended	Group		Company	
	2025 Rs.'000	2024 Rs.'000	2025 Rs.'000	2024 Rs.'000
Cost				
As at 1st April	55,347	49,937	55,347	49,937

*The figures above are stated after adjusting for assets handed over to Tea Smallholdings Development Authority.

These are investments in immature/ mature plantations since the formation of the Company. The assets (including plantation assets) taken over by way of estate leases are set out in Notes 12. Further investment in immature plantations taken over by way of these leases are shown in the above note. When such plantations become mature, the additional investments, since initial investment to bring them to maturity, will be moved from immature to mature under this note.

The borrowing costs were not capitalized during the period under Immature Plantations (2023/2024- Nil).

The addition of Rs. 245 mn (2023/24 - Rs. 224 mn) shown above includes the following costs among other costs incurred during the year in respect of Uprooting and Planting of Tea, Rubber, Cinnamon and Others.

	Group/Company			
	2025		2024	
	Extent - ha	Rs.'000	Extent - ha	Rs.'000
Planted during the Year				
- Tea	29	73,165	29	62,198
- Cinnamon	18	30,019	22	40,367
- Coconut	-	-	3	2,740
	52	103,230	54	105,305

13. C. CONSUMABLE BIOLOGICAL ASSETS

Timber Plantations - Managed Trees

As at 31 March	Group/Company	
	2025	2024
	Rs.'000	Rs.'000
As at 1 April	664,576	483,919
Increase due to development	22,871	15,254
Transfer From Immature Plantation	517	-
Gain/(loss) arising from changes in fair value less cost to sell attributable to physical change	14,561	172,114
Decrease due to harvest	(23,810)	(6,711)
As at 31 March	678,715	664,576

13. C.1 BASIS OF VALUATION

Under LKAS 41 - Agriculture the company has valued its managed plantations at fair value less cost to sell. Managed timber plantations as at 31st March 2025 comprised approximately 627.81 hectares

Managed trees include commercial timber plantations cultivated on estates. The cost of immature trees is treated as approximate fair value particularly on the ground of little biological transformation has taken place and impact of the biological transformation on price is not material. When such Plantations become mature, the additional investments since taken over to bring them to maturity are transferred from Immature to Mature.

The carrying amount of biological assets pledged as securities for liabilities as at the date of the statement of financial position is nil (2023/2024 - nil).

The fair value of matured managed trees were ascertained in accordance with SLFRS 13. The valuation was carried by Messer's KPMG Real Estate & Valuation Services (Pvt) Ltd, chartered valuation surveyors, using Discounted Cash Flow (DCF) methods. In ascertaining the fair value of timber, a physical verification was carried out covering all the estates.

13. C.1. CHANGE IN FAIR VALUE OF BIOLOGICAL ASSETS

As at 31 March	Group/Company	
	2025	2024
	Rs.'000	Rs.'000
Change in fair value of consumable biological assets (Note 13 C)	14,561	172,114
Change in fair value of produce on bearer biological assets (Note 15)	9,450	(333)
	24,011	171,781

13. C. 2. Information about Fair Value Measurements using Significant Unobservable Inputs (Level 3)

Non Financial Asset	Valuation Technique	Unobservable Inputs	Range of Unobservable Inputs (Probability weighted average.)		Relationship of Unobservable Inputs to Fair Value
			2025	2024	
Consumable Managed Biological Assets	DCF	Discounting Rate	13.00%	15.00%	The higher the discount rate, the lesser the fair value
		Optimum rotation (Maturity)	15-25 Years	15-25 Years	Lower the rotation period, the higher the fair value
		Volume at rotation	25-190 cu.ft	25-190 cu.ft	The higher the volume, the higher the fair value
		Price per cu.ft.	Rs. 60/- to Rs. 2,300/-	Rs. 60/- to Rs. 2,300/-	The higher the price per cu. ft., the higher the fair value

Notes to the Financial Statements

Other key assumptions used in valuation

1. The harvesting is approved by the PMMD and the Forest Department based on the Forestry Development Plan.

2. The prices adopted are net of expenditure.

The valuations, as presented in the external valuation models based on net present values, take into account the long term exploitation of the timber plantations. The Board of Directors retains their view that commodity markets are inherently volatile and that long term price projections are highly unpredictable. It does, nevertheless, concern the Directors that no estimate can ever be completely accurate. Moreover, in the case of the Group's biological assets, small differences in valuation assumptions can have quite disproportionate effect on results. Therefore, the Board of Directors is of the opinion that the sensitivity analysis regarding selling price and discount rate variations as included in this note allows every investor to reasonably challenge the financial impact of the assumptions used in the SLFRS 13 / LKAS 41 valuations as included in the consolidated accounts against his own assumptions.

The biological assets of the Company are mainly cultivated in leased lands. When measuring the fair value of the biological assets it was assumed that these concession can and will be renewed at normal circumstances. Timber content expects to be realized in future and is included in the calculation of the fair value that takes into account the age of the timber plants and not the expiration date of the lease.

3. Though the replanting is a condition precedent for harvesting yet the costs are not taken in to consideration.

13. C.3. THE COMPANY IS EXPOSED TO THE FOLLOWING RISKS RELATING TO ITS LIVE TREE PLANTATION:-

13.C.3.1 Regulatory and Environmental Risks

The Company is subject to laws and regulations in Sri Lanka. The Company has established environmental policies and procedures aimed at compliance with local environmental and other laws. Management performs regular reviews to identify environmental risks and to ensure that the systems in place are adequate to manage those risks.

13.C.3.2 Supply and Demand Risks

The Company is exposed to risks arising from fluctuations in the price and sales volume of timber. When possible the Company manages this risk by aligning its harvest volume to market supply and demand. Management performs regular industry trend analysis to ensure that the Company's pricing structure is in line with the market and to ensure that projected harvest volumes are consistent with the expected demand.

13.C.3.3 Climate and Other Risks

The Company's live tree plantations are exposed to the risk of damage from climatic changes, diseases, forest fires and other natural forces. The Company has extensive processes in place aimed at monitoring and mitigating those risks, including regular forest health inspections and industry pest and disease surveys.

Sensitivity Variation Sales Price

Values as appearing in the Statement of Financial Position are very sensitive to price changes with regard to the average sales prices applied. Simulations made for timber show that a rise or decrease by 10% of the estimated future selling price has the following effect on the net present value of biological assets:

	Rs:'000	Rs:'000
Managed Timber	10%	-10%
As at 31 March 2025	57,456	(57,456)
As at 31 March 2024	57,334	(57,334)

Sensitivity Variation Discount Rate

Values as appearing in the Statement of Financial Position are very sensitive to changes of the discount rate applied. Simulations made for timber trees show that a rise or decrease by 1% of the discount rate has the following effect on the net present value of biological assets:

	Rs.'000	Rs.'000
	1%	-1%
As at 31 March 2025	3,225	3,478
As at 31 March 2024	(4,176)	4,489

22. RETIREMENT BENEFIT OBLIGATIONS

As at 31 March	Group		Company	
	2025	2024	2025	2024
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
Provision for Retirement Benefit Obligations				
At the beginning of the year	932,949	801,095	928,821	797,503
Interest Cost	111,954	160,147	111,458	159,500
Current Service Cost	67,853	43,172	67,626	42,880
Gratuity Payments for the year	(162,443)	(196,295)	(160,714)	(196,058)
Actuarial (Gain) / Loss due to changes in experience	10,520	(17,574)	10,581	(17,408)
Actuarial (Gain) / Loss due to changes in financial assumptions	221,501	142,404	221,312	142,404
At the end of the year	1,182,334	932,949	1,179,084	928,821

According to the actuarial valuation report issued by the Actuarial & Management Consultants (Pvt) Ltd As at 31 March 2025, the actuarial present value of promised retirement benefits amounted to Rs. 1,182,333,796/-. If the Group had provided for gratuity on the basis of 14 days wages & half months salary for each completed year of service, the liability would have been Rs. 1,316,484,011 /-.

LKAS 19 requires the use of actuarial techniques to make a reliable estimate of the amount of retirement benefit that employees have earned in return for their service in the current and prior periods using the Projected Unit Credit Method and discount that benefit in order to determine the present value of the retirement benefit obligation and the current service cost. This requires an entity to determine how much benefit is attributable to the current and prior periods and to make estimates about demographic variables and financial variables that will influence the cost of the benefit. The following key assumptions were made in arriving at the above figure.

The key assumptions used by actuary include the following.

	2025	2024
(i) Rate of Discount	10.5% (per annum)	12% (per annum)
One of the principal assumptions is the discount rate, which should be based upon the yields available on government bonds or high quality corporate bonds at the accounting date with a term that matches that of the liabilities. LKAS 19 does not define "High quality", but this is generally taken to mean a security rating least AA.		
(ii) Rate of Salary Increase		
Workers	9% (per annum)	10% (per annum)
Staff	10% (per annum)	11% (per annum)
(iii) Retirement Age		
Workers	60 years	60 years
Staff	60 years	60 years

The actuarial Present Value of Retirement Benefit Obligation is carried on annual basis.

The weighted average duration of the Retirement Benefit Obligation at the end of the reporting period is 5.1 years and 6.0 years for staff and workers respectively.

Notes to the Financial Statements

22. RETIREMENT BENEFIT OBLIGATIONS (Contd.)

The following payments are expected from the Retirement Benefit Obligation in future years.

	Group		Company	
	2025	2024	2025	2024
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
Within the next 12 months	186,254	124,479	185,623	123,686
Between 1-5 years	463,697	358,182	461,947	356,137
Between 5-10 years	308,684	240,099	308,144	239,362
Beyond 10 years	223,699	210,189	223,370	209,636
Total	1,182,334	932,949	1,179,084	928,821

Sensitivity Analysis

Values appearing in the financial statements are very sensitive to the changes of financial and non financial assumptions used. The sensitivity was carried out as follows.

Group	Workers		Staff	
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
A one percentage point change in the salary/wage increment rate	-1%	1%	-1%	1%
As at 31 March 2025	(11,702)	12,660	(44,788)	48,740
As at 31 March 2024	(37,209)	40,762	(11,416)	12,427

Group	Workers		Staff	
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
A one percentage point change in the discount rate	-1%	1%	-1%	1%
As at 31 March 2025	12,361	(11,211)	53,251	(48,059)
As at 31 March 2024	44,080	(39,546)	12,210	(11,019)

Company	Workers		Staff	
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
A one percentage point change in the salary/wage increment rate	-1%	1%	-1%	1%
As at 31 March 2025	(11,702)	12,660	(44,644)	48,585
As at 31 March 2024	(37,209)	40,762	(11,216)	12,209

Company	Workers		Staff	
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
A one percentage point change in the discount rate	-1%	1%	-1%	1%
As at 31 March 2025	12,361	(11,211)	53,111	(47,931)
As at 31 March 2024	44,080	(39,546)	12,010	(10,838)

23. DEFERRED INCOME

As at 31 March	Group/Company	
	2025	2024
	Rs.'000	Rs.'000
Deferred Grants and Subsidies		
Balance at the beginning of the year	132,040	136,699
Add : Grants received during the year	13,222	975
Less : Amortisation for the year	(9,046)	(5,634)
Balance at the end of the year	136,216	132,040

The Company has received funding from Tea Board and Peko Trail during the year and received fundings in prior years are included under the relevant classification of property, plant & equipment and the grant component is reflected under Deferred Grants and Subsidies. Grants are amortised over the life of the assets for which they are being deployed or leased period.

32.4 Transactions with the Key Management Personnel of the Company or Parent

There were no material transactions with the Key Management Personnel of the Company and its parent other than those disclosed in Notes 9 & 33.1 to the Financial Statements.

Details of Directors and their spouses share holdings are given in the Annual Report of the Board of Directors of the Affairs of the Company.

33. RELATED PARTY TRANSACTIONS

There are no related party transactions other than those disclosed in Notes 9, 14, 18, 27 & 33 to the financial statements.

There are no Non-recurrent Related Party Transactions where aggregate value exceeds 10% of the equity or 5% of the Total Assets and Recurrent Related Party Transactions where aggregate value exceeds 10% Gross revenue/income.

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial liabilities, other than derivatives, comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Group's operations and to provide guarantees to support its operations. The Group has loan and other receivables, trade and other receivables, and cash and short-term deposits that arise directly from its operations. Accordingly the Group has exposure to namely Credit Risk, Liquidity Risk, Currency Risk and Market Risks from its use of financial instruments.

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk.

34.1 Financial Risk Management Framework

The Board of Directors has the overall responsibility for the establishment and oversight of the group's financial Risk Management framework which includes developing and monitoring the Group's financial Risk Management policies.

The Group financial Risk Management policies are established to identify, quantify and analyze the financial risks faced by the Group, to set appropriate risk limits and controls and to monitor financial risks and adherence to limits. Financial Risk Management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities.

The TTE PLC Audit Committee oversees how management monitors compliance with the Group's financial Risk Management policies and procedures and reviews the adequacy of the financial Risk Management framework in relation to the risks faced by the Group.

34.2 Credit Risk

Credit Risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arise principally from the Group's receivable from customers and from its financing activities including deposits with banks and financial institutions foreign exchange transactions and other financial instruments.

The Group is exposed to credit risk from its operating activities (primarily trade receivables), other advances including loans and advances to staff/workers, and from its financing activities, including deposits with banks and other financial instruments.

The carrying amount of financial assets represents the maximum credit exposure.

Risk Exposure

The maximum risk positions of financial assets which are generally subject to credit risk are equal to their carrying amounts. The following figures show maximum risk positions.

As at 31 March	Group		Company	
	2025	2024	2025	2024
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
Trade and Other Receivables	448,775	456,293	427,221	445,351
Related Companies Receivables	10,178	5,528	12,042	8,446
	458,953	461,821	439,263	453,797

Notes to the Financial Statements

34. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Contd.)

34.2 Credit Risk (Contd.)

34.2.1 Trade and Other Receivables

The Group's exposure to credit risk is influenced by the individual characteristics of each customer. The Group's credit policy is monitored at the Board level. The new customers are analysed individually for credit worthiness before Group's standard payment and delivery terms and conditions are offered. Group review includes external ratings, when available and in some cases, bank references, purchases limit etc. which also subject to under review on quarterly basis. The past experience of the Management is considered when revisions are made to terms and conditions.

TTE PLC has a minimal credit risk of its trade receivables from Produce Brokers, as the repayment is guaranteed within seven days by the Tea and Rubber Auction Systems.

Credit Quality of Financial Assets

As analysis of the credit quality of trade receivables that were neither past due nor impaired and the ageing of trade receivables that were past due but not impaired as at 31st March 2025 is as follows:

As at 31 March	Group		Company	
	2025	2024	2025	2024
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
Below 30 days	163,054	191,288	157,231	184,803
30-45 days	-	-	-	-
46-60 days	-	-	-	-
61 Over	-	-	-	-
	163,054	191,288	157,231	184,803

The movement in the provision for impairment in respect of other receivables during the year was as follows :

As at 31 March	Group		Company	
	2025	2024	2025	2024
	Rs.'000	Rs.'000	Rs.'000	Rs.'000
At the beginning of the year	(2,437)	(1,992)	(2,437)	(1,557)
Provision for impairment	(1,802)	(1,421)	(1,802)	(1,421)
Reverse during the year	-	977	-	542
	(4,239)	(2,436)	(4,239)	(2,436)

Impairment Loss Recognized

The Company believes that the unimpaired amounts that are past due by more than 45 days are still to be collected in full. Based on the Group's monitoring of customer credit risk, the Company believes that, except as indicated above, no impairment allowance is necessary in respect of trade receivables not past due.

Amounts due from Related Companies

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each Related Company.

The Company does not require a provision for impairment in respect of Related Companies Receivables.

34.2.2 Investments

Credit risks from invested balance with the financial institutions are managed by the Board of Directors. Investments of surplus funds are made only with approved counter parties and within credit limits assigned to them. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through potential counter party's failure.

The Group held short term investments of Rs. 4,346.2 Mn as at 31st March 2025 (2024 – Rs.3,849.2 Mn) which represents the maximum credit exposure on these assets.

Investment portfolio Maturity Aging of TTE PLC as at 31ST March 2025

- DFCC Bank PLC – A (lka)
- National Development Bank PLC – A (lka)
- Commercial Bank PLC – AA- (lka)

34.3 Liquidity Risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group does not concentrate on a single financial institution, thereby minimizing the exposure to liquidity risk through diversification of funding sources. The Group aims to fund investment activities of the individual and Group level by funding the long-term investment with long term financial sources and short term investment with short term financing. Where necessary the Group consults the Treasury Department and Strategic Business Development Unit in Parent Company for scrutinizing the funding decisions.

Notes to the Financial Statements

The Table below summarizes the maturity profile of the Groups financial liabilities based on contractual undiscounted payments.

As at 31st March 2025	On Demand	Less than 3 Months	3 to 12 Months	2 to 5 years	>5 years	Total

34.4 Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise four types of risk: interest rate risk, currency risk & other price risk such as equity price risk. Financial instrument affected by market risk include loans & borrowings, deposits, available for sale investment & derivative financial instruments.

34.4.1 Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long-term debt obligations with floating interest rates. The Group manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. The Group has not engaged in any interest rate swap agreements.

The Group do not hold long term borrowings with floating interest rates of Nil (2024-Nil) which represents its maximum credit exposure on these liabilities.

Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. The group does not hold long-term borrowings in this year. With all other variables held constant, the group's Profit Before Tax is affected through the impact on floating rate borrowings of comparative figures as follows:

	Increase/ decrease in Interest rate	Effect on profit before tax Rs.'000
Group		
2025	1%	-
	-1%	-
2024	1%	6,208
	-1%	(6,208)
Company		
2025	1%	-
	-1%	-
2024	1%	6,190
	-1%	(6,190)

34.4.2 Commodity Risk

The Company is affected by the volatility of certain commodities. Its operating activities require the ongoing purchase and manufacturing process. Due to the significantly increased volatility of the price of the underlying, the management has developed and enacted a risk management strategy regarding commodity price risk and its mitigation. The Company constantly monitor the Tea, Rubber, Cinnamon for downwards trends and invest in bulk purchase when low prices are prevalent. Management may revise the selling price based on the commodity prices whenever possible.

34.4.3 Equity Price Risk

The Group's listed & unlisted equity securities are susceptible to market price risk arising from uncertainties about future values of the investment securities. The Group manages the equity price risk through diversification and by placing limits on individual and total equity instruments. Management of the Group monitors the mix of debt & equity securities in its investment portfolio based on market indices. Material investment within the portfolio are Managed on an individual basis and all buy and sell decision are approved by the Board. Equity price risk is not material to the financial statements. However, company does not hold any quoted shares as at the reporting date.

34.4.4 Capital Management

The Group's policy is to retain a strong capital base so as to maintain investor, creditor & market confidence and to sustain future development of the business. Capital consists of share capital, reserves, retain earning & non-controlling interest of the Group. The Board of Directors monitors the return on capital, interest covering ratio, dividend to ordinary shareholders.

The gearing ratio at the reporting date is as follows.

	Group		Company	
	2025 Rs.'000	2024 Rs.'000	2025 Rs.'000	2024 Rs.'000
Interest bearing borrowings				
Current portion	-	2,619	-	2,619
Liability to make Lease Payment				
Current portion	21,413	14,055	21,408	14,050

* Market Price before share split of 2 shares for every one ordinary share held

** Market price after share split of 2 shares for every one ordinary share held

*** Restated - Statement of Profit or Loss

**** Earning per shares, Dividend per share and Net asset per share in all reporting period were adjusted based on post sub- division of 2 shares for every one ordinary share held

Glossary

FINANCIAL TERMS

ACCOUNTING POLICIES

Specific principles, bases, conventions, rules and practices adopted by an enterprise in preparing and presenting financial statements.

ACTUARIAL GAINS AND LOSSES

Is the effects of difference between the previous actuarial assumptions and what has actually occurred and the effects of changes in actuarial assumptions.

AGRICULTURAL ACTIVITY

Is the management by an entity of the biological transformation and harvest of biological assets for sale or for conversion into agricultural produce or into additional biological assets.

AGRICULTURAL PRODUCE

The harvested product of the entity's biological assets.

AMORTISATION

The systematic allocation of depreciable amount of an intangible asset over its useful life.

BEARER BIOLOGICAL ASSETS

Biological assets those are not to be harvested as agricultural produce or sold as biological assets. The biological assets other than the consumable biological assets.

BORROWINGS/DEBT

Bank loans, overdrafts, long term loans, debentures, finance lease obligations and interest bearing liabilities.

CAPEX

Funds used by a company to acquire, upgrade, and maintain physical assets such as property plants, buildings, technology or equipment.

CAPITAL EMPLOYED

Shareholder's funds plus non controlling interests and debts.

CASH EQUIVALENTS

High liquid investments that are readily convertible to know amounts of cash and which are subject to an insignificant risk of change in value.

CONSUMABLE BIOLOGICAL ASSETS

Includes managed timber trees those that are to be harvested as agricultural produce or sold as biological assets.

CONTINGENT LIABILITY

A condition or situation existing at the balance sheet date due to past events, where the financial effect is not recognised because:

1. The obligation is crystallised by the occurrence or non occurrence of one or more future events or,
2. a probable outflow of economic resources is not expected or,
3. It is unable to be measured with sufficient reliability

COP

Cost of Production. This generally refers to the cost of producing a kilo of produce (Tea, Rubber and Cinnamon).

COS

Cost of Sale. The cost incurred on preparation to salable condition of the goods sold.

CROP

The total produce harvested over a given period of time. (Usually during a financial year).

CURRENT RATIO

Current assets divided by current liabilities.

CURRENT SERVICE COST

Is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

DEBT SERVICE COVERAGE RATIO(DSCR)

Measures a firm's available cash flow to pay its current debt obligations. The DSCR shows investors and lenders whether a company has enough income to pay its debts.

DEBT/ EQUITY RATIO

Debt as a percentage of shareholders funds and non controlling interests.

DEFERRED TAXATION

The net tax effect on items which have been included in the Income Statement, which would only qualify for inclusion on a tax return at a future date.

DIVIDEND COVER

Company's net profits to the total sum allotted in dividends to ordinary shareholders

DIVIDEND PAY OUT

Dividend per share divided by Earnings per share.

DIVIDEND PER SHARE (DPS)

Dividend per share is the total dividends declared in a given period divided by the number of ordinary shares issued.

DIVIDEND YIELD

The amount of money a company pays shareholders for owning a share of its stock divided by its current stock price.

DIVIDENDS

Distribution of profits to holders of equity investments.

EARNINGS PER SHARE(EPS)

Profit attributable to equity holders of the parent divided by the weighted average number of ordinary shares in issue during the period.

EBIT

Abbreviation for Earnings Before Interest and Tax.

EBITDA

Abbreviation for Earnings Before Interest Tax Depreciation & Amortisation.

EBITDA MARGIN

EBITDA divided by Revenue.

EPF

Employee Provident Fund

EQUITY GROWTH

Equity growth generally refers to the increase in the ownership stake of a company over time, either in terms of total equity or equity per share.

ETF

Employee Trust Fund

HARVEST

Detachment of produce from a Biological Asset or the cessation of Biological Assets life processes.

INTEREST COST

Is the increase during a period in the present value of a defined benefit obligation which arises because the benefits are one period closer to settlement.

INTEREST COVER

Consolidated profit before interest and tax over finance expenses.

LKAS

Sri Lanka Accounting Standards.

MARKET CAPITALISATION

Number of shares in issue at the end of the period multiplied by the market price at the end of period.

MARKET PRICE PER SHARE(MPPS)

Current price at which a single share of a company's stock can be bought or sold on the open market.

Glossary

NET ASSETS

Total assets less current liabilities less long term liabilities less non - controlling interests.

NET ASSETS PER SHARE (NAPS)

Net assets as at a particular financial year end divided by the number of shares in issue as at the current financial year end.

NON CONTROLLING INTEREST

Part of the net results of operations and net assets of a subsidiary attributable to interests which are not owned, directly or indirectly, through Subsidiaries, by the Parent Company.

PBT

A measurement of a company's profitability that looks at the profits made before any tax is paid

PRESENT VALUE OF A RETIREMENT BENEFIT OBLIGATION

Is the present value of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

PRICE EARNINGS RATIO

Market price of a share divided by earnings per share.

RELATED PARTIES

Parties who could control or significantly influence the financial and operating policies of the business.

RETURN ON CAPITAL EMPLOYED

Profit before tax and net finance cost divided by capital employed.

RETURN ON EQUITY (ROE)

Profits attributable to shareholders as a percentage of average shareholders' funds.

REVENUE RESERVES

Reserves considered as being available for distributions and investments.

SEGMENT

Constituent business units grouped in terms of nature and similarity of operations.

SHAREHOLDERS' FUNDS

Total of stated capital, capital reserves and revenue reserves.

SLFRS

Sri Lanka Financial Reporting Standards.

SoRP

Statement of Recommended Practices.

UITF

Urgent Issue Tasks Force of The Institute of Chartered Accountants of Sri Lanka

WORKING CAPITAL

Capital required financing day-to-day operations (Current Assets less Current Liabilities).

NON FINANCIAL TERMS

BIO CHAR

Biochar is the carbon rich remains of organic material that has been heated to decompose and remove most of the hydrogen and oxygen containing molecules. The process is called pyrolysis and is carried out in the absence of air/oxygen to prevent the material burning. The resulting residue is black and contains the "skeletal" remains of the starting material e.g. wood. The finer the starting material the finer the end product.

BIODIVERSITY

All the different kinds of life you'll find in one area.

BIOMASS

Bioenergy, are fuels that is developed from organic materials

BRIQUETTES

Compressed Block of coal dust or other combustible Biomass material (E.g.: Charcoal, Sawdust, Wood chip,peat, or paper) used for fuel and kindling to start a fire.

BUFFER ZONE

A protective strip of vegetation or land maintained between agricultural areas and sensitive ecosystems (e.g., rivers or forests) to reduce erosion, filter runoff, and protect biodiversity.

CARBON DIOXIDE SEQUESTRATION

The capture of atmospheric carbon dioxide (CO₂) in a solid material such as growing trees, other vegetation and soils or a carbon sink through biological or physical processes, such as photosynthesis.

CBA

Colombo Brokers Association

CHEMICAL LEASING MODEL (CHL)

A sustainable business model where chemicals are sold as a service, not by volume. The supplier provides the chemical and assumes responsibility for its optimal and minimal use, promoting efficiency and reducing environmental impact.

CIDA

Construction Industry Development Authority

CIPM

Chartered Institute of Personnel Management

CPFP

Child Protection Focal Points

CTA

Colombo Tea Auctions

CTTA

Colombo Tea Traders Association

DEI

Diversity, Equality and Inclusion

ECOSYSTEM

Geographic area where plants, animals and other organisms as well as weather and landscape, work together to form a bubble of life

EFFLUENT MANAGEMENT

The treatment and proper disposal of liquid waste (effluent) from factories or domestic sources to minimize pollution and protect water bodies.

EMS

Environment Management System

ENERGY INTENSITY

The amount of energy consumed per unit of output, such as per kilogram of tea produced. It reflects how efficiently energy is used in production processes.

EnMS

Energy Management System

EPL

The Environmental Protection License (EPL) is a regulatory/legal tool under the provisions of the National Environmental Act No: 47 of 1980 amended by Acts No 56 of 1988 and No 53 of 2000.00

EROM

Enterprises Risk & Opportunity Management

ESEG STEERING COMMITTEE

Environment, Social, Economic and Governance committee

ESG TEAM

Environmental, Social, and (corporate) Governance Team

ETP

Ethical Tea Partnership

EVP

Employee Value Proposition

EWHCS

Estate Worker Housing Cooperative Societies

EXTENT IN BEARING

The extent of land from which crop is being harvested. Also see "Mature Plantation".

FIELD

A unit extent of land. Estates are divided into fields in order to facilitate management.

FSMS

Food Safety Management System

GAP

Good Agriculture Practices

GDP

Global Domestic Production

GESI

Gender Equality & Social Inclusive

GHG

Gases that trap heat in the atmosphere, contributing to global warming.

GHG EMISSIONS

Greenhouse Gas Emissions

GIS

Geographic Information System

GMC

Group Management Committee

GMP

Good Manufacturing Practices for Biological, Chemical and Physical hazards

GSA

The Gross Sales Average. This is the average sale price obtained (over a period of time, for a kilo of produce) before any deductions such as Brokerage etc.

HACCP

Hazard Analysis Critical Control Point System. A Scientific system which identifies, evaluates and control hazards which are significant for food safety.

HRD

Human Resource Development

HRMS

Human Resource Management System

IECM

Integrated Environment Conservation Mode

ILO

International Labor Organization

IMMATURE PLANTATION

The extent of plantation that is under development and is not being harvested.

INFILLING

A method of field development whereby planting of individual plants is done in order to increase the yield of a given field, whilst allowing the field to be harvested.

IOT

Internet of things

IREC

Renewable energy credit - Tradable, non-tangible commodities that represent proof that 1 MWh of electricity was generated from a renewable energy resource and was then fed in to the shared system of power lines that transport energy.

ISO

International Organization for Standardization. A worldwide federation of national standard bodies.

ISO 14001:2015

Environmental Management System

ISO 14064-1:2018

Greenhouse Gases Quantification and Reporting Standard

ISO 22000:2018

Food Safety Management System

ISO 26000 : 2010

Social Responsibility Standard

ISO 50001:2018

Energy Management System

ISO 9001:2015

Quality Management System

IUCN

International Union for Conservation of Nature

KPI

Key Performance Indicators

LEADS

Life, Education, and Development Support

MATURE PLANTATION

The extent of plantation from which crop is being harvested. Also see "Extent in Bearing".

METRICS**Gigajoules (Gj)**

Unit of measurement of energy consumption

Ha

Hectare

Kilogram(Kg)

The kilogram, symbol kg, is the SI unit of mass

Kiloliter (kL)

Kiloliter is a unit of capacity equal to 1000 liters.

KWh

Kilowatts hour

Metric Ton

The metric ton is a unit of mass, and it is defined as 1,000 kilograms.

MW

Megawatts

tCO2e

tCO2e stands for tons (t) of carbon dioxide (CO2) equivalent (e).

MOH

Ministry of Health

MOU

Memorandum of Understanding

MRL

Maximum Residue Levels

MSDS

Document that contains information on the potential hazards (health, fire, reactivity and environmental) and how to work safely with the chemical product

MSME

Micro, Small and Medium Enterprises

NAITA

National Apprentice & Industrial Training Authority

NGRS

National Green Reporting System

NIBM

National Institute of Business Management

NILS

National Institution of Labor Studies

Glossary

NIPM

National Institute of Plantation Management

NSA

The Net Sales Average. This is the average sale price obtained (over a period of time) after deducting Brokerage fees, etc. (Also see GSA).

NVQ

National Vocational Qualification

OHS

Occupational Health & Safety

PHDT

Plantation Human Development Trust

PPE

Personal Protective Equipment

QMS

Quality Management System

RAINFORREST ALLIANCE (RA)

The Rainforest Alliance functions as the Secretariat of the SAN and administers its certification scheme; RA works to conserve biodiversity and ensure sustainable livelihoods by transforming land-use practices, business practices and consumer behaviors.

REGENERATIVE BUSINESS

A Regenerative business seeks to restore and replenish ecosystems, fostering positive social and environmental impacts while ensuring long-term sustainability

REPLANTING

A method of field development where an entire unit of land is taken out of "bearing" and developed by way of uprooting the existing tree/bushes and replanting with new trees/bushes.

RPC

Regional Plantation Companies

RRI

Rubber Research Institute

RSM

Revenue Sharing Model

SBTi

Science Based Targets initiative - A global initiative that helps companies set greenhouse gas reduction targets in line with the latest climate science to meet the goals of the Paris Agreement.

SCIENCE BASED TARGETS

Science - based targets provide a clearly-defined pathway for companies and financial institutions to reduce greenhouse gas (GHG) emissions, helping prevent the worst impacts of climate change and future-proof business growth. Targets are considered "science-based" if they are in line with what the latest climate science deems necessary to meet the goals of the Paris Agreement limiting global warming to well-below 2°C above pre-industrial levels and pursuing efforts to limit warming to 1.5°C.

SCOPE 1 EMISSION

Emissions are direct greenhouse (GHG) emissions that occur from sources that are controlled or owned by an organization

SCOPE 2 EMISSION

Emissions are indirect GHG Emissions associated with the purchase of electricity, Steam, heat, or cooling

SCOPE 3 EMISSION

Encompasses emissions that are not produced by the company itself, and not the result of activities from assets owned or controlled by them

SDG

United Nations Sustainable Development Goals

SEEDLING TEA

Tea grown from a seed. (Also see VP Tea).

SLTB

Sri Lanka Tea Board

SOIL ASSESSMENTS

Tests of soil physical, chemical and biological parameters.

SUSTAINABLE AGRICULTURE NETWORK (SAN)

SAN is a coalition of independent nonprofit conservation organizations that promote the social and environmental sustainability of agricultural activities by developing standards. SAN Promotes efficient agriculture, biodiversity conservation and sustainable community development by creating social and environmental standards.

TRI

Tea Research Institute

TROT

The Republic of Tea

TTE

Talawakelle Tea Estates PLC

TURBULENT" TECHNOLOGY

Turbulent technologies specializes in liquid/liquid emulsion separation and the removal of toxins and contaminants from liquids using turbulent mixers

UN CLIMATE NEUTRAL NOW

Climate Neutrality is a three step process, which requires individuals, companies and governments to :

1. Measure their climate foot print
2. Reduce their emissions as much as possible
3. Offset what they cannot reduce with UN Certified emission reductions.

UNGC

United Nation Global Compact

VP TEA

Vegetative Propagated Tea. i.e. Tea grown from a cutting of a branch of Tea Plant. (Also see "Seedling").

WIL

Women in Leadership

WNPS PLANT

Wild Life Nature Protection Society PLANT

WUSC

World University Services of Canada

YIELD

The average crop per unit extent of land over a given period of time. (Usually Kgs per hectare per year).

ZERO EMISSION FOOTPRINT.

Carbon Neutrality is a state of zero Carbon Dioxide Emissions

Greenhouse GAS Verification Opinion

Notice of Annual General Meeting

TALAWAKELLE TEA ESTATES PLC

Company Registration No. PQ 36

NOTICE IS HEREBY GIVEN THAT THE THIRTY THIRD ANNUAL GENERAL MEETING OF

TALAWAKELLE TEA ESTATES PLC will be held on **Monday, 23rd June 2025 at 1.00 p.m.** at the Chas P. Hayley Lounge of Hayleys PLC, No. 400, Deans Road, Colombo 10 for the following purposes;

1. To consider and adopt the Annual Report of the Board of Directors and the Statements of Accounts for the year ended 31st March 2025, with the Report of the Auditors thereon.
2. To re-elect as a Director Ms. H.D.K. Randiligama, who has been appointed to the Board since the last Annual General Meeting, in terms of Article 28 (2) of the Articles of Association of the Company.
3. To re-elect as a Director Mr. J.D.N. Gunasekera, who has been appointed to the Board since the last Annual General Meeting, in terms of Article 28 (2) of the Articles of Association of the Company.
4. To re-elect as a Director Mr. T.M. Hewagama, who has been appointed to the Board since the last Annual General Meeting, in terms of Article 28 (2) of the Articles of Association of the Company.
5. To re-elect as a Director Lt. Col. J. M. Kariapperuma, who retires by rotation at the Annual General Meeting, in terms of Article 30 (1) of the Articles of Association of the Company
6. To re-elect as a Director Mr. Malik. J. Fernando, who retires by rotation at the Annual General Meeting, in terms of Article 30 (1) of the Articles of Association of the Company.
7. To propose the following resolution for the re-appointment of Mr. A.M. Pandithage, in terms of Section 211 of the Companies Act No. 07 of 2007.

Ordinary Resolution

‘That, Mr. Abeyakumar Mohan Pandithage, who is over seventy years be and is hereby re-appointed as a Director for a further period of one year and it is hereby declared that the age limit of seventy years referred to in Section 210 of the Companies Act No. 07 of 2007 shall not apply to him.’

8. To propose the following resolution for the re-appointment of Mr. S.L. Athukorala, in terms of Section 211 of the Companies Act No. 07 of 2007.

Ordinary Resolution

‘That, Mr. Sarath Lakshman Athukorala, who is over seventy years be and is hereby re-appointed as a Director for a further period of one year and it is hereby declared that the age limit of seventy years referred to in Section 210 of the Companies Act No. 07 of 2007 shall not apply to him.’

9. To authorize the directors to determine donations and contributions to charities for the ensuing year.
10. To re-appoint Messrs. Ernst & Young, Chartered Accountants as the Auditors of the Company for the year 2025/26 and to authorize the Directors to determine their remuneration.
11. To consider and if thought fit, to pass the following Special Resolution to amend the existing articles in the Articles of Association of the Company;

Special Resolution

IT IS HEREBY RESOLVED THAT Article 28 (1) of the Articles of Association of the Company be deleted in its entirety and be replaced by the following Article;

“28 (1) Unless otherwise determined by ordinary resolution of the shareholders of the Company, the number of Directors shall not be less than five (5) and not more than twelve (12).”

By Order of the Board
